NOTES TO THE ABBREVIATED ACCOUNTS

FOR THE YEAR ENDED 31 DECEMBER 2001

1 Accounting policies

Basis of accounting

The accounts have been prepared under the historical cost convention as modified by the revaluation of certain fixed assets and in accordance with the Financial Reporting Standard for Smaller Entities (effective March 2000).

Turnover

Turnover represents the invoiced value of goods and services supplied by the company net of VAT.

Depreciation

Depreciation is provided on all tangible fixed assets at rates calculated to write off the cost or valuation, less estimated residual value, of each asset over its expected useful life, as follows:

Plant and machinery

10% - 25% per annum on cost

Stocks

Stocks, including work in progress, are consistently valued at the lower of cost and net realisable value.

Foreign currencies

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. All differences are taken to the profit and loss account.

Leasing and hire purchase commitments

Assets held under finance leases and hire purchase contracts, which are those where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet and depreciated over their useful lives.

The interest element of the rental obligations is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding.

Rentals paid under operating leases are charged to income on a straight line basis over the lease term.
