[†] Earnings per share and dividends per share for the year ended 31 March 1993 have been adjusted to take into account the bonus element of the rights some announced in May 1993.

I am pleased to report another successful year for your Company. According to IATA, the industry association, 1993 was another year of appalling results with losses for international scheduled services totalling in excess of US\$4 billion for the second consecutive year. During the course of the year two special commissions were appointed to look into the future of the industry. The first was set up by Piesident Clinton to look at the prospects for US airlines, and the other was established by the European Union Commissioner for Transport, and known as the "Comité des Sages", to review the situation in Europe. I put forward your Company's views to both commissions emphasising the importance of removing the obstacles to traffic and investment access across borders at the earliest opportunities. I was encouraged by the reports and recommendations submitted by each of the commissions but remain disappointed at the lack of decisions and consequent action by those in authority.

In contrast, your Company achieved a significant improvement in profit over the previous year. Our success was due to maintaining a relatively high load factor, despite an increase in available capacity of 10 per cent; and to concentrating on raising productivity, this year by 8 per cent. Operating profits increased in all four of our main world regions and this success was especially noteworthy in Europe and the Americas. Cargo made its best ever contribution to our Group results, while carrying a record 607,(XX) tonnes. We saw a good improvement in the performance of British Airways Regional, responsible for our operations based in Birmingham, Manchester and Scotland and at Gatwick, including a small profit contribution from the domestic and European services of the company formerly trading as Dan-Air. Last summer we acquired the outstanding shares of Brymon Airways and have subsequently expanded this company's services with a successful outcome.

Our global alliance continues to strengthen despite the difficult circumstances encountered by USAir Group and by TAT European Airlines in France, USAir is threatened by severe low price competition especially in its principal geographic market area of the northeast United States. This has caused a deterioration in its results which led me to advise the board of USAir that British Airways would be unwilling to invest further money in that company until its reconstruction plan is finalised and we are assured of the company's ongoing viability. To that end the USAir management has commenced negotiations with its employees and their representatives but it is too early to predict the outcome. Meanwhile USAir is introducing new marketing initiatives which are expected to have a beneficial effect. A close working relationship has been established between the two companies and the expected synergy benefits are starting to flow through. In particular we are seeing additional revenues from the 54 routes in the United States on which codesharing is now in place, TAT had to confront the consequences of losing important contracts with Air Inter, the State-owned French airline, and the economic recession in France. Our partner was successful in negotiating an agreement which led to a substantial restructuring of the company. This has now been put into effect and is expected to improve materially the results in the present year. Following significant changes in its senior management. Quatas Airways is settling down well and starting to prepare for its planned privatisation which is expected to take place within the next twelve months. Our

German investment, Deutsche BA, has expanded its name network and, with its low cost base, offers good prospects for the fature Our enthusiam for, and recognition of, quality customer service remains undinunished and we have continued to seek further improvements in this area while endeavouring to contain costs at the same time. Our attractive arrivals lounge in Terminal 4 at Heathrow was opened last September and has proved to be very popular with our regular First and Club World passengers. Joundy with Qantas we have recently opened a new and much larger lounge in Hong Kong. More improved lounge facilities are under construction, or planned, in the international departures area of Terminal 1 at Heathrow, at Gatwick in the North Terminal and at Charles de Gaulle in Paris. To improve the connecting services between our partner airlines we continue to work with airport authorities to bring the various operations closer together. Notable progress has been made at JFK airport New York, where USAir has moved into the British Airways terminal; and at Charles de Gaulle airport. A number of new routes and increased frequency on established routes have been introduced during the year In June, together with TAT, we expect to re-introduce services between Heathrow and Orly airport in Paris, following a favourable decision by the European Commission. We have also introduced further improvements in our successful Air Miles customer loyalty programme, administered by Air Miles Travel Promotions Ltd which recently became a wholly-owned British Airways subsidiary.

We have continued to pay close attention to your Company's employment practices and, as a strong supporter of "Opportunity 2000", we have made more progress towards our targets for the employment of women and the appointment of women managers. High emphasis is placed on equal job opportunity for all, suchdang the disabled and ethnic minorines. Our employees strongly support four charities, all with a focus on children - Dreamfight, Operation Happychild, Cargo Kidney Fund and the Dhaka Orphanage. Earlier this year HRH the Duchess of Kern and I launched our "Change for Good" programme whereby loose change in any currency is collected on a voluntary basis from passengers on our intercontinental flights for the benefit of UNICEF. Winning for Customers, our staff motivational programme, will conclude in July, having run for more than two years and afforded every employee the opportunity to attend. I anticipate a new programme being launched early in 1995 with the objective of maintaining the strong endiusiasia and customer service commitment of staff throughout the world. Once again our employees have performed extremely well under considerable pressures in the marketplace and I am grateful for their strong support, without which the Company could not have achieved its present results and position on the world scene.

Your Company's strategy for the future is to keep in the forething of the globalisation of the arriver industry - resulting from increasing deregulation around the world, along wide more privatisation, as governments recognise the high cost of revenuing control and ownership. The consequences will ineviably lead to some industry-wide conscilidation while at the same same enabling many new companies to enter the mark-splace. In the door were we will concentrate on developing the synrogy bondon from the terresuments we have made to the past enuple of years lost will also remain afait to further apportunities to improve our coverage and

penetration of the major markets. It is our hope that the European Commission will put a stop to state aids thereby giving the playing field in Europe a more even and competitive balance. The World Travel and Tourism Council remains optimistic for further substantial growth in travel and tourism, and this, is of course, good news for airline prospects.

We strongly support BAA ple's application for planning permission to develop Terminal 5 at Heathrow, without which the economic growth prospects for the southeast of England, and the country as a whole, will be reduced in the early years of the next century. This new terminal, in which I would expect all of British Airways eventually to be housed, is vital to our long term success as is also the development of a new large airliner capable of carrying approximately six hundred passengers in our three class configuration. We are considering with the Manchester Airport Authority, the possibility of building a substantial addition to Terminal 1 at that airport which would accommodate all of your Company's interests there. Later this year the new Compass Centre located on the north side of Heathrow, will open to provide much improved and expanded facilities for our Operations and Cabin Services departments.

In conclusion, I wish to thank my fellow Board metabers for their contributions to our deliberations and to the achievements in the past year. It has been a particular pleasure to welcome Baroness O'Cathain and Charles Mackay to our midst. I believe that, together with all of our managers, our employees, and our partner companies, we can look forward with increasing confidence in our ability to deliver both value for money and a consistent high level of service to our customers, thereby enhancing prospects for our Shareholders.

Sir Colin Marshall Chairman

CORPORATE GOVERNANCE

British Airways continues to operate to high standards of corporate governance. The Code of Best Practice as recommended by the Cadbury Committee on the Financial Aspects of Corporate Governance has been implemented, with the exception of those provisions still under review by the accounting profession.

The Company has also introduced a Code of Business Conduct which has been circulated to all Group employees during the year.

The Board is made up of four Executive Directors and six Non-Executive Directors.

The Executive Directors are Sir Colin Marshall, Chairman, Robert Ayling, Group Managing Director, Derek Stevens, Chief Financial Officer and Sir Francis Kennedy, Special Adviser to the Board.

The Non-Executive Directors are people of varied background and experience, who contribute to the growth and vitality of the airline. They are paid according to the time they devote to the affairs of the Company.

The Board meets regularly ten times a year, but additionally when necessary, and considers all matters relating to the overall strategy, direction and future development of the airline. The Non-Executive Directors bring an independence of judgement and a wide business experience to these deliberations. They are given the information they require to enable them to make a full contribution at Board meetings.

In appropriate circumstances independent professional advice would be made available to the Directors, at the Company's expense. Board procedures are the responsibility of the Company Secretary, to whom all Directors may refer for guidance and advice.

There are four standing Board Committees each with its own terms of reference:

The Audit Committee comprises all the Non-Executive Directors and meets quarterly with the auditors to review the airline's financial statements including the Report and Accounts to ensure that these provide an accurate reflection of the airline's financial position. The Committee also ensures that the appropriate accounting policies and compliance procedures are in place.

The Air Safety Review Committee meets bi-monthly. Its members are the Chairman, the Special Adviser to the Board and four Non-Executive Directors. The Committee considers all matters relating to the operational safety of the airline and monthly-owned subsidiary undertakings.

The Remineration Committee is made up of four Non-Executive Directors and meets annually to consider and recommend remineration for the Executive Directors

The Norminations Committee is made up of the Chairman and four Non-Encentive Directors and mosts at least once a year. It is responsible for recommending Beard appairmanters and re-appointments.

BOARD MEMBERS, PRESIDENT AND EXECUTIVE MANAGEMENT

BOARD MEMBERS

Sir Colin Marshall (60) Chairman

Formerly Deputy Chairman and Chief Executive. Joined the Board as Chief Executive in 1983. Director, Grand Metropolitan PLC, IBM United Kingdom Holdings Limited, HSBC Holdings ple, USAir Group, Inc. and Qantas Airways Limited. (B, D)

Sir Michael Angus (64) Non-Executive Director, Deputy Chairman and Chairman of the Board Audit, Remuneration and Nominations Committees. Joined the Board in 1988. President, Confederation of British Industry 1992-94. Chairman. Whitbread PLC and a director of Nanonal Westminster Bank Plc and The Boots Company PLC. (A. C. D)

Robert Ayling (47) Group Managing Director

Joined the Board in 1991. Previously Director of Marketing and Operations, Company Secretary and Legal Director and Director of Human Resources. Formerly Under Secretary at the Department of Trade. Director, Sun Alliance Group PLC.

