| General information    | 212 |

nanca: <의

Other francial and non-francial KPIs

Please see pages 32 to 33 for a description of the Group's financial and non-financial KP's and now friey link to the Circup's strategic priorities

G4S is the world's leading global, integrated security company specialising in the delivery of security and related services across six continents.

We offer a broad range of security products and services on a single, multi-service and integrated basis. We have been investing in technology, software and systems. The Group's technology-related security revenues were £2.45 billion\* in 2017 (2016: £2.2 billion).

Technology-related security revenues are from the sale of security technology (£0.7 billion) and security solutions which compine our people with technology (technology enabled security £1.75 p. on).

### OUR BUSINESSES

### SECURE SOLUTIONS (84% OF CORE BUSINESS REVENUES)

**IMAGE REMOVED** 

### SECURITY SERVICES AND TECHNOLOGY (77%)

### Market

G4S operates an integrated security pushess in more than 90 countries across the globe. The global security market has structural growth qualities (see page 8 for a description of the growth drivers) and is highly fragmented there are few international suppliers and our competitors are typically smarler local and regional companies. The security industry is seeing growing demand for technology-enabled and integrated security solutions (which combine people and technology) to de ver cost effective serunty lespenally in developed markets

### Our approach

Against the backdrop of growing demand, we design market and detiver a wide range of security and related services and our global footbrint provides valuable access to a highly diversified customer hase in markets around the world. Some traditional security markets are commoditised and significant bilice competition exists - We aim to differentiate G4S by providing industry leading security solutions that are innovative ireliable and efficient. Our scale and focus on productivity support, our cost competitiveness and our sustained investment n professional staff, technology, software and systems ename us to provide inhovative and reliable solutions for our rilstomers on a stand alone on integrated basis

### CARE & JUSTICE SERVICES (7%)

### Market

G4S Care & justice Services are concentrated in the UK and Australia. The market for the private provision of calle and lustice services is fairly consolicated with a small number of large providers. Larger companies are usually better equipped to deliver the highly specialised services in this sector, working with a diverse supply chain including the voluntary sector. In the UK the market environment is mature with limited growth opportunities in the short to medium term we expert the environment to be more positive in Australia

### Our approach

We aim to acrieve positive outcomes for those in the care and justine system. C45 will only offer custody, detention irenabilitation and care services where we can access a qualified talent populand where the political, egal, numan rights and regulatory framework s consistent with our Croup values and results in acceptable operational, commercial and reputational risk

### CASH SOLUTIONS (16% OF CORE BUSINESS REVENUES)

**IMAGE REMOVED** 

**IMAGE REMOVED** 

### CASH SOLUTIONS

### Market

G45 Cash Solutions is one of a small number of large global cash businesses and is the market leader or number two in 40 of its 42 markets. Each market is highly regulated often by central banks, and the business requires significant infrastructure and expertise, G43 competes with local hational and a small number of international competitors. Cash volumes in most developed markets are flat or graduary decrining at an aggregate market level. Cash usage continues to increase n en enging markets (see page of for cash usage trends). The Group seesisign frant revenue growth opportunities n providing technology solutions to reduce the nost and ncrease the ease of using rash for panks and retailers

### Our approach

We transport process recycle, store securely and manage cash, and provide secure international logistics for cash and valuables. Our strategy is designed to enable us to aggregate cash handling volumes through cost leadership and product and service differentiation

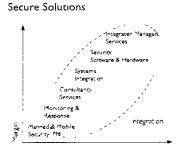

We hyest in ferning ogy and sell proprietary rash management systems which combine skilled professionals with software inardware and operational support in an integrated managed service. To support cost leadership we strive for a consistent operating model and use shared services to maximise efficiency

We operate around the globe, focusing on markets where we are able to bild and sustain a material market share in our key service offerings. Outside the traditional cash market, there remains significant opportunity for refail rash and bank branch automation - services that lave mainly remained in house until now G4S plays a valuable and an important role in society. We provide direct employment for over half a million people around the world and make a difference by helping people to live and work in safe and secure environments. G4S takes a fully-integrated approach to its strategy and Corporate Social Responsibility. This is reflected in this report and please see page 18 for more information on our CSR approach and impact on society.

### **OUR STRATEGY**

Our strategy addresses the positive, long-term demand for security and related services, and our enduring strategic aim is to demonstrate the values and performance that make G4S the company of choice for customers, employees and shareholders.

We aim to do this by delivering industryleading, innovative solutions and outstanding service to our customers, by providing engaging and rewarding work for employees and by generating sustainable growth and returns for our shareholders. These aims are underpinned by the key programmes in our strategic plan

### **OUR VALUES**

Cash Solutions

Our people and values underpin everything we do. Our 'One G4S' model brings all areas of our business together and is designed to ensure that the way we go about our business is consistent across our global operations and is strongly aligned with our strategy and our values

We believe that this approach will generate significant benefits for our customers, employees and shareholders

Please see pages 22 to 58 tor case studies of our values in action and sustainable development goals

We act with . INTEGRITY AND RESPECT

We are passionate about SAFETY SECURITY AND SERVICE EXCELLENCE

We achieve this through INNOVATION AND TEAMWORK

Since 2013, revenues from core businesses have grown by 17% and Adjusted EPS by 48% while generating operating cash flow of £2.5 billion.

The Group's strong cash generation has enabled us to invest in growth, pay dividends of more than £700 million and at the same time strengthen the Group's financial position, reducing net debt/Adjusted EBITDA to 2.4x at the end of 2017.

Over the same period we have created innovative new products and services for our customers and we greatly improved safety performance for our employees.

We are continuing to invest in growth, technology and productivity in order to capitalise on our strong positions and to support our aim of delivering sustainable, profitable growth.

### **OUR STRATEGY**

OUR STRATEGY ADDRESSES THE POSITIVE LONG-TERM DEMAND FOR SECURITY AND RELATED SERVICES AND OUR ENDURING STRATEGIC AIM IS TO DEMONSTRATE THE VALUES AND PERFORMANCE THAT MAKE G4S THE COMPANY OF CHOICE FOR CUSTOMERS, EMPLOYEES AND SHAREHOLDERS.

### Our business

The Group has two business segments, each with a number of key service lines

Secure Solutions, comprising

- · Security incorporating risk consulting software, manned security, software and systems and integrated security solutions
- · Facilities management including integrated security and FM services
- Care & Justice Services, comprising custody, health, transportation, care and rehablitation nitre UK and Australia

Cash Solutions, comprising

- · Cash fransbortation, cash processing and A. M. services
- . Smart safes aric cash recycling
- Cash Technology comprising software and service solutions

### 2017 Results highlights - core businesses

Revenues rose by 30% to 47.4 billion. The combination of growing revenues and improved productivity saw the Group's adjusted earnings per share rise by 5.9% to 179 pence penchare. The Group generated operating cash flow of £527 million, equivalent to 106% of Adjusted PB-TA in line with our guidance of a normalised rate of over 100%

### PEOPLE AND VALUES

### Organisation

Over the past four years we have invested in sales, business development, terhnology and our support and control systems,

processes and resources. We now have sufficient strength and depth in these areas to enable us to mplement the next, critical phase of our organisational development and with effect from I January 2018 we have reorganised the Group-wide management of our core pusiness. The principal features of this change are

- · Creation of a Global Cash Solutions division
- Consolidation of our Secure Solutions businesses nto four regions, Americas, Europe & Middle East, Africa and Asia

Our new organisation will enable us to strengthen further our strategic, commercial and operational focus in each of our core service lines. We will continue to build and utilise shared services for the provision of efficient and fit-for-purpose support functions to all bus nesses and this element of our organisation ac development has significant unrealised potential

The biographies of the leaders of our principal businesses are set out on pages 70 and 71

As outlined in the market growth section on pages 8 and 9, technology is a growing part of our Secure Solutions and Cash Solutions services

In Secure Solutions, we continue to build our capabilities to design and deliver integrated security solutions - combining people and technology to offer our customers more efficient and valuable security solutions (see pages 24 to 27). Today we have more than £2.45 bill on technology-related security revenues

Our integrated approach to designing and delivering security solutions heips us to differentiate our value proposition in order to win, retain and grow contracts with key customers

Our new Secure Solutions organisation will enable us to increase collaboration and co-ordination across all of our markets which, in turn, will enable us to rationalise and target our product and business development, marove global account development, harmonise marketing and transfer operational best practices more rapidly

Our Care & justice Services are concentrated in the UK & Australia where we have significant resource and capability to win and deliver complex public services. Our focus is on rigorous pre-bid evaluation of contracts and operational delivery. We expect the overall cash generation of these services to improve as certain legacy contracts expire over the next 18 to 24 montris

in our Global Cash Solutions division we have prover expertise in providing terhnology-enabled cash solutions and services that improve the control, ease of use and efficiency of our rustomers' cash management in the United States we have established a market-leading position in the provision of cash management technology for large format retall stores. We believe that our proven lash management technology and our people provide G4S with a substantial opportunity to

extend and grow new products and services across our global markets. At the end of 2017 G4S cash management technology was deployed at over 19,500 locations in North America, Europe, Asia Pacific and Africa, an increase of more than 30% over the prior year 'M'e also made progress in improving productivity hia number of markets and we now have plans to apply these improvements across all of our cash. solutions businesses

I am confider tithat our new organisation will enable C4S to take full advantage of the exciting growth opportunities in our markets and to successfully execute our strategy

### Our CSR approach and contribution to society

As a global leader in security and related sentices, corporate social responsibility is very important to G4S and it forms alkey part of our strategy. We are trusted to care for some of the world's most valuable assets and to ensure the safety, protection and welfare of people around the world, often in complex and demanding operating environments

Conducting our business in a way which is officially responsible, safe and consistent with the company's values and standards, is an essential element of our

The Group is committed to sustainability and the core principles of the IJN Global Compact are reflected in our policies halues and business activities today

We recognise that business has an important role in the achievement of the UN Sustainable Development Goals On page 18 of this report, ve highlight where G4S s helping to advance these goals and make a positive difference to society and communities around the world

We expect all colleagues to uphold G4S' values in whatever role they play In return, our sommitment s to provide meaningful work, fair reward and the opportunity to develop. Our employees often work n inherently hazardous environments and we equip and train our employees to ensure they are as safe. as possible

We regularly ask staker olders from inside and outside the company to provide input into an analysis of our material CSR issues to help set phonties. See page 83 for more information on the CSR materiality review that was undertaken in 2017

Our CSR approach covers a broad range of areas with three material priorities, health and safety numan rights and anti-bribery and corruption

in June 2017. G4S was selected as a constituen. company of the FTSE4Good index, renognising our strong commitment to social responsibility and sustainable busicess practices

### Technologyrelated security revenues in 2017

# /ero harm

Is our health and safety goal

Reduction in employee fatalities from 2016 to 2017

### Culture - Embedding our values

Underpinning our culture are the Group's values which govern and guide the conduct of everyone at G4S

### Employee-communication programme

Following the launch of our values in March 2016 we conducted an extensive employee engagement programme to raise awareness and deepen understanding of G45' corporate values. We have developed a training programme for managers and our values are an essential part of induction and training for new employees "Ve are embedding our values into existing processes, governing all aspects of our business including sales, operations and performance management. Where actions are required - for example, an improvement in the safety performance of a particular business - leaders and managers will have specific objectives in order to make sure the actions are prioritised appropriately (see Key Performance Indicators page 32)

### Speak Out

We continue to encourage colleagues to "Speak Out" if they are aware of behaviour which is not consistent with our values or policies. There are many ways in which colleagues can raise concerns, with supervisors or managers, with their local HR team or through the global, independent whistleblowing systems. Our case management system provides improved visibility of whistleblowing cases from across the Group, and provides vital information to our Group Ethics Steering Committee

tibelieve that the conduct of the vast majority of our employees is consistent with our values and that this has been 'and remains - the cornerstone of our customer sentice and commercial success. We know, however, that even isolated instances of poor conduct are unacceptable and can be very damaging. It is therefore important that we continue to promote good conduct and the use of Speak Out

### Health & Safety

The wellbeing and safety of our employees and those in our care remains a key priority for the Group executive and global leadership teams. We work in an inherently hazardous industry, we fravel extensively and many of our colleagues are trained and deployed to protect our customers and their property. As a result, road-traffic accidents and criminal attacks are inherent risks we face n delivering some of our services. We have therefore nivested in a sustained programme to strengthen our health and safety policies, practices and training performance across the Group with the aim of improving safety

The number of road-traffic fatalities has decreased by 48% since 2013 when the first G4S road-safety programme was jaunched. There has also been a reduction in attack-related fatalities in our Cash Solutions businesses. However, the number of armed attacks has not changed and so we continue to work with the relevant authorities to mitigate the elevation risk in some of our services. Sadly, during 2017, 25 of our colleagues rost their lives in work-related accidents. and affacks, compared with 47 fatalities in 2016

Although we are pleased that there are clear signs of an overall cultural shift within G4S in our approach to safety we also know that there is more to do and our plans reflect this Vive are firmly committed to improving our health and safety performance and our goal remains zero narm

### CUSTOMERS AND SERVICE **EXCELLENCE**

In both Secure Solutions and Cash Solutions we have been investing in innovative products and service excellence, to grow the business. with new contracts for new and

existing customers, and to improve customer retention, which averages around 90%, reflecting our exit from some low-margin contracts and retaining some of the Group's largest contracts in 2017—as discussed in this report

# IMAGE REMOVED

### TECHNOLOGY AND INNOVATION

Increasingly our customer offering includes technology in the form of systems and software Technology-related security revenues were £2,45 pilion (2016 £2.2 billion) in 2017

Overall we won new business with an annual contract value of £ 4 billion and total contract value of £2.5 billion in 2017

### OPERATIONAL EXCELLENCE AND PRODUCTIVITY

In 2017, our operational excellence and productivity programmes delivered further penefits, providing the Group. with the financial flexibility to hvest in service and product

development as well as improving the Group's adjusted profit before interest, tax and amortisation (Adjusted PBITA) from core businesses by 4.2% to £496 million

With our more focused pusiness designed around service delivery, there is further apportunity to streamline general and administrative processes and share resources to generate greater efficiency. The Secure Solutions, Clobal Cash Solutions and Care & Justice Services segments will share facilities, infrastructure and functional services. Our detailed plans will enable us to begin implementing changes and to realise the first phase of these penelits during 2018 and 2019

One example of where we are introducing more streamlined processes is in our manned security business with a new lean-business process called "Javelin" (see page 29), which combines HR, operations, finance and back-office functions, and should ensure we schedule our people more efficiently and are able to reduce the time between when we do the work and livnen we bill for it, and provide accurate and timely management information to customers, lavelin was aunched in Irelandin November 2017 and we will be commencing molementation in the UK during 2018

value of new business won

Reduction in annual road fatalities since 2013

in 2017

### FINANCIAL AND COMMERCIAL DISCIPLINE

The new capital and contract processes we hiroduced in 2013 are neiping us to apply capital with greater consistency and ngour Strengthening our working

capital management was also a priority for our finance and line management in 2017 and we have maintained the increased weighting of operating cash flow in our annual incentive plans I am pleased to report that at 31 December 2017, our net debt to Adjusted EBITDA had reduced to 24x, down from 28x at the end of 2016

### Portfolio programme

The portfolio programme we announced in 2013 has materially improved our strategic focus and the programme is substantially complete. Since 2013 we have divested 41 businesses (with annual revenues of c.£1.3 bill on and Adjusted PBITA of £46 million) realising gross proceeds of approximately £520 million in 2017 we closed four businesses and sold a further nine, real sing gross proceeds of £166 million

### Performance

### Statutory results

Revenue growth was 3.1% and earnings per share rose by 18.8%. A more detailed review of the stafutory: results can be found on page 38, and a reconcilation to results from core businesses is provided on page 44

### Core business performance

Supported by the continuous investment in sales and pusiness development resource and new technologyenabled services, revenues rose by 3.2% to £7.4 billion Consistent with the commercial practice we adopted several years ago, we have continued to be very disciplined on contract bidding and, whilst this constrained revenue growth in some markets, if underbins sustained profitable growth. The combination of growing revenues and improved productivity saw the Group's adjusted earnings per share rise by 5.9% to 1.19 pence per share. In 2017 the Group generated operating cash ow of 106% or Adjusted PBITA (2016-133%)

### Net debt

Growth in profits and robust cash flow generation, together with net disposal proceeds of £156 million, helped reduce the Group's het debt to Adjusted EBITDA to 24x (2016, 2.8x) in line with our plans

### Market Environment

The global demand outlook for security services remains positive as we outline in more detail on pages 8 and 9. We expect this positive demand to continue arourid the world in 2018 with the possible exception of the Middle East where the effect of prevailing fiscal and macroeconomic conditions remains uncertain

In the UK & Ireland region, the Brexit negotiations have created some uncertainty around UK GDP growth, but, n this market, we believe G4S is a defensive business, with a number of long-term contracts. We continue to nivest in innovative products and services for customers. to drive growth in the region

### Outlook

The outlook for the Group is positive G4S' strong market positions, growing technology-enabled revenues, positive cash generation, commercial discipline and on-going productivity programmes provide substantial confidence that the Group is very well positioned to deliver a strong performance over the next three years To real seith is potential G4S is investing in

- · Sales, technology and new products, services and solutions to support our aim of growing revenues from core our nesses by an average of 4-6% per annum
- Restructuring and efficiency programmes to deliver returning operating gains of £70 million to £80 million by 2020, through efficient organisation design and leaner processes. Accit onal refinancing gains of around £20 million are also anticipated by 2020 A portion of these gains will be re-invested in growth, with the majority expected to benefit the nottom line

We intend to remain soundly financed with average operating cash flow coliversion of more than 100% of Adjusted PBITA and a net debt to Adjusted EBITDA ratio of less than 25x. Priorities for excess cash will be rivestment, divicends and, in the hearitems, further leverage reduction

Following the achievement of the Group's leveragereduction target, the cirectors propose a 5% increase in the final dividend to 6 life (DKK 05097) reflecting the board's confidence in the Group's performance and prospects. Our policy is to increase the dividenci in line. with the long-term growth in earnings

Our customers and our colleagues are at the core of G4S and, in closing, I would like to thank our customers for placing their trust in G4S and to pay thoute to our 5 T0,000 colleagues who serve our Justomers every day

### Ashley Almanza

Croup Chief Executive Officen

**IMAGE REMOVED** 

See page 44 for the basis of results of core busir esses and an explanation of Alternative Performance measures is on page 35

### The world continues to face a series of divergent and emerging threats. Governments and companies require holistic approaches to ensure the security of their people and assets both at home and abroad.

Inind-party commentators such as Freedonia expect the global security industry to grow 5-6% per annum from 2015 to 2025 (see chartish page 9) With our global footbrint and attractive array of products and services we are well positioned to meet this increased demand

### a. Soince Seculity Systems Integration Report, 1995 Mark+ 2017

### MARKET-GROWTH DRIVERS

### SECURE SOLUTIONS

### Demand for security is increasing across the globe

The evolving nature of terrorism. which continues to threaten societies, has elevated security risks and concerns in many parts of the world

### Intense price-based competition in basic manned security and basic equipment installations

Barriers to entry in basic manned security and basic equipment. nstallations are low, which can result in intense competition in some markets

Comparies like G4S are therefore looking for ways to increase differentiation such as global breacth or technology and product vity mprovement to offset ance pressure

### Customers buying processes increasingly complex

The increasing use of technology, globalisation and the growing threat of cyber security breaches mean that the procurement of security services has moved away from operations to a more strategic role in an increasing number of customers' organisations The global market for security systems integration is estimated to be \$80or by 202 <sup>™</sup>

### Technology reshaping security industry

Wrilst labour costs have increased or are increasing, particularly in developed markets, the cost of sophisticalled security technology is reducing Combined with the additional data and assurance that comes with technology, it is starting to reshape the security industry.

### CASH SOLUTIONS

### Global cash-usage trends

According to third party research firm RBR London, cash withcrawn from automated teller machines (ATMs) between 2016 and 2021 s expected to grow by more than 6% per annum in emerging markets and between 0 to 1% per annum in developed markets

### Network consolidation

With lower cash volumes in some markets together with new higher value added services partly car nipalising traditional cash-intrans " services, it is likely that some, fnot all cash markets will experience network consolidation A riumher of industry participarits have publicly stated that they are looking to make acquisitions, and we have sold some cash businesses to focusion our key markels with stronger growth potenta: We believe this market consolidation will neip network efficiency and lower the cost of cash handling

### Retail opportunities

In many markets, retailers operate in very competitive environments and are looking to reduce costs including cash handling and to free uplidle cash sitting in tills, safes, vehicles and cash-processing centres

G4S software and service enhanced smart safes and cast- recycling services can reduce shrinkage costs for retailers and eliminate or reduce the space required for a cash back office and cash reconciliation teams

Inrough recycling the majority of cash takings in store, the number of cash in-transit journeys can be reduced by 40% to 60% - with both cost-sairing and environmental penefits

As more cash is recycled in store, less cash is being processed by the panks so the refailers achieve a reduction in banking fees

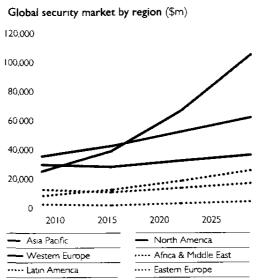

Source company research and 3rd party data including RBR, Pante a Hultomoniton international, World Refail Data and Statistics

### HOW G4S RESPONDS

### Supplier consolidation

In certain markets (both Manned Services and Systems) we have seen some market consolidation and trends whereby large competitors aim to provide multi-service bundled and integrated solutions

Some competitors have followed this trend to differentiate away from the commoditised manned security market. We believe this may be helping customers it ove to more technology-focused solutions Technology-enabled solutions is a less commoditised market than traditional manned security markets with a lower number of capable suppliers

Source Freedonia World Security Services report January 2017 excluding residential security

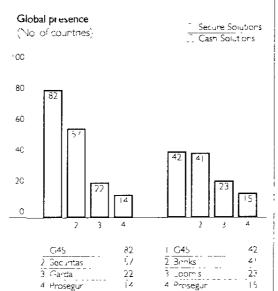

- We assist customers in evaluating and understanding security trends and their risks through expenerice in the market and the provision of software tools such as Risk360 and TravelAware Key trends are featured in G4S Risk Consulting publications
- G45 has been investing in productivity programmes to be more efficient and cost competitive (see page 29)
- G4S designs, builds, operates and maintains integrated security solutions. We invest in technology and innovation which is changing our sales mix, helping celiver service excellence to sustamers (see pages 24 to 28)

Our new products are being adopted by banks and some of the world's leading retailers and we expect this market will continue to grow strongly. Industry research data indicates that our addressable market for smart safes and recycling solutions is around £20br-25br becapption<sup>b</sup>

### Automated processes inside bank branches

Banks and financial institutions are also under pressure to be more efficient, lower the cost of handling cash, reduce their branch network whilst maintaining customer access and service

We have been developing integrated tecrinology lolacdress these areas. They combine nardware, proprietary cashmanagement koftware, real-time banking integration, same day credit and rustomer service and support

- vive provide cash solutions and services that materially improve the control and efficiency of our sustomers' cash handling. We continue to invest in innovative products and services such as CASH360, Deposita and bank-branch automation
- With the significant progress made in some areas of the business, we have an enormous opportunity to extend and grow our new technology and services right across our global markets
- At the end of December 2017 we had over 19,300 (2016 14,600) cash technology nstallations Jeployed in North America, Europe, Asia Pacific and Africa
- Vve have also made great progress in improving productivity in a number of markets and we now have the puportunity to apply these improvements across all of our cash bus nesses

### WHY G4S

### GLOBAL FOOTPRINT

We provide a proac range of products and services across more than 90 countries. This preacth provides us with a strong understanding and clear visibility of how security trends are evolving across the world. This insight is invaluable for positioning our solutions to address customer needs

### DEEP UNDERSTANDING

# 100 years' heritage

We support our knowledge of global security trends with a deep understanding of our customers' unique needs. We have a strong heritage of more than 100 years in the security industry, helping to distinguish positively the G4S brand in our key markets around the world. Our dedicated segment experts, involvement in industry bodies and academic institutions, strategic customer relationships and customer-service feedback mean that we can tailor our solutions to offer maximum value to our diverse customer pase

### SECURITY PROFESSIONALS AND EXPERTISE

# 570,000 colleagues

'Ne recruit, screen and deploy over 150,000 new colleagues each year. We have around 570,000 colleagues, whose unique skills and shared values are focused on delivering high-quality service to our many triousands of customers

### TECHNOLOGY AND INNOVATION

# £2.45bn technology-related security revenue

We continue to invest in technology to meet the growing demand for integrated solutions which combine consultation, technology (hardware and software), installation, staffing and maintenance and to drive the development of innovative new solutions for customers

### **CUSTOMER SERVICE**

# c150,000 customers

Service excellence is one of our core values and an area in which we continue to invest significantly. In the past three years, we have focused in particular on our capability, processes and performance measures to drive growth, customer refention and customer satisfaction

### OUR APPROACH

In order to grow our provision of security and related services, we use our unique industry and customer insight to deliver services that are innovative, efficient, effective and integrated.

I. ASSESS

2. DESIGN

**IMAGE REMOVED** 

### Security and risk consulting

We combine our understanding of our customers' businesses and objectives with our security expertise to assess their security risks and regulrements

Increasingly using data analytics, we are able to identify and mitigate security threats (confextual, criminal or business) and challenges on a local, regional and global basis

Risk consulting allows us to be seen as a trusted senior adviser to customers, providing insight and added value

### Solutions design

'We employ our growing resource and capability to design solutions to meet our customers' requirements, protecting and adding value to their organisation. This may involve a single service, bundled services (two on more services including facilities. services in selective markels), or an integrated security solution from the G4S portfolio

3. BUILD AND INTEGRATE

4. MANAGE

**IMAGE REMOVED** 

### **STAKEHOLDER VALUE CREATED**

### SOCIETY

G4S delivers a broad range of social and economic benefits to the communities in which we work, many of which are helping to realise the United Nations Sustainable Development Goals (see page 18)

### **CUSTOMERS**

### £2.5bn

Total contract value of new business won in 2017

### **SHAREHOLDERS**

**5.9**%

Growth in Adjusted EPS from core businesses in 2017 to 179p

### **EMPLOYEES**

570,000

People employed by G45 around the world

### **SUPPLIERS**

Suppliers provide services and products to G45 around the world

### G4S Solutions portfolio

In some markets, we are seeing a move towards integrated solutions where security or cash-management technology are delivered under one integrated solution

We use both third-party technology as well as our own world-class proprietary technology in areas such as visitor management, identity and credentials management access control, intégrated video systems and risk-management software

### Global security operations centres (GSOC)

G45 designs, builds and manages global security operations centres (GSOC) for customers, both on a standalone basis and as part of an integrated offering The GSOC receives analyses and responds to all the security ntelligence and data for a customer Customers may award these activities to a G4S GSOC in order to obtain network penefits and access our security expertise

Our key stakeholders are those who most materially impact our strategy, or are directly impacted by it. Engagement with stakeholders is essential for us, as a security business, with our role in society, the global nature of our business and substantial workforce.

### SOCIETY

**IMAGE REMOVED** 

### Key stakeholders

Our employees touch the lives of others every day, providing crucial services to help keep society safe and secure.

### How we engage

- Operations which promote secure and stable
- CSR Materiality Review with key stakeholders (see page 83)
- Community-engagement programmes
- Fax and economic contributions
- Government relationships and parliamentary engagement
- NGO and UN agency engagement
- Industry forums

### **CUSTOMERS**

**IMAGE REMOVED** 

Through understanding our customers' needs we can offer value-added, innovative, cost-effective security solutions and build enduring relationships

- · Relationship management
- c150,000 customers
- Bidding processes
- Customer service
- Net promoter score

### **SHAREHOLDERS**

**IMAGE REMOVED** 

The company actively seeks to engage with shareholders on a regular basis.

- One-on-one meetings between management and shareholders
- · Group investor meetings hosted by management
- Results announcements and trading updates
- · Participation in investor relations association and best practice events
- Annual governance meetings with the Chairman
- CSR updates with the Chair of the CSR committee
- Annual General Meeting

### **EMPLOYEES**

**IMAGE REMOVED** 

With around 570,000 colleagues, G4S is one of the world's largest private sector employers. Our success is underpinned by the way we lead and engage with our people.

- HR core standards set the framework for employee engagement
- · On-boarding, induction and refresher training
- Biennial global all-employee and senior management engagement surveys
- Works councils and employee representative forums, including through UNI the global union, with whom G4S signed a global Ethical Employment Partnership n 2008
- Newsletters, Lideos, employee self-senrice portals, and intranets
- Specific campaigns on health & safety ivalues and Speak Out whistleblowing arrangements
- Values recognition schemes

### **SUPPLIERS**

**IMAGE REMOVED** 

We have a responsible purchasing policy consistent with our business ethics.

- ສຽ,000 suppliers
- · Contract and relationship management
- Supplier Code of Conduct
- Purchase to Pay process

Understanding stakeholders' interests helps us define our strategic priorities and guide our initiatives. We run a formal exercise every two years to identify and prioritise our material CSR issues (see page 83).

Our strategy addresses the positive, long-term demand for security and related services and our enduring strategic aim is to demonstrate the values and performance that make G4S the company of choice for customers, employees and shareholders.

This section summarises our strategic priorities and how we focus our resources and expertise in areas where we can achieve the best results for customers and sustainable growth and return for investors. Our CSR approach covers a broad range of areas, but we have three material priorities: Health and safety, Human rights and Anti-bribery and corruption which are covered in the People and Values section.

COMMITMENT TO CORPORATE SOCIAL RESPONSIBILITY UNDERPIN THE STRATEGY

With around 570,000 people, G4S is one of the world's largest private sector employers. Our employees and services touch the lives of others every day, providing crucial services to keep them safe and secure. Our success is therefore underpinned by the way we attract, develop and engage with our people, as well as the culture and values that shape the way we work and how our colleagues carry out their roles.

### 2017 ACHIEVEMENTS

428,000 Employées

Reduction in voluntary responded to employee our global turnover to engagement 25 3% in 2017 survey (2016 276%)

Reduction in serious H&S incidents since 2015 in high priority businesses

### Attracting and retaining the best people

Attracting and retaining the best people continues to give G4S a competitive advantage as well as ensuring we deliver the pest results for our customers. For our senior population, we know from our management survey that the most important factor influencing their decision to join and then to stay at G4S is the nature of the roles and the responsibilities on offer. Our global footprint and operations across a range of product and service thes helps make the business attractive to the best candidates. Once appointed, the responsibility, complexity and opportunities for innovation help retain our senior people and keep them motivated

For other levels in the organisation, we have developed two tookits which help us attract and retain colleagues by utilising our expertise and sharing resources across the Group. The first relates to recruitment and is designed to ensure potential candidates for lobs with G4S have a positive recruitment experience while going through an efficient and effective riving process. The second provides guidance on good retention practices Both toolkits are online and contain templates that are easy to follow and adopt. They emphasise the mportance of ensuring applicants know what will be expected before they apply, and if they do join G4S there are robust processes in place to welcome, induct, train and support them feedback from our most recent global employee survey suggests that our employees feel well equipped to perform their role, with over 90% of respondents stating they understand their job procedures. Often employee tumover is at its highest n the initial months after appointment, which suggests there is still more to do to retain our newest colleagues.

In order to build our reputation as a good employer and attract candidates from the widest talent pools,

### CREATING THE RIGHT CULTURE

The G4S values are embedded in the standards, policies and guidance which we set out to help employees and managers perform.

To help our front-line operational employees understand the behaviours we expect, and the decisions they should take in line with our values, we have launched a range of learning and awareness materials. These materials include an animated video, scenario-based flashcards, presentations and an online exercise. The materials draw on over 90 scenarios from all product and service lines and are designed to promote discussion and to guide behaviour in line with our values. They address topics like harassment, bribery and corruption, the care and treatment of others, breaches of health and safety rules and inappropriate use of social media. To ensure these materials remain relevant we will continue to add different scenarios whenever new values-based operational situations are identified which can help guide our employees.

Work is now underway on values training materials for our managers, using our newly revised competency framework. In line with our values, this refreshed framework defines leadership and management behaviours in terms of how managers should act today, plan for tomorrow, and build relationships. The framework is used in our selection processes as well as our 360 degree review process to assess performance and future potential. It enables us

countries and regions adopt different approaches to diversity, reaching out to recruit from under-represented groups in their businesses. In North America, the recruitment of veterans who bring relevant skills and an inherent understanding of security risks continues, whilst in the UK our businesses are some of the few in the security sector to have been awarded Disability Confident level 2 status as a result of their commitment to identify and remove barriers which impact on the employment of people with disabilities

Overall employee retention continues to improve with voluntary employee turnover reducing to 25.3% (2016) 276%) as closer scrutiny and the implementation of good retention practices help us improve performance even in tight labour markets. This is good for service to our customers, who appreciate working with staff who know them better and have more experience. While our employee reaccount has reduced from 585,000 to 570,000 as a result of our portfolio management programme and our drive to improve organisational efficiency, wherever possible we receploy people and retain their skills and knowledge. For our front-line employees, the launch of a new values related global recognition programme will add a further opportunity to show case the amazing work they do for our customers each and every day. Ensuring we defebrate success, and share information about the ways in which our employees behave in line with our values, not only helps to bring our values to life but also promotes the expertise and capabilities of our people

In March 2018, we published our UK Gender Pay Gap Report for the relevant UK businesses. As well as explaining the reasons for any gaps, the report also sets out the actions we are taking to achieve the progress required as part of our wider diversity and inclusion strategy

to gather insight into what colleagues have achieved as well as whether they have done so in a way which is consistent with our values.

