The 2006 annual report is intended
to be a travel guide into
the world of Finnair
We are a reliable airline, we have
a comprehensive route network
and we provide first class service
Our customers are satisfied

We realised in time the growth
potential of Asian traffic and got
down to work in the company
we could tell people how good our
connections are via Helsinki from
Europe to Asia and vice versa

A map of Asia and new
aircraft This is good material for
a travel guide Shall we continue
with these themes?

*Indeed we have already
achieved our vision "Best in
Northern Skies, European
Excellence" Now we will empha-
size our role in traffic between
Europe and Asia*

*Absolutely we have a story
of strong growth to tell
we must remember to mention
that we are in strong shape
financially, as we start to
invest in a new Asian fleet*

*Let's do that I, for one,
have complete faith in this*

CONTENTS
