NOTES (forming part of the financial statements)

1. Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements.

Basis of preparation

The financial statements have been prepared under the historical cost accounting rules.

Fixed assets and depreciation

Depreciation is provided by the company to write off the cost less the estimated residual value of tangible fixed assets over their estimated useful economic lives as follows:

No depreciation is provided on freehold properties or on integral fixed plant and improvements. It is the company's practice to maintain these assets in a continual state of sound repair and to extend and make improvements thereto, as considered necessary, and accordingly the directors consider that the lives of these assets are so long and residual values are so high that depreciation is insignificant.

Cash flow

The accounts do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirement to prepare such a statement under Financial Reporting Standard 1 'Cash flow statements'.

Taxation

The charge for taxation is based on the profit for the period and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Provision is made for deferred tax only to the extent that it is probable that an actual liability will crystallise.