While having a common set of values helps set G45 apart from the competition, as a global employer we also appreciate that having a diverse workforce enables us to better understand our differing customer needs, and harnessing this diversity is critical to driving innovation. Feedback from our latest global employee survey indicates that 84% of employees who responded believe that the company values people from different backgrounds, and in 2018 we will continue our focus on diversity to ensure we maximise the benefits it brings.

### **OUR VALUES**

Our values are the standards we set for ourselves and they are reflected in the culture of our organisation through our behaviours and actions.

We act with .

INTEGRITY AND RESPECT

We are passionate about...

SAFETY, SECURITY AND SERVICE EXCELLENCE

We achieve this through.

INNOVATION AND TEAMWORK

Integrity and Respect Our business activities and relationships are built on trust, honesty and openness. We deliver on the promises we make and treat our colleagues. customers and those in our care with the utmost respect.

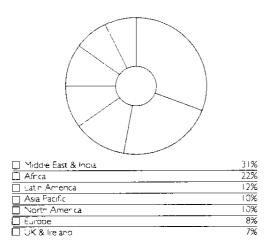

Safety, Security and Service Excellence We work in a safe way and take great care to protect our colleagues and customers from harm. We are experts in security and use that knowledge to protect our customers' most valuable assets. We are passionate about delivering high levels of customer service.

Innovation and Teamwork We invest in technology and best practice to improve continually our service offering. We challenge ourselves to find new ways of helping our customers.

We work together as a team to achieve the best results for our customers and our business. Everyone has a valid opinion and their contribution is valued.

**IMAGE REMOVED** 

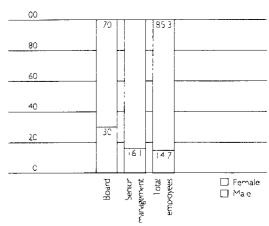

### Employees by location as at 31 December 2017 (%)

### Wage inflation

in a number of markets, especially developed regions such as North America and the UK, economic indicators have highlighted an increase in wage inflation - as a result of tightening labour markets in some areas and as a result of increases in minimum or living wages As a long-established global employer G45 has many years of experience of managing periods of wage inflation. We have to be prepared to negotiate once increases with customers and to look for ways to continue to be more productive and cost effective. For example, we believe this trend is helping to drive more revenue towards integrated solutions, where G4S has a competitive advantage and barriers to entry are higher

### Employee gender diversity in 2017 (%)

### Building capability

Building industry-leading capability is at the heart of our people strategy. We want employees at G4S to have the opportunity to fourish and grow so that they can contribute to the future success of the organisation nere are many examples of local development programmes which enhance the security and technology expertise in our organisation

For example, in 2017 the G45 Academy was launched in Denmark and has provided a structured approach to skills development and accreditation in line with industry standards

### DEFINING OUR SOCIETAL IMPACT

We play an important role in society. Through its services and organisation, G4S delivers a broad range of significant and far-reaching social and economic benefits to the communities in which we work, many of which are helping to realise the United Nations Sustainable Development Goals (SDGs).

- We create employment opportunities, and invest in and develop our employees. We directly benefit them and our suppliers through the salaries, benefits and payments we make for goods and services.
- In our Care & Justice operations, we develop innovative programmes to rehabilitate offenders and provide them with the encouragement and skills needed to help them rebuild their lives once released.
- We deliver a wide range of specialist security services that mitigate the risk or impact of criminal behaviour and help to create safer and more stable communities.
- Our colleagues work with governments and nongovernmental organisations in high-risk environments such as former conflict areas, to support humanitarian, stabilisation and economic-reconstruction efforts.

- Our focus on safety has helped reduce the risk of injury
- We encourage industry standards to be raised. By embedding our policies and practices into less developed regions, as well as by supporting new approaches such as the Ethical Employment Partnership or the International Code of Conduct for Private Security Providers, we have helped to improve industry standards around the world.

The SDGs call upon businesses to advance sustainable development through the investments they make, the solutions they develop, and the practices they adopt. In this report, we have mapped case studies against the SDGs to highlight where G4S is helping to advance the SDGs through our programmes and operations.

Visit sustainabledevelopment.un.org for more information on the United Nations Sustainable Development Goals.

### Regional Leadership Programme

On a Group-wide basis, our efforts are focused on developing the next generation of leaders, primarily through our flagship Regional Leadership Programme which is devised centrally but delivered locally so that it is tailored to meet our diverse needs. The Programme offers righ-potential includuals, in a range of line, functional and business-development roles, the opportunity to enhance their knowledge and strengthen their leadership skills. So far 90 employees have graduated from the programme, and a further 59 are already on course to do so in 2018

### Talent reviews

Annual talent reviews and quarterly talent exchange discussions are helping to identify potential candidates for future regional programmes early and are ensuring career opportunities are more widely available to employees across the Group

### Broadening use of training and development materials

Whilst our investment in training and development has to be highly focused, we are doing more to promote the use of materials we already have available to build wider capability across the entire management population. For example, in 2017 we launched a 16-week development programme containing relevant materials such as articles, assessments, online exercises and e-books relating to a number of specific topics such as change management, delegation and coaching skills The programme is currently running, with thousands of employees subscribing. As learning technology evolves, our ability to provide access to materials in a more flexible and pite-sized way, to suit our pusy managers, is increasing For example, for specific functions like Sales and 3usiness Development, we are establishing ori-line academies which will help employees identify their own development gabs and havigate the materials available to find those pest suited to meet their needs

### Recruiting and developing women

Recruiting and developing women into line-management roles for our operations remains a challenge across the Group as well as the security industry as a whole. We actively monitor our gender balance and were pleased that in 2017 ar independent business-led review supported by UK Government (the Hampton-Alexander Review) showed G4S as the top performing company n the business services sector in the FTSE TOX'. There is more to do in this area and as part of our wider diversity and inclusion strategy we have identified a number of actions to help us to conunue to make progress

### Engaging for success

We are in no doubt that having well-trained engaged and motivated employees helps us to deliver for our customers and make G4S a success. Consequently we invest a lot of time and effort in listening to our employees' views and responding to their feedback We do this in a variety of ways including direct dialogue consultation forums and our employee survey To ensure the survey is accessible to all employees, it is offered in over 40 languages and three formats (paper, online and mobile). Engagement levels for senior managers were also tested in a separate survey targeted at the leadership team. Response rates for both surveys remained high in 2017. In the case of the global engagement survey in 2017, the response rate at 73% was at the same level as 2015 and for the leadership survey was higher at 87%, compared with 85% in 2015 Feedback from the global survey helps identify what businesses need to stop doing, start doing and continue to do to improve levels of employee engagement The feedback from the management survey snowed improvements in almost every area, suggesting high levels of confidence and support for the business strategy, our values and the executive \*eam

Response rate to the biennial employee engagement survey undertaken in 2017

84% response rating from the global employee engagement survey

graduates from the regional leadership programme which continues in 2018

### SUSTAINABLE DEVELOPMENT GOALS

### Union representation

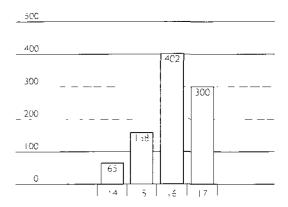

Our union and employee representative forums at global level are via the global union UNI, and the GMB, with whom we signed an Ethical -moloyment Partnership in 2008 At a European level we have a well-established European Works Council and at a local level triene are a number of union recognition agreements in place Marking together with our recognised unions helps us raise standards both internally and, where appropriate, across the wider industry and identify potential problems early and address them constructively

### Promoting the right organisational culture

Dunng 2017, 300 cases were raised by colleagues via Speak Out, our global whistleblowing system. This was 25% fewer than the previous year, but detailed analysis shows that employee grevances are being reported and handled more effectively via other channels. We believe it is very important that employees feel confident to speak out confidentially to ensure standards are meto protect people. All cases reported to Speak Out are reviewed and are directed to the most appropriate channel for action

The majority of matters raised via Speak Outlane gnevances which are transferred to the relevant HRdepartment, as they are best placed to ir vestigate and resolve the matter promotily. Concerns regarding operational procedures are investigated by local management to ensure that relevant standards are being followed

### Total number of whistle blowing cases

### Anti-bribery and corruption

Investigations relating to other matters, such as bribery, ethical or chancal issues, are conducted by our internal network of investigators or by ndependent experts

Matters of a serious nature are investigated at a serior and independent level, with 59 investigations completed dunng 2017

The Group Ethics Steering committee has continued to oversee implementation of our whistleblowing policy, case management of whistleblowing reports, and to conduct regular reviews or serious cases, the investigations' progress and the resulting actions

### SPEAK OUT

Integrity and Respect Safety, Security and Service Excellence

SDGs

IMAGE REMOVED

Every G4S employee has a responsibility to ensure that we uphold our core values, adhere to the law and deliver against the important commitments set out in our business ethics policy and ethics code

Speak Out, our global whistleblowing system, is a key method of ensuring that we maintain a high standard of ethics, respect and integrity.

Speak Out is hosted by an independent specialist hotline and case management provider. It enables every employee to report concerns that they may have about the behaviour of individuals, or the business operations, which they feel contravene the ethics code or our core values. We encourage any employee who wishes to raise a matter of ethical concern to contact the free telephone hotline or make a report online. Both channels are available 24 hours a day, seven days a week, and are completely confidential.

### IF YOU SEE OR SUSPECT WRONGDOING...

...do the right thing and speak out!

0808-234-8852

www.g4s-speakout.com

IT IS SAFETO SPEAK OUT!

You are encouraged to report any serious issues without fear of retallation Alf concerns raised in good taith will be taken seriously and integrated with respiration.

SPEAK OUTIS or reporting senous wrongdoing Any other concerns (such as may dureness uniform) stude or general amultownest grievances) should be direct by your line managen of HR for a curck resolution.

Ø:S

Securing Your World

### Improving health and safety

The safety of our employees and those in our care is one of our key phonities

To enable us to keep our customers and fre communities we serve safe, we must prioritise the safety as well as the health and wellbeing of our employees. It is our responsibility to ensure that our colleagues return nome from work safely every day

The nature of our work and the environments we operate in mean that safety and security present a strategic risk to our business. We believe that setting the highest standards for health and safety across our incustry helps keep our colleagues safe and builds loyalty and commitment to G4S among our employees Leading by example and having expertise in health and safety gives employees, customers and stakeholders confidence that we will work in a safe way

We recognise that our pusinesses operate in different confexts and face varying levels of risk. All businesses within the Group are reduired to meet a set of core health and safety standards. We must make sure that we are constantly learning and continuously enhancing our processes, in order to continue to keep colleagues safe despite a changing environment

Compliance is monitored via audits and reviews of performance at regional, group and board level via the CSR committee Health and safety's included in Group internal Audil's scope as part of non-financial risks

During 2017 we have

- · Continued to improve the performance of businesses which have had multiple fatalities. Senous no dents have reduced by 37% in these businesses since 2015
- introduced a reporting and tracking process for those ncicents which have the potential to result in a fatality, and increased the coverage of our injury reporting to 98% of businesses
- Reviewed our front-line health and safety induction training and draffed a mandatory syllabus
- Revised the C4S Golden Rules of Safety

Sadly, during 2017, 25 of our colleagues lost their lives in work-related accidents. On a comparative pasis this is a reduction from 47 tatalities in 2016. The number of road-traffic fatalities has decreased by 48% since 2013, when the first road-safety programme was launched

While the number of altack related fatalities decreased in our Cash Solutions businesses, this has not been due to a reduction in the number of armed attacks. The businesses continue to work with the relevant authorities to introduce new procedures and improved controls

During 2017 the Group's lost time injury incidence rate was 6.7 pen 1,000 employees (98% of businesses reporting). This compares with a rate of 7.7 in 2016. (96% of business reporting)

There were three non-hatural deaths in custody in 2017. All deaths in custody are investigated by the relevant authorities to determine the cause of death One of the incidents was due to self narm Pronouncements will be made by the relevant coroner on the two remaining incidents following their nvestigations in 2016, we disclosed a death in custody which was later pronounced as due to unintentional drug averdose by the coroner

### Respecting human rights

We are proud of our role in society and of the positive contribution we make to the realisation of ruman rights through the range of services we offer and the standards which we apply

However, we also recognise that we have a duty to ensure that we are not at risk of violating human rights through the services we provide, the customers we work with, the suppliers we use, or through the treatment of our own employees and others who are in our care

G4S' human rights policy and its related framework are based upon the UN. Guiding Principles on Business and Human Rights. Alongs de our values of Integrity and Respect, the framework reinforces the continued development of a business model, which aids the real sation of the Sustainable Development Goals through the improvement of incustry standards, employment opportunities and helping to preate secure and stable communities

By having clear values and standards, and educating and training colleagues to uphold them, we are creating a positive culture which means our colleagues can be trusted to do the right thing and behave in a way which meets our standards in cases where colleagues are deemed not to have upheld those standards, we uncertake sv: ft, thorough and impartial investigations nto the causes of such behaviour and take appropriate action to remedy them in addition to this resulting in consequences for the individual or individuals concerned, we learn from such instances and enhance our safeguards to prevent similar issues arising in the future

### **G4S ACADEMY**

Innovation and Teamwork √alues

G4S Academy is a recently-launched initiative within G4S Denmark, focused on creating an intelligent culture that can embrace and adapt to technological change, and predict future customer demands by leveraging our unique, untapped in-house knowledge and sharing it with customers. **IMAGE REMOVED** 

The standards set by our number lights policy have been embedded into our business policies and processes, such as our ethics policy. HR core standards, and the group risk and compliance systems For example, investment proposals are assessed on whether they can be achieved in line with our company values and standards, as well as on the basis of appropriate operational delivery, commercial risk and financial return

During 2017, we have

- · Developed and implemented a human rights awareness programme for sen or managers, beginning with the Group Internal Audit department
- Conducted 65 human rights control self-assessments of pusinesses operating in high-risk countries

- · Commerced a programme of internal audits of numan rights controls of businesses in high-risk countries, carrying out audits in 2017
- · Assessed operational and other pusiness issues against our risk universe', such as human rights and other CSR risks
- Published our first slavery and human-trafficking statement, setting our the actions we have taken to help prevent modem slavery within our business and supply chain including the development and implementation of our Supplier Code of Conduct and our migrant worker policy (g4s com modernslavery)
- · Updated our Supplier Code of Conduct
- Commissioned an independent review of Brook House Immigration Removal Centre following allegations of unacceptable behaviour and treatment of detainees by employees (see page 82)

### IMPROVING DRIVER SAFETY

√alues Satety, Security and Service Excellence

Innovation and Teamwork

SDGs

IMAGE REMOVED

The number of road-traffic fatalities has decreased by 48% since 2013 when the first road safety programme was launched. During 2017, we introduced new high-visibility clothing for our motorcyclists in Thailand, and brightly coloured seat belts in Hong Kong which enabled a visual check.

**IMAGE REMOVED** 

### **ACTIONS FOR 2018**

### Create and promote the right organisational culture

- Launch management values training materials, embed front-line materials and complete update of HR policies and processes to reflect G4S values
- Continue the delivery of regional leadership. programmes and promote development paths and learning opportunities for employees at different levels
- Implement action plans from global employeeengagement survey and address actions from management survey
- · Review opportunities to improve gender balance and follow up on UK gender pay gap reporting

### Improving Health and Safety

- Continue to implement the revised front-line health and safety induction training
- · Introduce updated controls for security officers working at entrance gates
- Share and adopt pest practice across the Group. n managing critical risk areas
- Develop action plans for businesses which have had multiple fatalities, as well as monitoring their mplementation

### Respecting Human Rights

- Review human rights risks across the Group's geographic footprint and update our human rights heatmap
- Conduct human rights control self-assessments and continue programme or internal audits or ous nesses operating in high-risk environments
- Carry out human rights risk assessment in key ous ness areas
- Review and implement key actions resulting from the independent review of Brook House IRC (see page 82)
- Continue to build awareness of numan rights responsibilities across the Group's businesses

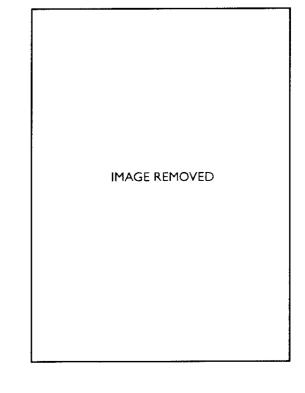

### Anti-bribery and corruption

Continue to increase awareness of Speak Out and create an environment in which colleagues are confident that they may raise concerns without fear of retaliation

| MOUNT                   | GAMBIER PRISON, AUSTRALIA                                     |  |  |  |

| Innovation and Teamwork |   |  |  |  |
| SDGs                    | IMAGE REMOVED   |  |  |  |

G4S has operated Mount Gambier Prison since 1995 and in September 2017 was awarded a new five-year contract which includes an option of a further term of up to five years. Mount Gambier Prison, the only privately-run prison in South Australia, is a medium-security men's prison with a capacity of 493 beds. Taking over as general manager at the prison is the previous deputy director for G45-managed HM Prison Rye Hill in the UK.

As the new contract begins, the team will be developing new partnerships with the local community. These will include support services and technology partners Rehabilitation and reintegration services will be provided, as well as programmes aiming to reduce prisoners' risks of reoffending, thus supporting the Government's policy to achieve a 10% reduction by 2020 and aiding reintegration back into the community. The prison's management team will also continue to work alongside the State on the planned expansion of the facility, engaging with the community and providing significant employment opportunities in the region.

We build long-term customer relationships based upon trust and understanding of our customers' businesses and objectives.

### Positive demand for security services

We believe that the long-term demand for our services remains positive, and we expect to grow revenues on average by around 4% to 5% per annum over the medium ferm. We continue to sustain contract retention rates of around 90%, have won substantial new business, and more than replenished our sales pipeline together with an improved quality of opportunities

### Large diversified customer base and sales pipeline

One of the strengths of the Group is the diversified nature of its contracts and sales pipeline. Our pipeline is diversified by service, geography and customer. Our 150,000 customers are spread across many different types and customer segment. At the end of December 2017, we had won new business with an annual contract value of £, 4 billion and total contract value of £2.5 billion

Our sales pipeline has grown despite an increased emphasis on pipeline qualification, ensuring we focus on the best opportunities and improve our win rate. As the Group has invested in innovative products and services, we also see an improvement in the quality of the sales pipeline in terms of more technology-related, longerterm, higher-value-added opportunities

### 2017 ACHIEVEMENTS

### YALE UNIVERSITY, USA

Safety, Security and Service Excellence innovation and Teamwork SDGs IMAGE REMOVED

Using G4S-owned AMAG technology, Yale University, one of the world's best-known and oldest lvy League institutions, has carried out, almost unnoticed, a full scale upgrade of its access-control and site security system across 350 main campus buildings.

Securing a prestigious university in a busy urban area presents particular challenges. High expectations by students, parents and staff, combined with modern security and environmental factors, demanded an exceptional security solution.

The innovative AMAG approach was to use their Symmetry SR Retrofit System, which is designed so that the customer can use their existing wiring and card readers to avoid a disruptive, prolonged, expensive and complex upgrade and without damage to the historic Yale buildings. This unique "plug and play" design allowed Yale to replace old controllers with Symmetry SR Controllers, and provides Yale with a range of advanced integration options so that additional security measures can be added if and when required.

### Investment in sales leadership and account management

Since 2013, we have invested in sales leadership, sales and service training, customer relationships, account management and a mandatory sales management system. Our understanding of customer requirements has increasingly resulted in opportunities to sell more technology-enabled solutions. This is particularly the case in developed markets, where higher wages and lower hardware costs have made technology solutions more cost-effective

We have also invested in capturing global customer opportunities, which has delivered success by winning new work or new customers such as Bank of America (see case study overleaf)

### Net promoter score and contract retention

Since 2016, we have embarked on a group-wice Net Promoter Score (NPS) survey process with existing customers. In 2017, using automated survey tools, we coubled the number of surveys conducted, with over 24,000 surveys, including our fab 20 customers in most countries, coricucted successfully in 29 languages and we improved NPS scores in most countries compared with 2016

### **ACTIONS FOR 2018**

- Improve win rate
- 'mprove contract retention
- morove net promoter scores

### CARGILL, BRAZIL

Values Safety, Security and Service Excellence Innovation and Teamwork

IMAGE REMOVED

SDGs

IMAGE REMOVED

Cargill has been providing food, agriculture, financial and industrial products and services across 70 countries for the last 150 years. In Brazil, it has 10,000 employees across 17 states and G4S Brazil has been providing electronic security services (CCTV and access control) to Cargill since 2016. After an in-depth study, G4S Brazil designed a CCTV and access control solution in 2017 for each Cargill site in countryside locations. This can be challenging due to isolation of the sites and the requirement for power generators to be used. This solution will be expanded from the current ten sites to 130 sites over the next three years.

**IMAGE REMOVED** 

Since its formation in 2004, G4S has positioned itself as a leader in integrated security, providing a combination of manpower and technology, systems and software. Through our customer relationships and insight, we have increased focus on investing in the development and marketing of new technology and services to strengthen our service offering, to support growth and to improve margins over time.

### 2017 ACHIEVEMENTS

### BANK OF AMERICA, NORTH AMERICA

### Innovative long-term security partnership with one of the world's largest banks

/alues Safety, Security and Service Excellence innovation and Teamwork \$DGs IMAGE REMOVED

Leading global financial institution Bank of America is one of G4S' largest commercial customers. Bank of America serves 47 million consumers and small businesses across 4.500 retail financial centres in 35 countries around the world.

During 2017, our North America business renewed its integrated secure solutions contract with the bank, including a new region covered by the contract, and including access to the Group's proprietary RISK360 software, with a resultant 10% growth in revenue.

### Investing in world-leading proprietary products and services

In our Secure Solutions segment, we continue to invest in product and service innovation combined with sales and operational support in the following areas:

- · Software tools including evidence-based risk assessment, incident management and travel advisory systems such as RISK360. For example, a global financial organisation used RiSK360 to reduce no dent reporting time by 50%
- Proprietary security systems such as Symmetry. Connect access control systems (see Yale case study on page 24) and visitor management systems

Technology-related security revenues are now £2.45 billion

### Cash solutions - Retail Solutions, bank-branch automation

For our financial and retail customers, we have developed a number of innovative and efficient services. We have over 19,500 cash technology installations, often combined with our software and managed service. and have a strong and growing pipeline

- Automated cash solutions for retailers this bespoke solution covers smart safes and cash recyclers, including our own Deposital equipment n emerging markets through to full cash. management automation solutions for some of the world's largest retailers
- Automated bulk-teller solution for banks the Deposita solution of hardware, proprietary software and managed service is also being used n bank pranches

. Mobile banking service in due to the increase in electronic payments and internet banking, traditional bank branch usage has declined in some markets, resulting in bank pranch closures. However, the panks recognise the value of personal interaction with customers and so in some developed and emerging markets G4S has lauriched a mobile panking service using the skills and fleet of our tracitional cash-in-transit business in a more integrated and innovative way

### **ACTIONS FOR 2018**

- Improve cross-market innovation and growth
- . Continue to crive market penetration of integrated security solutions
- Build on our market leadership in cash automation services with more customers in more markets
- Continue to invest in innovative and efficient services for customers
- Choss-selling and up-selling within and across markets
- · Continued investment in people, technology, software and systems

**IMAGE REMOVED** 

Growth in our new renewed contract with Bank of America. The three year integrated security solutions contract is the Group's largest individual contract.

Our productivity programmes have started to show clear benefits and we have increased confidence that there remain many more opportunities to be a more efficient organisation. In August 2017, we announced that we expected to deliver recurring operating and financing efficiencies of £90 million to £100 million per annum by 2020.

### 2017 ACHIEVEMENTS

,300 re-negotiations with suppliers

130 business units across 90 countries completed organisation benchmarking

### **Ist**

pilot launched in the entire Irish manned security business in November 2017, combining HR, operations and finance in one streamlined IT-enabled process

## £90m-100m

efficiency savings per annum by 2020

### More focused business - cultural change

Historically als grificant part of the Group's strategy and development was growth through polt-on acquisitions and, in many cases, these acquisitions were not fully integrated into the Group. With the Group offering many services in a large number of countries, this resulted in an inefficient organisation, with many management layers built up over time, resulting in nefficiency and lack of accountability

The Group is now more focused, on two core business. segments, and we are implementing programmes to ensure our organisation and operational costs are just as focused with support functions as shared-service centres. This reduces a substantial cultural change in the organisation and has to be done methodically and properly

### Reinvesting for growth

A significant proportion of the gains we have made from our efficiency programmes have been reinvested n the business to improve governance, increase the opportunities for growth as well as in processes to drive further efficiency. We have increasing confidence in being able to deriver further efficiencies as outlined in the "programme progress lable opposite" and we expect the majority of these will increasingly flow through to the bottom line

### Efficient organisation design and management de-layering

-ollowing benchmarking in 130 business units across 90 countries in 2017, we have begun celayering the management frameworks in the business and are now working to have more efficient regional, functional and operational frameworks as follows

### Procurement and property

The Group procurement team has continued driving its activities throughout the different regions with a categoryfocused and regionally-deployed strategic approach

Key areas of improvement included supplier base rationalisation, standardisation of procurement processes and demand management, renegotiation of payment terms and the delivery of savings across all categories Globally, in 2017, the team delivered over

### HINKLEY POINT C. UK

Safety, Security and Service Excellence Innovation and Teamwork

SDGs

IMAGE REMOVED

Hinkley Point C will be the first nuclear plant to be built in the UK in over 20 years. The build project will last ten years and involves a high level of complexity and risk, with over 5,600 workers on site. G4S will be providing an integrated security solution covering physical security and facilities management, access control, CCTV, RISK360, control room, vetting, incident response - command & control, contractor on-boarding, risk audits and protester management.

### Programme progress - helping to deliver between £70 million and £80 million sustainable operational cost savings per annum by 2020, with an additional c£20 million from re-financing.

| Programme   | Status   | Progress  |
|---|--|---|
| Safety performance  | Foundations laid building culture a mproving performance |   |
| Organisational efficiency loberations and support functions | •  | Benchmarked 130 business units across 90 countries  |
| Procurement and property                                    | •  | <ul> <li>&gt;1,300 supplier negotiations</li> <li>Reduced suppliers and demand</li> <li>Rationalising property</li> </ul> |
| IT-enabled automation and shared-service centres            | •  | T son, ce management model Progress ve, disciplined programme   |
| One G4S, standardised operating and functional processes    | L  | Significant opportunity   |

1,300 individual re-negotiations with tangible results in all regions and savings in excess of 50% in some cases New procurement tools were implemented to provide more efficient and controlled procurement, such as the tool rolled out in the UK to manage the procurement of contingent labour. This will be progressively rolled out. to other regions

in 2018 focus will remain on consolicating the supplier base, standardisation of procurement processes, demand management and delivering savings

### Operational excellence

We have a number of initiatives in place to introduce standardised operational and functional processes. We are also using iT-enabled automation and sharedservice centres to improve productivity. One example of this is tavelin

### Lean-process design - Javelin

Project javelin is a new operating model for our business which takes the best working practices and processes from across G4S Javelin replaces our previous systems and processes for recruitment, core HR, talent management, procurement, finance, contract management, payroll, billing, scheduling, tele-contact, IVP platform and operational control systems with a single Cloud hased platform

The pilot for lavelin was faunched in Ireland in November 2017. The purpose of the pilot programme was to learn now to best deliver this complex change. programme within our business, dentify areas of our combined processes that work well and capture areas for improvement before further roll-out. The enhanced version of Javelin encompassing all of the lessons learned will be deployed into frelar dipetore implementation commences in the UK later tris year

Automating our core processes for HR (screening, payroli) operations (scheduling, holidays and leave) and finance (billing) will reduce the amount of time between the work we do for customers and pilling for those services

### **ACTIONS FOR 2018**

- Continue with restructuring and organisational efficiency programmes
- Commence roll-out of Javelin in the UK
- . Continue to focus on consolidating the supplier base, standardisation of produrement processes, demand management and delivering savings

**IMAGE REMOVED** 

Ten-year

Contract to provide integrated security at Hinkley Point C.

Through a strong focus on cash management and portfolio management, net debt/Adjusted EBITDA reduced to 2.4x at the end of 2017 from 2.8x at the end of 2016, in line with our target set in 2015.

### Operating cash flow

Operating cash flow from core businesses in 2017 was £527 million, down from £633 million in 2016 as expected. Operating cash flow in 2016 was particularly strong, reflecting the beneficial impact or better terms and conditions with a large number of suppliers and the recovery of weak cash tow performance at the end of 2075 Our 2017 cash flow conversion performance of 106% of Adjusted PBITA (2016-133%) was in line with our guidance that average operating cash flow conversion will be more than 100% of Adjusted PBITA

We continue to focus on improved working capital management through strengthening bid evaluation frameworks to increase focus on frequency of invoicing and shorter payment terms

### Reducing the time between event to billing

- · Improving processes and automating event billing information such as hours worked (for example Project Javelin on page 29), milestones met, collections and deliveres in the cash solutions business
- Central sing of billing events of global and strategic accounts in some countries
- Automation of invoices removing the resource and delay of a manual process.
- Seeking to distribute invoices electronically, at lower cost and quicken than the post

### Contract risk management

Our contract risk management model was implemented n 2014, and alms to ensure weisign contracts that we can deliver efficiently and effectively and is shown in the ple chart below

### 2017 ACHIEVEMENTS

2.4x Net debt/ Adjusted EBITDA at end of 2017, within our target of <2.5x

flow from core businesses

106% operating cash flow from core businesses as a proportion of Adjusted PBITA

£156m in net disposal received in 2017

### Strengthening collections performance

- · Chariged incentive plans in 2016 with greater emphasis or cash-flow generation
- · Improved management information to increase accountability and influence behaviour
- . Weekly calls with finance and operations to drive cash collection

### Managing accounts payable

- The Croup's days' payable outstanding is 42 days. (2016, 35 days) which is still shorter than days! sales outstanding of 52 days (2016, 46 days), but the gap is reducing. This shows that, despite the progress made, there is still an opportunity to improve further
- · Ensuring that supplier contracts are linked with customer contracts
- · Re-negotiating moroved terms through procurement teams

### Capital allocation - on-going priorities for use of cash

All investment is reviewed to ensure that the Croup's return on investment targets are met, and all major capital investment projects are approved by the appropriate authority in line with delegation limits Other measures, such as whether we are able to achieve the benefits of the project in line with the Group values and whether the commercial risks are acceptable, are also considered

We intend to remain souridly financed with average operating cash flow conversion of more than 100% of Adjusted PBITA and a net debt to Adjusted EBITIDA ratio of less than 2 px Pronties for excess cash will be investment, dividends and, in the near term, further leverage reduction

### CAPITAL ALLOCATION

- Net debt/Adjusted EBITDA of below 2.5x
- · Priority uses of any surplus cash flow:
  - Investment in growth and productivity
  - Dividend growth
  - Leverage reduction

### Changing behaviours

Cash-flow generation is an important part of management incentive plans

### Portfolio management

The Group made further omgress with its portfolio management programme in 2017. The programme has greatly improved the Group's strategic focus and has also realised over £500 million in disposal proceeds in relation to the 41 businesses sold to date. This includes gross proceeds of £166 million in 2017 relating to the disposal of the Group's pusinesses in Israel and Bulgaria, the Group's cash businesses in Peru and Paraguay, the US Youth Services business and the UK children's homes business

The proceeds from these disposais have reduced the Group's leverage and have been reinvested in an organic growth and productivity programme from which we expect to see good returns

### Pension deficit repair plan

G4S had a net defined pension deficit for accounting purposes of £3+8 million (2016 £368 million) net of applicable tax as at 31 December 2017 for more details see page 173. The lower deficit reflects a small increase in the discount rate assumption, used and the payment of deficit repair contributions of £40 million during the year under the current deficit repair plan. The triennial review of the scheme and pension contributions will begin in 2018 and is expected to be completed in 2019

### Debt refinancing

G4S had gross debt of £2.5 billion (2016 £2.6 billion). and net debt of £1.5 billion at the end of 2017 (2016)  $\angle 17$  pillion). Around  $\angle 548$  million of the  $\angle 1$  pillion dept. which matures in 2018/2019 incurs post-nedging average nterest rates of between 6,90% and 7,75% (see page 41) The Group has good access to capital markets and a diverse range of finance providers and as a result began to refinance its debt at much lower rates in 2017 and early 2018 which should result in a material reduction nithe Group's interest charge from 2019 onwards

### FINANCIAL OUTLOOK

- Average organic revenue growth of 4-6% per annum
- Restructuring and efficiency programmes to deliver £70m-80m annual costs savings from 2020 and around £20m of refinancing cost reduction per annum by 2020
- · Compounding benefit of investment, growth and productivity to deliver strong earnings growth
- · Operating cash flow from core pusinesses of over 100% of Adjusted PBITA
- Continued focus on cash management and working capital
- · Continued disciplined approach to capital investment - expect to invest £100m-£150m per annum
- Maintain net debt Adjusted FBITDA below 2.5x
- Dividends increasing in line with long-term. growth in earnings

Our progress in implementing our strategic objectives is measured using key performance measures aligned to those objectives and to the Group values:

### FINANCIAL — CORE BUSINESSES

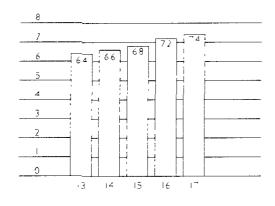

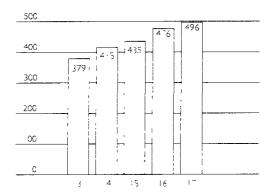

Revenue (£bn) growth since 2013

£7.4bn +17%

Adjusted PBITA1 (£m) growth since 2013

# £496m + 31%

Description

We have an organic growth strategy based on strong market positions in structural growth markets We have invested in improved customer service, anovation and sales and business development capabilities. There is also great potential to seil more complex solutions which tend to have longer contract terms and higher margins. Over the medium term we expect to grow revenues on average by 4% to 6% per annum

The Group has implemented a number of productivity programmes that are now driving efficiency and operational improvement across the Group These include efficient organisation design, management de-layering, lean operating processes, efficient reporting and assurance processes, upgraded If systems and efficient procurement

Performance in 2017

In 2017, revenues grew 3.2% to  $\pounds 7.4 \mathrm{pn}$  (2016) £/2bn), with developed markets growing 4.3%, reflecting strong grov/thin North America and modest growth in Europe and the UK

Emerging markets grew 15% with good growth across Africa, Asia Pacific and liatin America offset by a decline in the Middle East & India region

In 2017, Adjusted PBITA grew 4.2% to £496m (2016 £4/6m) as a result of revenue growth of 3.2% and our productivity initiatives having tangible compounding benefits. Adjusted PBITA in emerging markets was down 4.8% due to the challenging environment in Middle East & India John Ist in developed markets Adjusted PBITA increased by 9.1%

Adjusted EPS1 (pence per share) growth since 2013

Operating cash flow! (£m) growth since 2013

# £527m + 20%

A key priority for the Group is to drive improved cash generation, through enhanced working capital management and capital discipline and embedding a "cash matters" culture throughout the Group Greater emphasis has been placed on cashflow generation in management incentive plans since 2016

G4S is aiming to deliver sustainable growth in adjusted earnings over the long-term. Adjusted EPS growth is a component of both the annual and long-term management incentive plans

Operating tash flow was £52<sup>+</sup>m (2016 £633m), down 167% as expected following a higher than normal cash generation in 2016. The cash conversion rate was 106% (2016-133%), in line with our guidance of over 100% of Aquisted PBITA. Good cash flow and working capital management performances were derivered across most of the Group

Helped by revenue growth, improved Adjusted PBITA margins and lower non-controlling interests adjusted earnings from core businesses increased 5 7% to £27/m (2016 £262m) in 2017

Adjusted EPS from core businesses increased 5.9% to +79p (2016-1695)

# Alternative Performance Measures (APMs)

The Group applies the basis of preparation for its statutory results shown on page 136. As explained below, the Group makes use of Alternative Performance Measures (APMs) in the management of its operations and as a key component of its internal and external reporting. Whilst proactly consistent with the treatment adopted by both the Group's business senton peers and by other businesses outside of the Group's business section, these APMs are not necessarily directly comparable with those used by other hombanies.