Derek Stevens (55) Chief Financial Officer

Joined the Board in 1989, Formerly Finance Director, TSB Group plc. Director, USAir Group, Inc.

Captain Colin Barnes (60) Non-Executive Director, Chairman of the Board Air Safety Review Committee
Joined the Board in 1991 after 36 years flying with the airline as a pilot, the last ten as Chief Pilot and the final five as
Director of Flight Crew. (A, B)

Michael Davies (51) Non-Executive Director

Joinea the Board in 1984. Chairman, Calor Group PLC, Wilishier PLC, Perking Foods PLC and Simon Engineering PLC, (A, B, C, D).

Sir Francis Kennedy KCMG CBE (68) Special Adviser to Chairman and Board

Joined the Board in 1987. Chairman, British Airways Regional Ltd. Diplomatic Service, 1964-86. Director, Fluor Daniel Corp. and Smith & Nephew plc. (B)

Charles Mackay (54) Non-Executive Director

Joined the Board in 1993. Chief Executive, Incheape plc. Director, HSBC Holdings plc. (A, C, D)

Baroness O'Cathain (56) Non-Executive Director

Joined the Board in 1993. Managing Director, The Barbican Centre, Director Tesco Plc and Sears Plc. (A, B)

The Hon Charles H. Price II (63) Non-Executive Director

Joined the Board in 1989. Former United States Ambassador to the UK. Chairman, Mercantile Bank of Kansas City. Director, Mercantile Bancorporation Inc., Hanson PLC, Texaco Inc., Sprint Corporation and New York Times Company Inc. (A, B, C, D)

The letters in brackets indicate membership of the following standing committees of the Board:
(A) Audit Committee, (B) Air Safety Review Committee, (C) Remuneration Committee, (D) Normations Committee

The Directors have pleasure in presenting their Report and Accounts for the year ended 31 March 1994. The accounts are set out on Pages 12 to 38.

PRINCIPAL ACTIVITIES

The main activities of British Airways Ple and its subsidiary undertakings are the operation of international and domestic scheduled and charter air services for the carriage of passengers, freight and mail and the provision of ancillary services.

RESULTS FOR THE YEAR

Profit after taxation, attributable to members of British Airways Pk., amounted to £286 million, against £178 million in the previous year The Board recommends a final dividend of 7 92p per share. An interum dividend of 3 18p per share was paid in January making a total of 11 10p. per share, an increase of 9.3 per cent on the previous year. After providing £106 million for dividends, the retained profit for the year amounted to £180 million.

PROPERTY VALUATION

Richard Ellis, Chartered Surveyors, valued the Group's principal properties at 31 March 1993 in accordance with the statements of asset valuation practice and guidance notes of the Royal Institute of Chartered Surveyors Having regard to this valuation, the opinion of the Directors is that the current value of the Group's properties remains at approximately £250 million in excess of the net book value disclosed in the Group balance sheet at 31 March 1994

In view of the specialised nature of many of the Group's operational properties, such as hangars and aircraft maintenance buildings, a significant proportion of the total valuation is on the basis of depreciated replacement cost, the balance having been valued on an open market existing use basis,

During the year but prior to the annual general meeting in 1993, the Board appointed Baroness O'Cathain and Mr Charles Mackay as Directors. Both were elected at the annual general meeting in 1993 Lord White retired from the Board at the same annual general meeting.

Mr Robert Ayling, Captain Colin Barnes and Sir Francis Kennedy are proposed for re-election at the forthcoming annual general meeting. Mr Ayling has a service contract with the Company terminable by either party on two years' notice and expering in any event on his 63rd birthday. Sir Francis has a service contract with the Company which expires when he ceases to be a Director of the Company or its subsidiary British Airways Regional Ltd. of which he is currently the Chairman. Under Article 86 of the Company's Articles of Association, Sir Francis will be obliged to retire as a Director of the Company at the annual general meeting in 1996.

The names and details of the Directors are set out on Page 4 and their share interests are disclosed on Page 47.

Details of the Group's tangible assets and investments are set out in Notes 13 and 14 to the accounts.

LIABILITY INSURANCE

British Airways holds a Directors' and Officers' hability insurance policy

EMPLOYEE INVOLVEMENT

The motivation and commitment of all the employees continues to play a major part in the airline's success.

"Wanning for Customers", the airline's staff motivational programme, will conclude in July By then virtually all employees will have had the opportunity to attend a one day event which emphasies the vital role that every individual has in remaining the airline's customers. A new programme with the objective of maintaining the suring enthusiasm and service commitment throughout the assline is due to be launched early next year. This will reflect the results of an employee movey carried out in June 1993, as which all staff were musted to give their views on the Company and in management style

During the year changes in working practices around to achieve a profitable operation at Gaewick provoced lumited industrial action by cabin crew throughout the CK

The concerns of the workforce are understood and must be sleak with openly. To achieve this the airline and trade unions representing employs have drawn up a Staff Charter which lays down a communication to a policy of achieving future change through a relationship between the Compan its employees and unions based on openness and musual trust

The autime's Profit Sharing Scheme will operate this year with every eligible employee receiving 1 188 weeks' pay. Under the rules of the Scheme this can be used to sequire shares to be appropriated to participants and held in trust. The Board intends to make an equivalent cash payment to those eligible employers not wishing to or able to participate in the Scheme

The Savings Related Share Option Scheme has now been operated for a third time. Under the latest Scheine, employees are able to save up to £55 per month, and after five years have the option of purchasing shares with the money saved at the prescribed price of 286 pence per share, or have the money refunded with interest. The Scheme matures in 1998. Some 62 per cent of employees are already shareholders in the airlane

EQUAL OPPORTUNITY

British Airways policy is to promote equal opportunity in employment regardless of gender, race, colour or disability, subject only to capability and suitability for the task and legal requirements. As part of the Opportunity 2000 initiative percentage targets have been set for the employment of women and ethnic minority managers by the year 2000 and a dedicated Equal Opportunities executive has been appointed to monitor progress. Wherever possible, employees who become disabled during employment are provided with an alternative Job which maker full use of their capabilities.

CHARITABLE AND POLITICAL DONATIONS

Charitable donations made by the Group during the year amounted wi (479,000) (1993; £409,000). No political donations were made during the year (1993; nd).

SHAREHOLDERS ~ NON-UK NATIONALS

At 31 March 1994, 35 per cent of ordinary sharet were hardby mon-UK nanonals, compared with 36 per cent at 31 March 1993. Having regard to all relevant factors including the fact that there are no large interests of single or associated non-UK nationals and, in the absence of unformmen developmen the Directors do not expect (but without binuting their freedom to act) to seek to exercise their powers to restrict non-UK share ownership

CORPORATE GOVERNANCE

The Company has complied throughout the year under review with the Code of Best Practice published in December 1992 by the Commission on the Financial Aspects of Corporate Governance except in suspect of the two recommendations on going concern and asternal control on which the guidance of the accounting profession is awasted. The auditors have confirmed to the Board that they have reviewed this statement insofar as at relates to the paragraphs of the Code operation for those review and that, based on their review they concur with the interment

The Company is not a close company within the meaning of the Income and Corporation Taxes Act 1988 and this position has not changed since the end of the financial year

AUDITORS

The moditors, Errot & Young, have understed their willingness to comin office and a resolution proposing their reappointment and authorists the Directors to determine their renumeration will be proposed in the Munosus peneral mecanik

On behalf of the Board **GF Redwood Secretary** 23 May 1994

Medword

OPERATING AND FINANCIAL REVIEW OF THE YEAR

RUMMARY

The pre-tax profit for the year ended 31 March 1994 was £301 million, up 62.7 per cent, a significant improvement on last year despite compensive forces affecting the Company from many directions. The improved results reflect our cost reduction initiatives and the measures we have taken to increase revenues, particularly premium traffic. In addition we have enjoyed a benefit from weaker Sterling during the year, which has helped to mitigate the effects of declining yields arising from excess capacity in the market place. The Company achieved a 10.7 per cent increase in scheduled passenger traffic on capacity up 11.9 per cent, well ahead of general market growth.

IATA member airlines lost US\$4.1 billion on international services in calendar 1993, a net loss equivalent to 4 per cent of their revenues. This compares with losses of US\$4.8 billion in 1992, British Airways results contrast well with this general picture. They reflect the airline's continued ability to counter economic and market forces while investing heavily for the future particularly through product enhancement and investment in new developing European associates.

