1 ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008) and the requirements of the Statement of Recommended Practice, Accounting by Limited Liability Partnerships

Turnover

Turnover represents net invoiced sales of services, excluding value added tax

Turnover represents the value of services provided during the year. This value represents the amounts expected to be recovered from clients based upon time spent and expenses incurred excluding VAT. Fee income is recognised as the service provided progresses and the right to consideration is secured, except in respect of certain services whereby the final outcome cannot be assessed with reasonable certainty.

Fee income in respect of contingent fee services is recognised in the period in that the contingent service occurs when it can be assured the fee can be collected.

Unbilled fee income for services provided is included as work in progress within other debtors.

Turnover also includes salary earned by the members personally which has been taxed at source. Income tax and national insurance deduction has been taken to the relevant members' current account.

Goodwill

Goodwill, being the amount paid in connection with the acquisition of a business in 2003, is being amortised evenly over its estimated useful life of ten years.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off the cost less estimated residual value of each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter:

Fixtures and fittings	- 25% on cost
Motor vehicles	- 25% on reducing balance

Hire purchase and leasing commitments

Assets obtained under hire purchase contracts or finance leases are capitalised in the balance sheet. Those held under hire purchase contracts are depreciated over their estimated useful lives. Those held under finance leases are depreciated over their estimated useful lives or the lease term, whichever is the shorter.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of the future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.

Disbursements

Disbursements are not included within fee income or expenses, but are netted off against each other.

Members' remuneration

The profits of the Limited Liability Partnership are divided among the members in accordance with the agreed profit sharing arrangements.

A member's share of the profit or loss for the year is accounted for as an allocation of profits.

The firm's drawings policy entitles each member to draw a proportion of their share of profits in monthly instalments subject to the cash requirements of the business. The balance of profits is shared among the members and made available for drawing (subject to the cash requirements of the business) in the proportions determined by the members' agreement.