# Business reporting structure

Since 2016, the Group has reported its results across three distinct components, in line twith its strategy for managing the business.

- Core businesses (formerly referred to as "Continuing businesses"), which comprise the Group's on-going activities
- Onerous contracts, which are being managed effectively to completion.

The orierous contracts component largely comprises a small number of material legacy onerous contracts that were identified by management as loss-making and are being run to completion. The results of these contracts are presented separately so that stakeholders can clearly assess their financial impact on the Group as well as consider them separately when assessing the financial performance which the Croup is likely to deliver into the future, and

 Portfolio businesses, which are being managed for sale on closure, as part of the portfolio rationalisation programme announced by the Group in November 2013.

Businesses are classified as portfolio businesses, when the Group Executive Committee, having considered their performance, market conditions, competitive environment etc., considers that shareholder value is most likely to be maximised through a sale transaction rather than through continuing use. These businesses are available for immediate sale in their present condition, but do not represent a major line of business or geographical area of operation and hence do not meet the definition of a discontinued operation under IFRS 5.

Due to the scale and breadth of the Group together with the complex changing environment in the different countries where the Group operates, the portfolio bus nesses programme is dynamic. Changes n performance and market conditions subsequent to the original launch of the port-olio businesses programme have led the Group Executive Committee to consider that some additional businesses should be sold on closed. In certain cases changes in market conditions on business performance have provided sufficient evicence for the Group Executive Committee to conclude that shareholder value will best be maximised through m ention of some businesses previously categorised as portfolio businesses, and hence such businesses. have been re-classified as core businesses.

Since 30 June 2017 there have been no changes to the portfolio businesses other than the completion of some minor disposals. The portfolio programme is considered to be substantially complete at 31 December 2017. Going forwards no further transfers into priout of the portfolio businesses will occur.

When presenting these three components separately, the objective is to provide additional information and analysis to enable a fuller understanding of the Group the way it is managed, and to identify easily the performance of those businesses that are expected to form pair of the Group in the long term. These three components together with the impact of restructuring costs, specific items and other items disclosed separately from Adjusted PBITA (see pelow) on the face of the Consolidated income statement, constitute "continuing operations" under IFRS

Discontinued operations, in accordance with IFRS 5, represent areas of the business which are being managed for sale on closure but which represent material business segments or entities. The Group now has minimal operations that meet the IFRS 5 definition of discontinued operations.

The comparative results for each component of continuing operations, and for discontinued operations, are re-presented for consistency to reflect the impact or businesses re-classified between components on sold during the current period.

#### Financial performance indicators

The key financial measures used by the Group in measuring progress against strategic objectives are set out pelow, and are reconciled for the current and prior year to the Group's statutory results on page 44.

#### a Revenue

Statutiony revenue ansing in each of the three business components. Revenue from core businesses is a Key Performance Indicator ("KP")

#### Adjusted profit before interest, tax and amortisation ("Adjusted PBITA")

The Group uses Adjusted PBITA as a consistent internal and external reporting measure of its performance, as management views it as being more representative of financial performance from the normal course of business and more comparable benod to benod. Adjusted PBITA excludes strategic restructuring costs, goodwill impairment and amortisation of accursition-related intangible assets and specific and other separately disclosed items which the Group believes should be disclosed separately by virtue of their size, nature or indicence, as explained on page 36.

## Restructuring costs

These costs relate to the wilder strategic transformation of the Group and are excluded from Group and regional Adjusted PBLFA since they refrect Group censions and are not considered to be reflective of the underlying financial performance of the individual businesses. This programme is of a strategic nature and, as such is monitored and approved by the Croup Executive Committee, During 2016 and 2017 activities under the programme have focused or manify or

# Alternative Performance Measures (APMs) continued

transforming the operating model in the regions of UK & Ireland and Europe. Going forwards, the Group has announced a three-year plan to 2020 to implement efficient organisational design and leaner processes, which is I kely to readire further restructuring investment ocal, non-strategic restructuring costs in the pusinesses continue to be included within Adjusted PBITA, consistent with prior years

#### Goodwill impairment and Amortisation of acquisitionrelated intangible assets:

The goodwill and acquisition-related intangible assets (mainly related to the capitalised value of customer lists), which resulted in these charges, arose when the Group acquired a number of its current businesses. As a contrast, organically-developed businesses in the Group, whilst clearly benefiting from intangible assets such as talent and customer relationships do not have any associated goodwill or acquisition-related intangible assets recognised in the Group's Consolidated statement of financial position

Impaiment and amort sation of goodwill and acquisition-related intangible assets are excluded from Adjusted PBITA as they relate to historical acquisitions activity rather than the underlying trading performance of the business, and this presentation enables effective companson of business performance across the Group regardless of whether businesses were acquired or developed organically. This approach provides management with comparable information for day-tocay decision making. The income and trading profits. earned from previously-acquired businesses are, nowever included within Adjusted PBITA, and this treatment may differ from how other groups present profits and amortisation of intangible assets relating to busir esses acquired

The Group reports amortisation of all non-acquisitionrelated intangible assets, which are mainly related to development costs and software, as a charge within Adjusted PBITA, to reflect the amortisation of capital expenditure in rested in these assets to deliver the day-to-day operations, consistent with the treatment of depreciation of capital expenditure invested in property plant and equipment

## Specific items

These tems are those that based on management's lugment, need to be disclosed separately in arriving at operating profit by virtue of their size, nature on incidence. They are excluded from the Group's adjusted. performance measures since they are not considered to be representative of the underlying financial performance of the business. In determining whether an event or transaction is specific, management considers quantitative as well as qualitative factors such as the frequency or predictability of occurrence.

All items that are reported as specific items are evaluated and approved by the Group's Audit Committee prior to being separately disclosed. The Group seeks to be balanced when reporting specific items for both debits and credits, and any reversal of excess provisions preliquisly created as specific items is recognised consisterity as a specific item. The associated tax impact of specific dems is recorded within the

specific items tax charge. In addition, tax-specific charges or credits, such as those arising from changes in tax legislation which have a material impact, and which are unrelated to net specific tems, are also included within the specific items tax charge. Consistent with the treatment of one-tax specific items significant tax charges or credits that occur, which are not related to core businesses but which would have a significant mpact on the Group's tax charge, would also be classified as fax-specific items

#### Profits and losses on disposal or closure of subsidiaries and losses from discontinued operations:

These items are excluded from the Group's adjusted performance measures since they are not reflective of the underlying financial performance of the Group

Further details regarding these excluded items can be found in note 8 on page 148

Adjusted PBITA from care businesses is a KPI

# c. Operating cash flow

Net cash flow from operating activities of conunuing operations, adjusted to exclude strategic restructuring spend and cash flows from portfolio operations and onerous contracts. Operating tash flow from core pusinesses is a KPI

#### d Earnings

Profit attributable to equity shareholders of G4S bid. Adjusted earnings from core businesses excludes specific and separately disclosed items and is a KP

# e Earnings per share ("EPS")

Profit attributable to equity shareholders of G4S bic, per share, from continuing operations. Adjusted EPS from core businesses excludes specific and separately disclosed tems, and sla KP

# f Net debt to Adjusted EBITDA

The ratio of total net debt, including investments finance lease Labilities and cash and overdrafts within net assets of disposal groups held for sale, to ad usted earnings attributable to equity shareholders before interest, tax, depreciation and amortisation This ratio is a determinant factor in the poard's assessment of the financial strength of the Group, and is a key measure of compliance with covenants in respect of the Group's porrowing facilities

Certain of these financial performance indicators in respect of core pusinesses also form a significant element of performance measurement used in the determination of performance-related remuneration and incentives, as follows

- Adjusted PBITA annual bonus plans for serior managers in regional management,
- · Operating rash flow annual bonus plans and long-term incentive plan for all senior management including executive directors
- · Adjusted earnings I annual bonus plans for executive directors and functional directors who are members of the Group Executive Committee, and
- Adjusted EPS growth long term incentive plan for all senior management including executive cirectors

"We made good progress in 2017 and our core businesses delivered revenue growth of 3.2% and adjusted earnings growth of 5.7%."

| EPS  | 15.2p | 12.8p   | 188%             |
| Operating cash flow  | 488   | 613     | (20.7%)          |

Revenue increased by 3.1% compared with the prior year statutory reported results presented at historical exchange rares. On a constant-currency basis, revenue decreased by 1.2%, reflecting a reduction in revenue from businesses, dentified for sale or closure of £335m primarily due to businesses disposals in the current and prior years including the Group's US Youth Services business and its business in israel (see page 39 and note +7) in 2017. Revenue from onerous contracts was slightly higher than the prior year at £119m. (2016 £115m) Excluding revenue from orierous contracts and from businesses identified for sale or closure, revenue grew by 3.2% at constant exchange rates

Business performance is discussed in more cetal by region on page of

# Adjusted PBITA

Adjusted PBITA of £49 im (2016 £46 m) was up 65% including the benefits of exchange rate movements in the year. On a constantcurrency basis, Adjusted PBİTA increased I 9% reflecting the strong performance of the Group in developed markets, improved product mix and the results of our on-going productivity programmes, partially offset by the weakness in the Middle East & India and a reduction in Adjusted PBITA from businesses held for sale on closure of £1 im primarity due to business disposals in the current and prior years (see page 44). Excluding Adjusted PBITA from increase contracts and businesses identified for sale or closure, Adjusted PBITA increased by 4.2% at constant exchange rates

### Net specific items

Specific tems resulted in a rief charge of £34m (2016-£13m), of which £19m (2016-£4m) primarily relates to the articipated total losses over the next 15 to 20 years in respect of certain UK contracts. The net specific item charge also includes £6m relating to the estimated cost of settlement of subcontractor claims from commercial disputes in respect of phonyears, and £9m relating mainly to the settlement of labour-related disputes in respect of prior years, in North America and Latin America. Specific items in 2016 included a £10m charge due to the revision of estimales relating to legacy acquisitions and labour claims in Latin America, £7m relating to commercial restructuring in Middle East & Incia, and a net £4m supplementary onerous contract provision primarily in respect of the Compass asylum seekers contract, all offset by an £8m credit relating mainly to the recovery of a legal claim in Europe and of certain disputed debtor balances in the UK.

#### Restructuring costs

The Group invested £20m (2016 £12m) in restructuring programmes during the year, mainly in the UK & Ireland and Europe regions as part of the multi-year strategic productivity programme being implemented across the Group, which is now drawing to a close. In addition, the Group incurred non-strategic severance costs of £10m (2016, £9m) which are included within Adjusted PBITA. Going forwards the Group has announced a three-year plan to 2020 to implement efficient organisational design and leaner processes, which is I kely to require further restructuring investment

### Profit on disposal and closure of subsidiaries and goodwill impairment

As part of the portfolio programme, the Group realised a net profit of £74m (2016, £7m) relating to the disposal of a number of its operations including the businesses in Israel and Bulgana, the US Youth Services business, the UK children's homes business and the Group's cash pusinesses in Peru and Paraguay In 2016, the Group recorded a goodwill impairment charge of £9m in relation to businesses dentified for sale or closure

#### Acquisition-related amortisation

Acquisition-related amort sation of £10m (20.6-£32m) is lower than the phonyear as certain intangible assets recognised on a number of legacy acquisitions became fully amortised in 2016

Net interest payable on net debt was £92m (2016, £90m), the increase in 2017 was primarily due to a temporary increase in gross porrowings (matched by an increase in cash balances) following the issuance of a €500m Public Bond in November 2016 and a €500m Public Bond in lune 2017 that were used mainly to re-finance fine March and May 2017 cebt maturities in addition to drawings under the Revolving Credit Facility. Net other finance costs or £12m (2016, £6m) increased compared with the prior year due to an additional £2m relating to discount unwound on provisions, a £2m charge in relation to overseas tax settlements, and a £2m indeptedness-related foreign exchange gain recognised in 2016

The pension interest charge, related to the unwinding of discount in relation to long-term pension liabilities, was £11m (2016-£10m), resulting in a total net interest cost of £115m (2016 £ 06m)

### Chief Financial Officer's review continued

#### Tax

The statutory tax marge of £128m (2016, £,16m) for 2017 includes a tax charge of £92m (2016, £85m) on the adjusted profits of core pushesses, as explained on page 46 a fax credition onerous contracts of £4m (2016 £nl), a tax charge of £7m (2016 £2m) in respect. of portfolio businesses, a net tax charge of £18m (2016 hax credit of £9m) in respect of accousition-related amortisation and other separately disclosed items, and a rax charge of £19m (2016 £nil) in respect of the tax impact of the US fax reform (see page 49).

The Group's statutory rax charge represents an effective rate of 33% (2016-26%) on profit before tax of £386m (2016-£296m). The effective tax rate is a function of a variety of factors, with the most predominant being the geographic mix of the Group's taxable profits and the respective country tax rates, profits arising on the disposal of certain subsidiaries boing taxed at air gher rate, the recognition of, and changes in the value of, deferred tax assets and liabilities, Dermanent differences such as expenses disallowable for tax purposes, and irrecoverable withholding taxes

The higher effective tax rate compared with the phonivear is primarily driven by a phe-off charge relating to the re-measurement and impairment of US deferred tax assets ansing as a result of US tax reform (as explained on page 49), together with profits ansing on the disposal of certain subsidiaries being taxed at a higher tax rate.

The effective tax rate on the Group's statutory profits was also sign ficantly higher than the effective tax rate on the adjusted profits of core pusinesses (explained on page 46), phimarily due to two hon-core factors. Firstly, the impact of US tax reform, which is excluded from the tax charge on adjusted profits from core businesses, and secondly, as a result of profits arising on the disposal of certain subsidianes being taxed at a higher rate

#### Non-controlling interests

Profit attributable to non-controlling interests was £16m in 2017 a decrease from £19m for £016. The decrease compared with the prior year reflects the non-controlling partners' share in the lower level of profitability of certain businesses in the Middle Tast & india region.

#### Profit for the year

The Group reported profit for the year attributable to equity holders of the parent ("statutory earnings") of £236m (2016, £198m), an increase of 19.2% compared with the phonyean holiding the benefits of improved Adjusted PRITA, the phonition disposal of subsidianes and the impact of foreign exchange movements. On a constant-currency basis, earnings increased by 140%

#### Earnings per share

Statutory earnings per spare increased to 15.25 (20. 6, 12.8b), based on the weighted average of 1,548m (2016, 1,546m) spares in issue A reconciliation of the Group's statutory profit for the year to EPS is provided below

|  |                         | Earnings per share                               | ···  |

#### Review of the Group's consolidated statement of financial position

# Significant movements in the consolidated statement of financial position

Non-current loan notes were £1,486m (2016-£1,715m), reflecting the re-classification of certain US Private Placement notes repayable in July 2018 and the €500m Public Bond repayable in December 2018 as current liabilities, offset by the addition of the new €500m Public Bond issued in June 2017 and repayable in 2024

The following movements in the Group's consolidated statement of financial position are set but elsewhere in this report, as follows

- cash, cash equivalents and overdrafts are explained on page 41,
- retidebt slanalysed on page 50,
- provisions are analysed in note 33 on page 179, and
- retirement benefit obligations are explained on page 43

### Total equity

Total equity at 31 December 2017 was £854m (2016, £863m). The main movements during the year were, profit for the year of £252m (2016-£21/m) other comprehensive losses of £4/m (2016-income of £109m) which included a re-measurement gair on deferred retirement benefit schemes of £26m (2016 loss of £169m) as explained on page 43, an excrange loss on translation of foreign operations of £12pm (2016, gain of £429m) and a gain from changes in the fair value of cash flow hedging financial instruments. of £56m (2016 loss of £197m) and dividends baid in the year of £179m (2016 £162m).

The significant foreign currency gain of £228m (net of changes in fair value of cash flow hedging financial instruments) recognised in the consolidated statement of comprehensive income in the prior year was mainly as a result of the weakening of Sterling compared with the US dollar and zuro following the UK referendum result in June 2016 In 2017, Sterling strengthened compared with the US dollar, partially offset by a further weakening against the Euro, resulting in a net foreign exchange loss of £69m recognised in the Consolidated statement of comprehensive income for the year

#### Review of the Group's cash flow and financing

#### Consolidated statement of cash flow

Net cash flow from operating activities of continuing operations was £488m (2016 £615m), a decrease compared with the priorityear as the Group reverted to a more customary level of operating cash generation following the particularly strong performance in the prior year, net cash inflow from total operating activities was ±402m (2016-£522m), net cash generated by investing activities was £81m (2016) net cash outflow of £18m), including £156m (2014) £82m) of net business disposal proceeds and net cash outflow from Francing activities was £570m (2016-£30Tm). Cash, cash equivalents and overcrafts at 31 December 2017 were £5Tlm (2016 £672m), a net decrease including the impact of exchange rate movements of £101m (2016 net increase of £284m). The Group's statutory tash flow is presented in full on page (35)

The Group's net debt as at 31 December 2011 was £1,487 $\sigma$  (December 2016-£1.670 $\sigma$ ). The Group's net debt to Adjusted FBITDA ratio improved to 2.4 $\sigma$  (2016-2.8 $\sigma$ ). A detailed reconciliation of movements in net debt is provided on page 50.

#### Net debt maturity

in May 2017, the Group's credit rating was affirmed by Standard & Poons as 3BB- (negative). As of 31 December 2017 the Croup had Equidity of £1,57 in (2016-£1,692m) comprising cash leading and bank overcirafts of £571m (2016-£672m) and unutilised but committed facilities of ±1ch (2016 ±10h). The Group issued a €500m Public Bond in June 2017 which matures in June 2024 and pays an annual couper of 1.5%

The next dept maturities are £44m and \$224m US Private Placement notes due in July 2018 and a €500m Public Bond due in December 2018. The Group has good access to capital markets and a diverse range of finance providers. Borrolyings are brind bally in Sterling, US dollars and Euros, reflecting the geographies of significant operational assets and profits

The Group's main sources of finance and their applicable rates as of 31 December 2017 are set out below

| Dept instrument/Year of ssue |                   |               |                                    |      |      |      | Y   | ear of re | demptio | n and amo | ounts (£n | n) <sup>b</sup> |  |

<sup>1964</sup>m of the original £1bh multi-cumency revolving credit facility matures in january 2022, with the remainder maturing in january 2021. As at 31 December 2017 there were no drawings from the facility

# Chief Financial Officer's review continued

The Group's average cost of gross borrowings in 2017, net of interest hedging, was 41% (2016-41%)

### Financing and treasury activities

The Group's freasury function is responsible for ensuring the availability of cost-effective finance and for managing the Group's financial risk arising from currency and interest rate volatility and counterparty credit. Group Treasury is not a profit centre and is not bermitted to speculate in Shancial instruments. The treasury department's policies are set by the board. Treasury is subject to the controls appropriate to the risks it manages, which are discussed in note 31 on pages 168 to 172

To assist the efficient management of the Group's interest costs, the Group operates a multi-currency notional pooling cash management system with a wholly-owned subsidiary of an A-rated bank. The Group presents pooled cash and overdrafts gross in the Consolidated statement of financial position

#### Other information

#### Significant exchange rates applicable to the Group

The Group derives a significant portion of its revenue and profits in the cumercies shown below, with their respective closing and average rates

|                     | As at<br>3 December 20 7 | At 2017<br>average rates | As at<br>3 December 20 6 | At 2016 average rates |

| £ Brazil Reai       | 4.4.794                  | 4 1506                   | 40165                    | 4.7252                |

Applying December 2017 closing rates to the Group's statutory results for the year to 3! December 2011 would result in a decrease in revenue of 1.9% to £7,680m (for the year ended 3) December 2016 Increase of 2.5% to £7,82m) and a decrease in Adjusted PBITA. of 19% to £482m (for the year ended 3). December 2016 increase by 2.5% to £4/3m)

The weakening of average Sterling exchange rates compared with the phonyear led to an increase in revenue of 4.5% and an increase ir. Adjusted PBITA of 4 T% as explained above. The impact of exchange rate movements reduced the Group's net debt by £2 (m compared with the prior year

#### Dividend

In assessing the dividenc, the board considers

- · future investment requirements,
- the Group's bension obligations,
- net dept to Adjusted FBITDA,
- · the availability of distributable reserves in the parent company and
- · reward to shareholders

Following the achievement of the Group's leverage-reduction target, the directors propose a 5% increase in the final dividencito 6 Hp. (DKK 0.5097) per share (2016-5.82p per share, DKK 0.5029) reflecting the board's confidence in the Group's performance and prospects Our dividend policy is to increase the dividend in line with the long-term growth in earnings. The intermidividend was 3.390 (DKK 0.2948) per share and the total dividenci if approved, will be 9 1%p (DKK 0.8045) per share, an increase of 3 1% compared with 2016 (for the year ended 31 December 2016, the interim dividered was 3.595, DKK 0.3143 and the total dividend was 9.41p. DKK 0.8172)

The proposed dividend cover is 1.8x (2016, 1.8x) on adjusted earnings from core pusinesses

#### Pensions

As at 31 December 2017 the net defined benefit bension obligation in the Consolidated statement of financial position was £381m (2016-£437m) of which £283m (2016-£341m) related to material funced defined benefit schemes. Net of related deferred tax balances, the Group's riet bension obligation was £318m (2016 £368m).

The most significant of the Group's pension schemes is in the UK and accounts for over 88% (2016, 94%) of the Group's total material scheme obligations. The scheme has approximately 30,000 members and further details of the make-up of the scheme are given in note 32 on page 174

|                    | 2017    | 20 6    |
|--------------------|---------|---------|
|                    | £m      | £m      |
| Scheme assets      | 2,345   | 2,339   |
| Obligations        | (2,595) | (2,659) |
| Net UK opligations | (250)   | (320)   |

The reduction r the UK scheme net obligations reflected a decrease in the scheme obligations of £64m partially offset by an increase of £6m in the value of scheme assets. The decrease in the obligations is a result of the discount rate used for valuation purposes increasing to 2,55% (2014, 2,50%), the projected pension inflation rates decreasing to 3,2% (2016, 3,3%), and the payment of scheduled deficit repair contributions of £40m (2016-£39m) curing the year. The Group will pay pension deficit repair contributions of £41m in 2018 in line with the agreed contribution schedule. The next funding valuation is due in 2018, following which future contributions will be subject to review and potential renegotiation

#### Interest-rate risk and interest-rate swaps

The Group's investments and borrowings at 31 December 2017 were a mix of fixed rates of interest and floating rates of interest Inked to LIBOR and FURIBOR

The March 2007 and July 2008 physite placement notes and the May 2009. December 2012, November 2016 and June 2017 public notes were all issued at fixed rates, whilst the Group's investments and bank homowings were all at variable railes of interest linked to LIBOR and EURISOR

The Group's interest-risk policy requires Treasury to fix a proportion of its interest exposure on a slicing scale in US collars. Stefling and Furb, using the natural mix of fixed and floating interest rates emanating from the bond and bank markets and by utilising interest-rate and pross-currency swaps. Part of the proceeds of the private placement and public notes have been swapped to floating interest rates, and accounted for as fair-value hedges, with a net gain in the hedges at 31 December 2017 of £14m (20.6 heligain £27m). market value of the pay-fixed receive-variable swaps and the pay-fixed receive-fixed cross-currency swaps outstanding at 31 December 2017 accounted for as cash-flow hedges and net-investment nedges, was a net asset of £59m (2016 nel asset of £31m)

#### Foreign currency

The Group has many overseas subsidianes and joint ventures, denominated in various different currencies. Treasury policy is to manage significant translation risks in respect of net operating assets and its consolidated net dept Adjusted ERITINA ratio by holding foreigncurrency denominated loans, cross-currency swaps and to a lesser extent forward-currency contracts

At 3. December 2017, the Group's US dollar and Euroinet assets were approximately 91% and 90% respectively, hedged by foreign currency dept. As at 31 December 2011, net debt held in US dollars and Furos, and in those currencies officially pegged to these two currencies, equated broadly to a ratio of 2.3x Adjusted EBITDA generated from these currencies (2016-2.2x Adjusted EBITDA)

# Tax policy

The Group's fax policy is set out at g4s com/taxstrategy

#### Corporate governance

The Group's policies regarding risk management and corporate governance are set out in the Risk management section on pages 60 to 65 and in the Corporate governance report on page 84

### Business performance - Alternative Performance Measures (APMs)

#### Basis of preparation

In the following review, to aid comparability, 2016 phonyear results are presented on a constant-currency basis by applying 2017 average exchange rates, unless otherwise stated

#### Summary Group results

Year ended 31 December 2017 (at 2017 average exchange rates)

- a. Attemptive Performance Measures ("APMs") for core pusinesses are explained on pages 35 and 36 and are reconciled to the Group's statutory results on page 44.
- h. Operating cash flow for 2016 is shown at actual 2016 exchange rates.

#### Revenue

At £2 ion, emerging markets inevenues increased 1.5% on the prior year, with growth in all regions except for Middle East & India, and represented 37% of Group revenue (2016-37%). Developed markets' revenues were 4.3% higher than the prior year with 6.0% growth in North America, 3.9% in Europe and 2.1% in UK & Ireland. Revenue from Cash Solutions was up 2.3% on 2016 and from Secure Solutions was up 34% on 2016

# Adjusted PBITA

Adjusted PBITA of core businesses of £496m (2016, £476m), was up 4.2%. This growth reflects the strong performance of the Group in developed markets, improved product mix and the results of our on-going productivity programmes ipartially offset by the weaken trading in the Middle East & India. Overall, the Adjusted PBITA margin increased to 6.7% (2016, 6.6%) with improvements delivered in six out of the seven regions.

#### Interest

Net interest payable on het debt from core businesses was £90m (2016, £85m). The increase in 2017 was primarily due to a temporary increase in gross homowings (matched by an increase in cash balances) following the issuance of a €500m Public Bond in November 2016 and a €500m Public Bond in june 2017 that were used mainly to re-finance the March and May 2017 debt maturities. in addition to drawings on the Revolving Credit Facility. Net other finance costs of £12m (2016-£6m) increased compared with the pronyear due to an additional £2m relating to discount unwound on provisions, a £2m charge in respect of overseas tax vertiements, and a £2m indeptedness-related foreign exchange gain recognised in 2016.

The pension interest charge, related to the unwinding of the discount in relation to long-term pension labilities, was ALTIM (2016, 10m). resulting in a total net interest cost of £113m (2016 £101m).

A tax charge of £92m (2016, £90m), was incurred on the adjusted profits of core businesses of £383m (2016, £375m) which represents an effective tax rate of 24% (2016-24%). The effective tax rate is a function of a variety of factors, with the most predominant being the geographic mix of the Group's taxable profits and the respective country tax rates, the recognition of land changes in the value of deferred tax assets and liabilities, permanent differences such as expenses disallowable for tax purposes, and irrecoverable withholding faxes

At any point in time, the Group is typically subject to tax audits in a number of different countries. In situations where a difference of built on arises between the Group and a local tax authority in respect of its tax filings, the Group will debate the contentious areas and, where necessary, resolve them through negotiation or litigation. The Group relies upon acvice and opinions from the Group tax department local finance teams and external advisors, to ensure that the appropriate judgments are arrived at in establishing appropriate accounting provisions in relation to such disputes

# Chief Financial Officer's review continued

### Non-controlling interests

Profit from core businesses attributable to non-controlling interests was £14m in 2017, a decrease from £28m for 2016, reflecting the non-controlling partners ishare of the lower level of profitability of certain businesses in the Middle Fast & India region

#### Adjusted profit for the year ("adjusted earnings") - core businesses

The Group generated agrusted profit from core pusinesses attributable to equity holders ("adjusted earnings") of £2.77m (2016) £262m), an increase of 5.7% for the year ended 31 December 2017

#### Adjusted earnings per share

Acjusted earnings per share from core businesses increased to 1/9p (2016-169b), based on the livelgrifed average of 1,548m (2016 1,546m) shares in issue. A reconciliation of adjusted profit for the year from core businesses to Adjusted EPS is provided below

|   | Adjusted earning | s per share — col               | re businesses                                |

# Onerous contracts

The Group's onerous contracts generated revenues of  $\mathcal{L}$  19m (2016,  $\mathcal{L}$ -15m) for the year ended 31 December 2017. The Group recognised additional provisions of £19m (2016 £4m), classified as specific items, primarily related to the anticipated total losses over the next 15 to 20 years in respect of certain UK contracts it is expected that around 60% of the Group's total provision for onerous customer contracts of £62m will be utilised by the end of 2020

# Portfolio operations

The Group made further progress with its portfolio management programme in the year. This programme has greatly improved the Group's strategic focus and has also generated approximately £3 10m in disposal proceeds in relation to the 38 businesses sold up to 31 December 2017 Disposals in the year include the Croup's businesses in 'srael and Bulgana, its cash businesses in Peru and Paraguay, the US Youth Services business and the UK children's homes business, generating total gross proceeds of £166m. Since the year end, and up to the date of this report, a further triree pusinesses have been sold, generating additional gross proceeds of £9m. The portfolio programme is considered to be substantially complete at 31 December 2017 Since 30 June 2017 there have been no changes to the portfolio businesses other than the completion of some minor disposals. Going forwards no further transfers into or out of the portfolio businesses will occur

# 2017 core business<sup>a</sup> reconciliation

#### Net specific items

Specific tems resulted in a net charge of £15m (2016) £, 4m, comprising £6m related to the estimated tost of settlement of subcontractor claims from commercial disputes in respect of onchivears, and £9m related mainly to the settlement of abour-related disputes in respect of phonyears in North America and Latin Americal Specific items in 20-6 included an Ellim charge due to the revision of estimates relating to legacy acquisitions and labour claims in Latin America, £, milrelating to commercial restructuring in Middle East & ricia, and a net £4m supplementary onerous contract provision phimanly in respect of the Compass asylum seekers contract, all offset by an £8m credit relating mainly to the recovery of a legal claim in Europe and of certain disputed debtor balances. in the UK.