DPERATING REVIEW

FURNOVER

For the year ended 31 March 1994 Group turnover increased by 13.2 per cent from £5,566 million to £6,303 million. A total of 30,595,000 passengers were carried on scheduled and charter services during the year, an increase of 8 % per cent. Cargo tonne kilometres were up by 11.1 per cent, representing the carriage of 607,000 tonnes of cargo. Revenue tonne kilometres (RTK) for the year increased by 10.9 per cent with available tonne kilometres (ATK) up by 10.5 per cent and the overall load factor was 66.5 per cent. Revenue passenger kilometres on scheduled services increased by 10.7 per cent while available seat kilometres rose 11.9 per cent, giving a passenger load factor of 70.0 per cent, down by 0.8 points on the previous year. Yield on scheduled services improved 3.1 per cent on passenger revenue and 4.7 per cent on cargo. However, excluding exchange rate benefits, yield declined 2.4 per cent and 3.3 per rent respectively.

Significant progress has been made in developing our product and standards of customer service. A £100 million, 18 month programme of improvements to our premium brands was committed at the height of the recession when producine and was designed to enhance the committed at the height of the recession when producine and was designed to enhance the committed at the height of the recession when producing better value and quality. The success of the strategy is proving itself in traffic which has grown by 6 per cent over the progress of recovery seen in September 1993.

The investment in products has included a major interior refurbishment of the Concorde fleet and a new First Class Sleeper Service on 40 intercontinental overnight flights. In longhaul Club World cabins, new seats and the most comprehensive video system available in business class and improved in-flight service have been introduced. Arrivals lounges ~ the first of their kind in the world — have opened at Heathrow and Gatwick. They offer arriving premium passengers a chance to showe , change and have breakfast before they leave the airport. A fast track process through immigration and security for Concorde, First and Club passengers has been introduced at both London airports. Additionally, British Airways achieved the best punctuality performance since arrivation in, with 85 per cont of flights departing within 15 minutes, four points up on last year,

Market share on routes to and from both London airports was 46 per cent for the year, an improvement of three percentage points on last year and exceeding capacity share of 43 per cent. Our passenger numbers grew by 11 per cent, while the market grew by 5 per cent.

The acquisition of the principal European and domestic routes of Dan-Aer with effect from 1 November 1992 coencilosted to a boost in market share at Gaewick of 12 percentage points to 41 per cent and passenger traffic

growth of 39 per cent. Significant improvements have been raide at British Airways Regional and at Garwick, including a small avoid control bution earned by British Airways (European Operations at Garwick) Limited, farmerly Dair-Air Services Limited.

In addition to the new mutes added to the network following the acquisition of Brytton Airways Limited and the new franchise agreements with CityFlyer Express and Maersk Air, new services have been introduced during the year to Verona, Themalomiki, Aden, Sana'a, Calcutta, Baltimore, Charlotte and Sannago, and from Birminghami to New York and Manchester to Los Angeles. Plaghts to Aden and Sana'a were suspended in May 1994 because of the conflict in the Yennen.

Several thousand staff were involved in the hunch of the British Airways Dream Ticket, a promotional campaign specifically designed to translate the premium market during the autumn of 1993. In a bid to win a bigger share of the leasure travel markets British Airways Saunburys joint premotion was operated for the second year running and the airline has recently launched World Offen, a range of bargain pricod fares on service with seats that would otherwise probably go unsold. All these inmatives are considerable wiccesses.

The terrorist attacks on Heathrow in March 1994 and the subsequent security alerts caused considerable disruption to flights: 147 flights had to be cancelled and a further 70 delays of up to 24 hours were experienced. Our staff showed outstanding dedication and courage in dealing with the disruption caused to our operations and to our customers as turnways and terminals were closed by the security forces. The overall effect on operating profit for the year was estimated at close to £10 million.

EXPENDITURE

Group expend: we rose 10.5 per cent from £5,256 million to £5,807 million. Unit costs—measured by net operating expenditure per ATK increased by 1.1 per cent but excluding exchange rate effects fell 5.

3.6 per cent.

The average number of employees in the same very and very same ver

Fuel and oil costs meacased by 15.4 per cent to £646 militors, largely due to additional flying prevenue aircraft laflometrus up 10.4 per cent) and exchange rate changes, partially office by 8.2 per cent reduction in the average market price of fuel to 63.6 US cents per US gallon for 1993-94. Engineering and other and take costs more sed 24.8 per cent principally due to aircraft and crew costs associated with the new Gatwick in Phisburgh, Baltimore and Charlotte wer loose services using USAse aircraft and crews and the lare of cargo space from other carriors as well as increased flying activity and third party manifestance. Landing form and or rouse charges were up by 9.7 per cent due to more flying activity. Handling charges, catering and other operating cess increased by 10.6 per cent reflecting the increase on passengers carried and product amprovement.

Selling costs were 15.2 per cert hugher principally due to volume related travel agent and errin and commonweal and additioned advertising and promision parts their un premium services

Programmes to reduce run costs and amprove receives remain as place and

new opportunities for substantial improvement commus to be identified. Staff are felly involved in our cost saving and revenue generating instances. Last summer Operation Brainstorm invited all employees to make suggestions for generating additional revenue or trimming costs. More than 5,500 suggestions were received and many have been acted up on.

In the year to 31 March 1994 we again exceeded our cost savings target of £15t million. Since the end of the year British Airways has embarked on a management reduction programme which will be achieved through early retirement and voluntary severance, and a further review of overheads and administrative processes. Savings in the cost of operating the airline are now running at over £580 million per annum through better working practices, better value for money from our suppliers, and better utilisation of aircraft and other assets, introduced over the last three years. Aircraft utilisation improved 4.2 per cent in 1993-94.

GEOGRAPHICAL ANALYSIS

The geographical analysis of Group turnover and operating profit shows significant improvement across all routes. European route operating profit more than doubled to £69 million as passenger traffic growth of 13.9 per cent kept ahead of capacity increases of 12.8 per cent but margins remain sinacceptably low.

Asthough turnover on the America toutes rose 18 I per cost to £2,029 million, turnover originating in that region was up by 28.2 per tent to £1,188 million reflecting increases in passenger volumes particularly premium business, cargo and exchange benefits. Operating profit on the Americas routes rose 48.3 per cent, reversing the decline in profitability experienced in 1992-93.

Turnover on the Africa, Middle East and Indian sub-confinent routes increased 18.9 per cent to £900 million. Operating profit on those routes was £203 million, up 51.5 per cent. Far East and Autralasia operating results rose 61.0 per cent to £95 million, reflecting improved economic conditions in the region.

OTHER DEVELOPMENTS

With effect from 1 August 1993 British Airways and Maerik Air Holdings agreed to restructure The Plimsoll Line Limited (TPL) in which British Airways held 49.9 per cent of the equity. Under this agreement TPL and ws subsidiary undertakings, Brymon Airways Limited and Plymouth City Airport Limited, became wholly-owned subsidiary undertakings of British Airways Group. Birmingham European Airways (renamed Maerik Airj.), came a wholly-owned subsidiary undertaking of Maerik Air Holdings. Brymon Airways flights and Maerik Air flights (both formerly operated under the brand name of Brymon European Airways) now operate with British Airways flight codes, with aircraft repainted in British Airways livery and with cabin crew wearing British Airways umform

In July 1593 British Airways entered into a new franchising agreement with the Gatwick-based independent communic arthure CityFlyer Express Limited, whereby CityFlyer Express operates all its scheduled services under the brand name of British Airways Express, using British Airways livery and uniforms. Plans for a similar franchise agreement with Scottish based Loganaic were announced in April 1994 to start in July 1994.

On 13 May 1994, the Group acquired the tensioning 49 per cent shareholding in Air Miles Travel Promotions Lumred together with a perpenuit heence to use the Air Miles' trade marks and to operate the Air Miles scheme.

INCOME FROM INTERESTS IN ASSOCIATED UNDERTAKINGS AND OTHER INCOME AND CHARGES

British Assways share of losses of associated undertakings declined by £6 malfron to £11 militon, principally representing continuously losses of TAT European Asthmes and Deutsche BA offset by share of profit from Quinter and preferred dividends received from USAst. Other receive and charges worsened by £20 militon to £32 militon due to province against advances to TAT and Deutsche BA.

L'SAir

USAir has been severely affected by increasing competition costs low-cost, low-fare airlines in its principal peographic market area in the northeast United States. Pre-tax losses for their fare quarter to 31 March 1994 were US\$196.7 million and losses for 1994 are now expected to exceed the 1993 pre-tax losses of US\$349.4 million. Although US\$50 million of the first quarter losses was autributed to poor weather conditions, the main reason for the losses arises from incursion by low cost carriers into USAir's markets, and USAir's pricing response no their action. Against this background, USAir's management has drawn up a major restructuring programme. USAir made the following materiess in their 1993 Annual Report:

"Unless USAir is able to reduce its operating costs, present and increasing competition from low cost, low fare airlines in USAir's markets could have a material adverse impact on USAir's cash position and therefore, its ability to sustain operations. In March 1994, USAir announced that it had initiated discussions with the leadership of its uniformed employees regarding wage reductions, improved productivity on a other rost savings. The outcome of these negotiations is uncertain, but of timely agreements are not reached, the Company may seek other restructuring alternatives."

The major restructuring programme sticlides negotiations with the misors, for which the outcome is incertain. If these negotiations are not successfully concluded within the timescale which the financial position of USAir requires, then the Directors believe that a provision for permanent diminution in value is likely to be required against the provision book value of the Group's investment of £275.3 million (US\$400) 7 million)

In March 1994 Brush Airways announced that it would not make any additional investments in USAir until the Company has been reassured of the engoing viability of the business.

