Notes to the Accounts for the year ended 29 February 2008

#### 1 Accounting policies

#### 1.1 Basis of preparation of accounts

The accounts are prepared under the historic cost convention and incorporate the results of the principal activity which is described in the director's report and which is continuing

The company's principal activity is exposed to inherent uncertainties and global market fluctuations beyond the control of the company's management. The company meets its working capital requirements from its day to day activities in this market place and the director considers that the company will continue to operate on this basis and that it is appropriate to prepare the financial statements on the going concern basis. The financial statements do not include any adjustments that would result from a downturn in the market in which it operates.

The company has taken advantage of the exemption in Financial Reporting Standard number 1 from the requirement to produce a cash flow statement on the grounds that it is a small company

#### 1.2 Turnover

Turnover represents the invoiced value of goods and services supplied by the company, net of value added tax and trade discounts

#### 1.3 Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives

Office equipment

25% reducing balance

#### 1.4 Deferred taxation

Full provision is made for deferred taxation resulting from timing differences between the recognition of gains and losses in the accounts and their recognition for tax purposes. Deferred taxation is calculated on an un-discounted basis at the tax rates which are expected to apply in the periods when the timing differences will reverse.