#### Profit on disposal and closure of subsidiaries/businesses and goodwill impairment

As part of the portfolio programme, the Group realised ainer profit of £74m (2016-£5m) relating to the disposal of a number of the Group's operations including the Group's businesses in Israel and Bulgaria, the US Youth Services business, the UK children's Fornes business and the Croup's cash businesses in Peru and Paraguay. The Croup recorded a goodwill impairment charge in the prior year of £9m in relation to businesses to be sold or closed

### Acquisition-related amortisation

Acquisition-related amort sation of £10m (2016-£34m) is lower than the phon year as cortain intangible assets recognised on a number of legacy acquisitions became fully amortised in 2016

#### Tax charges arising on acquisition-related amortisation, specific and other separately disclosed items

Tax charges arising on acquisition-related amorpsation, specific and other separately disclosed tems of £18% (2016) tax credit of £9m). relate phimanity to the disposal of subsidiaries in the United States, Peru and Paraguay

#### Tax impact of US Tax Cuts and Jobs Act ("US tax reform")

On 22 December 2017, the US tax legislation known as the Tax Cuts and Jobs Acc was signed into raw by fire US President and introduced significant changes in US tax laws with effect from 1 anuary 2018. As this legislation is considered to be substantively enacted as at 31 December 2017, any tax effects of the legislation arising in 2017 have been taken into account

For 2017, the changes in legislation resulted in a separately disclosed one-offichange to the income statement of £19m ansing from the re measurement and impairment of deferred tax assets due to the reduction in the USI lederal tax rate, and from the impairment of foreign tax credits which are no longer expected to be recovered in future periods against foreign source income

On the basis of in ormation currently available and from analysis completed since the legislation was enacted, the above are likely to be the most significant impacts for the Group. However, as more detailed analysis and future legislative guidance decorre available, 🕆 is possible that the Croup may be further impacted in the current and subsequent years by the legislative changes

# Chief Financial Officer's review continued

#### Reconciliation between statutory operating profit and net debt

A reconcilation between operating profit as presented in the Group's Consolidated income statement to movement in net debt is presented below with 2017 amounts presented at actual rates for the year and the prior year amounts presented at 2016 average exchange rates

Key customer sectors - mining, oil and gas, retail, energy, agriculture and financial services

G4S is the largest provider of integrated security solutions in the region, with operations in 23 African countries. The region's largest countries by revenue are South Africa and Kenya.

Revenue growth across the Africa region was 60%, with growth in both secure solutions and cash solutions. Cash solutions releance growth panelited from continued strong growth in cash volumes and retail solutions such as Deposita, which uses technology and software to service the retail and panking sectors. Accusted PBITA increased by 70%

New and renewed contracts won across the region include manned security, security technology and systems and risk management services work for multi-lateral agencies

Our sales and business development apportunities in Africa is broad based, covering more than 20 countries and key sectors such as availor manking, mining, consumables, telecomms and oil and gas

# CAPITEC/DEPOSITA

Values Safety, Security and Service Excellence

Innovation and Teamwork

Following a number of years in development, G4S subsidiary Deposita launched a bank-branch automation solution in 2017 for Capitec, the fastest-growing banking group in Africa. We have the technology installed and operating in 160 branches of this major bank, and we expect that to continue to grow with this client and with others. The technology reduces the cost of handling cash and improves customer service. We provide hardware, software, real-time banking integration, same day value for the clients of our bank customers, service in the branch or support in the faunch stage of this product, and then remote service and support.

# STANDARD CHARTERED BANK/ASIA PACIFIC. MIDDLE EAST & INDIA

Values Safety, Security and Service Excellence Innovation and Teamwork

Building on an existing strong relationship with Standard Chartered Bank (SCB) which has been in place for more than 20 years and where currently G4S provides Cash and/or Secure Solutions support in more than 20 countries for SCB

In 2017 SCB embarked on a group project with G4S to address the bank's strategic goal of digitising the cash collection process for its corporate customers using the CASH360 solution,

The programme will faunch in Q1 2018 in Indonesia where there is a significant appetite from their large corporate clients to deploy cash depositary machines in client premises, with plans to roll-out the model in a structured manner across other SCB franchise markets

Where appropriate the Deposita hardware, software and the G4S managed service solution enables SCB to provide same day credit for the customer cash deposited in the CASH360 device with the cash returning directly to the G4S cash processing centre,

The solution provides mutual growth opportunities and improves the efficiency and security of the corporate customer cash handling processes as well as improving the customer's cash flow.

Key customer sectors - financial services, extractive, retail, embassies and manufacturing

G4S is a leading integrated Cash Solutions and Secure Solutions provider for commercial and government customers across 16 countries in Latin America, with Brazil, Colombia and Argentina being our largest markets in the region by revenue.

Our revenue growth across Latin America markets was 5.8%, principally driver by growth in Brazil, Argentina and Colombia

'We improved productivity across the region, particularly in Brazil and Adjusted PBIFA increased by 20.8%

During 2017 we continued expanding our footprint and leveraging our expertise winning new contracts in manned security and cash solutions for the banking retail and mining sectors. Of note is the success winning and retaining US Embassy contracts, renewing the contracts for Barbados, Granada, Trinicad & Tobago and Colombia and growing in the region to Argentina, Paraguay, Saint Lucia, Martin due, Antigua and Peru-The focus on marketing Integrated Solutions brought sign ficant improvements for the technology business

'Whilst competition remains robust and wage inflation. needs proactive management, demand for our security and FM services is expected to be positive during 2018 and our businesses are well positioned in our key markets

# LOCALIZA, BRAZIL, LATAM

Values Innovation and Teamwork

Localiza is the biggest car-rental company in Latin America and is one of the largest in the world by size of its fleet. Previously, Localiza car-rental branches had a cleaning team for each branch, no matter the size or opening hours, which resulted in high costs and complex management. Following an in-depth study by the G4S facilities management business in Brazil, we won a new contract which uses mobile cleaning teams, reducing Localiza costs by 20%, increasing efficiency, and ensuring they maintain high-quality standards of cleaning which are recognised as part of Localiza's service excellence.

G4S Europe has activities in 21 countries in Scandinavia, Benelux, Southern Europe and Eastern Europe. It has strong market positions in Cash Solutions and around 20% of the region's revenues are security systems-related.

Our sustained investment in Europe in sales, technology and service continued to produce positive results, and revenues rose by 3.9% across all service lines. Adjusted PBITA rose by 14.3% in the region, reflecting the compound benefits of revenue growth and successful productivity programmes

'We established a technology academy in Denmark where our growing technology pusitiess has become one of our technology centres of excellence, supporting product and service development across the region

In Cash Solutions, we continued to grow our annuity revenues from CASH360, won a large new CASH360 contract with one of the largest retailers in the Netherlands to be implemented from Q1 2018. We have also recently launched a new service in Europe. G4S Pay, which includes an electronic payment module with CASH360 and is in over 400 locations

We succeeded in winning new security contracts for aviation and retail customers, electronic monitoring equipment, systems security for infrastructure and cash management and we retained some of the largest contracts in the region through successful repids in the aviation and banking sectors. Our nurobean dipeline has a large number of opportunities across aid versified range of customer segments

# **BRUSSELS AIRPORT**

Values Safety, Security and Service Excellence Innovation and Teamwork

SOG

In 2017, G4S Belgium won a six-year contract to continue to provide security services at Brussels Airport, one of Europe's busiest travel hubs. With a team of 900 employees, G4S will provide terminal security, passenger and remote screening, hold-baggage screening, access control for VIPs, crew and general aviation personnel, and supervisor presence inside the airport authority's operations centre. A ground-breaking approach to the contract helped G4S secure the win. The team developed an 'output'-based contract, working closely with the customer to establish their key performance indicators. Confident that G4S can deliver over and above the customer's requirements, G4S is paid for the services which are successfully delivered.

G4S provides aviation and security services in 120 airports. across 45 countries, as well as working for 85 airlines In Belgium, G4S also secures Brussels South Charleron Airport, providing 400 highly-trained personnel

| 2,006 | 1,892            | +60%  | 123            | 115  | 70%   |  |  |

Freedon a World Security Services Report ,anuary 2017

G4S North America is an integrated Secure Solutions business for commercial customers, with some government contracts including border protection, and has a market-leading innovative cash management solution for retail customers.

in North America, our revenues grew by 60%, with good growth rates in both our Cash Solutions and Secure Solutions businesses

in Cash Solutions, G4S technology-enabled cash management services are now delivered to over 6,900 retail locations across the United States, including over 5,000 in large store formats where G4S has established a market-leading position. We believe that our metail cash solution offers unique customer value and this sireflected in a substantial pipeline and active pilot programmes

Our Secure Solutions business produced revenue growth of around 5% as our integrated security. solutions continued to find traction in the market place This rate of revenue growth was constrained as we continued to apply commercial discipline in those market locations facing tight labour corigitions. In North America we continue to monitor and manage wage inflation, particularly in Canada following recent min mum-wage increases

Overall in the United States we are managing wage. inflation pressure through productivity improvements and commercial discipline, and we believe that increased unit labour costs are encouraging customers to move to our integrated security solutions combining G4S security professional personnel with technology. We continue to see good demand for our products and services across the US and Canada

Adjusted PBITA increased by 70%, helped by a favourable revenue mix and efficiency gains, partially offset by the cost of investing in capacity to support our growing integrated secure solutions and retail solutions businesses

Freedonia World Security Services Report, aniuary 2017

G4S is the leading provider of Cash and Secure Solutions in the region, with a broad range of expertise covering specialist-event security, provision of services to the UK Government including Care & Justice services, and Cash Solutions.

Revenue in the UK & Ireland increased by 2.1%, with a solid performance in our core businesses, including double-digit growth in our security technology business

The deployment of integrated security solutions, compining technology and manned security, was instrumental in retaining and expanding a number of our existing contracts and is increasingly relevant in winning new business. We are able to craw on substantial expertise in our UK & ireland security systems business, supported by product research and development at our UK technology centre

Revenue from our Care & justice services and FM businesses was broadly flat as we maintained a disciplined and selective approach to new contract bioding

Adjusted PBITA increased by 7 1%, reflecting the combination of revenue growth and the penefit of our on-going productivity programmes

The roll-out of our lean process design for the backoffice operations of purmanned security business commenced in Ireland in the third quarter of 2017 and we expect it to be implemented in the UK during 2018

# JOBCENTRE PLUS, UK

Values Integrity and Respect

Safety Security and Service Excellence

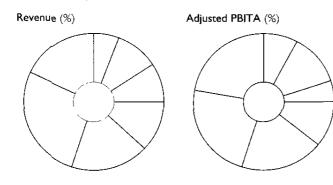

Innovation and Teamwork

SDGs

In 2017, G4S UK&I won the integrated security contract for the job centres in the UK for the Department of Work & Pensions (DWP). G4S previously had the manned security contract through Telereal Trillium and managed the access control system across most of the estate.

The DWP's objective was to procure a security service allowing for a potential reduction in the number of sites from 900 to around 700, and so is flexible and supports the DWP's transformation programme plan over the next two years. The DWP transformation programme aims to reduce costs whilst maintaining safety of the users of its properties. We have modernised the way in which security is provided using an Effects-Based Methodology, which has been aligned with the Centre for the Protection of National Infrastructure (CPNI) best practice. Essentially we are looking to minimise threats by reducing and better managing anxiety of members of the public at DWP sites, reducing the likelihood of incidents occurring.

Our services range from conventional manned security offenings to risk consulting, highly sophisticated security technology, security systems and integrated solutions. We are investing in the resources and capabilities which enable us to innovate and apply technology in the design and delivery of integrated solutions for our customers, and this is reflected in the increasing share of revenue from these solutions. Our technology-related security revenues for the Group grew by 114% to £2.45 billion (2016 £2.2bn).

Our Secure Solutions business segment also includes our Care & Justice and FM services. Our Care & Justice business is concentrated in the UK and Australia and provides custody, detention, rehabilitation, education and transport services, typically in complex operating environments.

As previously reported, our Secure Solutions businesses faced challenging trading conditions in the Middle East & India region and this partially offset the good rates of profitable growth in our other markets. Overall, the Secure Solutions businesses delivered 3.4% growth in revenue and 2.9% growth in Adjusted PBITA

# **CASH SOLUTIONS**

|                                | Revenue    | Revenue    |          | djusted PBITA | Adjusted PBITA |          |
|--------------------------------|------------|------------|----------|---------------|----------------|----------|
| At 2017 average exchange rates | 2017<br>£m | 2016<br>£m | YoY<br>% | 2017<br>£m    | 2016<br>£m     | YoY<br>% |
| Emerging markets               | 388        | 414        | (6.3%)   | 55            | 59             | (6 8%)   |
| Developed markets              | 821        | 768        | 69%      | 105           | 93             | 12.9%    |
| Total                          | 1,209      | 1,182      | 2.3%     | 160           | 152            | 5 3%     |

Revenues in Cash Solutions grew 2.3% and Adjusted PBITA rose by 5.3%

The overall growth in revenue and profit was driven by strong volume growth, particularly in our Retail Cash Solutions business in North America, CASH360 in Europe and Deposita in Africa and Asia. At the end of January 2018, we had an installed base of over 19,500 cash automation solutions at retail and banking customers, around a 30% increase compared with 14,600 in 2016. The strong growth in Adjusted PBITA in our developed markets reflects the benefits of our systematic restructuning and productivity programmes which have been implemented over the past three years, partially offset by investment in sales and business development.

The robust growth in developed markets was partially offset by the effect of weak trading in our Middle East & India region, where our businesses have been adjusting to the challenging trading environment and where we expect trading to begin to stabilise during 2018.

#### CORPORATE COSTS

Corporate costs comprise the costs of the G4S plc board and the central costs of running the Group including executive, governance and central support functions, and were slightly lower compared with the prior year

developed markets Adjusted PBİTA in Cash Solutions developed markets

Our aim is to identify material risks that could impact us, and to focus management attention on effective mitigation of the significant risks to achievement of our strategic objectives and safeguard our reputation.

#### An evolving risk landscape

During 2017 we continued to see challenges from uncertainty and changes in political leadership, terrorist events, weak economic recovery, geopolitical shifts, general migration and the on-going instability in the 4iddle East. These have created risks and opportunities for the security industry, C4S continues to face operational and health and safety risks often particular to the security industry, along with financial and commercial risks common to all multinational companies. Regulations on data privacy continue to be tightened within ghilfnes for non-compliance. Our drive for increased growth through delivering significant cost. savings and innovative service excellence to customers may lead to a changed risk profile

We continue to assess that the risk to G45 from the lote for the UK to leave the IU is not significant as we mainly operate within national boundaries with around 83% of total Group revenues outside the UK and minimal cross-border trading. However, depending on the terms of the UK's exit from the FL, there might be a range of business factors that could affect us including the availability of labour, regulations and taxation it is also possible that continuing uncertainty during the negotiation period reduces economic growth in the  $\ensuremath{\mathsf{U}} K$ and Europe, further affecting both our sustomers and our competitors. We continue to monitor developments through our risk and governance framework

#### What we did in 2017

Progress continues to be made on increasing risk awareness and ensuring accountability for risk management rests with business management teams The Group's mandated control standards have been further enhanced to ensure they address our key risks with appropriate training and challenge to facilitate their effective performance. Control self-assessments were completed by all businesses. These are reviewed, challenged and best practice shared by region and group functional experts, and compliance has been tested through internal audits. Our quarterly Regional Audit Committees continued to focus on financial judgments and to address internal and external audit findings, which has enabled further improvement in financial control awareness and effective performance

#### What we will do in 2018

We will continue to refine our key standards and controls and through support and training we will help all businesses operate them effectively. Functional teams will use the results of control self-assessments to assist countries with full compliance. In addition, internal audits will continue to test the operational effect veness of our standards and controls. Regional Audit Committees will continue to review challenge and direct improvements in the performance of control standards, financial judgments and reporting. Through continued engagement and review by country, region and Group management, we will enhance the quality and timeliness of the identification of risks and the delivery of mitigating actions

During the year we will further improve the reporting of risks and use metrics to assist with risk identification

#### Risk Management and Appetite

As in prior years we have undertaken a bottom-up review with businesses completing an assessment of their major risks and developing mit gating actions to reduce the likelihood of those risks crystallising. These reviews require management teams to identify the essential controls needed to mitigate high innerent risks to acceptable residual risk levels, in line with the group's risk appetite, further encouraging effective compliance with the Group's core standards and controls. These risk assessments are reviewed, challenged and amended as necessary by regional teams, who are also responsible for monitoring delivery of required improvements. This is combined with a top-down review from group functional leaders, to ensure that the risks captured are complete and appropriately assessed. The risks are then summarised and presented to the Risk Committee for consideration before being presented to the board for review. The resulting principal residual risks, with any dentified changes and mitigating actions, are outlined in the following pages 62 to 65. The residual risk level has not changed significantly compared to the prior year

G4S operates in high-risk areas of business, in which our core competence and value-add to customers in managing those risks effectively. We have a higher risk appetite for growing and transforming businesses in which we have the expertise to deliver and to achieve a good commercial return for the risk we are accepting

We have a low to ven low risk appetite for non compliance with laws and regulations, appropriate culture and values, health and safety and people risks, as these are priority areas for our stakeholdern and failure in these key risk areas could have a material mpaction our business

# ENTERPRISE RISK MANAGEMENT GOVERNANCE MODEL

The poard has responsibility for ensuring risk-management processes are diffective by reviewing the most critical risks and controls

#### RISK COMMITTEE

#### The Risk Committee meets four times per year and reviews the Group's risk appetite, assesses the Group's principal residual risks and assesses the overall enterprise risk management process

#### AUDIT COMMITTEE

The Audit Committee meets four times per year and ensures the Group's control framework is operating effectively

# GROUP EXECUTIVE COMMITTEE

## The Group Executive Committee oversees the management of the Group's onne ball residual risks

# REGIONAL AUDIT COMMITTEES

The committees meet four times a year, also attended by the external auditor, and review

- The progress of closing internal and external audit findings, and
- 2. Reports on status of financial controls and significant accounting judgments

#### **GROUP AND REGIONAL ETHICS COMMITTEES**

The committees are responsible for whistleblowing and related investigations across the regions

#### OPERATING COMPANIES AND SHARED-SERVICE FUNCTIONS

Our operating companies and shared-service functions centry and assess the risks to their pusiness objectives and plan appropriate mitigating actions. These are recorded in our Group-wide risk management tools A thorough review is conducted as part of the annual

planning process with updates made in senior management team meetings and trading reviews Control self-assessments of compliance with Group control standards are completed annually to -annually for financial control standards).

#### Operating companies

Melemble/ three lines of defence to control. and manage risks across the Group

# I'' LINE: BUSINESS OPERATIONS AND SUPPORT

Responsibility for the first line sits with the managers of our pusinesses, whether line management or support. The senior management team within each business is responsible for implementing and maintaining appropriate controls across their business Result. Ensures standards expected by the Group, our customers and other stakeholders are met

### 2NO LINE: CONTROL AND OVERSIGHT FUNCTIONS

The second line consists of oversight functions at both regional and Group level including linsk, finance, legal, human resources, operations, information technology commercial and CSR

Result: Provides support to pusiness managers

# 3RD LINE: INTERNAL INDEPENDENT ASSURANCE

The third line comprises the internal audit function As part of its annual programme of work, internal audit conducts regular reviews of risk management processes and gives advice arid recommeridations on now to improve the control environment

Result: Provides independent assurance over the design and operation of controls

# **EXTERNAL AUDIT**

Financial reporting risks are considered as part of the external audit

# **HEALTH AND SAFETY (H&S)**

#### Risk

The provision of security services to protect valuable assets, often in hostile or dangerous circumstances, presents health and safety challenges. In addition to the significant impaction individuals, a senous preach of health and safety could disrupt the Group's business, have a negative impact on our reputation and lead to financial and regulatory costs. In 2017, 25 (2016, 4.7) employees lost their lives in work-related incidents, of which eight (2016, 20) were as a result of armed aftacks and 11 (2016-17) were road-traffic incidents as the year-on-year improxiement in road safety continued. There were three (2016, 9), non-natural deaths of people in our custody

#### Risk mitigation

We are committed to protecting the health, safety and well-being of our staff, people in our care or custody and third parties. The Group's mandatory FI&S standards target the critical safety risks in the Group including road and firearm safety and are supplemented by training for front-line staff through to business leaders. During 2017 the annual self-assessment by countries of compliance with our standards was supported by site reviews from local, regional and Group H&S managers and was included in the scope of country internal audit visits. Reporting was enhanced to include high potential incidents which are investigated thoroughly. Controls are reviewed in light of lessons learned from senous incidents

#### CULTURE AND VALUES

#### Risk

G4S provides security for people, oremises and valuable assets The Care & Justice services our ness provides services to detainees, victims of chime, people needing assistance, and other members of the public. We operate in many different countries with a diversity of local and national cultures. Having an appropriate set of values strongly embedded as our corporate culture is very important to ensure staff meet our high expectations including compliance with our ethical business. conduct standards. Failure to do so risks not delivering on our commitment to our colleagues, customers and other stakeholders and may fall to comply with legislation and international standards

## Risk mitigation

We have a set of values, detailed on page 17, which are continually reinforced to all employees through a variety of key processes including recruitment, induction training, and recognition schemes as well as communications materials. Nominated values ambassadors in businesses are helping to cascade values-related communications. HR and learning and development leaders have assisted in the production of materials for increasing awareness and uncerstanding of our values. In everything we do indimatter flow chalfenging the dimumstances, we require our people to henave in line with our values and to be prepared to use our whistleblowing facility, Speak Out, if they become aware that offiers are not doing so letnics steering committees at a Group level and in each region oversed the whistleblowing investigation process and provide constructive guidance to countries on artificial matters. We continue to focus on building awareness of the importance of our corporate values and whistleblowing, particularly in places where we work with people who may be more rulherable and have less

#### Link to strategy

We reviewed the appropriateness of our 'Golden Rules' which reflect critical safety risks and are mandatory for all G4S businesses, and failure to achere to them is linked to our discolinary procedures. Good practice and progress in delivering H&S improvements are recognised and rewarded, while boor practice and insufficient progress lead to close executive scrutiny, and can impact performance-related pay for business, eaders, flappropriate

#### Mitigation priorities for 2018

We will continue to refine our standards, policies and controls where we see an opportunity to reduce 1-85 risks further. The compliance with these group requirements will again be self assessed during 2018 and reviewed by H&S and internal audit teams. A revised H&S training programme for our front-line employees is under development which supplements existing training provided by businesses on key H&S risks. Safety improvement plans are required for all businesses. Business leaders take responsibility for leading safety performance and butting H&S at the forefront of their day-to-day activities

opportunity to raise concerns themselves. In 2017, our whistleplowing notline and case-management system received a total of 300 reports from our employees (2016, 402). Matters of a serious nature were investigated at a serior and independent level, with 59 investigations completed during 2017 (2016, 55).

# Mitigation priorities for 2018

For our front-line employees, we will extend the values-based training materials already developed to reflect common experiences or particular challenges which come to light from whistleblowing cases, internal grevances or feedback from the global employee-engagement survey conducted in 2017

For managers, the newly-revised competency framework has helped guide the development of on-line training, which is due to be launched in 2018. The training uses real stic scenarios in which participants are required to make value-based decisions from a range of options in order to achieve the right outcomes. The training will be mandatory and tascaded to all managers to complete before the end of 2018

Our reward and recognition schemes will continue to be alighed to the values, to ensure they are promoted in everything we do A new group-wide scheme will supplement local efforts and enable us to showcase the types of penazioun which exemplify the values and reflect the great work that our employees do

### **PEOPLE**

#### Rick

in a global and diverse security business such as ours, there are risks associated with recruiting, training, engaging, rewarding and managing people, as well as ensuring we retain critical talent to deliver increasingly sophisticated services through our 5/0,000 employees. Screening and vetting is a particular challenge in some territories which lack supporting infrastructure from the relevant authorities. Any indicent where our people fail to meet expectations of customers and other stakeholders could lead to financial and reputational damage to the Group's pusiness. Whilst our controls are robust we still face the risk of an employee not behaving in the with our values

#### Risk mitigation

The Group's mandatory human resource standards cover core requirements for delivering the HR strategy, such as ensuring there are effective organisational structures in place, that employees are screened, inducted and trained to perform their jobs, and that there are appropriate mechanisms in place for managing on-going performance and recognising great performance. During 2017 the annual self-assessment by countries. of compliance with our standards was supported by site reviews from local and regional teams, and included in the scope of country internal audit visits

#### Link to strategy

We review in detail the performance and potential of managers across the Group to help identify development needs and build succession plans. We also cell ver regional leadership programmes to nurture falented individuals early in their careers, and help develop them into more senior roles as they move through the organisation. Staff turnover is a key indicator to us of employee. satisfaction, and reducing it improves service excellence and reduces recruitment costs. During the year staff turnover reduced from 276% in 2016 to 25.3% in 2017 (see page 17).

#### Mitigation priorities for 2018

We will use the information from our fifth global employee survey. to help develop initiatives to enhance standards further and ways in which to ensure the standards are embedded. Compliance with our Core HR Standards will again be self-assessed during 2018 and reviewed by local, regional and group teams as well as tested by internal audit. Direct support will be provided as necessary to enhance compliance with our stancards

# MAJOR CONTRACTS

#### Risk

The Group operates a number of long-term, complex high-value contracts with multinational companies, governments or strategic partners. Key risks include, accepting onerous contractual ferms, poor mobilisation of contracts, not transitioning effectively from mobilisation to on-going contract management, not delivering contractual requirements, inaccurate billing for complex contracts, ineffective contract-charge management, and not managing sub-contractors appropriately

#### Risk mitigation

During 2017 we updated our strict thresholds for the approval of major bids involving detailed legal review and senior management oversight. For a selection of our most significant contracts in the UK, we perform 360° reviews of all aspects of contract management and performance. We also perform a quarterly financial review of the top 25 and low-margin contracts in each region

For our large multinational customers, account managers oversee performance of these contracts across relevant countries and have regular updates with customers to ensure we deliver against contractual terms

#### Mitigation priorities for 2018

While great improvements have been made in reducing the risk of taking on onerous contracts, as the impact can be significant, we will continue to enhance the quality of the analysis used in the bidding process and ensure that lessons are 'earned from underperforming contracts. We will also embed into the SalesForce opportunity management tool our updated approval requirements to make compliance and monitoring effective

### Link to strategy

- People and vailes
- Customers and service excerience
- Growth and nhovation
- Operational excellence and productivity
- Enancial and commercial discipline

# LAWS AND REGULATIONS

G4S operates under many complex and diverse regulatory frameworks, some of which have extratemitorial reach and many where regulations change regularly. Risks include incw or changed restrictions on foreign ownership, difficulties obtaining all relevant I cences to operate, complying with employment legislation covering a wide range of requirements, complying with often complex and proad ranging local tax regulations, increasing It gat on and class actions, bribery and corruption and complying with human rights legislation. Failure to meet the recured standards can lead to higher costs from claims and litigation, inability to operate in certain jurisdictions, through either direct ownership or joint ventures, loss of management control, camage to our reputation, and loss of customer confidence

#### GROWTH STRATEGY

#### Risk

Our focus is an investing in the development and marketing of innovative and integrated products and services and improving business efficiency to strengthen service excellence and support improved margins over time. There are risks with adopting such a strategy that we fail to create higher-value solutions that differentiate us from local commodifised competitors, that we fail to deliver our core services effectively and consistently, that we lose contracts or growth opportunities through price competition and market changes, that we fail to enter target markets successfully, that we become over-reliant on large customers, and that our business transformation in tiatives do not deliver as expected

#### Risk mitigation

We continue to focus on delivering excellent service through the pest-practice service delivery guidelines in place for both Secure Solutions and Cash Solutions service lines. Our newly developed information systems supporting the end-to-end order-to-cash process in our Secure Solutions service line, including finance, numan resources and operational delivery, was launched in Irelanu in 2017. We use our centres of excellence to develop innovative solutions for customers, particularly in electronic security and CASH360 in Cash Solutions. We leverage our global network to offer integrated solutions internationally and our global accounts programme supports and promotes our multinational accounts. initiatives. Our consistent focus on delivering excellent service to customers has red to an increase in our Net Promotor Scores

#### Link to strategy

#### Risk mitigation

Our policies and procedures clearly set out the requirement for local management teams to comply with all relevant laws and regulations. Group and regional leadership together with our Ethics Committees at Group and regional level provide oversight and support our businesses to mitigate the risks. Group legal and regional leadership closely monitor changes in foreign ownership. laws and make appropriate plans to respond IC4S continues to faise with relevant governments and authorities to influence positively the regulatory environments in which we work

# Mitigation priorities for 2018

We will continue to focus on seeking full compliance with laws and regulations across all jurisdictions we operate in and ensure that concerns are addressed appropriately by local management with support and guidance from Group and regional leaders

We are able to mitigate local reduction in growth opportunities through the diversity of inhustries and markets we serve, and by leveraging our portfolio of products to offer alternative costefficient solutions. All our product development initiatives and business transformation projects are crosely monitored by Group and regional teams, with appropriate challenge and approval to maximise the opportunity and minimise the risks

# Mitigation priorities for 2018

In 2018, we will focus our investments in innovative product development and in transforming the efficiency of our pusiness and the capabilities of our people and systems. Customer satisfaction reviews, vill guide now live cerver integrated solutions to existing and potential customers across all businesses. This would include proprietary security systems, video and intelligent camera systems, video management systems, global security intelligence systems and software tools including incident-management systems such as RISK360 in our Secure Solutions business. For Cash Solutions, development would include iretail solutions, CASH360, Deposita cash-recycling systems and solutions for our smaller retailers. Our new information systems for the Secure Solutions service line will be implemented in the UK in 2018, with plans to expand into other countries once proven to celiver as expected. Focused business transformation projects will also be implemented to drive further efficiency and improve margins. Oversight, challenge and approval of detailed business cases for all such initiatives will be er forced by Group and regional teams

#### Link to strategy

- People and values
- Customers and service excellence
- Growth and inhovaling
- Operational excellence and productivity
- Financial and commercial discipline

#### **GEOPOLITICAL**

#### Risk

We operate in many countries across the world with wide-ranging government and political structures, different cultures with varying degrees of compliance with laws and human rights, particularly within conflict and post-conflict zones. The hisk factors include political volatility including the outcome of elections and referendums affecting trade rules and regulations and changes in policies towards business, revolution, temonsm, military intervention, mistreatment of migrant workers arid employees working for our suppliers. These risks impact us in many ways, the health and safety of our staff and customers, the continued operation of our businesses, and the ability to secure our assets and recover our profits

#### Risk mitigation

We collaporate with our local partners, conduct early risk assessments before and during security assignments, developrobust operating procedures, and work closely with our local and global customers in managing the risks of operating in such en pronments. We have clear standards on human rights which

#### INFORMATION SECURITY

increased regulations and sanctions relating to the potential failure to secure sensitive and confidential data, which we are entrusted with by customers, staff suppliers and other stakeholders, have increased our risks in this area. Like all organisations, we face ic, per attacks from a variety of sources which, if successful, could result in censure and fines by hat on all governments, loss of confidence in the G4S brand. and specific loss of trust by customers, especially those in government and financial sectors. Additionally, we face the risk of disruption to service delivery from system failures, incomplete backup noutines, inadequate business continuity and disaster recovery plans

#### Risk mitigation

We have "defence-in-depth" technologies (i.e. multiple layers of defence) in key systems to protect business information entrusted to us During 2017 we prought our IT function under direct management of the Group team, to enhance the way our systems

# CASH LOSSES

#### Risk

We provide a wide range of cash management services including cash processing, fit-sorting of notes for recycling, holding funds on penalf of customers, secure storage, a range of ATM services, as weil as transporting high values of cash and valuables including international shipments and fully-outsourced cash-management solutions such as CASH360. Our cash business is at risk of external attacks, internal theff, boor cash reconcliations and weak management supervision, which could lead to loss of profit, ir creased cost of insurance and health and safety considerations for our staff and the public

# Risk mitigation

During 2017 we refined the standards for Reconcliation and Operational Cash Controls and continued through an folloaming academy' and direct support, to ensure wide-spread awareness. and effective performance of these controls. Self-assessments against these standards are performed twice a year by each

#### Link to strategy

all businesses must comply with. Those paked in high-risk countries self assess their compliance with these standards annually, with this assessment reviewed by Group and checked by Internal audit We have a mandatory supplier roce of conduct vihich includes anti-ordery and modern slavery recurrements. Our G4S Risk Management business has particular expertise in providing secure solutions in very high risk, low infrastructure environments

#### Mitigation priorities for 2018

In markets where potential government policy or trade agreements may have a significant impaction our ability to trade we will continue to engage with riational and international governments to promote the benefits that G4S brings to a market and an economy, to ensure that we minimise the impact of any trace restrictions on trade policy. We will increase the number of countries that complete numan rights control self-assessments and carry out numan rights risk assessments in all key business areas. We will also work to build awareness of numan rights responsibilities across the business and our partners and increase engagement with suppliers to ensure they are also complying with human rights

are supported and run. This will ensure policies and best practice are applied consistently across all operating liusinesses. In late 2017 we commenced a programme of investment in Cyper defence tools, to improve the levels of compliance for managing these risks across the many systems and infrastructures that exist globally. We are also introducing additional standards and guidance to ensure compliance with Gerieral Data Protection Regulation (GDPR) across the UK and Europe

# Mitigation priorities for 2018

We will continue to strengthen the effective performance of our IT processes through the centrally-managed IT structure, and complete the implementation of our new Cyber Tools programme to increase the security of our 'T systems and infrastructure, including managed cycler security products, central sed infrastructure management tools and cyber vulnerability assessments

pranch and head office and compliance is supported and monitored by regional teams and through internal audit. We also have clearly-defined standards for physical cash security for our employees, vehicles and processing centres. The Group and regional cash security teams are responsible for monitoring compliance with these through self-assessments performed by pranches and visits to country, for monitoring attacks and other cash losses, and for communicating lessons learned. Innovative security-defence products such as cash-box tracking, vehicle protection foam and protective boxes are used in a number of hus nesses

# Mitigation priorities for 2018

Our new Grobal Cash Sofutions division will give additional focus to have improvement in the effective performance of physical security and cash reconciliations throughout our cash pusinesses, to reduce both the number and value of losses.