The emerging benefits of the aliance with USAit are desit with on Page 9

QANTAS

Quantas announced an unaudited grown profit from operations of A\$100.5 million for their half year ended 31 December 1993 compared with A\$33.8 million for the same period a year ago. Group profit after tax for the six months to 31 December 1993 amounted to A\$71.7 million compared with a loss of A\$365.2 million in the previous kalf just, which included significant abnormal items relating to she acquisition of Australian Airline, staff redundancy and other restructioning costs.

The improvement was largely due to increased passenger volumes as international and dornestic markets, and interest saving, resulting from the Amerahan Government's recognisation of Qaritas in February 1993, offset by declaring yields on both domestic and national rouses. Of the insight international rouses, Japan, The Orient and New Zosland made positive contributions. Europe and The Americas commond to material lowes overage to low first and over capacity and state March 1994 a mainber of changes have been made to trans Pacific route schedules including the certains of flights to San Francisco.

Quitas has embarked on considerable procuration in brand and product enhancement including in-cabin nervice and factories on the ground. The screegic paracethap between Brandi Airways and Quotas consistence in provide opportunities to enhance the intege of products available to build compared consoners such as the new "Ger of Explosive" mand-the-world frees and reciprocal freque. "Hyer beautifus Both crossponess are worlding to reduce coses by co-op inc. In some prochangs, technical real supposes activities and by sharing some assets and ground facilities, including new lounge facilities at Hong Kong. The most monthle development, however, is Quotaes' document instable the BABS competitor insertions measure developed by British Astronys and while the a transfer of after mediation.

The 7% par case of the author evened by the Assundant Convenients is copported to be sold by a public flumina in the next demond your to fluor 1479.

TAT EUROPEAN AIRLINES

The results from TAT have been disappointing, mainly as a result of the dopth and duration of the French recession, the loss of the Air Intercontract and a lew level of penetration of the French originating market on international routes.

A joint TAT/British Airways plan for restructuring was accepted by all the unions involved in February 1994. It involved substantial cost reductions and the loss of approximately 300 jobs out of a total of 1,500, mainly flight crew and administration staff. In addition the commercial organisation of TAT has contracted out all its sales and marketing activities to British Airways. Cost per passenger boarded this year is expected to be some 30 per cent below last year.

On the domestic network some routes have been closed and there is an overall reduction in the number of seats offered so that capacity more closely reflects market conditions

TAT has retained most of its existing international routes, subject to a closer integration with the operations of Deutsche BA. New services have been started from Nice to Brussels, Manchester and Rome, and from Lyon to Rome. TAT has also started operating two daily services into Heathrow from Paris-Charles de Gaulle. These will transfer to Paris-Orly by the end of June 1994. TAT plans to operate from Orly to Marseille and Toulouse by the start of the winter season.

DEUTSCHE BA

Deutsche BA experienced lower than expected trailic levels as a consequence of the recession of the German economy, 82 per cent of Deutsche BA's scheduled passengers were carried or Jomestic services, Overall Deutsche BA's domestic scheduled traffic grew by more than 90 per cent in 1993-94 compared with last year. New international scheduled routes in 1993-94 include Stockholm from Munich and Berlin, Ankara from Munich, Oslo from Stuttgait and Berlin, and St. Petersbur, and Moscow from Berlin. Nevertheless overall seat factors remain disappointing.

This summer, Deutsche BA commenced operations from Frankfurt to Paris-Charles de Gaulle and from Berlin and Munich to Madrid. The route from Paris-Charles de Gaulle to Munich, previously operated by TAT, has been taken over by Deutsche BA. Deutsche BA has entered the busy Munich to Dusseldorf market with seven flights per day. Since April 1994, the Deutsche BA operation has been consolidated at its new head office and principal operating hub in Munich. Deutsche BA is expected to improve its performance substantially as its recent network expansion matures.

ALLIANCE BENEFITS

Group results for the year reflect early cost and revenue benefits from our global alliance amounting to some \mathcal{L}^{10} million compared with the net losses originally anticipated. All partners are now accruing benefits from the Frintli Airways global alliance

The majority of the benefit has come from the alliance with USAss, where work on achieving benefits from the transatiantic partnership is now well advanced. Cost savings have been achieved in many areas including joint purchasting institutives and engineering best practice.

Revenue benefits, which make up the major part of the benefits, have principally been generated by linking the British Airways and USAst route networks through codesharing joint frequent fiver programmes and co-ordination of the airknes' sales efforts. Identified benefits from the USAst alliance are forecast to deliver around \$\int_{10}\$ million in benefits this year, largely from additional revenue.

PINANCIAL REVIEW

LOSS ON DISPOSAL OF FIXED ASSETS

Not leave, on disposal of fixed owen amounted to L5 million correpared with a profit of L15 million last year due to provinces made system. Tribias six rath held for resole.

NET INTEREST PAVARILE

Net interest parable ruse £36 million to £147 million reflecting the full vear effect of 1992-93 ascerafe deliveries and ascerafe horsowings office in part by lower interest rates, the effect of the rights mue, and the absence of currency losses on revaluation of general purpose losses.

TAXATION

An analysis of the tax charge is set out in Note 10 to the accounts. The taxation charge was 5.0 per cert of profit before tax. The effective rate is lower than the standard tax charge due largely to expital allowance on fleet acquisitions exceeding the charge for depreciation and the utilisation of prior year losses. It is expected that the tax charge for 1994-95 will be us the region of 25 per cent.

EARNINGS PER SHARE

Profit after tax was £286 milion, equivalent to earmings of 31 hp per share compared with 23 1p (after adjustment to take man account the bonus element of the rights usue) last year. On a fully delimed book, earnings per share were 28 7p.

DIVIDENDS

The Board recommends a final devidend of 7.92p per share, giving a total dividend for the year of 11.10p per share, compared with 10.10p (after adjustment) per share in the previous year, a. Accrease of 0.3 per cent. The total dividend is covered 2.7 times by earnings. The final dividend will be paid on 29 July 1994 to shareholders registered on 1 July 1994. The total cost of the dividends is £10h million, leaving £180 million to be transferred to reserves.

SHARE CAPITAL

On 11 June 1993, British Airways raised £442 million, net of expenses, by way of a 1 for 4 rights issue of 185,485,636 new ordinary shares of 25p each. On 15 June 1993, 1,615,949 ordinary shares were seed on the first opportunity for conversion and exchange of the Convertible Capital Bonds. In addition, £34 million was raised during the vear by the exercise of options under Employee Share Option Schemes.

REVIEW OF CASH FLOW

Net each neflew from operating activities totalled L736 million, up L107 million on last year. Net cathly on aircraft and other fixed agest at the year amounted to L849 million, including L643 million of agest acquired under finance leases and true purchase arrangements (1993) $L^4.058$ million and L513 million respectively) and L126 millions (1993) L.574 million) was invested in associated undertakings, principally USAn, TAT and Deutsche BA. These were the clust factors in accommand for a lower financing requirement of L454 million compared with L1.115 million last year.

WORKING CAPITAL

At 31 March 1994 test current assets were L429 million compared with not current habilities at L274 millions a year ago. This suppolicant change is due to a L699 million increase in short-term losss and deparent contributing to sotal liquid assets of L1,226 millions at the end of the year. The high level of each held is a reside of solving advantage of the current market chitiste to borrow on attractive terms in advance of pleaned capital expenditure in the future and the need to possesse a normal prodest working balance.

Sales an advance of carrange duclored by £67 millions to £618 millions largely due to reclamification of certain sometime sales and discounse form made evolutions this was affect by an incounse in volume of sales.

OPERATING AND FINANCIAL REVIEW OF THE YEAR

AIRCRAFT FLFET CHANGES

One Boeing 747-400 and one Boeing 737-400, both of which had been delivered in the financial year to 31 March 1993, entered service in April 1993. Two Boeing 747-400s, three Boeing 767-300s, rac Boeing 757-200 and six Boeing 737-400s were delivered to the sidine, of these three Boeing 737-400s have yet to enter service. Three Boeing 767-200s have been wet leased from USAir in order to operate the Garwack to Phttsburgh, Baltimore and Charlotte routes.

Three Boeing 737-300s have been returned to the operating lessor and one Boeing 737-400 has been sub-leased to a third party. Two Boeing 737-200s were sold during the year.

The acquisition of Brymon Arrways Limited with effect from 1 August 1993, brought with it six de Havilland Canada DHC-7s and five de Havilland Canada DHC-8s Since acquisition one DHC-7 was stood down and one DHC-8 was returned to the lessor.

Six BAC 1-11-500s in service at the beginning of the year were stood down. During the year 20 BAC 1-11-500s which had previously been stood down, were sold.

AIRCRAFT ORDERS

No orders for new sweraft were placed in the year. Reflecting our intention to focus on more profitable growth and higher aircraft utilisation, options on seven Boeing 747-400s, seven Boeing 767-300s, one Boeing 757-200 and ten Boeing 737-400s were cancelled during the year. British Airways still holds orders and options for 94 aircraft including 49 Boeing 747-409s and 30 Boeing 777s. During the current year to March 1995, the Group expects to take delevery of four new aircraft.

