NOTES TO THE ACCOUNTS AT 31ST MAY 2015

1. PRINCIPAL ACCOUNTING POLICIES

A summary of the more important accounting policies adopted by the Company are set out below;

(A) FIXED ASSETS

Depreciation is calculated so as to write off the cost of fixed assets, over the expected useful economic lives of the assets concerned. The annual rates used for this purpose are :- 20%

(B) STOCKS

Stocks are stated at the lower level of cost and net realisable value. In general, cost is determined in a fist out basis and includes transport and handling costs; in the case of manufactured products cost includes all direct expenditure and production overheads based on the normal level of activity. Net realisable value is the price at which stocks can be sold in the normal course of business after allowing for the costs of realisation and, where appropriate, the cost of conversion from their existing state of a finished condition. Provision is made, where necessary, for obsolescent, slow moving and defective stocks.

(C) TAXATION

The charge for taxation is based on the profit for the period, as adjusted for disallowable items and capital allowances.

(D) TURNOVER

Turnover, which excludes value added tax, represents the invoiced value of goods or services supplied.