I am delighted that, building on the foundations laid in recent years, the Group has improved both its performance and financial position in 2017. This is particularly notable, in light of the challenging trading conditions that prevailed in the Middle East & India markets.

As shown in the business review section of this report, the Group has made substantial progress on its strategic priorities. The board is pleased with the focus, energy and leadership that the executive team brings to the Group.

# **IMAGE REMOVED**

John Connolly, Charmar-

## Strong governance culture

Ensuring that G4S is resilient and agree and therefore able to deal with constant change and evolving economic and geo-political situations is of paramount importance. This can only be achieved with a skilled and experienced board and management feam and an appropriate culture and governance structure

 ${}^{\pm}$ ne board and I see strong governance, adapted to the Group's needs, circumstances and business model, as a source of competitive advantage. G4S is a large, geographically diverse organisation, doing business in complex and sometimes sensitive environments. Sharing a common understanding of the company's purpose and values is essential. To promote this, the poard continues to support the application of G4S values throughout the organisation. A strong governance culture is supported. by continuous monitoring, review and promotion of the Group's values, standards and policies. It is also essential that directors feel able to provide notionly support but also constructive challenge

# BOARD AREAS OF FOCUS IN 2017

In my statement last year, I listed six areas of focus for the board. These were

- Annual review of Group strategy and management's execution of the strategy
- Induction and integration of new poard members
- · board and management succession planning
- · Monitoring business performance
- Continued understanding of the Group's businesses and management teams
- Maintaining emphasis on risk management aric e ficient structures

vie made good progress in all the lelareas and further information on the key areas of artivities for the board r 20 - 7 are set out in the governance report

I herefore we strive to foster open and effective communication within the poardroom and with the executive team. This process is informed by hest practice as well as feedback received and views collated from our key stakeholders. There are a number of ways. in which the board gathers stakeholders views, which are set out on pages 78 and 79. This year, as in previous years, I met with major shareholders as part of our annual programme of governance meetings

Given the business undertaken by the Group and the complex markets in which we operate, it is essential to understand the key risks faced by the organisation and to ensure that the company has appropriate policies, systems, processes and management action plans to mitigate these risks to an acceptable level. The board therefore maintains a Risk Committee, which is separate from the Audit Committee, to provide the necessary focus on risk management and mitigation

#### Supporting change

Planning for the future requires us to review the board's composition regularly to ensure that it remains fit to support the changing needs of the Group Management development and succession planning are also key areas of nterest for the board. This was also particularly important this year, as management implemented important organisational changes, with the Secure Solutions business segment now organised into four regions and the creation of a global Cash Solutions division

In 2011, the board visited the Americas business and the technology business in the UK. Further details of these visits can be found on pages 78 and 79. In both histances, the board and Ewere impressed with the quality of the products and services offered and the importance of technology both in creating new services and also enhancing offenings when combined with tracitional security and cash services

As chairman, it is my role to ensure that the board has the right skills to understand, support and relatinge triese developments. We give hareful nor sideration

to this need during the board members recruiment process but also when reviewing committees composition, as we did in December II am confident that the board has significant, diverse and relevant skills and experience, with strong international exposure and knowledge of a significant number of industries (further ir formation on the board balance is set out on page 74)

#### Performance evaluation

Our externally facilitated performance evaluation was conducted between July and December 2011 in eresults confirmed that the board and its committees continue to operate well, with all directors contributing to the overall success of the Group Hed the performance evaluation process, with assistance from the Senior Independent Director and the company secretary. All the directors participated. The knowledge gained from the previous external evaluation allowed us to conduct a more focused evaluation this year. The board and committees performance review process is described in detail on page 77 and I am pleased to confirm that no sign ficant issues were raised

# Changes to the board

Due to continued linealth, an Springettire recifrom the board on 20 june 2017. We were very sorry that lan was unable to loin our board and we wish him well for the future. Paul Spence, who was already a member of the Audit Committee, served as interim chair with effect from 20 January I am very grateful to Paul for his strong stewardship

The Nomination Committee oversaw the process to find a new non-executive director qualified to act as chairman of the Audit Committee, which led to John Ramsay joining the board on 1 January 2018 am pleased to welcome, ohn, whose experience in highly international, innovation-focused businesses and his extensive background in finance and accounting will seivery valuable to our board and in leading our Audit Committee

As announced in December 2017, after eight years on the board, Clare Spott swoode will step down after the company's annual general meeting on 15 May 2018 I would I ke to thank Clare for her thoughtful contributions to the board and her strong commitment, as chair of the CSR Committee since 2014, to help the company develop and promote CSR policies and processes. The Nomination Committee has initiated a search to find a new non-executive director to join the board

Further information about the work of the Nomination Committee during the year under review is set out or: Dage 80

#### Results

I am pleased to report on another year of good financial progress with confinued growth in revenue and earnings and, importantly a modulation in hell debt with achievement of the Group's revenage target of below 2.5 times het debt in Adjusted EBITDA by the end of the year

Our statutory results showed a 3.1% increase in revenue, which rose to £7.8 billion, Adjusted PBITA up 65% to £491 million and earnings up 192% to £236 million benefiting primarily from a combination of profitable growth in our core pusinesses and profits or disposal of a number of businesses as our portfolio rationalisation programme drew to a close

As noted elsewhere, our core pusinesses in all regions apart from the Middle East & India grow revenue and Adjusted PBITA such that total Group revenue from core businesses was up 3.2% to £7.4 billion and Adjusted PBITA grew by 4.2% to £496 million

The management team's continued focus or cash and working capital enabled the Group to deliver good operating cash flow conversion and this, coupled with net proceeds from disposal of a number of portfolio businesses of £156 million offset by organic capital hivestment of over £100 million, meant that the Group's het debt to Adjusted EBITDA ratio reduced. from 2.8 times at the end of 2016 to 2.4 times at the and of 2017 in line with the polard's stated leverage reduction target

The troard is confident in the Group's outlook and proposes to increase the final dividenciby 5% to 6 (13) (DKK 0.5097) per share, payable on 15 June 2018 Ŵ th an interm dividenci of 3.59p (DKKS 2943) baid on 13 October, this will bring the total dividenciion the year to 9.70p per share

#### People

The Croup has around 570,000 employees in over 90 countries often providing complex services in a fficult en vironments. This can create significant chailer ges. It is therefore pleasing that the outcome of the  $20^{1/3}$ employee engagement survey, which consisted of questions relating to G4S' new corporate values, provided an 84% favourable response rate

On behalf of the board, I wish to thank the employees of G4S for their engagement, enthus asmilhard work and dedication

John Connolly Crairman

# COMPLIANCE WITH THE UK CORPORATE **GOVERNANCE CODE**

The board's statement on the company's corporate governance performance is based on the April 2016 edition of the UK Corporate Governance Code (the "Code"), which is available on the Financial Reporting Council's website (frc.org uk).

The company complied throughout the year under review with the provisions of the Code, except in relation to the composition of the Audit Committee. This matter is addressed on page 85. The Corporate governance report, together with the Audit Committee report, the Risk Committee report and the Directors' remuneration report, describe how the board has applied these provisions

- 3. Mr Springett was appointed to the board with effect from ill anually 20-7 and shortly thereafter had to take an extended leave of absence to undergo treatment for a medical condition, therefore he was not expected to attend poard meetings ouring this time Due to continued in health, Mr Springett retired from the board on 20 jine 201

# BOARD BALANCE AND DIVERSITY

# Diversity

The Group's workforce reflects the wide range of countries, cultures and environments in which the Group operates. The Group has long recognised. that diversity can enhance decision making and performance and promotes diversity within the organisation. The result is a diverse mix of gender age race religion, nationality, language, background and experience agross the Workforce Diversity, including gender diversity, in the ser or managemen, population remains an area of particular focus for the board

As well as being diverse in terms of gender and hat onality, the board also includes members with diverse skills, personal attributes and experience. While most members have international assignment expenerice others bring extersive. expenence of a variety of industries In addition, the board has a mix of soft. long-senting and hery members. These differences greatly errors denate in the poardroom, bring tresh bersperrives and understanding

Although the board has not adopted a formal board diversity policy, noninasi ti set any specific targets in this respect, diversity is a key consideration for the board. Recruitment of any new member to the board is always based on ment, against objective ontena, which take account of the diversity penefits each candidate can bring to the board "urther ir formation in this regard is set out in the report of the Nomination Committee or pages 80 and 81

The board aisc considers diversity as part of its annual review of talent management. and succession plans for the board and senior management team. As part of this review gender diversity, as well as in latives in place on being developed to promote greater representation of women and an increase in cultural and ethnic civersity across the Croub's global leaders are also discussed

ne poard is mindful of its obligations. under soth DTR 12.8 and Code Provision 324 and is considering adopting a formal. board diversity policy to capture the

# Board balance

board's approach to diversity and setting autithe panciples. I follows in tonsidering board appointments, board composition, and success on planning

However, the board is committed to ensuring that any such policy is informed by the results of the Group's diversity and inclusion strategy review, taking place in 20 8 Therefore the poard will keep this matter under revisioning the year

#### Board composition

As at the date of this report, the board comprises 10 members the non-executive chairm an John Connolly), severi other con-executive directors and two executive directors

The names of the cirectors serving as at 31 December 2017 and their hiographical details are set out on pages 68 and 69. All these directors served throughout the year under review, apart from Ian Springett a nonexecutive director who retired from the poard on 20 June 2017, and john Ramsay, who was appointed to the board on Flanuary 2018

Clare Spottiswoode, having completed hearly eight years as a non-executive director of the company, will retire from the poard after the company's AGM in 2018 The process of seeking a candidate for a new non-executive director role is or -going

#### Independence

The board considers all the non executive directors to be independent and to bring objective oversight and challenge

The board acknowledges the recommended term within the Code and is mindful of the need for planned and orderly succession whenever possible. Therefore crear records of the tenure and skill set for each non executive director are maintained

#### Director re-election

The company's articles of association require that all continuing directors are subject to election by shareholders at the next ar hual general meeting following their appointmen, and that they submit themselves for re-election at least every three years and that at least one-third of the directors not standing for election for the first time stand for re-election at each annual general meeting. However, in accordance with the Code's provision on re-election of directors, all continuing cirectors stand for re-election every year. With the exception of Clare Spott swoode who will step down at the end of the 2018 AGM, all continuing directors intend to stand for election or re-election, as the case may be, at the company's upcoming ACM

#### Potential conflicts

Each of the directors has disclosed to the board any situations which apply to them as a result of which they have or may have an interest which conflicts or may Lonfict with the interests of the company in accordance with the company's articles of association, the coard has authorised such matters. Should aid rector become aware that they may have an interest in an existing transaction with G4S, they should notify the board in Anting or declare it at the next meeting. The company has procedures in place for managing such situations. The affected director will not vote on a matter in which they have an interest and the board may impose adhif chai conditions if deemed appropriate. The polard reviews such matters on a regular basis

#### Board meetings

Seven scheduled poard meetings were held during the year ended 31 December 2017 Fach year, one of these meetings is an extended two-day meeting at which in acdition to normal board business, the hoard and executive committee review the Group strategy

Prior to each poard meeting, comprehensive papers. are circulated to the directors addressing not only the regular agencalitems on which the executives will report, but also details of any matters requiring approval or decisions, such as significant transactions or other matters reserved to the board

At each meeting, the board receives regular reports and in-depth presentations from line and functional executives and the board makes visits to business sites. from time to time

After meetings of the board committees, the respective chairs report to the board on the matters considered by each committee

After each board meeting the charman holds a meeting attended solely by the non-executive directors

There are seven board meetings scheduled for 2018 including a two-day board and strategy meeting

# 2017 BOARD ACTIVITIES IN FOCUS

- Appointed one new non-executive director
- Reviewed results of employee engagement survey underpinned by group values
- Held a two-day strategy forum with Group executive, in October
- · Discussed succession plans for poard members and reviewed succession planning and senion management development
- . Oversaw the review of organisational structure
- · Received regular reports from the chair of the nomination, risk, CSR, audit and remuneration committees
- Approved half-year results and year-end results
- Monitored and reviewed developments n governance
- · Reviewed and approved Group treasury policy and Group tax policy
- · Approved Slavery and Human trafficking statement
- Conducted visits to two customer sites in the US for further details see page [8] as well as business sites in the US and the UK
- Took part in various engagements with shareholders and investors during the year - see page 79
- Reviewed the 2017 ACM proxy voting figures

# INDUCTION, INFORMATION AND DEVELOPMENT

A failured induction is provided to new directors oining the board. The induction is designed to ensure directors joining the board have the necessary understanding of their role and now they can maximise their effectiveness (t. s. therefore tailored to the needs of each cirector and those of the role they will fulf- on the board

To build on the induction programme directors receive further priefings both to help in their own development and also to enhance their avvareness of the different elements of the pusicess

direnings are provided to poard members on legal governance, compliance and reporting developments and to members of board committees from time. to time or matters relevant to their work or those committees

hiadd Johi non-executive directors learn about the Group's ousness and meet employees and management through site visits

Information about the interactions between members of the board, in particular non-executive directors, and the business during the year, are set out on pages 78 a1c 79

#### Tailored induction - Audit Committee chair

upon foiring the board on 1 January 2018, a tailored induction programme was prepared for onn Ramsay who took on the role of chair of the Audit Committee

A four-step programme was devised. Step I focused or promoting a good understanding of the business by providing access to information about the company, group structure, management team, board governarice, minutes of poard and committee meetings and risk management. Step 2 developed an understanding of the company's business, markets and main relationships. Over a day, Mr. Ramsav had individual sessions with members of the group executive team and serior managers. Areas covered included strategy and investor relations, governance and corporate social responsibility as well as legal, human resources and health and safety. Step 3 had a strong financial focus and nonsisted of a day decicated to meetings with the group chief financial officer, group financial controller ichief information officer, direction of risk and internal audit as Meillas the external auditor. Step 4 will consist of site visits dun to be amanged during the course of HT 2013.

# BOARD AND COMMITTEES PERFORMANCE REVIEW

In accordance with guidance from the Code, the board and its committees are assessed yearly with the support of an external factitator Dunng 2017, a fully externallyfacilitated exercise was carried out by Oliver Ziehn and Merlin Underwood of Lintstock Oliver Ziehn, Merlin Underwood and untstock have no other connection with the company

#### Stage 1

A thorough prief was provided by the chairman and company secretary in July 2017. Entstock was given access to information about the board and particular areas of focus. Tailored questionnaires were then developed for the board and each committee

In early October, each of the directors, company secretary, Group HRD, Group Corporate Affairs Director, Director of Risk and Internal Audit, Group Fir ancial Controller, Director of Compensation and Benefits, other regular board committee attendees, audit partners from PwC and Deloitte (remuneration consultant) was invited to complete the questionnaires online

niate October and early November, the Lintstock ream conducted detailed interviews with each board director and the company secretary

# BOARD REVIEW OUTCOME

# **Board**

The conclusions of this year's review were positive and confirmed that the board operates effectively, with the poard dynamics notably enhanced by recent additions. to the board and by good information flow. Other areas which received positive feedback included the board's relationship with senior management, time management and board support

A number of areas for further focus were also identified These included greater focus on succession planning, mor toring the implementation of strategy and the use of technology, gaining a better understanding of certain stakeholders, views, particularly those of customers, continued focus on comporate culture and fostering an environment conductive to the reporting of senous concerns through the available charnels

#### Committees

The committees of the board were also reviewed and the results of the evaluation were also positive with committees perceived to be rutining efficiently and making effective decisions

Further information about the results of each committee review and now these results inform the following year's plan har be found in each of the board committee reports

# Chairman

The chairman's performance was righly rated and his relationship with all poard members identified as a particular strongth

#### Stage 2

The Linstock team compiled a report based on information and views gathered through replies to the questionnaires and follow-up interviews. Lintstock also reported on the performance of each of the directors and separately on that of the chairman

#### Stage 3

The reports, conclusions and recommendations were considered and discussed by the board and each of the board's committees when reviewing their performance and informed the planning for the board and committees' priorities in 2018

As part of this process, the individual director reviews were used as the basis for the chairman's individual discussion with each of the directors about their performance and any training and development needs The results of the board review were considered as part at the review of the committees' composition by the Nomination Committee in December

The report on the chairman was used to inform the discussion amongst, he non-executive directors conducted by the Senior Independent Director about the chairman's performance, without the chairman heirig present

# **BOARD ACTION PLAN 2018**

The board action plan for 2018 was informed among other things by the results of the board evaluation process and will include

- Annual review of Group strategy and execution of the strategy
- · Monitoring the effectiveness and performance of the organisation
- Application of security technology in the business.
- Induction and integration of new board members
- Board and management succession blanning
- Maintaining understanding of the Group's stakeholders, including customers, employees and shareholders
- · Continued focus on corporate sulture

# **STAKEHOLDERS**

With about 570,000 employees operating in a variety of sectors in over 90 countries, often in challenging environments, the Group has a large and rich stakeholders' network.

The board's engagement with the Group's stakeholders takes a variety of forms and provides invaluable feedback that informs the board's decision-making process.

# SOCIETY

- The CSR Committee received a presentation on CSR activities in developing countries and discussed these activities in light of the results of the materiality exercise undertaken during the year
- The board received an update on Africa's pan-regional project, focusing on development through

sport initiatives and in particular rugby. The project runs in several countries where G4S partners with Bhubes, Pride Foundation to carry out annual rugby roaching events, providing support including delivering talks on topics such as health and safety, career I fe skills and the environment

# **CUSTOMERS**

- Two customer-site visits were. organised during the year and members of the board were able to meet and receive direct feedback
- The CFO and other serior executives provided customer feedback and information to the board during the year
- · The board sought to understand customer constraints and requirements as part of consideration of large contracts oid or renewal
- The CEO CFO and charman attended a number of meetings with customers

# **EMPLOYEES**

- The board met employees during visits to other parts of the business such as the board zisin to the Americas at which the board met the senior management team as well as line management and operational employees both at the regional office and curring customer site. zisits. Further details of the
- poard's trip to the Americas businesses are set out below
- A number of poard members attended the Global Leadership forum in London in March 2017
- . The board received regular health and safety reports
- · The results of the blennial employee survey were presented to the board

# **SUPPLIERS**

· During the year, the Supplier code of conduct was reviewed and reinforced to ensure greater alignment with our values

# BOARD TRIP TO NORTH AMERICA

Values

Integrity and Respect Safety, Security and Service Excellence

In April 2017, the board meeting was held at the Group's North America headquarters located in Jupiter, Florida. The board met with the North America senior management team as well as the Latin America management team. The board received in-depth presentations from both management teams and had the opportunity of meeting the senior team informally as well.

During the trip, the board saw a demonstration of the retail cash solutions suite of products offered by the business and visited a customer facility at which such solutions are deployed

In addition, the board visited a customer location at which integrated security solutions are provided, meeting both G4S personnel and customers.

**IMAGE REMOVED** 

- The primary means used by the board for communicating with all company shareholders are the annual report, annual results haif-year results and the AGM
- he section of the website dedicated to investor relations is also a useful fool, facilitating communication with institutional and private investors. It can be found at g4s com/investors and ncludes material shared with institutional snareholders and analysts at company meetings

# Analyst and investor meetings and presentations

- Presentations as well as analyst and investor meetings are held following the release of the company's annual results and half-year results announcements These are also streamed via live webcast for those unable to attend in person
- After each such event, the presentation is made. available in the investor Relations section of the website

# Other shareholder meetings

- The company actively seeks to engage with shareholders and during 2017 the Unief executive officer and the chief financial officer had contact val one-on-one meetings, group meetings and telephone conference calls with current and potential shareholders as well as with analysts
- The shareholders covered represented around 65% of the total share register (which includes bassive funds) and over 205 institutions. The number of meetings is driven by demand. These meetings tend to be focused primarily on the Group's tracing operations and the implementation of its strategy

- · in addition, during the year, the chairman idirector of investor relations and company secretary met with major shareholders as part of an annual round of governance meetings
- The chairman reported on those meetings to the board
- The chair of the CSR Committee, Clare Spottiswoode, and relevant senior executives organised a meeting with a group of Socially Responsible Investors in jurie 2017, updating them on the Group's corporate responsibility programme. She reported feedback received to the board

#### Annual general meeting

- · The company's annual general meeting is an important opportunity for communication between the board and shareholders, particularly private shareholders
- · The next annual general meeting is due to take place on to May 2018, at the Holiday Innin Sutton, and details of the meeting and the resolutions to be proposed are set out in the Notice of Meeting available to download from the website. It is intended that all the directors will attend and be available to answer questions from shareholders
- . The meeting will be informed of the number of proxy votes cast and the final results of votes on the resolutions will be published subsequently on the website

# STRATEGY SESSION AT UK TECHNOLOGY CENTRE

Safety, Security and √alues

Service Excellence

Innovation and

Teamwork

In October 2017, the board and group executive team held a two-day strategy session at the G4S Technology Centre in Tewkesbury, England. The business had just exhibited at ASIS, the largest tradeshow in North America and launched a number of new products, including 'RISK360' version 7 and a number of AMAG products.

Senior management at the technology centre provided demonstrations of these products, which enabled the board to gain a deeper understanding of the Group's technology solutions

**IMAGE REMOVED** 

# THE NOMINATION COMMITTEE

# **IMAGE REMOVED**

"2017 was again a busy year for the Nomination Committee. Adjustments to committee composition were required after a sudden onset of ill-health forced a newly appointed non-executive director to take a leave of absence before retiring from the board. Subsequently a new non-executive director qualified to act as chairman of the Audit Committee was recruited.

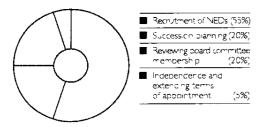

The committee also focused on identifying and planning for the long-term needs of the company."

| Committee membership during 2017 |              |  |
|----------------------------------|--------------|--|
|                                  | Yember since |  |

| Barbara Thoralfsson              | July 20-6    |  |

The Nomination Committee meets on an ad nocipasis, when the need anses in 2017, the committee met four times

Members' attendance at committee meetings is shown on page 74

# Main activities of the Nomination Committee during the year (%)

#### Responsibilities

The Nomination Committee's remit covers proacly five areas, namely board composition, making recommendations to the board on appointments with a view to maintaining a balance of skills and expenence on the board and its committees, succession planning, board performance evaluation and annual reporting

The committee's terms of reference are available. at gris comy nivestors

#### Board composition

Ir January 2017, the Nomination Committee met to discuss the adjustments that should be made to the composition of the Audit Committee following the sudgen onset of a medical condition, which prevented lan Sonngett from taking on his role as chair of the Audit Committee

Based on the information available at the time, the Nomination Committee considered the interim steps that should be taken to ensure the Audit Committee carried on operating effectively. Mindful of the Code and DTR 7 I requirements with regard to the composition of the Audit Committee, the committee reviewed the skills and experience of the board members and dentified Paul Spence, who had strong and effective readership and communication skills, and was already a member of the Audit Committee as well as chair of the Risk Committee, and Winnie Fok, who had accounting qualifications and audit experience and who was previously a member of the Audit Committee

The Nomination Committee went on to recommend to the poard Paul's appointment as intermichair of the Audit Committee and that of Winnie as an additional member

On 20 fune 2017, due to continued II-health fan Sunnigettiretired from the poard. The Zygos Partnership (Zygos) was appointed to assist with the search for a new non-executive director qualified to act as the sharman of the Audit Committee Zvgos, who has no connection with the company other than as provider of recruitment consultancy services to the Nomination Committee, was provided with a brief, setting out the requirements for the role to be filled and preferred attributes of potential candidates. In selecting candidates consideration was given to the skills and competence required to fill the role, the need to maintain and enhance diversity of relevant skills and experience on the board, as well as corporate currure and fit Shortlisted candidates were then interviewed by the charman, the members of the committee as well as the chief executive officer and the chief financial officer

The recruitment process initiated by the Nomination Committee led to the appointment on 1 january 2018 of John Ramsay

# Succession planning

Succession planning is very much a matter for the board as a whole and is considered by the board at least once a year. This year, as in previous years, the entire board reviewed sucression plans as well as talent management and development for the sen or management team

In addition, at its December meeting, the Nomination Committee reviewed and discussed the results of the board evaluation current skills and experience available on the board. Discussing what further skills on experience may be useful to chable the board to support the developing needs of the Group helps inform future poard recruitments

The committee also gave further consideration to board succession plans. Clare Spottiswoode having indicated that she would not seek re-election at the company. 2018 AGM, the committee initiated a search for a new

non-executive director to join the board in que course and Zygos was appointed to assist with the search. A fallored brief, setting out the particular requirements for the role was developed and provided to Zygos Consideration was given to the need for potential candidates to possess a range of skills and experience allowing them to make a meaningful and proad contribution to the board

#### Diversity

Diversity is a matter for the board as a whole and is an integral part of succession planning and recruitment for the board and senior management team. The board's approach to diversity is set out on page 74

The Nomination Committee seeks assistance from executive search agencies which are signatories of the Volumetary Code of Conduct to help ensure the most diverse talent pools are reached and an approach in line with best practice is adopted

Consideration is also given to diversity when reviewing board composition and the result of the annual board performance evaluation

#### Directors' length of service

As part of its annual review of the poard composition, the Nomination Committee reviews the directors' length of service. In line with our Remuneration Policy, executive directors have a rolling service contract, whereas non-executive directors are appointed for an initial term of two years. Further information about the key feature of the executive directors' service contracts. and non-executive directors' letters of appointment can be found on page 1+2

The table below sets out the date of appointment and (where applicable) unexpired term remaining for current members of the board

# Independence and re-election to the board

John Daly's term of appointment, which was due to expire in June 2017, was considered by the Nomination. Committee in May The committee was satisfied that John continues to remain independent and committed to his role as a director and as chairman of the Remuneration Committee

In coming to this conclusion, the committee took into account his experience, qualities and skills, as well as his other commitments. The committee recommended to the board that his appointment be extended

#### Committees composition

In December, the committee reviewed the composition of the committees of the board. Taking into account the balance of skills and experience on each committee, it was felt that Steve Mogford, as a current serving CEO with experience of cellivery of complex programmes, would aring additional relevant expertise to the Pisk Committee and that John Ramsay's extensive experience in emerging markets would enable him to make a valuable contribution to the CSR Committee.

#### Committee performance

The performance of the Nomination Committee was reviewed as part of the process undertaken by each of the board committees, with assistance from Linistock

Although the committee was considered to be effective, greater emphasis on succession planning was identified. as an area for increased focus, and is included as a key area for the committee's work in 2018. The committee will also continue to ensure that it has appropriate plans. for board and executive succession, which promote diversity of gender and social and ethnic backgrounds

| Director                | Date of appointment       | Unexpired term |  |
|-------------------------|---------------------------|----------------|--|

all Ashrey Almanza was appointed to the board on 1 May 2013 as chief financial officer and fook on the role of chief executive officer on I une z01s

or Tim Weiler loined the board or II April 2013 as a non executive director until 24 October 2016, when he became chief financial officer  $\epsilon$  Clare apottiswoode will retire from the policy at the conclusion of the combany's ACM on 15 May 20/8.

# THE CSR COMMITTEE

"Our people and values underpin everything we do. Our updated values are the standards which we have set for ourselves, the organisation as a whole and our stakeholders. In 2016 they were re-launched across the Group supported by a targeted communications programme, awareness building and training materials. The committee will continue to work to ensure that the values are embedded firmly throughout the entire organisation. This is my last statement as chairman of the CSR Committee. After almost eight years as a non-executive director, I will step down from the board and its committees at the conclusion of the company's annual general meeting in May. I am pleased that since joining G4S in 2010, CSR has become firmly embedded in the Group's processes and forms an integral part of our overall strategy.

Despite a distinct improvement in work-related fatalities in 2017, the committee's focus on health and safety will continue to remain a key part of its activity during 2018, as we re-affirm our goal of zero-harm."

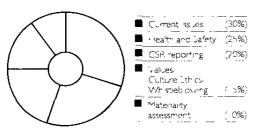

| Committee membership during 2017 |              |  |

Ionn Ramsay joined the board and the CSR Committee on 1 january 2018

Other regular attendees include the chief executive officer for rare & , istice services, the regional president for the Africa region, the group corporate affairs director and the group -Ricirector

There were three scheduled meetings and one unscheduled meeting of the CSR Committee during 2017 Members' attendance at committee meetings is shown on page 74

# Main activities of the CSR Committee during the year (%)

#### Responsibilities

The Group takes a noistic approach to corporate and social responsibility. The scale of the Group, geographic spread of its activities and the complex environments our employees operate in creates a variety of challenges The CSR Committee was established in 201 to review and monitor the Group's CSR approach, which includes developing policies on various CSR-related matters for consideration by the poard and to review and monitor how the Group performs against relevant policies # oversees reporting on CSR matters and progress made during the year. Further details of the committee's responsibilities can be found in the committee's terms of reference which are available at g4s cominvestors

#### Specific issues

The CSR Committee receives regular updates on current ssues from the human resources and CSR teams

In late August 2017, G4S became aware of allegations regarding the conduct and behaviour of a number of staff at Brook House immigration Removal Centre

In response to these allegations, G4S took, mmediate action to strengthen the safeguarding of detainees at Brook House Together with the UK Home Office, an action pian was agreed and a joint working party created to oversee its implementation. The actions outlined in the plan are well underway and many have been completed. The key objective throughout has been to ensure that detainees are safe at Brook House

Investigations into staff conduct resulted in the dismissaof six members of staff. The committee has received regular updates on the measures that have been taken to address the issues raised, and on progress of nvestigations and operational improvement plans. I visited the centre personally in December to discuss the ssues with managers, staff and detainees on site and to see the progress first hand

We have commissioned Venta, a specialist consultancy, to carry out an independent review to understand the extent and root causes of the issues at Brook House. The review is examining G4S' management, operational and staffing arrangements and the practices and behaviour of C4S' sta4. It is also assessing how G4S oversees the care. and welfare of detainees, including in relation to mental-nealth issues, self-harm, violence prevention use of force and proper reporting of incidents

The review is led by Kate Lambard CBE, a former barrister and vice chair of the South of England Strategic Health Authority and of the Financial Ombudsman Services it in teal. The findings will be presented a rectly to the Home Office and the CSR Committee

# Culture and values

As a principal risk for the Group, culture and values as well as ethical compliance , were reviewed by the board as a whole during the year in addition, the CSR Committee oversees the programme supporting the embedding of the values across the Group including in all HR processes, from recruitment through to evaluation and performance management. The committee also reviewed and inscussed the various

nitiatives that supported the laurich of the values. including training for management and front-line employees and enhanced communication of the vnistleblowing amangements to all employees

# Health and safety

As part of the CSR Committee's focus on health and safety during the year, the committee oversaw an ir tiative to refresh health and safety induction training for front-line employees and the re-issue of a simplified firearms policy across the Group

As part of its normal cycle of work, the committee received regular health and safety reports including updates on on-going in tlatives and details of future plans and summaries of incidents

Sadly in 2017, 25 employees lost their lives in workrelated indicents. Although this is a significant reduction over previous years, in part, as a result of a reduction in road traffic accident fatalities, the focus and work of health and safety professionals and management teams in this area will continue. We will build on this progress and re-affirm our goal of zero harm. To further this endeavour and as mentioned last year, in 2017 the CSR Committee reviewed and supported the adoption of a new and consistent definition of High Potential Incidents ("HPIs") and the embedding of HPIs reporting across the Group. Work to ensure consistent reporting of HPIs is on-going, so as to ensure valuable insight is captured and efforts are focused preventatively

# Materiality Assessment

In order to ensure that G4S' approach to CSP remains focused on the areas that are most relevant to the pusiness and its stakeholders, a wide-ranging materiality assessment of ethical and sustainability issues is carried out The committee's work also included overseeing this process, which is connucted with the support of an external factitator every two years

The results, which inform future reporting and strategy, confirmed three core priority ethical and sustainability areas for the Group during 2018 and 2019

- 1) Health arec safety
- 2) Human rights
- 3) Anti-bribery and corruption

The assessment reinforced the importance of G4S' ethics, culture and values, as well as employee standards and behaviour in preventing issues and poor performance across the Group's core priorities and other CSR matters

Further information can be found at g4s comicsh

#### Integrated CSR reporting

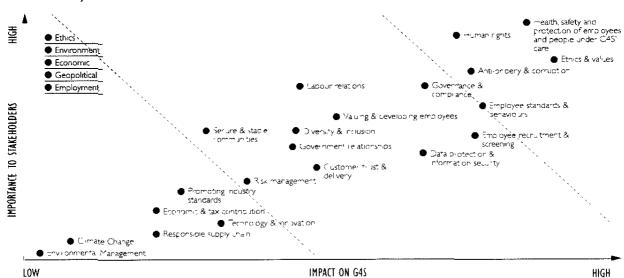

The Group's approach to corporate and social responsibility is now firmly embedded in the Group's business processes, from employee recruitment and supplier management to bidding and contracticelivery. As a result, during the year the CSR Committee considered whether the CSR approach and activities should continue to be reported on a standalone basis in a separate report or whether it was more appropriate to integrate CSR activities fully with the company's annual report and accounts it was decided that a fully-integrated report was more representative of the Group's approach

# Committee performance

The assessment of the committee's performance conducted as part of the overall board review process with assistance from lintstock, concluded that the committee continued to provide good oversight and challenge over the Group's CSR strategy

For 2018, the committee will review the scope of its remit and activities, and continue to support the communication of the Group's values and whistleplowing arrangement. In addition, informed by the result of the marehality assessment, the committee will continue to focus its work on issues that are material for the Group

# CSR Materiality Matrix

# RISK COMMITTEE REPORT

"The creation of sustainable value for our stakeholders requires effective risk management.