INDERTEDNESS

An analysis of the movements in loans and capital obligations under finance leases and hire purchase arrangements for the year ended 31 March 1994 is set out in Note 24c to the accounts.

Two Boeing 747-400s, three Boeing 767-300s, one Boeing 757-200 and two Boeing 737-400s were acquired on hire purchase arrangements by way of Japanese leveraged leases. A further Boeing 767-300, which was delivered in March 1993, was similarly financed during the financial year 1993-94.

One Boeing 737-400 was purchased outright by way of an 18 year US Dollar loan secured on the arcraft, and a further Boeing 737-400, which has been sub-leased to a third party, was acquired on an 18 year US Dollar finance lease. Both of these financings made use of an existing syndicated bank facility.

In order to reduce financing costs, 13 finance leased Boeing 737-200s were progressively bought in during the course of the year. In a separate transaction, four Boeing 767-300s held on extendible operating leases were re-financed on mortgage loans and brought on balance sheet.

In December 1993 a Boeing 747-100 was sold and leased back on an operating lease basis for a term of four years. In February 1994 British Asrways gave notice of its intention to terminate extendible operating leases of two Boeing 747-400s in December 1994, reflecting the airbac's success in improving aircraft stillisation and thus prosportively requiring fewer sizeraft than had previously been planned.

NET DEBT: TOTAL CAPITAL KATIO

The Group has adopted Furnacial Reporting Standard 4 'Capital Instruments' and consequently the Convertible Capital Bonds have been mehided under creditors. On this basis, becrowings furchading Convertible Capital Bonds of £316 million) not of cash, short-term leans and deposits during the year fell £78 million to £2,095 million. Capital and reserves rose to £1.827 million heliped by the £442 millions Rights large. The net debt testel capital ratio was 37.6 per cent on the restated bacie, a 10 point improvement since lux year.

FUTURE FINANCING ARKANGEMENTS

The Group's buildings of cash and short-torus leans and dopen with communed funding receives, are sufficient to never the fell one of A firm mercial deleverses due in the next two financial years. The augmention of Booing 747-400 and Boeing 777 amerals scheduled for delivery charang the next eight years a expected to be financed permally by mounted cash flow and partially through external financing, including communed facilities arranged prior to delivery Bratish Airways has arrangements through a facility provided by a syndicate of benta for it so acquire commit of these arreraft on an aburnative basis. Bocasse of the pocusity to plan arcraft orders well in advance of delivery, it is not economic for British Airways to have communted funding in place new for all automating orders, many of which relate to atteract which will not be delivered for several years. Bruish Airways policies in this regard are in line with the funding policies of other airlines. In addition to aircraft reason financing facilities, the airline has a number of innecessed borrowings of both a short and long-term nature which may be used \$ ___ v general perposes or the Group

FOREIGN CURRENCY EXPOSURE

The Group does business in approximately 120 torough currences which account for approximately (4) per case of Group revenue and approximately 50 per cent of operating expenses. The Group generates a surplus in most of these currencies. The principal oscoptions are the Us Dullar and the pound Storbing, in which the County has a deflect arming from capital expenditure and the payment of some leaving costs, together with expendence on fuel, which is payable in US Dollars and the majority of scaff costs, central overheads and other lessing costs, which are payable as pounds Sterling. However, the broad spread of currencies in the business. many of which are hished to the US Dellar and the pound Steeling - goverthe Group a measure of protection against exchange rate movements and reduces the overall semutative of the Group's results to exchange rate fluctuations. Nonetheless, the Group can experience solverse or beneficial efform. For example, if pounds beeding weakened against the US Dellar and strengthoned against other major currencies, the overall affect models be likely to be adverse while the reverse would be likely to produce a beneficial effect.

The Group tooks to reduce its foreign exchange empounce arming from transactions in various currencies through a policy of matching, as fac as possible, recesps and payments in each individual currency. Surplement of convertible currencies are sold, author spot or forward, for US Dullars. and pound: Sterking.

The Group had forward contracts outstanding at 31 March 1994 as foreign currency amounting to US\$272 million for US 17-like purchases. L^{79} multion to hedge future revenue flows and L^4 million for payments

In addreson to the primary effects outlined show, suchange rate rnovements can affect domand for services, especially fount lessure travellers where decision whether and where so street mer after at a seof exchange rate movements. While it is not possible to quantify this effort. British Astronys slows increases exchange take moved atterript to anticipese blocky changes in the pattern of demand

OUTLOOK

We plan to release h Club Burupe later this year, providing a more comfortable and attractive cubin for this large and proportion games of passengers. Our everall coparity gravels will average amount 4 per sour in 1994-95. In worms of our metricula, product and necessor, and over focus on costs and asset utilization we indicate we are should all mosts of the competition and here the mountains to metastic that elega-Competition will not during, but we are way well placed to take fail silverings of the world-wide successive measury and the gustant Mireculination of the second parameter thally accesspectative market

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO FINANCIAL STATEMENTS

The following statement, which should be read in conjunction with the report of the auditors set out below, is made with a view to distinguishing for shareholders the respective responsibilities of the Directors and of the auditors in relation to the financial statements.

The Directors are required by the Companies Act 1985 to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and the Group as at the end of the financial year and of the profit or loss of the Group for the financial year.

The Directors consider that in preparing the financial statements on Pages 12 to 38, the Company has used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgements and estimates, and that all accounting standards which they consider to be applicable have been followed.

The Directors have responsibility for ensuring that the Company keeps accounting records which disclose with reasonable accuracy

the financial position of the Company and which enable them to ensure that the financial statements comply with the Companies. Act 1985.

The Directors have general responsibility for taking such steps as are reasonably open to them to safeguard the assots of the Group and to prevent and detect fraud and other irregularities

The Directors, having prepared the financial statements, have requested the auditors to take whatever steps and undertake whatever inspections they consider to be appropriate for the purpose of enabling them to give their audit report.

REPORT OF THE AUDITORS TO THE MEMBERS OF BRITISH AIRWAYS PIC

We have audited the accounts on Pages 12 to 38, which have been prepared under the historical cost convention as modified by the revaluation of certain fixed assets and on the basis of the accounting policies set out on Pages 16 and 17.

RESPECTIVE RESPONSIBILITIES OF DIRECTORS AND AUDITORS

As described above the Company's Directors are responsible for the preparation of the accounts. It is our responsibility to form an independent opinion, based on our audit, on those accounts and to report our opinion to you.

BASIS OF OPINION

We conducted our audit in accordance with Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the accounts, It also includes an assessment of the significate estimates and judgements made by the Directors in the preparation of the accounts, and of whether the accounting policies are appropriate to the Group's circumstances, consistently applied and adequately disclosed.

We planned and performed our rudit so as to obtain all the information and explanations which we considered necessary in order to provide as with sufficient evidence to give renormable assumance that the accounts are free from material impaturement, whether caused by fraud or other arregularity or error he forming our opinion we also evaluated the overall adequacy of the presentation of information in the accounts.

Investment to USAir Group, Inc.

In focusing our opinion we have considered the information

disclosed in the accounts concerning the Group's investment of £275.3 million in USAir. The value of the Group's investment is dependent upon the six cessful outcome of the restructuring institutives proposed by USAir. The circumstances relating to this fundamental uncertainty are fully described in Noor 17 to the accounts. Our opinion is not qualified in this respect.

OPINION

In our opinion the accounts give a true and fair view of the state of affairs of the Company and of the Group as at 31 March 1994 and of the profit of the Group for the year then ended and have been properly prepared in accordance with the Companies Act 1985.

1 ACCOUNTING POLICIES

PRESENTATION OF FINANCIAL INFORMATION

The Group has adopted the provisions of Financial Reporting Standard 4 'Capital Francisments' and consequently the Convertible Capital Bonds have been reclassified within creditors falling due after more than one year and corresponding amounts have been restated.

No adjustment has been made in respect of the costs associated with the issue of the Group's capital instruments outstanding at 1 April 1993, which were written off as incurred, as the amounts involved were in a material

ACCOUNTING CONVENTION

The accounts have been prepared under the historical cost convention modified by the inclusion of certain assets at valuation, as stated below, and in accordance with all applicable United Kingdom accomming standards and the Companies Act 1985.

BASIS OF CONSOLIDATION

The Group accounts include the accounts of the Company and its subsidiary undertakings, each made up to 31 March, together with the attributable share of results and reserves of associated undertakings. Corrate associated undertakings make up their annual audited accounts to day other than 31 March; in such cases the results disclosed by subsequent unaudited management accounts have been included. The attributable results of those companies acquired or chaposed of during the year are included for the periods of ownership.

On the acquisition of a business, including an equity interest in an associated undertaking, fair values are attributed to the Group's share of net tangible assets. Where the cost of acquisition exceeds the values attributable to such net assets, the resulting goodwill is set off against reserves in the year of acquisition.

In accordance with section 230 of the Companies Act 1985, a separate profit and loss account dealing with the results of the Company only has not been presented.

SEGMENTAL REPORTING

a BUSINESS SEGMENTS

The Directors regard all Group activities as relating to the airline business.

- **b** GEOGRAPHICAL SEGMENTS
- i) Turnover by destination The analysis of turnover by destination is based on the following criteria.

