T Coff
Director

T Coff Services Limited

Notes forming part of the unaudited financial statements for the period ended 31 March 2010

1 Accounting policies

The unaudited financial statements have been prepared under the historical cost convention and are in accordance with applicable accounting standards

In preparing these financial statements the company has adopted for the first time FRS 21 'Events after the balance sheet date' Further details are given in note 2

The following principal accounting policies have been applied

Turnover

Turnover represents sales to external customers at invoiced amounts less value added tax Turnover is recognised when the risks and rewards of owning the goods has passed to the customer which is generally on delivery

Depreciation

Depreciation is provided to write off the cost, less estimated residual values, of all tangible fixed assets, except freehold land, evenly over their expected useful lives It is calculated at the following rates

Fixtures, fittings and equipment - 20% per annum

Gains and losses on disposal of fixed assets

The profit or loss on the disposal of a tangible fixed asset is accounted for in the profit and loss account of the period in which the disposal occurs as the difference between the net sale proceeds and the carrying amount, whether carried at historical cost (less any provisions made) or at a valuation

Deferred taxation

The charge for taxation is based on the profit for the year and taken into account taxation deferred

Current tax is measured at amounts expected to be paid using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the balance sheet date except that

- deferred tax is not recognised on timing differences arising on revalued properties unless the company has entered into a binding sale agreement and is not proposing to take advantage of rollover relief, and
- the recognition of deferred tax assets is limited to the extent that the company anticipates making sufficient taxable profits in the future to absorb the reversal of the underlying timing differences

Deferred tax balances arising from underlying timing differences in respect of tax allowances on industrial buildings are reversed if and when all conditions for retaining those allowances have been met

Deferred tax balances are not discounted

1 Accounting policies (Continued)

Leased assets

Where assets are financed by leasing agreements that give rights approximating to ownership ('finance leases'), the assets are treated as if they had been purchased outright. The amount capitalised is the present value of the minimum lease payments payable during the lease term. The corresponding leasing commitments are shown as amounts payable to the lessor. Depreciation on the relevant assets is charged to the profit and loss account.

Lease payments are analysed between capital and interest components. The interest element of the payment is charged to the profit and loss account over the period of the lease and is calculated so that it represents a constant proportion of the balance of capital repayments outstanding. The capital part reduces the amounts payable to the lessor.

All other leases are treated as operating leases. Their annual rentals are charged to the profit and loss account on a straight-line basis over the term of the lease.

Pension costs

Contributions to the company's defined contribution pension scheme are charged to the profit and loss account in the year in which they become payable. The assets of the scheme are held separately in an independently administered fund.

Dividends

Equity dividends are recognised when they become legally payable. Final equity dividends are recognised when approved by the shareholders at an annual general meeting.

Financial liabilities and equity

Financial liabilities and equity are classified according to the substance of the financial instrument's contractual obligations, rather than the financial instrument's legal form.

2 Changes to accounting policies

Dividends

The company has adopted FRS 21 'Events after the balance sheet date'. Previously, equity dividends declared after the balance sheet date were recognised as liabilities at the year end, as required by company law and SSAP 17 'Accounting for post balance sheet events'. In accordance with FRS 21 and recent changes to the law, if a final equity dividend is declared after the balance sheet date but before the financial statements are authorised for issue, the dividends are not recognised as a liability at the balance sheet date.