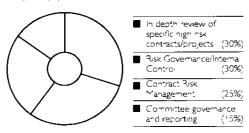

The Risk Committee's oversight of the Group's risk management framework seeks to balance a robust approach to risk management, in particular risk mitigation, with the need to encourage and support the entrepreneurial spirit that drives growth".

| Committee membership during 2017 |              |  |
|----------------------------------|--------------|--|
|                                  | Member's nce |  |

Steve Mogford joined the Risk Committee on 1 january 2018 Other regular attendees include the group director of risk and ntema audit

There were four scheduled meetings held during the year ended 31 December 2017 Members' attendance at committee meetings is shown on page 74

# Main activities of the Risk Committee during the year (%)

# Responsibilities

Formed in 2013, the Risk Committee advises the board on the Group's overall risk appetite, reviews and approves the Group's risk management strategy acroses the Audit Committee and the poard on risk exposures. and reviews the level of risk within the Group. The Risk Committee also assesses the effectiveness of the Group's risk management systems and reports thereon to the Audit Committee

The homm tree's composition ensures that a proad set of skills and experience comes together to look authow the Circup manages risk in the business. Further details can be found in the committee's terms of reference available at g4s com investors

# Risk governance

As part of its continued focus on risk governance, the committee reviewed and discussed proposed amendments to Group risk management policies The committee also reviewed both the process and results of control self-assessments (CSAs) completed by business units across the Group on a regular basis The CSAs, which cover many of the control standards addressing the Group's high inherent risks, are seen as a positive way in which to ensure that key controls specified by the Group to reduce such risks are embedded and compliance enhanced. During the process, regional functional leaders review and challenge the results of the business units. The internal audit function also performs tests to identify and correct any poter taild screpancy between the results of CSAs and is findings. The committee also reviewed the Group's risk appetite and recommended its approval by the poard

The committee also reported to the Audit Committee to confirm that it was satisfied that the Group's risk management processes were appropriate

#### Principal risks

During the year, the Risk Committee received regular updates on the progress of and in mitigating the Group's principal risks set out or pages 62 to 65

Presentations on information security, laws and regulations, rash losses and culture and values covering the inherent risk, mitigations in place and management of the residual risk, were also received. Further retails of the significant risks and uncertainties facing the business are set out on pages 60 to 65

# Major contracts and projects

Contract-risk management continues to remain a key area of focus for the company and the committee, which undertakes a review of a major contract at each of its meetings

In addition, the committee has particular oversight for the project developing lean-order-to-cash processes through the development and implementation of a standard if system for the marined-security operations, Project Javelin. The committee receives regular reports. on this project and oversaw the launch of the pilot project in Ireland in the last quarter of 2017. Further information about this project is set out or ipage 29.

# Committee performance

The committee's performance is assessed every year in 2017, the result of the assessment performed by Linistock showed that the committee continued to the effective and to provide valuable oversight of the risk management framework

In 2018, the committee will continue its focusion major. contracts and projects as well as principal residual risks he committee also plans to increase its focus on operational risk and to reinforce its oversight of te hnology and innovation as well as cyber-risk

# The Audit committee report

# THE AUDIT COMMITTEE

#### John Ramsay

Audit Committee Chairman

"As announced in December 2017, I joined the board on I January 2018 and succeeded Paul Spence as chairman of the Audit Committee from the same date. Paul, who remains a member of the committee, was very supportive during the transition process and I am very grateful for his continued support.

During the year, the Audit Committee's work continued to focus on enhancing the Group's control environment, the quality of our group financial reporting and the effectiveness of the external and internal audit processes."

| Committee membership during 2017 |                           |  |
|----------------------------------|---------------------------|--|
|                                  | Member since              |  |
| Paul Spence (Chairman)           | January 20+3              |  |
| John Daly                        | May 2015                  |  |
| Winnie Fok                       | January 2017a             |  |

| lan Springett                    | January 20₁ <sup>-ь</sup> |  |

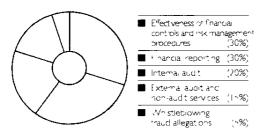

- a. "Minnle Tok was previously a member of the committee between October 20+0 and December 2012. She stepped cown from the Audit Committee on I January 2018
- b. Due to continued iii hearth, lan Springett het hed from the Audit Committee and the board on 20 june 2017

On I January 2018, onn Ramsay Joined the board and took over the role of chair of the Audit Committee

Regular attendees include the chief financial officer the group Francial controller, the company secretary, the group director of risk and internal audit and representatives or the Group's external auditor. The chief executive officer also attends meetings from time to fime when invited by the chairman During 2017, the chaiman of the board, a chartered accountant who spentins executive career with Deloitte, aiso attended most meetings

There were four scheduled meetings held during the year ended 3+ December 2017 Members' attendance is shown or page /4

#### Main activities of the Audit Committee during the year (%)

# Committee membership

As reported previously, tan Springett was appointed to the board and as chair of the Audit Committee with effect from I January 2017 Unfortunately, in anuary 2017 Ian had to take an extended leave of absence in order to undergo treatment for a medical condition Accordingly with effect from 20 January 2017, Paul Spence was appointed as chairman of the Audit Committee and Winnie Folk became a member Paul was already a member of the committee and Winnie brought an accounting and audit background

The poard was satisfied that Paul and 'Winn'e together with the other members of the committee prought significant and relevant experience gained at seniormanagement level and that the committee's composition met the requirements of DTR7 I during the year. Their skills and experience are set out on pages 68 and 69 However the Audit Committee cicinol have a member with recent financial experience. Mindful of the need to ensure continued application of main principle CII of the code, additional steps were taken, including further support and training provided to the chair as well as the promotion of greater interaction with the

in June, due to continued. Il health Mr Sphrigett stepped down from the Audit Committee and the source Following a search for a new non-executive director qualified to act as chairman of the committee, John Ramsay was appointed to the board and as chair of the Audit Committee on 1 january 2018

# Responsibilities

The committee ensures that there is effective governance of the Group's financial reporting and internal controls to safeguard the integrity of its financial statements and the adequacy of related disclosures, and assists the board in relation to its consideration of whether or not the annual report of the Group is fair balanced and understandable The committee also has oversight of the performance of both the internal audit function and the external auditor

During the year, the terms of reference of the Aucit Committee were reviewed, following which a minor amendment was made. The terms are available at g4s com/investors

The committee has an annual agenca, which includes standing items that the committee considers regularly, as well as specific matters that require the tormittee's attent or

At the end of each meeting, a private session is held by the Audit Committee with representatives of the Group's external auditor or with the Group director of risk and internal audit, without members of the executive management team being present

After each meeting, the chairman of the committee reports to the bound on the matters which have been discussed

# Significant judgments and issues considered by the Audit Committee

The orimany judgments and issues considered by the committee in the 2017 Chancial statements, and how these were addressed, were

# ONEROUS CONTRACT PROVISIONS

# Description

The Group delivers certain long-term outsourcing services that are complex in nature. Some of those contracts may evolve to become loss-making, such that net unavoidable losses are expected over their life. This requires determining the net present value of estimated. future losses in order to calculate an appropriate onerous contract provision. The centification and measurement of such provisions require significant. judgment, given the extended time periods often involved and the humber of variables that are not all within the Group's control

In particular, judgment is reduced in assessing the future expected revenue and costs, including determining the expected impact of any profit improvement bians (PIPs) the level of any related lifecycle funds and the estimated costs for the remaining life of the contract, and an appropriate discount rate to apply to material future cash flows

Details of the outcome of the assessment of contract provisions are set out in the Chief Financial Officer's Review on page 31

#### Action taken

The committee reviewed in respect of each onerous contract, the critical assumptions provided by management and encuired about the judgments made, the ropustness of the assumptions, the sensitivities to changes in the assumptions and the disclosure provided n relation to the key material ludgments

The committee also reviewed the disclosure provided in relation to these contracts, and in particular in relation to a dispute with a subcontractor in respect of one of these onerous contracts

#### Conclusion

The Audit Committee ivas satisfied that the level of provisions and the related disclosures as at 31 December 2017 were appropriate

# COMPLIANCE WITH FOREIGN-OWNERSHIP RESTRICTIONS AND CONSOLIDATION OF UNDERTAKINGS

# Description

n markets where foreign ownership restrictions (FORs) apply, the Group seeks to ensure that it compiles with foreign ownership laws and regulations and meets the relevant accounting standards (IFRS10) Professional acvisors are typically retained to establish and maintain contractual ownership structures, which comply with local laws and regulations relating to foreign ownership

When restrictions apply to direct share ownership, the Group also exercises influence or control through arrangements, including snareholder agreements

FORs can limit the Group's ability to do business on invest in certain markets and could result in a loss of management control

Consolidation of any of these entities would be at risk if the Group's ability to enforce its rights of control were to be undermined by FORs

# Action taken

The Lammittee reviewed the Group's partfolio of investments in countries where FORs apply

In addition, the board reviewed the monitoring process in place for key markets, discussed relevant changes in law and regulations, their potential impact on the Group, arid, where relevant, reviewed mitigation plans

The committee also received specific reports in relation to a number of countries

#### Conclusion

The committee was satisfied with the Group's processes and approach to foreign ownership and consolidation of undertakings

This will remain an area of focus to ensure that the committee remains apreast of changes in laws, regulations and standards

# ALTERNATIVE PERFORMANCE MEASURES

#### Description

The Group uses Adjusted PBITA as a consistent internal and external reporting measure of its financial performance, given that management views it as being more representative of the normal course of business and more comparable period to period. Adjusted PBITA excludes strategic restructuring costs, amortisation of acquisition-related intangible assets and specific and other separately disclosed items which the Group believes should be disclosed separately by virtue or their size, nature or incidence (see page 35 for further details) Judgment is required when defining those items to be disclosed separately and when applying the classification chtena to each period's results. Further details on separately disclosed items are set out in note 8

#### Action taken

The Audit Committee reviewed and challenged, in light of the guidance issued by the FRC in December 2013, October 2016 and November 2017, and the results of the FRC review of the 2016 Integrated Report and Accounts, the enhanced disclosures prepared by management in the 2017 Integrated Report and Accounts (pages 35 and 36) in relation to alternative

performance measures (APMs) and specific items The committee observed that the Group's accounting policies were being applied consistantly from year to year, and considered whether specific items were being identified in line with Group policies and that these items included both depits and credits as appropriate

The committee also reviewed information from in anagement to satisfy itself that changes in estimates related to items that were classified as specific items. were treated equally and consistently as specific items, in particular for both increases and decreases. of provisions

#### Conclusion

The committee was satisfied that the Group's definition of APMs, and in particular in relation to specific and other separately disclosed items, had been applied correctly and that the designation of specific tems was subject to objective and balanced chrena. The committee noted the enhanced disclosure and explanation on APMs and considered that these give a meaningful and balanced view of the operations of the Group

# GOODWILL IMPAIRMENT TESTING

# Description

The total value of the Group's goodwill as at 31 December 2017 was £1 9bh, a significant proportion of which was generated by the merger of the security services pusinesses of Group 4 Falck and Securicon in 2004, which was accounted for as an acquisition of Securican by Group 4 Falck

The Group tests tangible and intangible assets, including goodwill, for impairment on an annual basis or more frequently if there are indications that an impairment may be needed. The impairment analysis consists of the estimation of the recoverable amount of goodwill supported by the Group's cash generating units, which requires significant judgment, primarily in relation to the achievability of long term business plans and future cash flows. Such ach evability is dependent on circumstances. both within and outside management's control, in relation to the discount rates adjusted to reflect risks specific to individual assets used, and in relation to the macro-economic assumptions and related moideling assumptions underlying the valuation process

As a result of the annual review of the carrying value of good will indimualment charge to goodwill was required (see notes 4 and 18 to the consolicated finarical statements). The full methodology and results of the Group's impairment testing, including an analysis of the sensitivity of goodwill to the kev assumptions, are provided in note 18

# Action taken

The Audit Committee reviewed the methodology and results of the impairment tests prepared by management

The Audit Committee reviewed the assumptions used in relation to long-term growth, the resulting headroom and the sensitivities applied by management. In addition, these results were considered against alternative valuation bases such as reference to transactions for similar assets in similar locations, both within the Group and external to the Group

For those businesses that are expected to be sold as part of the strategic portfolio management programme the Audit Committee reviewed the recoverable value or the basis of expected sale price less costs to sell

Finally, the Audit Committee considered the adequacy of the disclosures provided, particularly in respect of cash generating units where changes in key assumptions rould give rise to an impairment

#### Conclusion

The committee was satisfied with the carrying value of goodwill and related disclosures as at 3. December 2017

# **TAXATION**

# Description

The Group operates in around 90 countries and is therefore subject to numerous reviews by individual tax authorities in the ordinary course of business. In some countries, tax legislation is not consisteritly applied and uncer some complex contractual structures, the responsibility for tax arising is not always clean Judgments and estimates are required to determine the appropriate amount of tax to provide for and any required disclosure around contingent tax liabilities at each period end

Provisions for tax liabilities are estimated for existing matters under dispute with local tax authorities, as well as for matters which it is considered may be disputed by them where it is probable that a future liability will arise In some instances, tax reviews may result in claims being raised by tax authorities. Any claims are handled by the focal fegal entity in the first instance. More complex cases are reviewed by the Group tax function and provisions, where necessary, are made pased on the pest estimate of the iikely outcome

The Group recognises deferred tax assets in respect of temporary timing differences, mainly in relation to bension arrangements, fixed assets and carned forward losses At 31 December 2017, total deferred tax assets were £240m (2016 £285m). Recognising such assets requires an assessment of their i kely recovery through utilisation, which includes an assessment of the taxable profits expected to be made in each of the relevant unsdictions in the future. Deferred tax assets can be affected by changes in legislation and in tax rates

# LAWS AND REGULATIONS

# Description

The Group operates in many jurisdictions globally, with complex and diverse regulatory frameworks. Due to such operations, the Group faces many associated risks including increasing litigation and class actions, ondery and corruption, obtaining operating I cences, complying with local tax regulations, changes to and application of employment and employee remuneration legislation, complying with human rights legislation, and new or changed restrictions on foreign ownership. Furthermore, the Group may face new or changing regulations which may regulre modification of its processes and staff training. Not being compliant with applicable laws and regulations can have far-reaching consequences, including higher costs from claims and litigation, hability to operate in certain jurisdictions, loss of management control, and camage to the Group's reputation

#### Action taken

The Audit Committee reviewed the Group's tax strategy, including the tax report and tax risk management processes and the board approved the tax policy which complies with the UK Confederation of British Industry's seven tax onncibles

The committee also reviewed information prepared by management in relation to existing or potential tax exposures, the adequacy of the provisions recorded, their ireatment and disclosure in the financial statements and emerging matters arising from the OECD's Base Frosion and Profit Sn fung framework

The committee reviewed information prepared by management supporting the recoverability of deferred tax assets, considered the period of time under which triese assets would be recovered and made enquiries of the external auditor on the appropriateness of the Group's tax position. The committee reviewed the impact of the US tax reform and in particular to the recognition and re-measurement of US deferred tax assets, and reviewed the disclosure provided in this area

#### Conclusion

The committee was satisfied with the Group's approach to tax, with the assessment of recoverability of deferred tax assets and with the accounting treatment and disclosure of tax exposures

The committee was satisfied that the disclosure provided in connection with the US tax reform was clear and appropriate

# Action taken

During the year the committee received a report from the Group General Counsel, analysing significant areas of exposure to claims and areas where in particular abour laws and regulations are complex and there is therefore an inherent risk to the judgment made wher applying those laws and regulations. For the most material items, the committee was provided with regular updates throughout the year

#### Conclusion

The committee was satisfied that the provisions booked at 31 December 2017 were appropriate The committee was satisfied that the disclosure for the judgments made in relation to contingent liabilities was riear and appropriate

# RISK OF ACCOUNTING ERRORS AND MANAGEMENT OVERRIDE OF INTERNAL CONTROLS

#### Description

The Group operates in around 90 countries and has around 600 legal entities, with a sign ficant number of local financial systems and processes. This leads to an ir herently-diverse set of processes and controls that rely on local capabilities for implementation and execution of the controls. As set out on page 61, the Group has adopted a three-lines-of-defence model to control and manage risks across the Group

Over the course of the last four years the Group has made significant investment in strengthening capability in finance, internal audit and risk, and has introduced additional internal controls and enhanced Group oversight to mitigate these risks. These include monthly reviews of the quality of earnings, a comprehensive internal audit bian and a regular cycle of reviews of local business unit or country balance sheets and controls

#### Action taken

The committee oversaw the progress made over embedding minimum financial controls and received regular updates on the overall control environment of the Group including results of internal audits, training and up-skilling of capabilities across the Group, as well as the regular reports from the external auditor and the output of the whistleblowing process

The committee confirmed in particular that controls had been strengthened to minimise the risk of reloccurrence of control failures that required the restatement of the 2014 annual results and balance sheet in the 2015 Integrated Report and Accounts. The committee also considered progress made to reduce reliance or manual controls, by developing and integrating financial and operational systems across the Group

#### Conclusion

The committee acknowledged the progress made in relation to the strengthening of controls and the plans n place to reduce the number of systems and reliance on manual controls across the Croup, but noted that, although good progress has been made to date, significant work remains to be done

#### Viability statement

At the March 2018 meeting, the committee reviewed a paper prepared by management which examined the for genterm solvency and viability of the Group. The committee tested the lunderlying assumptions and analysis performed by management, reviewed assurance work carried out and considered the appropriateness of the timeframe of the assessment. The committee was satisfied that the three-year pencid covered by the viability statement remains appropriate in that it aligns with the Group's regular business planning period, over which management has a reasonable level of confidence in its projections reflecting the life cycle of the majority of the Group's contracts, and takes account of the I mited visibility on material bidding opportunities in the pipeline beyond that period. The committee also reviewed and challenged the outcome of the stresstesting of projections by management

The committee recommended to the board that the directors confirm that they have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fail due over the three-year period of the assessment as set out on page 92

# Fair, balanced and understandable

One of the key compliance requirements of a group's financial statements is for the annual report, taken as a whole to be fain, balanced and understandable Guidelines on Alternative Performance Measures (APMs) were issued by the European Securities and

Markets Authority (ESMA) and have been applicable since July 2016. In addition, the FRC issued a "Frequentiv Asked Questions I guidance document and published the results of its thematic review on this matter in November 2017. The committee considered each of frie above in assessing whether the Group's annual report was fair, balanced and understandable

The sommittee reviewed a paper setting out the approach taken by management in the preparation of the annual report to ensure it met the requirements of the FRC's Code and the ESMA guidance including the reasons for and clear explanation of the non-GAAP measures used by the Group in reporting its results. for the year. The paper described the process and procedures followed and detailed the steps taken in each of the sections of the annual report to ensure that the information presented was complete and accurate This paper also described the review processes carried out internally to ensure that the annual report is fair, balanced and understandable. In addition, an external verification exercise was carried out to confirm that the information contained in the annual report is supported either by factual evidence, on by nonfirmation from management where such information is a statement of belief on intent

The committee was satisfied with the work performed and advised trie poard that the annual report, taken as a whole, presents a fair, balanced and understandable view of the business and its performance for the year under review

#### Internal control

Since 2013, the Group has had a reightened focus on improving systems of internal control and risk management for financial reporting. The main features of these control systems include clearly-defined reporting lines and authorisation procedures, a comprehensive budgeting and monthly reporting system, written bolicies and procedures and the use of a single global consolidation system for internal management reporting, budgeting and planning as well as for external reporting

The system is designed to ensure the integrity of finar dial reporting and the committee's responsibility is to ensure that these internal controls remain effective The committee does this primarily through receiving reports from management, from the internal audit function and from the external auditor

The committee reviewed progress on the strengthening of internal controls, and on plans to continue progress, which included a targeted audit plan for 2017 from Group Internal Audit for those areas where issues have been identified

The committee also considered the plans being implemented by management to reduce reliance on manual controls, through the gradual implementation and integration of new financial systems

Further details on internal controls are set out on page. £1. The Audit Committee confirmed to the board that although it is satisfied that the Group's risk management and internal control processes and procedures are appropriate and effective, the need for continued focus on enhancing the internal control environment remains

#### Internal audit

During 2017, the internal audit function focused on assessing the effectiveness of a proader set of mandated controls including Min mum Financial Controls, HR Core Star dards, Driver and Fream's Controls, Human Rights and Anti-Bribery and Comuption, with the goal of focusing local management on the most material control issues specific to their local environment

The Group finance function and Regional Audit Committees also provided support to assist in driving improvements where appropriate

The internal audit function continued to provide support and guidance to business units to improve awareness. of and compliance with Minimum Financial Controls

in 2018, internal audits will continue to test the operational effectiveness of the Group's standards and controls. Precise coverage in each nountry will be determined through risk assessment

#### External audit

Following an audit tender process during 2014 PricewaterhouseCoopers LLP (PwC) was appointed as the Group's new external auditor for the 2015 financial year PwC was sunsequently re-appointed for the 2016. tinancial year and at the 2017 ACM to hold office until the next AGM. Richard Hughes has been lead audit. partner since the beginning of 2015

Duning the year, the committee reviewed PwC's Group audit pian including the scope to be undertaken as well as their reports on external audit findings, with particular focus on the areas set out above. The committee also had prizate sessions with the external auditor both during the year and at the end of a number of Audit Committee meetings, and approved the fee for the external audit The committee also considered and approved the representation letter to be issued to the auditor

In addition, in March 2017, the committee reviewed the report of the FRC on its review of PwC's audit of the 2015 Integrated Report and Accounts

#### Non-audit services

To ensure that the independence of the audit is not compromised, the committee has put a policy in place covering the non-audit services that can be provided by the external auditor, the relevant approval process for certain services, and detailing those services which the auditor is prohibited from providing

in essence, the external auditor is proribited from providing services that could create a conflict of interest, result in the audit firm auditing its own work, or result in the performance of management functions. Examples of non-permitted services are actuarial services, pookkeeping services, internal audit outsourcing services and legal services

The committee has pre-approved certain services which can be provided by the auditor subject to specified fee Tmits, above which further approval is required. All other services would require prior approval by the committee Every year the Audit Committee reviews its policy on the provision of hon-audit services by the external auditor

The auditor, PwC, has written to the Audit Committee confirming that, in its opinion it was independent for the behod through to 8 March 2018

Details of the fees paid for audit services, audit-related services and non-audit services can be found in note 10 to the consolidated financial statements

#### Effectiveness of the external auditor

A compination of formal and informal processes is used in the assessment of the effectiveness of the external audit process

A formal questionnaire is completed at the end of the augit by members of the Aud \* Committee, by the Croup finance department and by the finance directors of significant operations across the Group, and the results of those questionnaires are reviewed by the Audit Committee. The assessment of the external audit for 2017 concluded that it remained effective and that the external auditor is independent

# FRC review of the 2016 Integrated Report and

During the year, the Group received a letter from the FRC confirming that the Annual Report for the year ended 31 December 2016 had been subject to a limited. review by its Concluct Committee which is responsible for reviewing and investigaling the annual accounts, cirectors' and strategic reports of UK public companies

The Key areas of focus were in relation to the use of alternative performance measures and compliance with the ESMA Guidelines and the commentary provided or IFRS measures in the strategic report

As a result of on-going discussions with the EPC as part of its engulry, we have considered the labelling of the alternative performance measures used and provided enhanced disclosure and explanations on page 44. We have also provided further and clearer harrative on financial performance based on statutory measures. on pages 38 to 43

#### CMA Order Compliance

The G4S Group audit was but out to lender in 2014. following which PwC were appointed with effect from 2015

The committee confirms that the company has compried with the Audit Services for Large Companies (Mandatory Use of Compettive Tender Processes and Audit Committee Responsibilities) Order 2004

#### Committee performance

The assessment of the committee's performance, conducted with assistance from Lintshock, concluded that the committee had performed well during 2017, n particular in reviewing the quality of the Group's financial reporting

In 2018, the committee will support the induction of its new chair, review internal and external audit coverage. n light of the changing shape of the Group and in conjunction with the CSR Committee, refine the whistleblowing process further

#### John Ramsay

Aud : Committee Chairman

# Corporate governance report

# RISK MANAGEMENT AND INTERNAL CONTROL

The directors acknowledge their responsibility for the Group's systems of risk management and internal control and for reviewing their effectiveness each year The main features of these control systems include clearly-defined reporting lines and authorisation procedures a comprehensive budgeting and monthly reporting system, written policies and procedures and the use of a single global consolidation system for internal management reporting, budgeting and planning as well as external reporting. While the Audit Committee has primary responsibility on the board's pehalf a separate committee of the board, the Risk Committee was set up in 2013 as part of the Group's heightened focus on improving systems of internal control and risk management

The board, through the Risk Committee has carried out a robust assessment of the principal risks facing the company and of now those risks might affect the prospects of the company. The principal risks and their possible impact on the company and the mitigations taken, are set out on pages 62 to 65 Through the Audit Committee, the board conducted a review of the effectiveness of the systems of internal control during the year. The systems are designed to manage rather than eliminate the risk of failure to achieve business. objectives, and ran only provide reasonable and not absolute assurance against material misstatement or oss. The enterprise risk management governance. moder, described on page 61 sets our same of the key features of the Group's risk-management process which was in place throughout the year under review

During the year, the Risk Committee reviewed the Group's risk appetite, which was considered and approved by the board Further information on the work of the Risk Committee in relation to the risk management framework, including the Group's risk appellie, can be found in the report of the Pisk Committee on page 84

Whilst further improvement has been made in the effective performance of internal controls during the year, given the number of countries in which the Croup operates and the variety of systems used there s still opportunity for improvement in the operational effectiveness of mandated controls and this will continue to be a focus during 2018

The Audit Committee has confirmed that, although + is satisfied that the Group's risk management and internal control processes are appropriate and effective, the rieed for continued focus on enhancing the internal control environment remains. Further information on the work of the Audit Committee in this respectican be found in the Audit Committee report on page 85. The board has reviewed the Circup's risk management and internal control systems for the year to 31 December 2017 by tonsidering reports from the Audil Committee and the Risk Committee and has also taken account of events since 31 December 2017

# FAIR BALANCED AND UNDERSTANDABLE

The preparation of the Integrated Report and Accounts is co-ordinated by the finance, investor relations and company secretariat teams with group-wide support and input from other areas of the business

Comprehensive reviews were undertaken at regular intervals throughout the process by senior management and other contributing personnel within the Group

The process was reviewed by the Audit Committee and the board has reviewed a paper setting out the governance relating to the preparation of the report prepared by management

The board has separately considered the disclosures in the integrated Report and Accounts and has conduced that they are fair, balanced and understandable

The statement required to be given by the directors by Code provision CIII can be found on page +19

# VIABILITY STATEMENT

In accordance with provision C22 of the UK Comporate Governance Code 2016, the directors have assessed the viability of the Group over a three year period aligned with that of the Group's rolling planning cycle, taking into account the Croup's current position. and the potential impact of the principal risks documented or pages 62 to 65. Extension of viability festing beyond three years is seen by the Group as being of imited value because of the following factors

- . The majority of the Group's contracts are less than three years in duration,
- The correlation of demand for security services with the global economy, and
- The impact of the Group's on-going productivity programme

The Group's prospects are assessed primarily through its bottom-up strategic blanning process. The overall strategy for the Group was refreshed comprehensively in November 2013 and the poard has monitored progress closely against this strategy as well as the risks to its success. The 2017 process commenced in lune with each country and pusiness unit updating its rolling three-year strategic plan and considering the risks to achievement of that plan. These plans were reviewed and refined by regional management and then by the Group Executive Committee before being reviewed by the board in October 2017. The key assumptions in the financial forecasts, reflecting the overall strategy, include

- · A continued cerr and for security services, as set out on page 8 of the strategic report.
- · An ability to continue to drive through our productivity programmes and to flex the cost base, as set out on pages 28 to 29, and
- Continuing to deliver good operating cash flow. Deformance as set out on pages 30 and 31

The output of this plan is used as the baseline for stressifiesting nover arit and headroom analysis analysis in ludes sensitivity analysis to changes in tracing conditions affecting profit growth and the

capital needs of the business, as well as the onnobal residua: hsks

The rast majority of the Group's risks exist at an individual country level and are individually immaterial The principal residual risks described on pages 62 to 65 are an aggregate view of individual risks captured in country, region and Group functional risk registers These wice-ranging risks are highly unlikely to crystallise simultaneously and it is therefore unlikely that such risks would have a material impact on the Croup's financial position. Nevertheless, the Group has sensitised its three-year financial projections for the following risks

- a) Potential loss of certain of the Group's top customers.
- b) Potential adverse changes in foreign ownership legislation resulting in cessation of material pus ness lines,
- c) Potential claims from major contracts resulting in material settlement payments, and
- a) Litigation or Class Action claims resulting in material legal costs and settlement payments

The directors consider that this stress-test assessment of the Group's prospects is reasonable in the circumstances. The directors have also considered the debt maturities in 2019 and 2020 as indicated on page 31 under the stress test scenarios and concluded that the Group would be able to meet its maturities as they fall due with the existing facilities currently in piace, without the need to acress the financial markets

Based on this assessment, the directors have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fall due over the three financial years to 31 December 2020

# Directors' remuneration report

# THE REMUNERATION COMMITTEE

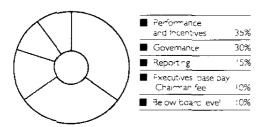

"We believe our remuneration framework is aligned with the Group's strategic objectives and promotes the interests of our shareholders and the long-term success of the organisation, by rewarding the creation of sustainable value, with particular focus on our customers, people and values."

| Committee membership | during 2017            |

| Winnie Fok           | October 2010           |
| Clare Spott swoode   | June 2015              |
| Barbara Thoraifsson  | July 2016              |

There were three scheduled meetings and one additional meeting help during the year ended 31 December 201 Members' attendance at committee meetings is shown on page 74

The committee consists entirely of independent non executive directors and the committee membership during 2017 is set out in the table above. Biographies of the members of the committee are set out on pages 68 and 69. As announced previously, at the 20+8 AGM, Clare Spottiswoode will retire from the poard. I would like to thank Clare for her valuable support and her contributions to the work of the committee

# Main activities of the Remuneration Committee during the year (%)

# Responsibilities

The Remuneration Committee is responsible for overseeing all elements of the remuneration of the executive cirectors, other members of the Group Executive Committee and the chairman of the board

It also agrees with the board the framework and policy for the remuneration of other senior managers of the Group and reviews and recommends to the board the remuneration of the company secretary

In determining remuneration policy, the committee takes into account a variety of legal and regulatory requirements and the relevant provisions of the UK Corporate Governance Code

The committee also determines policy on the duration, notice period and termination payments under the contracts with the executive directors with a view to recognising service to the company whilst ensuring that failure is not rewarded and that the cuty to mitigate loss is recognised

The committee approves the design and getermines the measures and formulae for performance-related pay schemes operated by the company it approves the eligibility of executive directors and other Group Executive Committee members for annual bonuses and penefits under long-term incentive plans and assesses performance against the objectives of those plans. No directors are involved in determining their own remuneration

The committee's terms of reference are available on the Company's website at g4s com/investors

# Our remuneration approach

Me seek to attract and retain the pest people whist ensuring that the remuneration policy and practice drive behaviours that are in the longterm interests of the company and its shareholders

#### Fixed pay

- base bay
- retirement benefits
- other penefits

#### Short-term incentives

 annual bonus plan (one year) with deferred element (three years)