 Scheduled and non-scheduled services Turnover from domestic services within the United Kingdom is attributed to the United Kingdom. Turnover from inbound and outbound services between the United Kingdom and overseas points is attributed to the geographical area in which the relevant overseas point hes.

 Other revenue Revenue from the sale of package holidays is attributed to the geographical area in which the holiday is taken while revenue from aircraft maintenance and other miscellaneous services is attributed on the basis of where the customer resides.
- ii) The analysis of turnover by origin is derived by allocating revenue to the area in which the sale was made. Operating profit resulting from turnover generated in each geographical area according to origin of sale is not disclosed as it is neither practical nor meaningful to allocate the Group's operating expendituse on this basis.
- iii) Geo, replical analysis of net assets. The major revenue-earning assets of the Group are comprised of the aircraft floot, all of which are registered in the United Kingdom. Since the Group's aircraft floot is employed flexibly across its worldwide route network, there is no suitable basis of allocating such assets and related habilities to geographical segments.

 TANGIBLE FIXED ASSETS
- Tangible fixed assets are stated at cost except for certain aircraft floots and properties which are included at valuebous.

 Depreciation is calculated to write off the cost or valuation, less residual value, on the straight line basis.
- b FLEET
- i) Cost or valuation. All aircraft are stated at cost with the exception of a small number that are stated at 31 March 1988 valuations, with subsequent expenditure stated at cost. The Concorde floot remains at 118 book value. Aircraft not in current use are included at estimated net realisable value.
 - Aircraft which are financed in whole or in part in foreign currency, either by loans, finance leases or him punchant arrangements, are regarded together with the related liabilities as a separate group of assets and habilities and accompanies for in foreign currency. The amounts in foreign currency are translated into Steeling at rates ruling at the balance shows date and the not differences arising from the translation of aircraft costs and related funding currency loans, exactly for those loans which are hedged, are taken to reserves. The cost of all other aircraft is fixed in Steeling at rates ruling at the date of purchase.
- ii) Capitalisation of interest on progress payments. Interest (calculated based on US Dellar LIBOR related rates of interest) attributed to progress payments made on account of aircraft under construction is capitalised and added to the erest of the aircraft concerned. Interest capitalised in respect of progress payments on those aircraft which subsequently become subject to extendible operating lease arrangements is carried forward and written off over the initial lease period.
- th) Depredation Flort are to owned, or held on finance leases or live purchase arrangements, are depositioned at most calculated to write down the cost or valuation to the estimated residual value at the end of the planted approximated lives. Residual values and operational lives are reviewed annually.
- C PROPURTY AND EQUIPMENT

All properties, other than those of a speculised use antere sadi at hangers and strengt material materials. The professionally volumed at open materials where the containing use or open materials release at March 1984 and are included in these accounts on the basis of their valuation, with subsequent expandionic second at one. Specialised use properties are included at case.

Provision is reade for the depreciation of all property and equipment, spare from feedbold land, based upon expensed result lives and, in the case of learning properties, over the derector of the leaves if shotter.

1 ACCOUNTING POLICIES APPEARENT

d LEASED AND HIRE PURCHASED ASSETS

Where assets are financed through finance leases or here purchase arrangements under which substantially all the risks and rewards of ownership are transferred to the Group, the assets are treated as it they had been purchased outright. The amount included in tangable fixed assets represents the aggregate of the capital elements pupils during the lease or hire purchase term. The corresponding obligation, reduced by the appropriate personation of lease or hire purchase payments made, is included in creditors. The amount included in tangable fixed when is depreciated on the basis described in the preceding paragraphs and the interest element of lease or hire purchase payments made is included in interest payable in the profit and loss account.

Payments under all other lease arrangements, known as operating leases, are charged to the profit and loss account in equal annual amounts over the period of the lease. In respect of asceraft, operating lease arrangements allow the Group to terminate the leases after a limited period, normally every five to seven years, without further material financial obligations.

AIRCRAFT AND ENGINE OVERHAUL EXPENDITURE

Aircraft and engine spares acquired on the introduction or expansion of a fleet are carried as tangible fixed assets and generally depreciated in line with the fleets to which they relate. Replacement spares and all other costs relating to the maintenance and overhaul of aircraft and engines are charged to the profix and loss account on consumption and as incurred respectively.

ASSOCIATED UNDERTAKINGS

Where the Group participates in the results of partnerships or companies in which it has an equity interest of 2st per cent or more, but not exceeding 50 per cent, and is in a position to exercise significant influence, those interests are classified as associated undertakings. The Group's share of the profits less losses of associated undertakings is included in the Group profit and loss account and its share of the post-acquisition results of these companies is included in interests in associated undertakings in the Group balance sheet. The Group's interest in the results of USAir Group, Inc. is currently limited to its fixed preferred dividends and only such dividends are included in the accounts.

STOCKS AND WORK IN PROGRESS

Stocks and work in progress are valued at the lower of cost and net realisable value.

CASH AND CASH EQUIVALENTS

Cash includes cash in hand and deposits held with banks and other financial institutions which are ropsyable on demand. Cash equivalents are short-term investments with maturities at inception of less than three months.

PENSION AND OTHER POST-RETIREMENT BENEFITS

Retirement benefits are payable through separately funded United Kingdom pension schemes with equivalent arrangements for overseas territories. Contributions to pension funds are made on the basis of independent actional advice and charged to the profit and loss account so as to spread the cost over the remaining service lives of the employees. Provision is made based on actuarial advice for post-retirement medical benefits of employees in the United States.

FREQUENT FLYER PROGRAMMES

The estimated additional direct cost of providing free travel in exchange for redemption of miles earned by members of the Group's Executive Club and Frequent Traveller programmes is accrued as members of these schemes accumulate miles of DEFER RED TAYATTON.

Provisions are made for deferred taxation, using the liability method, on short-term turning differences and all other material timing differences to the extent that it is probable that the habilities will crystallise in the foresceable future FOREIGN CURRENCY TRANSLATION

Foreign currency balances are translated into Sterling at the rates ruling at the briance sheet date, except for certain loan repayment instalments which are translated at the forward contract rates where instalments have been covered forward at the balance sheet date. Except for those loans which are hedged, changes in the Sterling value of outstanding foreign currency loans, finance leases and hire purchase arrangements which finance fixed assets and of the related aircraft are taken to reserves. Exchange differences arising on the translation of not assets of overseas subsidiary and associated undertakings are taken to reserves. Profits and losses of such undertakings are translated into Sterling at average rates of exchange during the year. All other profits or losses arising on translation are dealt with through the profit and loss account.

Executive Directors' emoluments (excluding pension contributions) consist of a basic salary and a porformance related bonus. Salaries are reviewed annually by the Remuneration Committee which consists of Non-Executive Directors and is chaired by the Non-Executive Deputy Chairman. Performance related bonuses are driven by comparate performance targets which are set annually by the Remuneration Committee.

Share appreciation rights are sums paid following exercise of rights under the Bruish Assways Share Approximition Rights Plan 1991, under the rules of which up to 25 per cent of rights granted may be exercised after once year, up to 50 per cent of the grant after two years and the balance after three years, terminating in May 1994. The value of the right, which is payable in each, is the difference between the madest share price when the right is exercised, with an upper limit of 200 per share, and 163p per share.

Lord King held 625,855 share appreciation rights at the time of his rethramont in Chaleman and Director on 5 February 1993, 208,500 of which he exercised in May 1993.

Two Directors have waived fees totalling Q1,330 for the year (1993: one Director £17,500).

Directors' shape options are a rown on the table of Directors' interests on Page 47.

c DEPRECIATION

Fleets are generally depreciated over periods ranging from 14 to 20 years after making allowance for maidual values. Property, apart from freebold land, is depreciated over expected useful life subject to a maximum of 50 years Equipment is depreciated over periods ranging from 3 to 20 years, according to the type of equipment.

d	CAPITAL EXPENDITURE COMMITMENTS		Group		Conguege
	L million	1994	1993	1994	1993
	Capital expenditure authorised but not provided for in the accounts amounts to: Authorised and contracted Authorised but not contracted	5,015 816	5,376 593	5,012 815	5,375 592
		5,831	5,969	5,827	5,967

The outstanding commitments include £4,635 million which relates to the acquaition of Boeing 747-400 and Boeing 777 aircraft scheduled for delivery during the next eight years and £351 million which relates to the acquisition of Boeing 767-300 and Boeing 757-200 aircraft scheduled for delivery during the next three years. It is intended that these aircraft will be financed partially by internal cash flow and partially through external financing, including committed facilities arranged prior to delivery.

At 31 March 1994 British Airways had unused overdraft and revolving credit facilities of approximately £55 million. In addition, British Airways had uncommitted money market lines of £150 million (of which £87 million remained undrawn) and US\$45 million with a number of banks.

British Airways has also arranged a separate 18 year secured aircraft financing facility for US\$2 billion which allows for British Airways to acquire certain new aircraft on a number of alternative bases, including under extendible operating leases. At 31 March 1994 the unused facility was IJS\$296 million. Under the terms of this facility, the financing banks have the right to call for security from British Airways in the event that there is a material adverse change in the financial condition of British Airways or in other limited circumstances if the financing banks are not adequately protected by the value of the equipment financed.

