## THE EFFECT OF VITAMIN C ON THE

### HEALTH OF MAN

BY DR. J. V. CAMPBELL, JR.,  
 AND DR. J. H. HARRIS, JR.

From the Department of Medicine, University of

California, Los Angeles, California.

(Received for consideration, June 1, 1954.)

RECENTLY, the importance of vitamin C in

human health has been widely appreciated. The

vitamin has been shown to be essential for the

growth and development of man and animals.

It has been found that the deficiency of this

vitamin leads to the development of scurvy.

The purpose of this study was to determine

the effect of vitamin C on the health of man.

The study was conducted in a hospital setting.

The subjects were healthy men and women.

The study was conducted over a period of six

months. The subjects were divided into two

groups. One group received a daily dose of

vitamin C, and the other group received a

placebo. The results of the study are shown

in the following table.

The results of the study are shown in the

following table.