# Long-term incentives

· long term incentive plan (three years)

#### Business context and performance

In 2017, management delivered another year of profitable growth and good cash generation, enabling continued investment in growth, technology and productivity programmes, while continuing to strengthen the parance sheet. Our leadership team continues to demonstrate commitment to the long-term success. of the business and I am pleased to report that they produced core business revenue growth of 3.2%, Adjusted PBITA increase of 4.2%, Adjusted EPS growth of 5.9% and a reduction in het debt to Adjusted EBITDA of 24x from 2.8x at the end of 2016. Further details are set out in the chief executive officer's introduction to the Strategic Review on pages 4 to 7

# 2017 Remuneration outcomes

Pay review As reported last year, the CEO's salary was increased by 1.5% effective from 1 January 2017 and that of the CFO, who was appointed in October 2016 remained the same. The increase awarded to the executive directors was in line with the increase applicable to Group employees and most managers pased in the UK

Annual Bonus - The Group's financial performance, together with individual performance against strategic objectives, supports a high level of annual bonus pay-out for the executive directors. Recognising the impact of trading conditions in the Middle East & India during 2017 the executive directors recommended a reduction equivalent to 10% of base pay be applied to their bonus payments. The Remuneration Committee commenced this initiative and approved the proposal, which resulted in payments, after adjustment, of 79.5% of maximum opportunity for the CEO and 69.5% of maximum opportunity for the CFO

Long term incentive plan - In line with our commitment to ensure that our remuneration framework aligns with our strategy and promotes the long-term success of G4S, a significant part of performance-related reward is delivered through shares. Given the growth in earnings and strong operating tash-flow over the three years from 2015 to 2017, awards that were granted in 2015 vested at a level of 62%

Further information on the levels of executive remuneration earned in 2017, including performance against the relevant targets, is given on pages 96 to 98

# Key areas of focus in 2017

# Remuneration Policy and approach

During 2016, the committee carried out a thorough review of our remuneration policy and found that the policy approved by shareholders in 2014 continued to operate effectively. Therefore, no substantive changes were made to the Directors Remuneration Policy submitted for shareholders' approval at our AGM last May The policy received a high level of support with 9/26% o tayourable voies, for which I am grateful

During 2017, the committee uncertook a further review of our current remuneration practices taking account of the overall approach and structure of employee reward across the Group, developments in remuneration for executives in the global market as well as views of the hvestor community. The committee together with its advisor is developing a package of measures in relation to which consultation with major shareholders will take place during the latter part of 2018, with a view to finalising an up-to-date policy for submission to shareholders' approval at our AGM in 2019. Key areas where changes are being considered include the introduction of a two-year holding period post vesting of shares for awards to the Group executive committee under our long-term incentive plan and an increase in the shareholding requirements. The level of company pension contributions for future executive appointments s also under review

#### Our stakeholders

The committee considers shareholders' lievis via consultation and wider stakeholders' views through reviews of regular reports from the committee's acvisor on market and governance developments. During the year, the committee also reviewed the analysis and results of the UK gender pay gab reporting requirements. It is also aware of institutional investors' views including the Investment Associations' Principles of Remuneration published in November 20-7 and Interiors to consider the implications of the revised UK Comprate Governance Code once it is finalised and published later in the year

#### Governance

With a view to refocusing the work of the committee and updating some of the committee's duties such as its reporting obligations, the committee reviewed and approved for recommendation to the board, a number of americanests to its terms of reference The committee's revised terms of reference are available on the company's website at g4s com-investors

#### UK Code Compliance

The company had in place malus and clawback before their introduction became a feature of the revised L.K. Corporate Governance Code. These are explained or page III

The committee is also conscious of the Code's requirement that executive directors' remuneration should be designed to promote the long-term success. of the company - and that performance-related elements of remuneration should be transparent, stretching and applied rigorously

# Implementation of remuneration in 2018

#### Pay review

For 20-8, the CEO and CFO's base pay has been increased by 2%. This pay review took account of market salary therids as well as salary incheases elsewhere in the Group

The increase awarded to the executive directors was in line with the increase applicable to Group employees and most managers based in the UK

#### Incentives

The bonus opportunity and LTP award levels remain unchanged in 2018, both of which are subject to caps as set out in the Remuneration Policy on pages 107 to 115

In relation to bonus, the committee seeks to set targets that support the overarching strategy, reflecting the business context for the relevant period. Targets are also intended to be stretching whilst remaining achievable and are compatible with the Group's risk appetite. The committee is confident that the targets set meet these chiena

The long-term incentive plan introduced in 2014. received overwhelming support from shareholders and will tontinue to operate in 2018

# The committee's performance

Consistent with our practice every year a formal review of the committee's performance was carried out at the end of 2017

Details of the process for poard and committee performance evaluations are set out on page 6

The review concluded that the committee continues to be effective and to perform well. It also highlighted the committee's awareness of its key role, as the Group's new organisational structures bed in and celliery of the strategic objectives gains momentum, in continuing to focus on ensuring that the Group's remuneration practices enable the Group to attract, retain and reward the high calibre individuals and talent it needs to deliver long-term sustainable success

#### Voting on remuneration

The annual report on remuneration will be but to an advisory vote at this year's AGM, and we look forward to receiving snareholders' support once again this year

I will be available to answer guestions and lister to the views of our shareholders at the forthcoming AGM

#### John Daly

Remuneration Committee Chairman

8 March 2018

# Remuneration policy

The company's remuneration policy for directors is set out on pages (07 to +15 of this report and on the company's website at g4s comilit, was approved by shareholders at the company's annual general meeting held on 25 May 20-7 with 97.26% of all votes cast in favour. The long term incentive plan referred to in the policy was approved at the 2014 annual general meeting with 96 88% of all votes cast in favour. The remuneration policy came into effection 26 May 2017 and will continue to apply for up to three financial years unless a new or revised policy is approved by shareholders in the meantime

#### 2017 Annual bonus

During the financial year erided 31 December 2017, the performance measures relating to the annual conus scheme rules were consistent with the Remuneration Policy; with 85% of the bonus for Ashley Almanza and 70% for Mr. Weller being pased on achievement of challenging financial performance measures. The financial performance measures were pased on budgeted Group earnings (excluding specific and other separately disclosed items) and budgeted Group operating cash flow before cupital expenditure. For threshold performance 35% of maximum entitlement would day out with on-target performance resulting in a payment of 60% of maximum entitlement, with TCC% only being earned in the event of achievement of a stretch performance sign ficantly in excess of budget. The element of ponus getermined for each financial performance measure is calculated by interpolating actual achievement against the range between the minimum (e) entry threshold and the maximum target to achieve maximum performance

The remaining 15% of the bonus for Mr Almanza and 30% for Mr Weller was linked to objectives relating to non-financial performance. These consisted of personal objectives or related to the organisation and were linked to specific elements of the Group's strategy for which the particular director had responsibility. Each executive director has a number of strategic performance measures linked to areas that the committee has agreed for the year. The committee reviews the progress in each area and then makes an assessment as to whether the executive has performed in accordance with expectations

The maximum ponus potential remained unchanged from 2016 at 150% of base pay for both Messis. Almanza and Weller Bonuses are bald in cash up to 50% of maximum entitlement. Where the bonus amount is in excess of 50% of the maximum bonus potential, the amount which exceeds 50% is delivered in the form of a deferred share award vnich vests after a period of three years

The tables below show how pay was linked to performance in 2011, and set out details of each of the financial measures, the targets in respect of these measures and the actual outcomes

#### 2017 annual bonus - Performance conditions and outcomes

#### Personal objectives

Mr Aimanza was able to earn up to 15% of the maximum bonus potential for achieving personal objectives. These were designed to align with the strategic phonties for 2017 (see pages 32 and 33) and were set out in the 2016 Directors' Remuneration report

Mr Almanza's 2017 personal objectives consisted of improving health and safety performance, updating the growth and innovation strategy, continuing to strengthen the global leadership team and achieving substantial completion of the strategic portfolio programme

| Personal Objective     | Achievement   | Performance Rating   |
|------------------------|---|--|
| —ealth and safety      | Clear and visible focus and leadership on safety has resulted in significant performance improvement in 2017 with 25 work related fatalities, a reduction from 47 in 2016. This demonstrates the results of a culture change programme incorporating leadership behaviour capability building and performance management.                                   | As a result of the significant improvements and progress in these areas the assessment against non-financial objectives for the Group CEO was agreed as 11 out of 15 points. |
| Global leacership team | With effect from 1 anuary 2018, the group wide management of our core business has been reorganised. This resulted in new appointments for five of the Group Executive Committee including a new external hire. The new organisation will enable the further strengthening of strategic commercial and operational focus in each of the core service lines. |  |
| Growth and Innovation  | The Group made clear progress growing new technology services in both Cash Solutions and Secure Solutions   | -  |
| Porfolic programme     | The Croup has substantially completed the strategic portfollo<br>programme established a few years ago. This has improved<br>profitability and raised over 1500 million in gross proceeds.  |  |

# Personal objectives

Mr Weller was able to earn up to 30% of the maximum borus potential for achieving personal objectives. The personal oplectives for the CFO role were set at the beginning of the year to align with the strategic priorities for 2017 These were set out in the 2016 Directors Remuneration report and focused on three key areas, namely organisational efficiency and finance functions, celivery of integrated 11 systems and produrement efficiency

| Personal Objective      | Achievement   | Performance Rating   |
|-------------------------|---|--|
| Organisation efficiency | There has been continued focus on efficiency across the Group, with particular focus on the Fhance function and steps taken to embed stream ned reporting and management information as well as delayering have resited in significant efficiency improvements.   | As a result of the improvements and progress in these areas the assessment against non-financial objectives for the Group CFO was agreed as 15 out of 30 points. |
| Integrated IT systems   | The pilot of the javelin IT-enabled operating mode, was aunched in Ireland in 2017 and the enhanced version of javelin encompassing all of the lessons, eamed will be deployed into Ireland before roll out to the UK commences, after this year.   | _  |
| Procurement et a ency   | Procurement programmes continued to operate across the Group with a category focused approach across a regions Key areas of improvement included continued supplier base rationalisation, demand management and implementation of new procurement tools providing more efficient and continued procurement. | _  |

The table below sets out the annual bonus awards which were made to executive directors in respect of the financial year ended 31 December 2017, pased on the performance described on the previous pages. As mentioned earlier in the report, the executive directors suggested their bonus pay-outs be reduced by an amount equivalent to 10% of their base pay. The Remuneration Committee, which commended their initiative, was fully supportive and used its discretion to reduce the awards accordingly. The annual bonus awards set out below are shown after adjustment

|                | 20 7 annual bonus | 20 7 annual bonus<br>(% of salary) | 2017 annuai<br>ponus deferred<br>(% of saiary) |

| Average OCF                  | 129%                            | 100%                   |
| Total .esting                |                                 | 70% of maximum         |

The table below illustrates the company's performance against the 2015 award targets and the estimated pay-out as shown in the 2017 values in the fourth column of the single figure table.

| Yeasure                       | Performance                     | Vesting (% of element, |
|-------------------------------|---------------------------------|------------------------|
| Average ar rual growth in EPS | Increase of 0% pa               | 80%                    |
|                               | Ranked between 4:st and 42nd in |                        |
| Relative TSR                  | peer group                      | 0%                     |
| Average OCF                   | 125%                            | 100%                   |
| Total resting                 |                                 | 62% of maximum         |

Vesting under the 2015 LTIP was 62% of maximum of the award. Maximum performance was achieved for the average OCF component and 80% of the portion allocated to average annual EPS growth vested. Dividence payments to shareholders were maintained throughout the performance period however relative TSR performance was affected by share price fluctuations soldid not result in any pay-out for this measure.

#### Total pension entitlements (audited information)

None of the executive directors have any prospective entitlement to a Group defined benefit pension non-sleither a member of the Group's pension plan, which is a defined continuition group personal pension plan available to all UK employees. Instead the CEO and CEO receive cash also vances of 25% and 20% of their base pay respect vely

# SCHEME INTERESTS AWARDED DURING THE FINANCIAL YEAR (AUDITED INFORMATION)

Awards under the LTIP approved by the shareholders at the company's AGM in june 2014 were made in March 2017 consistent with the company's normal grant policy. In June 2017, in accordance with the terms of his contract of employment, Mr Weller was granted a conditional award over 100,000 ordinary shares of 25 bence each in the company following the forfeiture of his 2016 bonus from his previous employer. The deemed date of grant for this award is March 2016 and the vesting of such award will be subject to the achievement of performance conditions measured over a three-year period beginning in the deemed year of grant, i.e. 2016

Details of the awards made to the executive directors are summarised in the table below and further details are given in the table on directors' shareholdings and interests or page 101

#### Notes

- 1 Nick Buckles stepped down as CEO on 31 May 2013 and Ashley Almanza took over as CEO from 1 June 2013
- 2. After thy 2011, the CEO's total single figure of annual remuneration included payment in leu of pension. This was 40% of base pay for Nick Buckes and is 25% of base pay for Ashley Almanza. Phorito July 2011, a notional sum equal to 40% of relevant base pay has been included
- 3. The value of shares that vested in the relevant year under the PSP (or a notional value in the case of shares vested but unexercised) has been included in the phor year's CEO's total figures, since that is the most relevant year for measurement of performance
- 4. The figures before 2013 did not include taxable expenses
- 5. Bonus % of maximum awarded figure for 2017 is the adjusted figure after a reduction equivalent to 10% of base bay was abblied, as recommended by the executive directors and approved by the Remuneration Committee

# PERCENTAGE CHANGE IN CEO'S REMUNERATION

The table below, shows how the percentage change in the CEO's salary, benefits and bonus between 2016 and 20 Ticompared with the percentage change in the average of each of those components of pay for UK-based G4S employees. The Remuneration Committee has chosen all employees in the UK who were in employment during the two-year period - 2016 and 2017 - as the group which should provide the most appropriate comparation, as the Group CEO is based in the UK

|   | Percentage change in i | Percentage change in remuneration between 2016 and 2017 |          |  |  |  |
|---|------------------------|---|----------|--|--|--|
|   | Salary                 | 3enefits  | 30~us    |  |  |  |
| CEO                                       | l 5%                   | C + %   | -168%    |  |  |  |
|   |                        | See note  | See note |  |  |  |
| Average change for all other UK employees | 3  %                   | pelow   | below    |  |  |  |

- 1. The core benefit composition and the underlying employee entitiements remain unchanged over the two-year period, with changes niked to increases in premium rates and costs of procurement
- 2. Information on ponuses is not readily available for all other UK employees

# RELATIVE IMPORTANCE OF SPEND ON PAY

The table below Illustrates the relative importance of spend on pay compared with other dispursements from profit

|                      | 2017    | 20 6    | Change |
|----------------------|---------|---------|--------|
| Dividends paid       | £145m   | £145m   |        |
| Fotal employee costs | £5,363m | نے,240m | · 2 3% |

There were no share buy packs effected in either year

# STATEMENT OF IMPLEMENTATION OF REMUNERATION POLICY IN 2018

Decisions were taken on the basis of the cirectors' remuneration policy approved at the company's 2011 AGM set out on pages 10° to 145

#### Executive directors' remuneration

#### Base pay

For 2018, at the annual pay review, it was decided to increase Messrs Almanza and Weller's base pay by 2% from £939,755 to £958,550 and £643,750 to £656,625 respectively. These changes took effect from 1 January 2018

#### Annual Bonus Scheme

The annual bonus for the 2018 financial year Ivill operate on the same basis as that for 2017 and will be consistent with the existing remuneration policy. The maximum bonus opporturity remains at 150% of base pay for both Ashiey Almanza and Tim Wieller. The financial measures of group earnings and operating cash flow remain and revenue will also be included in the financial measures for 2018. These have been selected as they support the company's key strategic objectives. As for last, year, the financial measures are allocated weightings of 85% for Ashley Almanza: They have increased to 80% for Tim Weller. The hon-financial measures will therefore account for up to 15% and 20% of the maximum horus opportunity for Messrs Almanza and Weiler respectively

These non-financial measures are based on the Group's strategy and core values and include the following key areas

#### Ashley Almanza

Mr Nimanza's personal objectives for 2018 cover three key areas, namely strategy, productly ty and organisation and are as follows

- Strategy: Continue to develop the Group's use of technology in its products and services.
- Productivity Develop and initiate the next phase of the Group productivity programme
- Organisation —moed new organisation to ensure new teams operate effectively.

#### Tim Weller

For 20-8, Mr. Weller's personal objectives cover product t ty and  $\top$ 

- Productivity Contribute to Group programme with efficiency improvements in key support functions
- IT Deliver lean process IT project

Details of the performance measures and targets are deemed to be commercially sensitive since they relate to the 2018 financial year. To the extent that they are no longer commercially sensitive, targets and performance levels against them will be disclosed in the company's 2018 integrated report and accounts

The proposed target levels for 2018 have been set to be challenging and align with the Group's strategic promities and business plan in reviewing the targets, the committee took into account a number of factors including for example the fact that in relation to group earnings the minimum target that needs to be met in order for any points to be payable must be at least equal to the earnings in 2017

The committee considered the proposed targets relating to non-financial measures and concluded that these were also demanding

# Long Term Incentive Plan

The level of awards due to be granted in the 2018 financial year under the LTIP approved by shareholders at the 2014 AGM will be consistent with the existing remuneration policy

As for 20 %, the committee considers that a combination of earnings per share growth, total shareholder return and average cash flow targets are the most appropriate performance measures for the 2018 awards, as they provide a moust method of assessing the company's performance both in terms of underlying financial performance and re ums to shareholders

A wards granted under the LTIP during the 2018 financial year are subject to the performance conditions listed in the table on page 105

# Performance measures for long-term incentives awarded in 2018

The company's current policy is louse market-purchased shares to satisfy LTIP awards

Participants in the LTIP will receive a further share award with a value equivalent to the dividends which would have been baid in respect of LTIP awards vesting at the end of the performance period

The company calculates whether the EPS performance targets have been achieved by reference to the Group's audited accounts, which provide an accessible and objective measure of the Croup's earnings per share

Ac astments to HPS will be made in respect of

- Constant exchange rates in line with previous years, these will be normalised to the rates in the base year.
- Acquisitions earnings will be added to the EPS base at the level used in the acquisition business case
- Disposals earnings will be removed from the EPS base at the pusitiess plan rate.
- Share puly-back —the company will only execute puly-backs if the investment is economically accretive and in six in the interest of the company. The adjusted EPS for the purposes of calculating performance against the LITIP target shall be further adjusted by
  - (a) increasing the average number of shares in issue during the performance year by the number of shares bought back during the past three years
  - (b) decreasing the net interest cost in the performance year in respect of the interest charge on the cash cost of any share buy-backs during the past three years. Interest will be calculated at the Group's average costs of funds for the year

The Remur cration Committee will apply discretion in the event of impairment of the impairment is not a result of management failure, then it will not impact the pay-out

The Remuneration Committee may alter the terms of the EPS measure if it feels that it is no longer a fair measure. and sino longer incentivising

Operating cash flow is a measure taken before capital expenditure and investments into ensure that management is not incentivised to under-invest in growth opportunities. I and before pension deficit repayment. Operating cash flow is expressed as -BITDA +/- working capital and provisions movement as a percentage of EBITDA. Average operating cash flow is the average over three years

ISR ranking will be verified externally

#### Non-executive directors' remuneration

The fees payable to the non-executive directors other than the chairman are set by the executive directors who receive input from the chairman. The tees payable to the non-executive chairman are set by the Remuneration. 1 ommittee. In both cases, fees are reviewed ar nually flees were last increased in July 2016 for the chairman and July 2015 for non-executive directors

In July 2017 it was decided to postpone the exercise to the end of the year, so that it would take place at the same time as the pay review for executive directors and employees in general. The review carried out at the end of 2017 received input from the Remuneration Committee's advisor, Deloitte

As a result of the review, the Remuneration Committee considered and approved a proposed increase of the chairman's fee, in line with the increase applicable to group employees based in the UK, of 2% from January 2018

The review also resulted in a proposed increase to the basic fee for non-executive directors of 2.8%, from £61, 150 to £63,500 Such increase was within the range of market practice in the FTSE 100 and in line with increases for other employees over the same period. Consistent with market median for companies ranked 31 - 100 in the FTSE index and in recognition of the increased demands of the role, the fee for the chair of the Audit Committee increased from £19,000 to £20,000. There was no proposed increase to the fees for the role of Senior Independent Director or other committee chairs. All increases took effect from 1 january 2018

The table below, sets but the fees for the non-executive chairman and other non-executive directors applicable for 2018 as well as the percentage increase, where relevant applied following the annual fee review

| Annual ree               | 2018 in | ncrease or<br>proriyear n<br>% |

# ADVISORS TO THE REMUNERATION COMMITTEE

Deloitte was appointed by the Remuneration Committee as its advisor in 2014. Such appointment is reviewed every year and was confirmed in August 2017. The committee received advice from Deloitte on executive and sen or management remuneration matters throughout the year under review. The committee has satisfied itself as to the independence of Deloitte. Deloitte, sia member or the Remuneration Consultants Group and operates voluntarity under its code of conduct in the UK.

| Advisor  | Appointment | Services provided to<br>Remuneration Committee | Fees far services<br>to Rem Co | Other services provided to Combany                   |
|----------|-------------|--|--------------------------------|--|
| Deloitte | 2014        | Advice on executive                            | £45,900                        | Advice on controls, tax advice or expatnate and      |
|          |             | remuneration                                   |                                | share plans, and other consulting services. These    |
|          |             |  |                                | services were provided by different parts of Delotte |

Fees for services to the Remuneration Committee are at an agreed rate based on time involved and baid as incurred

Fre group chief executive, Ashley Almanza, provided guidance to the committee on remuneration packages for senior executives within the Group Further guidance was received from the Group's HR director, Jenni Myles, and the director of compensation and penefits, Sok Wiah Lee. Neither the group chief executive non the group HR director participated in discussions regarding their own remuneration

The committee is satisfied that the advice it received ouring the year was objective and independent based on the experience of its members generally,

information about who are the members of the Remuneration Committee and their attendance at meetings of the committee during the year under review can be found on pages 74 and 93

#### STATEMENT OF VOTING AT GENERAL MEETING

A resolution to approve the Directors. Remuneration Policy as set out in the company's arinual report for the year erided 31 December 2016 was bassed at the company's annual general meeting held on 25 May 2017 in addition, a resolution was passed to approve the Directors' Remuneration Report (other than the part containing the Directors' Remuneration Policy) for the year ended 31 December 2016

The results of the votes on these resolutions are set out in the table below

| Resolution                                | For    | Against | Wthhec  |
|---|--------|---------|---------|
| Directors' Remur enation Policy 2017 AGM  | 97.26% | 2 /4%   | 13 ,465 |
| Directors' Remuneration Report - 2017 AGM | 9/05%  | 295%    | 118,840 |

# DIRECTORS' REMUNERATION POLICY

Remuneration policy for executive directors

# BASE PAY

#### Purpose and link to strategy

Base pay is set at compet tive levels in order to recruit and retain high calibre executives with the skills required in order to manage a company of the size and global footprint of G4S

The level of pay will reflect a number of factors including individual experience, expertise and role

#### Operation

Reviewed annually and fixed for 12 months commencing i January Interim salary reviews may be carried out following significant changes in rote, scope or responsibility or at any other time at the committee's discretion

The final salary decision may also be influenced by role, experience individual and company performance, internal relativities and increases for Group employees

#### Maximum opportunity

Actual base pay for each executive director is disclosed each year in the Directors remuneration report

In determining salary increases, the committee considers market salary levels including those of appropriate comparator companies

Ordinarily annual salary increases would be no more than the average annual increase across the Group However, in exceptional circumstances ain gher level of increase may be awarded, for example

- · following a sign ficant change to the nature or scale of the business,
- following a significant change to the nature or scope of the role, or
- · for a new appointment, where the base pay may initially be set below the market level and increased over time as experience develops and with reference to the individual's performance in the first few years in the role

Where exceptional increases are made we will fully disclose and explain the rationale for such increases

## Performance measures and clawback

None, although individual performance may have a bearing on salary increases.

# BENEFITS

#### Purpose and link to strategy

As with base salary, a suitable range of benefits is made available in order to recruit and retaininghicalibre executives

#### Operation

Executives are entitled to a number of benefits comprising paid holiday, healthcare for themselves and their family and life insurance of up to four times base. salary, car alfowance, business related transport, limited financial advice from time to time and expathate penefits where relevant. A relocation allowance reflecting reasonable costs actually incurred will be paid

Other benefits may be granted at the discretion of the Remuneration Committee

Reasonable business expenses in line with G4S' expenses policy (e.g. travel, accommodation and subsistence) will be reimbursed and in some instances the associated tax will be nome by the company

# Maximum opportunity

Maximum benefits per director per annum

- nolidays 30 days
- can allowance £20,000
- business related local transport £40,000
- · for tinancial advice, expatriate benefits and relocation expenses, the expense will reflect the cost of the provision of benefits from time to time but will be kept under review by the committee
- · other benefits granted at the discretion of the committee up to 3% of base pay per annum per director
- · reasonable business expenses are not subject to a max mum, since these are not a benefit to the director

Any allowance in relation to relocation will provide for theire moursement, of reasonable costs incurred

#### Performance measures and clawback

None

## Directors' remuneration policy - continued

#### ANNUAL BONUS

#### Purpose and link to strategy

Rewards the achievement of annual financial and strategic business targets and delivery of personal objectives

Deferred element encourages long-term shareholding and discourages excessive risk taking

#### Operation

Awarded annually based on performance in the year Targets are set annually and relate to the Group and/or the business managed by the executive

Bonus outcome is determined by the committee after the year end, based on annual performance against targets

Bonuses are paid in cash, but executives are required to defenany ponus pavable in excess of 50% of their maximum ponus entitlement into shares. Deferral is for a minimum behold of three years. Dividencs on equivalents accrue during the deferral period on deferred shares

Bonuses are not pensionable

#### Maximum opportunity

Maximum opportunity of 150% of base pay per annum for the CEO and the CFO

125% of base pay per annum for any other executive

# LONG TERM INCENTIVE PLAN

#### Purpose and link to strategy

Incentivises executives to achieve the company's long-term financial goals, as well as focus on value creation, whilst aligning the interests of executives with those of shareholders

#### Operation

Executive directors are granted awards on an annual basis, which vest over a period of at least three years subject to continued service and the ach evement of a number of key performance measures

The Remuneration Committee reviews the quantum of awards to be made to each exerutive each year to ensure that they remain appropriate

Dividends or equivalents accrue curing the vesting period on awards that yest

The award is settled by the transfer of marketpurchased shares to the executive directors

Ail the released shares (after tax) must be retained until the minimum shareholding requirement is met Currently, the minimum shareholding requirement is 200% of base savary for the CEO and 150% for the ather executive directors

#### Performance measures and clawback

Typically, executive directors' bonus measures are weighted so that

 between 70% and 85% of the horus is based on achievement of challenging financial performance measures (e.g. profit before tax and amortisation, organic growth, cash-flow measures, etc.), with each measure operating independently of the others, and the remainder is linked to personal and for nonfinancial measures, which are strategic or operational in pature

Each year, the committee may use its discretion to vary the exact number of measures, as well as the nirelative weightings, and this will be disclosed in the annual remuneration report

As a result of the number of factors taken into account in determining ponus, there is no minimum pay-out level.

For illustrative purposes, in the event that only threshold has been achieved pay-out would be 35% of maximum. nsing to full pay-out should achievement of a stretch performance level be achieved for all measures assuming the non-financial performance measures were satisfied

The determed element of the bonus is not subject to any further performance measures but is subject to plawback in certain circumstances. The non-deferred part of the bonus, which is settled in cash, is also subject to clayback (see separate section on page 1-1)

#### Maximum opportunity

Maximum opportunity of 250% of base pay per annum for the CFO

Maximum opportunity of 200% of base pay per annum for other executive directors

#### Performance measures and clawback

Awards vest based on performance over a period of at least three financial years commencing with the financial year in which the award is made

Performance will be measured based on a combination of earnings per share growth, total shareholder return against all tomparator group and average operating hash flow For awards made in 2017, those were in the proportion of 40%, 30% and 30% respectively However, the committee retains the flexibility to amend these proportions, provided that no single measure will be a sign ficantly greater proportion trian the officers

At threshold, 25% of the relevant portron vests "his ncreases on a straight-line basis up to 100% for performance in line with maximum, largets are set out on page 99

Awards are subject to clawback in certain incumstances (see below or page 111)

### RETIREMENT BENEFITS

#### Purpose and link to strategy

As with base salary and other benefits, making available a suitable retirement benefits package aids the recruitment and retention of high calibre executives, allowing such executives to provide for their retirement

#### Operation

G4S operates a defined contribution Group-wide personal pension plan in the UK in which executives may participate. Alternatively, G4S may provide a cash allowance in lieu of a contribution into such plan

The current executive directors receive cash allowances The CEO receives 25% of base pay as a cash allowance, the CFO and other executive directors receive 20% of base bay

#### Remuneration policy for non-executive directors

#### CHAIRMAN'S FEE

#### Purpose

To attract and retain a high callbre charman by offening a market-competitive fee, which also reflects the responsibilities and time commitment. There are no Derformance-related elements

#### Operation

The chairman's fee is disclosed each year in the Directors' remuneration report. The fees are reviewed annually by the committee. The annual fee is an all-inclusive consolidated amount. The committee retains the discretion to review the chairman's fee at any other time if appropriate line chairman's fee is reviewed against other companies of a similar size

#### The level of award is kept under review by the committee and is intended to be broadly market comparable for the roles

### Maximum opportunity

Maximum opportunity of up to 25% of base pay for the CEO and 20% for other executive directors

#### Performance measures

None

### Maximum opportunity

Ordinanty any horease in the chairman's fee would be in line with other increases for similar roles in other companies

Fees payable to the chairman and other non-executive directors in aggregate per annum shall not exceed the maximum specified in the company's articles of association for the relevant year

# NON-EXECUTIVE DIRECTORS' FEES (EXCLUDING THE CHAIRMAN)

### Purpose

To attract and retaininghical breinon-executive directors (NEDs) by offering market-competitive fees which should reflect the responsibilities and time commitment There are no performance-related elements

#### Operation

NED fees including any additional fee for any additional role listed below are disclosed each year in the Directors' remuneration report

With the exception of the chairman, the fees for NEDs are structured by composition build-up nonsisting of

- a base fee
- · an additional fee for chairing a committee
- · an additional fee for the role of senior independent

The NED fees are reviewed annually by the executive directors. The board retains the discretion to review the NED fees at other times, as appropriate, to reflect any changes in responsibilities or commitment

The basic fee covers committee membership and each NFD is expected to participate in one or more board. committees. All the fees are reviewed against other rombanies of a similar size

#### Maximum opportunity

Ordinanly, any increase in the NEDs feet would be in line with other increases for similar roles in other companies

Fees payable to non-executive directors (including the chairman) in aggregate per annum shall not exceed the maximum specified in the rombany's acticles of association for the relevant year

# Directors' remuneration report continued

Directors' remuneration policy - continued

Remuneration policy for non-executive directors

#### BENEFITS

#### Purpose

Benefits may be provided from time to time in connection with the chairman and other NEDs performing their roles, such as business traves, subsistence and entertainment, accommodation and professional fees for tax and social security compliance and other ancillary benefits

#### Operation

Reasonable business expenses in line with G4S expenses policy (e.g. travel, accommodation and subsistence) will be reimbursed and in some instances the associated tax will be borne by the company

#### Maximum opportunity

Reasonable business expenses are not subject to a maximum, since these are not a benefit to the director

Benefits and expenses will reflect the actual cost of prevision

#### Notes to the directors' remuneration policy

#### 1. Performance measures

Annual Bonus Plan - The actual performance measures and targets are set by the Remuneration Committee at the beginning of each year. The performance measures used for our annual bonus plan have been selected to reflect the Croup's key performance indicators

The committee aims to ensure that the measures appropriately encourage the executive directors to focus on the company's strategic phonties, whilst the targets are set to be stretching but achievable

The aim is to strike an appropriate balance between incentivising annual financial and strategic business. targets, and each executive director's key role-specific objectives for the year

Long Term Incentive Plan - In choosing the performance measures for the Long Term Incentive Plan, the committee aims to find a balance of measures smich reflect the company's long-term financial goals as well as incentivise executives to create sustainable long-term value for shareholders

Legacy plans - The committee reserves the right to make any remuneration payments and or payments for loss of office including exercising any discretions available to it in connection with such payments)

notwithstanding that they are not in line with the policy set out above where the terms of the payment were agreed

- () before a lune 2014 (the date the company's first shareholder-approved directors, remuneration policy came into effect),
- (ii) before the policy set out above came into effect, provided that the terms of the payment were consistent with the shareholder-approved directors' remuneration policy in force at the time they were agreed, or
- (ii) at a time when the relevant individual was not a director of the company and, in the opinion of the committee, the payment was not in consideration for the incividual becoming a director of the company

For these purposes, payments may include the committee satisfying awards of variable remuneration In cases where all or part of the variable remuneration award was in the form of shares, the payment ferms are those agreed at the time the award was granted

