#### **ACCOUNTING POLICIES**

#### YEAR ENDED 30 JUNE 2010

#### BASIS OF ACCOUNTING

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

#### TANGIBLE FIXED ASSETS

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows

Plant and machinery

25% on cost

No depreciation has been charged on property as the residual value of the property is directly underpinned by an interest in the freehold of the site and the rental stream derived there from. No diminution in value of the property is considered to occur over time since the value relates to the land and therefore no depreciation is provided.

#### **INVESTMENTS**

Fixed asset investments are stated at cost less provision for diminution in value. Current asset investments are stated at the lower of cost and net realisable value.

#### **DEFERRED TAXATION**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date will result in an obligation to pay more, or a right to pay less or to receive more tax with the following exceptions

• provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold,

#### **ACCOUNTING POLICIES (Continued)**

#### **YEAR ENDED 30 JUNE 2010**

- provision is made for deferred tax that would arise on remittance of the retained earnings of overseas subsidiaries, associates and joint ventures only to the extent that, at the balance sheet date, dividends have been accrued as receivable.
- provision is made for deferred tax that would arise on the realisation of the current asset investments of their carrying value and valuation at the balance sheet date,
- deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date

#### TURNOVER

Where the amount of investment income is uncertain, income is not accrued but is accounted for in the period in which it is received