The Group's holdings of cash and short-term loans and deposits, together with committed funding facilities, are sufficient to cover the full cost of all firm aircraft deliveries due in the next two years.

FORWARD TRANSACTIONS IN FOREIGN CURRENCY

The Group had the following forward contracts outstanding:

1994	1993
TOTAL .	T title design

Consu

Maturing within one year	
- to cover payments in US Dollar	
- to hedge future revenue flows (Sterling equipalents)	

- to cover payments in US Dollar	US\$272m	US\$576m
- to hedge future revenue flous (Sterling equivalents)	£79m	£26m
- to cover payments in other currencies (Sterling equivalents)	£4m	L6m
Maturing after one year	.~	~
- to cover payments in US Dollar	119832	1 200 1 5 Am

These forward contracts have been entered into to hedge future capital commitments and future revenues.

	Between one and five years	32	17	31	14
	Over five years	26	32	25	,32
		80	67	77	64

The fleet lessing commitments of the Company include the balance of rental obligations under operating lesses in respect of 13 Boeing 747-400s, 3 Boeing 747-200s, 1 Boeing 747-100, 7 Boeing 767-300s, 4 Boeing 757-200s, 20 Boeing 737-200s, 4 Boeing 737-400s, 2 DC-10-30s and 14 BAe ATP aucraft. In the case of most of these obligations, the Company may be required to meet a small share of any loss on resale if options to extend the lease are not exercised and has entered into related foreign exchange commitments. The fleet leasing commitments of the Group also include 1 Boeing 757-200, 12 Boeing 737-400s, 1 DHC-7 and 2 DHC-8s.

Four Boeing 767-300s originally on operating leases were purchased during the year ended 31 March 1994, funded by mortgage loans.

The principal amount of the total property and equipment commitments above relates to property leases.

15 INVESTMENTS IN THE PLIMSOLL LINE LIMITED

AND THE GALILEO INTERNATIONAL PARTNERSHIP

With effect from 1 August 1993 The Plantoll Line Limited, whose principal subsidiary undertaking is Brymon Airways Limited, became a wholly-twined subsidiary undertaking of Bruish Airways.

The combination of the Covia Partnership and The Galileo Company Limited was completed on 16 September 1993. British Airways investments in these two companies were exchanged for a 14-65 per cent interest in the new entity, the Galileo International Partnership.

The following table sets out the combined cost of the acquisitions, the fair value of the assets and habdines acquired and the resultant goodwill arising which has been set off against Group reserves.

NET ASSETS AND LIABILITIES ACQUIRED

16 INVESTMENT IN QANTAS AIRWAYS LIMITED

British Airways acquired the 25 per cent interest in Qantas Airways Limited through a wholly-owned Australian subsidiary undertaking on 10 March 1993. The goodwill arising from this acquisition and set off against reserves in the British Airways Group in the year ended 31 March 1993 was calculated based on the audited accounts of Qantas and Australian Airlines Limited for the year ended 30 June 1992 which were the latest available. The final goodwill set off has been derived from the audited accounts of the Qantas group for the year ended 30 June 1993.

The following tables set out the revised fair value of the assets and habilities acquired and the resultant goodwill adjustment required.

ASSETS AND LIABILITIES ACQUIRED

Reserves	(1,030)	(460)

For the six months ended 31 December 1993 Qantas Airways Limited announced an unaudited group operating profit of A\$101 million (£45 million) on operating revenues of A\$3,463 million (£1,535 million). Group operating profit after tax attributable to members amounted to A\$72 million (£32 million).

The Sterling equivalents for the statements of operations have been translated at the average exchange rates for the year ended 30 June 1993 and six months ended 31 December 1993; those for the balance sheet have been translated at the closing rate on that date

17 INVESTMENT IN USAir Group, Inc.

Under an agreement made between British Airways and USAir in January 1993, Brussh Airways undertook to invest US\$750 million in USAir convertible preferred stock over a five year period. The investment was to occur in those stages and was subject to a number of conditions, including regulatory approval by the US Government. Approval of the first stage, involving the investment of US\$300 million to give British Airways a holding equivalent to 24.6 per cent of USAir's equity share capital on an undiluted basis and an imitial code sharing agreement, was given by the U5 Socretary for Transportation in March 1993. The preferred stock so acquired by the Group is convertible at the Group's option at any time on or after 21 January 1997 association common stock. Until converted, the preferred stock is entitled to cumulative quarterly cash dividends of seven per cont per annum.

In order to maintain its holding equivalent to 24.6 per cent of USAir's equity capital, the Group invested a further US\$100.7 millions in convertible preferred stock in May 1993 pursuant to the exercise of pre-emptive rights relating to the 1000 me of new common stock by USAir. This new series of convertible preferred stock is emulod to cumulative quarterly each dividends of 0.5 per cent over LIBOR.

The present holdings of convertible preferred stock entitle the Group to 22 per cent of the current voting rights in USAs. If not converted, the preferred stock is finally redcomable in 2008. In certain extremely unfilledly circumstances, the Group can be sequired to invest a further US\$450 million over the next four years through two additional purchases of preferred stock in USAsse.

Under the above arrangements, the Group's current interest in the results of USAir is hunted to its fixed professed of release, all of which have been received to date, and only such dividends have been included in these accounts (see Note 1).

The US Government has renewed British Airways current code sharing authority for 65 destinations for a further period of 12 months, but has deferred action on British Airways application to extend these arrangements further

SUMMARISED FINANCIAL INFORMATION

The audited statement of operations of USAir for the year ended 31 December 1993 and its belonge disect at that dots, prepared in accordance with United States generally accepted accommissing principles, are standarded before:

17 INVESTMENT IN USAx Group, Inc. postmark

For the three months ended 31 March 1994 USAII announced as unaudeed opening loss of US\$136 million (£94 million) on opening revenues of US\$1,686 million (£1,134 million) and a res loss of US\$216 million (£145 million) applicable to common stockholders, and that it expected a pre-tax loss for the full year to 31 December 1994 in excess of the US\$350 million loss reported for 1993.

The Sterling equivalents for the statements of operations have been translated at the average exchange rates for the year ended 31 December 1993 and the three months ended 31 March 1994; those for the balance shoet have been translated at the closing rate on that date.

In its Annual Report on Form 10-K for the year ended 31 December 1993 filed with the US Securities and Exchange Commission, USAir made the following statement:

"Unless USAir is able to reduce its operating costs, present and increasing competition from low cost, low fare airlines in USAir's markets could have a material adverse impact on USAir's cash position and, therefore, its abdity to sustain operations. In March 1994, USAir announced that it had initiated discussions with the leadership of its unionized employees regarding wage reductions, improved productivity and other cost savings. The outcome of these negotiations is uncertain, but if nimely agreements are not reached, the company may seek other restructuring alternatives."

If these negotiations are not successfully concluded, within the timescale which the financial position of USAx requires, then the Directors believe that a provision for permanent diminution in value is likely to be required against the present book value of the Group's investment of £275.3 million (US\$400.7 million).

In March 1994 British Airways announced that it would not make any additional investments in USAir until it has been reassured of the ongoing viability of the business.

The terms of the 9.75 per cent Convertible Capital Bonds allow the holders to convert into British Airweys Plc ordinary shares during the period June 1993 to 2005 on the basis of one ordinary share for each £2.34 (adjusted for the effect of the 1993 rights issue) of Bonds held. On 15 June 1993, the date of the first opportunity for conversion 1.615,949 ordinary shares were issued in exchange for 3,825,837 Bonds. The terms also provide that the conversion 2005 the Company may require remaining bondholders to convert their Bonds into ordinary shares of the Company which would be sold on their behalf. If the proceeds of such a sale are less than the issue prior of the Bonds the Company has to fund any deficit from its own resources. Full conversion of the remaining Bonds would require the issue of 2 *5,209,193 ordinary shares.

The market closing prices of the Bonds and the ordinary shares at 31 March 1994 as quoted in the Loudon Stock. Exchange Daily Official List were 190.5p and 404p each respectively.

d INTEREST RATE AGREEMENTS

To reduce interest rate risk, British Airways has entered into single currency interest rate swap arrangements effectively to change the interest payable elements of parts of its underlying loan and lease obligation: from variable to fixed rates. Accordingly, while the Group is exposed to market risk to the extent that receipts and payments under interest rate agreements are affected by market interest rates from time to time, any such fluctuations will be offset by changes to interest and interest-related payments made on variable rate loan and lease obligations. British Airways accounts for interest tax: agreements as hedges.

Outstanding single currency interest rate swap agreements are summarised as follows:

Inderest rates

	Notional principal balance	Termnation dates	Pinol payable
At 31 March 1994 US Dollar Sterling	US\$630m £100m	2000 - 2003 1994 - 1997	8.4% - 9.4% 9.5% - 10.0%
At 31 March 1993 US Dollar Sterling	US\$659m £100m	2000 - 2003 1994 - 1997	8 4% - 9.9% 9.5% - 10.0%

In addition British Airways has entered into cross currency interest tate swaps in relation to specific bearowings, involving the exchange of interest payments in one specified currency for interest receipts in another specified currency.

Outstanding cross currency interest rate swap agreements, resulting in the following interest rates payable (comprising both fixed and variable rates), are:

Interest set

	Notional principal balance	Termination dates	Miyoble
At 31 March 1994 Sterling	€83m	1997 - 1998	3.2% - 10.2%

29 DIRECTORS' AND OPFICERS' LOANS AND TRANSACTIONS

No loans or credit transactions were outstanding with Directors or Officers of the Company at the end of the year which need to be duclosed in accordance with the requirement of Schedule 6 to the Companies Act 1965

30 PENSION COSTS

British Arrways operates two principal defined benefit pension schemes in the UK, the Airways Pension Scheme (APS), which is closed to new members, and the New Airways Pension Scheme (NAPS) of which all new permanent employees over the age of 18 employed by the Company and certain subadiary undertakings in the UK may become members. The assets of these schemes are held in separate trustee-administered funds.

Benefits provided under APS are based on final average pensionable pay and, for the majority of members, are subject to increases in line with the Retail Price Index. Those provided under NAPS are based on final average possionable pay ruduoud by an amount equivalent to one and a half times the Government's lower earnings limit and are subject to Retail Price Index increases up to a maximum of five per cent in any one year.

Most employees engaged outside the UK are covered by appropriate local arrangements

Employees' contributions range from 5.75 per cent to 8.5 per cent of full pensionable pay in APS and from 3.75 per cent to 6.5 per cent of full pensionable pay less one and a half times the lower earnings havit in NAPS.

The latest actuarial valuations of APS and NAPS were made as at 31 March 1992 by an independent firm of qualified actuaries, R. Watson & Sons, using the attained age method for APS and the projected user method for NAPS. These showed that no further employers' contributions were required in respect of APS while for NAPS an employers' contribution equal to an average of two times the employee's contribution for the year 1 April 1993 to 31 March 1994 (two times the employee's contribution for 1992-93) was appropriate. The next valuations of the two schemes will be carried out as at 31 March 1995.

L million	1994	1995
All amounts recognised as costs were either funded or paid I rectly. Employers' contributions (calculated as set out above for APS and NAPS) charged in the accounts were:		
Airways Pension Scheme New Airways Pension Scheme Other pension schemes and provident funds – mainly outside the United Kingdom	44 10	42 10
	54	52

At the date of the actuarial valuation the market values of the assets of APS and NAPS amounted to £2,825 million and £927 million respectively. The value of the assets represented 112 per cont (APS) and 105 per cont (NAPS) of the value of the benefits that had accrued to members after allowing for assumed increases in earnings. In the case of APS, the accurated value of the assets together with future contributions from employees was sufficient to cover both past and future service habilities. In the case of NAPS, the accurated value of the assets together with future contributions from employees was sufficient to cover past service liabilities and some future service liabilities. The employer's contribution is intended to make up the belance of future service liabilities. The principal assumptions used in the actuarial valuation were that, over the long term, the annual return on investments would be 2.5 per cent higher than the annual increase in carnings and 4.5 per cent higher than annual increases in dividends. Annual pension increases, over the long term, were assumed for APS to be at the same level as dividend increases and for NAPS at a level one per cent lower.

Employers' contributions in respect of overseas employees have been determined in accordance with best local praemos.

31 LITIGATION

- A number of logal claims have been made against the Company by Virgin Atlantic Airways Lamited. Having segaral to legal advice received, and in all the circumstances, the Directors are of the opinion that these claims will not give rise to hebilities which will in the aggregate have a material effect on these accounts
- b There are a number of further identified legal and other claims which emanate from unernasional audine operations and other activities of the Group for which the Directors have made what they believe a appropriate provision
- c In addition, experience with litigation and regulation has led the Directors to conclude that it is predent to continue to there forward £22 million of a provision made in prior years.

UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (US GAAP) INFORMATION

US GAAP ACCOUNTING PRINCIPLES

The financial statements are prepared in accordance with accounting principles generally accepted in the United Kingdom which differ in certain respects from those generally accepted in the United States. The significant differences are described below.

- Deferred taxation—British Airways provides for deferred taxation using the hability method on all material timing differences to the extent that it is probable that the habilities will crystallise in the foreseeable future. Under US GAAP, as set out in Statement of Financial Accounting Standards (FAS) No. 109 "Accounting for Income Taxes", which the Group adopted on 1 April 1993, deferred taxation is generally provided on a full hability basis. The cumulative effect of the change at that date, from FAS 96 to FAS 199, was not significant.
- b Goodini? British Airways sets off goodwill arising on consolidation directly against retained earnings. Under US GAAP, goodwill arising on consolidation is amortised over its useful life. For the purposes of determining the differences between UK GAAP and US GAAP, the expected useful life of goodwill has been taken to be 40 years.
- c ryoperty and fleet valuation. Under US GAAP, tangible assets must be stated at cost less accumulated deprectation in the financial statements. The valuation of properties at 31 March 1984 and fleet at 31 March 1988 incorporated by British Airways in its financial statements would not therefore have been included in financial statements properted in accordance with US GAAP and the subsequent charges for depreciation would have been correspondingly lower. When such assets are sold, however, any revaluation surplus thus realised would be reflected in income.
- d Purchase accounting Under US GAAP, as set out in FAS 109, a deferred tax liability is recognised for the tax effects of differences between the assigned fair values and tax bases of assets acquired whereas, under UK GAAP, no such liability is recognised. As a result of recognising such a deferred tax liability the amount of goodwill arising on consolidation increases correspondingly. Under US GAAP, the deferred tax liability would be amortised over the same period as the assets to which it relates.
- e Forward exchange contracts Under US GAAP, the notional gain or loss arising on the translation of certain outstanding foreign currency forward exchange contracts at each balance sheet date, at the forward rates of exchange ruling at that date, would have been included in the determination of net income. British Airways does not take account of such notional gains and losses.
- f Dividends Under UK GAAP, dividends are recorded in the financial statements for the period to which the dividend relates. Under US GAAP, the hability for dividends is recorded in the financial statements when doclared. The proposed final dividend at 31 March 1994, and the related advance corporation tax, would not therefore be included in the financial statements for 1994 prepared in accordance with US GAAP.
- Foreign currency translation. Aircraft which are financed in whole or in part in foreign currency, either by loans, finance lease obligations or hire purchase arrangements, are regarded together with the related habilities as a separate group of assets and liabilities and accounted for in foreign currency. The amounts in foreign currency are translated into Sterling at rates ruling at the balance sheet date and the net differences arising from the translation of sucraft costs and related foreign currency loans are taken to retained earnings. Under US GAAP, the cost of these aircraft would be fixed in Sterling at the rate of exchange ruling at the date of the original acquisition, lease or hire purchase and the exchange gain or loss on the related foreign currency loans would be reflected in income
- h Gains on sale and leaseback transactions. Under UK GAAP, gains arising on sale and leaseback transactions are recognised as part of income to the extent that the sale proceeds do not exceed the fair value of the assets concerned. Gains arising on the portion of the sale proceeds which exceed the fair value are deferred and amortised over the minimum lease term. Under US GAAP, the total gains, including any realised revaluation gains, would be deferred in full and amortised over the minimum lease term.
- Post-retirement medical benefit obligations. With effect from 1 April 1992 British Airways has accounted for its obligations in respect of post-retirement medical benefits in accordance with UK Urgent Issues Task Force Abstract 6, which accords with FAS 106 'Employers' Accounting for Postretirement Benefits Other Than Pensions' Under UK GAAP, the cumulative effect of this change at that date was dealt with as an adjustment to opening retained earnings at 1 April 1992. Under US GAAP, this adjustment would have been dealt with as a cumulative effect of change in mathed of accounting in the determination of net income for the year ended 31 March 1993.
- J Pension costs: Under US GAAP, the cost of providing pensions is attributed to periods of service in accordance with the benefit formulae underlying the pension plans. The resultant projected benefit objection is metched against the correspondence of the underlying plan assets and unrecognised actuarial gassis and losses in determining the pension cost of credit for the year. The net periodic pension costs for these plans for the year ended 31 March 1994 amounted to £44 million (1993: £42 million) under UK GAAP compared with an estimated cost of £111 million (1993. £114 million) under FAS 87 'Employers' Accounting for Pensions'. The resultant increase in operating costs of £67 million (1993: £72 million), net of related deferred tax of £22 million (1993: £24 million), would reduce their successe under US GAAP by £45 million (1993: £48 million), and would be reflected in the consolidated bilance sheet as an addition to accrued pension costs.

The estimated effect of the significant adjustments to net income and to shareholders' equaty which would be required if US GAAP were to be applied instead of UK GAAP is summarised on Pages 40 and 41

UNSOLICITED MAIL

British Airways is obliged by law to make its share register available on request to other organisations who may then use it as a mailing list. This may result in your receiving unsolicated mail. If you wish to limit the receipt of unsolicated mail you may do so by writing to the Mailing Preference Service, an independent organisation whose services are free to you. Once your name and address have been added to its records, it will advise the companies and other bodies which support the service that you no longer wish to receive unsolicited mail.

If you would like more details please write to: The Mailing Presence Service, FREEPOST 22, London W1E 7EZ. British Airways arks organisations which obtain its register to support this service.

GLOSSARY