Details of the vesting of the awards will be published in the annual remuneration report each year

The non-executive directors do not participate in any ncentive schemes nor do they receive any benefits other than those referred to in the above table

#### 2. Malus and claw-back mechanisms

Since 2010, any cash and on shares awarded under the annual borius plans and the previous Performance Share Plan may be subject to clawback

The long Term incontive Plan and the annual ponus plan may he subject to malus or clawback from the executive director concerned if the Remuneration Committee so determines and, in the case of misstatement of accounts, where the Audit Committee concurs

The time period in which the clawback can be operated depends on the reason for the overpayment as set out n the table below

The amount to be clawed back directly from the executive director will be the overbald amount, but the Remuneration Committee retains the discretion to draw back the 'net'' (i.e. post-tax) amount of the award received by the executive director

| Maius and claw-back                               | Annual Bonus Plan<br>(including deferred elements)  | Long term incentive plan (LTIP)  |                             |
|---|---|--|-----------------------------|
|   | Since 2015 plan                                     | PSP (previous)   | Current LTIP                |
| Material misstatement of group financial accounts | up to 2 years after the payment of the cash element | up to 2 years after vesting<br>(except where due to<br>fraud or reckless<br>penaviour when it shall be<br>5 years after vesting) | up to 2 years afer resting  |
| M sconduct  | upito 6 years after the payment of the cash element |  | up to 6 years after vesting |
| Fraud   | unl mited   |  | unlimited                   |

# Principles and approach to recruitment and internal promotion of directors

When rining a new executive director or promoting to the poard from within the Group, the committee will offer a package that is sufficient to retain and motivate and, firelevant, attract the right talent whilst at all times alming to pay no more than is necessary. Ordinarily, remuneration for a new executive director will be in line with the policy set out in the table summarsed above However, a scretion may be required for exceptional circumstances such as dealing with remuneration relincuished in a previous loo

The maximum level of on-going variable pay that mav be awarded to new executive directors on recruitment or on promotion to the board shall be limited to 400% of base salary as set out in the policy above (calculated at the date of grant, excluding any buy-out awards - see below). Remuneration and any buy-out arrangements will be announced as far as possible at the time a new executive director or chairman is appointed, or in the following Directors, remuneration report

When determining the remuneration of a newlyappointed executive director, the Remuneration Committee will apply the following principles

The on-going remuneration package to be designed in accordance with the policy above

- · New executive directors will participate in the annual bonus schieme and Long Term incentive Plan on the same basis as existing executive directors
- The Remuneration Committee has discretion to grant one-officash or share-based awards to executive directors where it determines that such an awaru is necessary to secure the remultiment of that

executive director and where it is in the best interests of the company to do so. Such awards would only be made as compensation for remuneration relinguished under a previous employment (i.e. buy-out arrangements) and would be intended to mirror forfeited awards as far as possible by reflecting the value, nature, time horizons and performance measures attached in such circumstances, the company will disclose a full explanation of the detail and rationale for such one-off awards

- In certain circumstances, it may be necessary to puy out long notice periods of previous employment
- · With regard to internal promotions, any commitments made before promotion and unconnected with the individual's promotion may continue to be honoured even if they would not otherwise be consistent with the policy prevailing when the commitment is fulfilled
- For external and internal appointments, the Remuneration Committee may agree that the company will meet certain relocation expenses (including legal fees), as set out in the porcy
- In determining the approach for all relevant elements the Remuneration Committee will consider a number of factors, including (but not imited to) external market bractice, current arrangements for existing executive directors and other internal relativities

#### Service contracts

Shareholders are entirled to inspect a copy of executive directors' service confracts at the company's head office

Executive directors' service contracts all have the following features

- · Contracts are drafted in line with best practice at the time the executive directors were appointed
- Terminable on 12 months' notice by either party

Specific provisions for Ashley Almanza and Tim Weller's contracts [dated 2013 and 2016 respectively) include

- Messis Almanza and Weller are each allowed to hold one external hon-executive appointment and retain the fees baid to them for such appointments Mr Almanza is a non-executive cirector of Noble Corporation and Mr Weller is a non-executive director of the Carpon Trust.
- Mitigation obligations on termination payments are explicitly included in the executive cirectors. contracts. Notice payments for Ashley Almanza and I'm Weller are pavable monthly

Non-executive directors' letters of appointment

- Appointment is subject to the provisions of the articles of association of the company, as amended from time to time regarding abbointment, retirement, fees, expenses, disqualification and removal of airectors
- All continuing non-executive directors are required to stand for re-election by the shareholders at least once every three years, although they have agreed to supmit themselves for re-election annually in accordance with the LK Comporate Governance Code
- initial period of appointment is two years
- Ail reasonably-incurred expenses will be met
- · Fees are normally reviewed annually

# Loss-of-office payment

The duration of the notice period in the executive directors' contracts is 12 months

The Remuneration Committee would consider the application of mitigation obligations in relation to any termination payments

The contracts do not provide for the payment of a guaranteed bonus in the event of termination

Neither Ashley Almanza nor 1 m Weller will be eligible for ponus accrual during any period of garden leave

in relation to Mr Almanza, the value of the remination payment would cover the balance of any salary and associated penetits payments que to be paid for the remaining notice period, the value of which will be cetermined by the Remuneration Committee

In relation to Mr Weiler, the value of the termination payment would amount to the balance of any salary due to be paid for the remaining notice period multiplied by I 25 to reflect the value of contractual penefits during such period

The Remuneration Committee would also retain the discretion to make appropriate payments necessary to finalise any settlement agreement, out in exercising such discretion the Remuneration Committee would remain mindful to ensure that there was no reward for failure

The rees for outplacement services and reasonable legal tees in connection with advice on a settlement agreement may be met by the company

The table below Illustrates how each component of pay would be calculated under different circumstarices

| Plan  | Automatic "good leaver" categories   | Treatment for "good leavers"  | Treatment for other leavers        |
|---|--|---|------------------------------------|
| Annual bones<br>(cash element)              | , All leavers other than voluntary<br>resignation and summary dismissai  | Executive directors may receive a<br>bonus to be paid on the normal<br>payment date and in accordance<br>with the agreed performance<br>measures but reduced pro-rata<br>to reflect the time employed.                  | Bonus opportunity<br>will lapse    |
| Annual bonus<br>(ceferred share<br>element) | <ul> <li>Injury, disability on II health</li> <li>Redundancy</li> <li>Retirement</li> <li>Death</li> <li>Termination without cause</li> <li>Change of control or sale of employing company or business</li> <li>Any other circumstances</li> </ul> | Deferred shares may be released if the executive director ceases employment prior to the third anniversary as a result of one of the good leaver reasons  | Defemed share<br>awarcs will lapse |
|   | at the discretion of the<br>Remuneration Committee   |   |                                    |
| Long Term<br>Incentive Plan                 | <ul> <li>Injury, disability or II health</li> <li>Redundancy</li> <li>Retirement</li> <li>Death</li> <li>Change of control or sale of employing company or business</li> </ul>   | Awards will rest on the relevant vesting date on a time-apportioned basis, unless the Remuneration Committee determines otherwise, and supject to the achievement of performance measures at the relevant vesting date. | Awards will lapse                  |
|   | Any other circumstances<br>at the discretion of the<br>Remuneration Committee  | The resting date for such awards will normally be the onglial vesting date, unless otherwise determined by the Remuneration Committee   |                                    |

As directors may leave employment for a wide range of reasons, the committee retains discretion to approve payments where the reason for leaving does not fall precisely within the prescribed "good leaver" category

The committee will take account of the directors performance in office and the circumstances of their exit. The committee will seek to balance the interests of shareholders, the departing director and the remaining directors

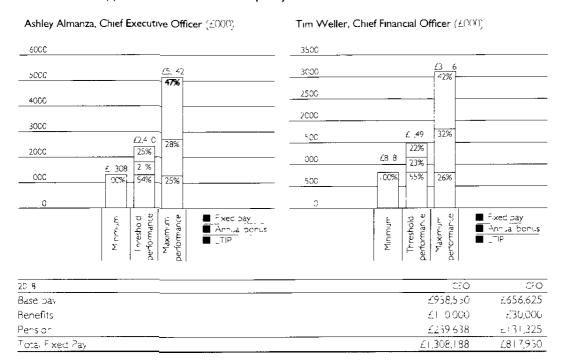

Any awards subject to performance conditions would be assessed at the end of the relevant period and be subject. to time appoint orment

### Corporate Action

If the company is subject to a change in control, the Long Term Incentive Plan provides that awards will yest subject to the performance targets having been satisfied up to the date of the change of control and, unless the committee determines otherwise, time pro-rating

On a variation of share capital, other reorganisation of the company, or a demergen of a substantial part of the Group's business, the committee may make such adjustment to awards as it may determine to be appropriate

# Illustrations of application of remuneration policy

The penefits figures include taxable business expenses and associated tax and NIC payable by the company

The participants above set out the effect of the executive directors' remuneration policy as it will apply in 20-8 and pased on the assumptions set out below

|                           | Minimum                              | nresho d  | Yax mum   |

# Statement of consideration of employment conditions elsewhere in the Group

The structure of the executive directors' pay policy is generally in line with the policy for remuneration of the senion management within the Group, although the levels of award will be different

The performance measures that apply in the variable element of the remuneration will reflect the relevant areas of responsibilities. There may be one-off awards for retaining scarce and chtical individuals below board level Remuneration of employees globally will depend on local regulation and practice, taking any collective bargaining agreements into account, where they exist

| Elements of remuneration |                                   | Availability  |
|--------------------------|-----------------------------------|---|
| Fixec                    | ₽ay                               | Available to all employees worldwide                                      |
|                          | Pensions Pensions                 | Available to most employees in developed markets                          |
| √anable                  | Annual bonus                      | Available to all sen or managers worldwide                                |
|                          | Long term incentive plan          | Available to some senior managers worldwide                               |
| 3enefits                 | Carlor car allowance              | Available to all sen or managers worldwide                                |
|                          | il fe/Income protection insurance | Available to most employees in developed markets                          |
|                          | <sup>3</sup> rvate Healthcare     | Available to all senior managers in markets where it is commonly provided |

Across the Group the company seeks to pay competitivery, taking into account external penchmarking and internal moderation at each level to ensure that remuneration is in line with market practice. When determining base salary increases for executive directors, the Remuneration Committee bays particular attention to the data at senior manager lever

At G4S, the committee does not normally consult directly with employees as part of the process of determining the remuneration policy and pay decisions for executive directors and has not merefore done so in setting this remuneration policy. However, employee surveys are carried out biennially which help determine employees, views of the nown day and penefits, as well as those of colleagues in general

# Statement of consideration of shareholder views

We are committed to on-going engagement on key remuneration issues and seek our major shareholders' views prior to proposing any major change in policy. This provides us with valuable feedback and we take into consideration these views and seek to reflect them in our policy

The chairman of the Remuneration Committee will be available to answer any questions and listen to the views of our shareholders at the forthcoming annual general meeting

Remuneration Committee Chairman

8 March 2018

# Directors' report

This is the report of the directors of the board of G4S. blc for the year ended 31 December 2011

### 3. Dividends

The directors propose the following dividencifor

- Iriterim dividend of 3.59p (DKK 0.2948) per share paid on 13 October 2017
- Final diridenciate 6 1 Ip (DKK 0509") per share payable on 15 lune 2018

Shareholders on the Danish VP register will receive their dividence in Danish kroner Shareholders who hold their snares through CREST or in certificated form will receive their dividends in sterling unless they prefer to receive Danish kroner by way of a relegue payable in the UK, in which case they should apply in viniting to the Registrans by no later tran 3 May 20 8

#### 4. Capital

The issued share capital of G4S pic at 31 December 2017 is as secoution page +82 (note 35 to the consolidated financial statements) and consisted of 1,551,594,436 ordinary shares of 25 bence each. The number of shares in issue as at 8 March 2018 remains unchanged

In general there are no restrictions on the holder's ability to transfer their shares or exercise their voling rights, other than in situations where the company is 'egally entitled to impose such restrictions (usually where amounts remain unpaid on the shares after request, or the holder is otherwise in default of an obligation to the company)

The company is not aware of any agreements between its shareholders that may restrict the transfer of their snares or the exercise of the voting rights attaching to them except in relation to the G4S Employee Benefit Trust ("the Trust") which has been established to facilitate certain employee share plans

Resolutions granting the directors power subject to certain conditions, to allot and make market burchases of the company's shares will be proposed at the company's annual general meeting. At 31 December. 2017 the directors had authority in accordance with a resolution bassed at the company's annual general meeting held on 25 May 2017 to make marke purchases of up to 155,+39,000 of the company's shares

The company does not hold any treasury shares as such Frowever, the 4,362,068 shares held within the Trust and referred to on page 182 (note 36 to the consolidated in ancial statement) are accounted for as treasury shares. The Trust has waived its right to receive dividends in respect of the company's shares which it held during the period under review

#### Significant agreements – change of control

The company sparty to a £1,000,000,000 muitcurrency revolving credit facility agreement which requires prompt notification of a change of control event following which funds committed but unutilised could be cancelled and repayment of outstanding funds utilised would need to be made within 45 days

The company entered into two US Private Placement Note Purchase Agreements (the "USPP Agreements"), on I March 2007 and 15 July 2008 respectively. The first USPP Agreement is for \$550,000,000 and series C-D senior notes representing \$250,000,000 remain outstanding and mature between 1 March 20-9 and March 2022. The second USPP Agreement is for \$513,500,000 and £69,000,000 and series LD-Hisenion notes representing \$298,500,000 and £44,000,000 remain outstanding and mature between 15 July 2018 and 15 July 2020, Under the terms of both USPP Agreements, the company is required to offer the note holders the right to purchase the notes at par value together with interest thereon upon a change of non-roll

Under the terms of the £2,500,000,000 Euro Medium ferm Note Programme the company issued four tranches of Medium Term Notes (MTNs), issued to /arrous institutions on 3 May 2009 (£350,000,000), 6 December 2012 (€500,000,000), 9 November 2016 (€500,000,000) and 2 June 2017 (€500,000,000). In the event of a charge of control, a but option comes into force, according to which holders of any MTN may require the company to redeem the MTNs at parlifthe MTNs carry a sub-investment grade credit rating in the behas immediately prior to the change of control, or in certain dircumstances where the MTNs are downgraded to sub-investment as a result of the change of control

The Group's UK pension scheme trust deed contains provisions which apply if a takeover event occurs following such an event, the appointment and removal of trustees becomes subject to unarimous trustee agreement and the trustees acquire the unitateral power to set the employer contribution rates in certain sections of the scheme

#### 6. Post balance sheet events

There have been no significant events from 31 December 2017 to the date of this report

#### 7. Research and development expenditure

Research in connection with the development of new services and products and the improvement of those currently provided by the Group is carried out. continuously. Research and development written-off to profit and loss during the year amounted to £4m (20 6 £4m)

#### 8. Employees

Asking for listening to and acting on the feedback from our people enables us to address their concerns and capture their deas for improvements. They are closest to our operations and to the needs of our customers in a constantly changing marketplace. We value the feedback from our biennial global and management surveys and take time in between to address the issues raised. The high response rate helps identify underlying problems and provides a strong mandate for action. In addition to the surveys we encourage dialogue with our employees directly and also seek feedback from our networks with union representatives at a global, European and local level. These networks provide early warning signs of any issues and are an additional avenue for communication and for sharing updates on business performance. More information on employee communication and consultation can be found on bages 16 and 1

Our managers are invited to participate in webinars which coincide with announcements of our financial results and are encouraged to cascade the information snared with their teams in 2017, we also introduced new on-line newsietters for our senior managers nontaining information on contract wins, projects and market developments. The newsletters showcase examples of security innovations and help businesses. struggling with similar challenges to become early adopters building on new ideas rather than recreating them

We do not employ forced, banded an child labour We appoint people pased on their skills and capabilities and not any personal characteristics which are discriminatory on illegal in the countries in which we work Our am is to develop and grow so removing barners to employment helps us ensure we rap into the widest talent pool and are able to harness all the skills and abilities beoble have If, during the course of their employment individuais become disabled and unable to meet the job requirements we seek to retrain or retain their talents by making reasonable adjustments wherever possible Further information on our approach to diversity and inclusion can be found on page 16

#### 9. Political donations

Fach year the company's shareholders have passed a resolution on a precautionary basis to allow the company and its subsidiaries to make political conations or incur political expenditure not exceeding £50,000 However the board confirms that the Group's policy is not to make any financial contribution to political parties and that the company and its subsidiaries have made no contributions during the year to political parties carrying on activities, on to candidates seeking election within the EU or anywhere else in the world

# Greenhouse gas emissions

Alongs de the risks raced by people and infrastructure from rimate thange are the challenges presented by global economic conditions

Managing fuel costs and the impact of "carbon taxes" through programmes to improve the Croup's energy efficiency and reduce its environmental impacts are mportant to the continued effectiveness and sustainability of the Group's our ness

We follow WBCSD\* and WRI\*\* Greenhouse Gas Protocol to measure our Scope I and 2 emissions vehicle fleet, fuel, refrigerants and electricity usage for G4S businesses over which the Group has financial and operational control in addition the Group has measured Scope 3 emissions from employee business air travel

The businesses that reported data in the 2017 GHG measurement represent 90% of the Group's operations, across a 12 month period. This level of measurement. including each of the Group's main sen, ce types, allows reliable calculation of the total GHG emissions for 100% of the Group

The C4S total ramon footpoint during 2017, extrapolated to 100% of the business equates to some 301,467 t/COje These COje emissions, including emissions generated by senfices which our customers have outsourced to G4S, have decreased by 25% since 2016 against a 3.2% revenue growth in our core businesses during the same behod, reflecting the efforts made to increase the energy efficiency of our business

In 2018, we will continue to implement energy efficiency strategies with the aim of reducing carbon intensity by at least 3 5% per annum

World Business Colinci for Sustainable Development \*\* Vional Resources Institute

#### 12. Auditor

A resolution to re-appoint PricewaterhouseCoopers LLP, chartered accountants as auditor to the company for 2018, and for their remuneration to be fixed by the Audit Committee, will be submitted to the annual general meeting

#### 13. Directors

The directors prographical details of whom are contained on pages 68 and 69, held office throughout. the year apart from lan Springett who retired from the board on 20 June 2017 and John Ramsay, who was appointed to the board on 1 January 2018

in accordance with the code provisions on re-election of directors in the UK Corporate Governance Code, each of the directors continuing in office will offer themselves for re-election. The board believes that the directors standing for re-election possess experience. and expertise relevant to the company's operations, that they continue to be effective, that they are committed to the success of the company, and that they should be re-elected (or elected) at the annual general meeting

The contracts of service of the executive directors have no unexpired fermisince they are not for a fixed termi They are terminable at 12 months' notice. None of the non-executive girectors has a contract of sentice

The company has executed deeds of indemnity for the penefit of each of the directors in respect of labilities. which may attach to them in their capacity as directors of the company. These deeds are qualifying third-party indemnity provisions as defined by section 234 of the Companies Act 2006 and have been in effect single 14 June 2010 for Ms Spott swoode, Il October 2010 for Ms Fox, 8 june 20, 2 for Mr Corrolly, I anuary 2013

for Mr Spence, I April 2013 for Mr. Aleller, May 2013 for Mr Almanza, 5 june 2015 for Mr Daly 27 May 2016 for Mr Mogford, I July 2016 for Ms Indralfsson Lianuary 2017 for Mr Springett and Lifanuary 2018 for Mr Ramsay Copies of the forms of incemnity are available on the company's website. In addition, indemnifies have been granted by the company in favour of certain of the directors of some of the Group's subsidianes in the USA. Greece, Incia, the UAE and the Philippines. Fre company has maintained a cirectors' and officers liability insurance policy throughout the year under review

Details of directors' interests (including the interests of their connected persons) in the share capital of C4S pic are set out on page (O) and the directors' remuneration s set out on page 96

The directors who held office at the date of approval of this Directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the company's auditor is unaware, and each cirector has taken all the steps that he on she ought to have taken as a director to make himself or nerself aware of any relevant audit information, and to establish that the company's aucitor is aware of that information

None of the directors had a material interest in any contract significant to the business of the Group during the financial year

By priger of the board

# Celine Barroche

Company Secretary

# Directors' responsibilities

# Statement of directors' responsibilities in respect of the annual report and the financial statements

The directors are responsible for preparing the annual report and the Group and parent company financial statements in accordance with applicable law and regulations

Company law requires the directors to prepare group and parent company financial statements for each financial year. Under that law they are required to prepare the group financial statements in accordance with IFRSs as adopted by the EU and applicable law and have elected to prepare the parent company financial statements in accordance with UK Accounting Standards

Under company law the directors must not approve the Snand all statements unless they are satisfied that they give a true and fairly ew of the state of affairs of the Group and parent company and of their profit or loss for that period in preparing each of the group and parent company financial statements, the directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgments and estimates that are reasonable and prudent,
- for the group financial statements, state whether they have been prepared in accordance with IFRSs as adopted by the EU,
- · for the parent company financial statements, state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the parent company financial statements, and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Group and the parent company will continue in business

The directors are responsible for keeping adequate accounting records that are sufficient to snow and explain the parent company's transactions and disclose with reasonable accuracy at any time the financial position of the parent company and enable them to ensure that its financial statements comply with the Companies Act 2006. They have general responsibility. for taking such steps as are reasonably open to them to safeguard the assets of the Croup and to prevent and detect fraudiand other irregulanties

Under applicable law and regulations, the directors are also responsible for preparing a strategic report, Directors' report, Directors' remuneration report and Corporate governance statement that comply with that law and those regulations

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website. Legislation in the UK governing the preparation and dissemination of financia: statements may differ from legislation in other jurisdictions

# Directors' responsibility statement

Each of the directors, the riames of whom are set out on pages 68 and 69 of this integrated Report and Accounts confirm that to the pest of his or her knowledge

- the financial statements in this integrated Report and Accounts have been prepared in accordance with the applicable accounting standards and give a true and fair view of the assets, liabilities, financial position and results of the company and the Group, and
- the management report required by DTR4 I 8R (contained in the strategic report and the Directors' report) includes a fair review of the development and performance of the business and the position of the company and the Group taken as a whole, together with a description of the principal risks and uncertainties they face

The strategic report from the inside front cover to page 65 includes information on the Group structure, the performance of the business and the principal risks and uncertainties it faces. The financial statements on pages 132 to 210 include information on the Group and the company's financial results, financial outlook, cash flow and net debt and balance sheet positions. Notes 22, 26, 27, 30 and 31 to the consolidated francial statements natude information on the Group's investments cash and cash equivalents, borrowings, derivatives, financial risk management objectives, hedging policies and exposure to interest, foreign exchange, credit liquidity and market risks

Pages 132 to 201 contain information on the performance of the Group, its financial position, rash flows, net debt position and porrowing facilities i further information, including financial risk management policies, exposures to market and credit risk and nedging activities, is given in note 31 to the financial statements After making enquines, the directors have a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. For this reason the directors consider if appropriate to adopt the going concern basis in preparing the financial statements

Directors are also required to provide a broader assessment of viability over a longer benod, which can be found on page 92 of the Integrated Report and Accounts

The directors consider that the Integrated Report and Accounts, taken as a whole, is fair, balanced ann understandable and provides the information necessary for shareholders to assess the company's performance and position, business model and strategy

The statement of directors' responsibilities and the strategic report are approved by a duly authorised committee of the board of directors on 8 March 2018 and signed on its behalf by Tm. Weller, Chief Financial Officer

# REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

#### Opinion

in our opinion

- · G4S pic's Group financial statements and parent company financial statements (the 'financial statements ) give a frue and fair view of the stare of the Group's and of the parent company's affairs at 31 December 2017 and of the Group's profit and cash flows for the year then ended.
- · the Group financial statements have been properly prepared in accordance with International Financial Reporting Standard ("IFPSs") as adopted by the European Union,
- the parent company financial statements have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice United Kingdom Accounting Standards, comprising FRS 101 "Reduced Disclosure Framework" and applicable law), and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006 and as regards the Group financial statements. Article 4 of the iAS Regulation

Me have audited the financial statements, included within the Integrated Report and Accounts (the Annual Report"), which comprise

- the consolidated statement of financial position at 3. December 2017,
- the parent company statement of financial position at 31 December 2017.
- the consolidated income statement for the year then ended,
- · the consolidated statement of comprehensive ncome for the year then ended,
- · the consolidated statement of cash flows for the year then ended,
- · the consolicated statement of changes in equity for the year then ended
- · the parent company statement of changes in equity for the year then ended, and
- · the notes to the financial statements, which include a description of the significant accounting policies

Our opinion is consistent with our reporting to the Audit Committee

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the auditors, responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a pasis for our opinion

#### Independence

We remained independent of the Group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which riciudes the FPC's Ethical Standard, as applicable to listed public interest entities and we have fulfilled our other ethical responsibilities in accordance with these

To the best of our knowledge and belief we deciare that non-audit services profibited by the FRC's Ethical Standard were not provided to the Group or to fine parent company

Other than those disclosed in note +0 to the linancial statements, we have provided no non-audit services to the Group or to the parent company in the period from Tjanuary 2017 to 3 December 2017

#### Our audit approach

#### Context

G4S is an integrated security company specialising in the provision of security and related services to customers n around 90 countries, which in 2017 was organised nto seven geographical regions

#### Overview

# Materiality

- Overall Group materiality £20m (2016 £15m). which represents approximately 5% of adjusted profit before tax, being profit before tax after adding back certain items that are separately reported on the face of the consolidated income statement including specific items, restructuring costs and profit on disposal
- Overall parent company materiality £15m (2016) £13 pm), which represents approximately 1% of net asse's

### Audit scope

- Our audit included full scope audits of the Group's seven geographical regions. The regional audits were supported by full scope audits at 73 country components with specified audit procedures performed at a further 16 country components
- Taken together the components at which either full scape audit work or specified audit procedures were performed accounted for 75% of consolidated revenue, 78% of consolidated profit before lax and 73% of consolidated adjusted profit before tax

#### Areas of focus

- · Onerous contract provisioning
- · Goodwill mpairment
- · Uncertain tax positions and deferred tax assets
- · Compliance with payroll laws and regulations
- · Income statement presentation
- Control environment

#### The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the cirectors made subjective judgments, for example in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. We gained an understanding of the legal and regulatory framework applicable to the Group and to the industry in which it operates and considered the risk of acts by the Group which were contrary to applicable aws and regulations including fraud. We designed audit procedures at the Group and component levels to respond to this risk, recognising that the risk of not detecting a material misstatement due to fraucilis higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example forgery or intentional misrepresentations on through collusion

We designed audit procedures that focused on the risk of non-compliance related to, but not limited to, compliance with payroil, foreign ownership and tax laws and regulations. Our tests included, but were not limited. to, the review of the financial statement disclosures to underlying supporting documentation, review of correspondence with legal advisors, enquiries of management, review of significant component auditors' work and review of Internal Audit reports in so far as they related to the financial statements. There are inherent limitations in the audit procedures described above and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it. We found payroll compliance and tax to be key audit matters and these are discussed further below

As in all of our aucits, we also addressed the risk of management override of internal controls including evaluating whether there was evidence of bias by management that represented a risk of material miss atement due to fraud and the risk of fraudin rovenue recognition. Procedures designed to address these risks included lesting of material, ournal entries and post-close adjustments, testing and evaluating management's key accounting estimates for reasonableness and consistency, undertaking cut-off procedures to check proper cut-off of revenue and testing the occurrence and accuracy of revenue transactions. In addition, we incorporate an element of unbredictability into our audit work each year

#### Key audit matters

Key audit matters are those matters that, in the auditors' professional judgment, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) dentified by the auditors, including those which had the greatest effect on the overall audit strategy the allocation of resources in the audit, and directing the efforts of the engagement feam. We have also set out how we tailored our audit to address these specific areas in order to provide an opinion on the financial statements as a whole. These matters, and ank comments we make on the results of our procedures. thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereori, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit

# Independent auditors' report to the members of G4S plc continued

Key audit matter

How our audit addressed the key audit matter

#### Onerous contract provisioning

Refer to Audit Committee report on page 85 and to note 33 of the Group financial statements

Certain of the Group's contracts are onerous. and long-term in nature. These contracts can be complex and incorporate penalty and key performance indicator ("KPI") clauses in the event of non-compliance. The Group's therefore required to make operational and financial assumptions to estimate future losses. over periods that can extend beyond 20 years.

Variability of contract benalties, underlying delivery costs and customer and subcontractor claims or displites can put additional pressure on margins and on future contract profitability. giving rise to onerous contract provisions

The prediction of future events over extended periods contains inherent risk and the outcome. of customer and sub-contractor claims is uncertain and involves a high degree of management juggment

The Group's operous contract provisions at 31 December 2017 are £62m (2016 ±69m) and the income statement charge for onerous contracts in 2017 amounts to £19m (2016, £6m). Our global approach to testing complex contracts starts with an evaluation of management's process to identify and quantify phenous and at-risk contracts Management focuses on the top 25 contracts by region and on contracts with margins of less than 3%. We performed scanning analytics on contract margins and investigated unusual or unexpected trends to check inclusion of all relevant contracts in management's assessment. Our sampling of contracts focused our testing on higher risk and larger contracts and enabled us to form an independent view as to whether management's processing identified all onerous and at-risk contracts

For each contract in our sample, we obtained and read the key contractual ferms and tested that the revenue recognised in the Deriod was in accordance with the contractual terms and was supported by evidence of service delivery We read and understood the contract penalty clauses and evaluated the completeness of behalties through discussions with contract managers and reading minutes of meetings between G4S and the customer, and customer correspondence

We assessed each of the key assumptions used in management's forecasts to dentify and quantify onerous contract provisions, where possible, we obtained third party evidence to componate managements assumptions and assessed the appropriateness of the Group's forecasts based on past performance. The Group's policy is to include the benefits of performance improvement plans only where there is evidence of plans being ach evable. We chacally challenged these penefits based on observable benefits achieved to date and the extent to which these plans are within the Group's direct control

We assessed the appropriateness of the discount rate used to present value the obligation and checked that the rate appropriately reflected the risk in the underlying cash flows. We also assessed the recoverability of dedicated contract assets where the contract was identified as onerous

Having examined management's analysis, including accounting papers prepared to support key contract judgments and onerous contract provisions, our procedures focused on the Facilities Management and Care & Justice businesses nithe UK and specifically on the Compass contract and on a legacy PFI contract. which is long-term in nature. Both contracts are sensitive to changes in assumptions and have given rise to crianges in provisioning levels at year-end

For these contracts, we performed our own independent sensitivity analysis and we have undertaken additional analysis on key assumptions to which management's provisioning adgments are more sensitive

We also held discussions with in-house and external legal coursel and read appropriate documentation to evaluate contractual claims and disputes with customers and subcontractors. We obtained and evaluated evidence to support decisions and rationale for provisions held or the decision not to record provisions, including correspondence with external legal counsel. We also considered external information sources to assess and evaluate the atternate

We considered the level of provisioning to be acceptable in the context of the Group financial statements taken as a whole However, we noted that the assumptions and judgments that are required to formulate the provisions mean that the range of possible outcomes is broad. We are satisfied with the Group's related disclosures of these onerous contracts in light of the underlying assumptions and accounting judgments made

#### Key audit matter

#### How our audit addressed the key audit matter

#### Goodwill impairment

Refer to Audit Committee report on page 85 and to note 18 of the Group financial statements

The Croupings £19ph of goodwill at 31 December 2017 (2016 £2 0pm) No imparment charge has been recorded r 2017 (2016 £9m)

Management determines the recoverable amount of a cash generating unit ("CGU") as the higher of value in use ("VIU"), or fair value less cost of disposal ("FVLCD")

The carrying value of goodwill is contingent on future cash flows and there is risk if these cash flows do not meet the Group's expectations that the assets will be impaired. The impairment reviews performed by the Group contain a number of significant adgments and estimates including revenue growth, profit margins, cash conversion and long-term growth and discount rates. Changes in these assumptions can have a significant impaction the headroom available in the impairment calculations

We assessed the mathematical accuracy of management's cash flow model and agreed the underlying forecasts to board approved budgets and assessed how these budgets were compiled

With the support of our valuations experts, we assessed the terminal growth. rates and discount rates applied by management to third party information and confirmed whether they fell within a reasonable range of external market data. Where they did not, we applied our independent few of a more appropriate rate to management's forecast

We considered the reliability of management's forecasting for revenue, profit and cash conversion by comparing budgeted results to actual performance over a period of three years, which we considered appropriate. Where we identified significant chortfalls against budget in prior years, this in ormed our determination of sensitivities to apply as we formed our independent view aboul reasonable downside scenarios

Where the recoverable amount has been assessed with reference to a valuation multiple, we assessed the appropriateness of the multiple by companson to recent pusiness disposals and to other third party information, with the support of our valuations experts

We challenged management as to the appropriateness of the level of aggregation of pact CGU and the independence of cash flows from other assets

We performed our own risk assessment by considering historical performance, forecasting accuracy and modelled headroom to highlight the CGUs with either a lower neadroom or which are more sensitive to changes in key assumptions. We also considered the valuation multiple implied by management's estimate. For those CGUs with low headroom, we performed our own sensitivity analysis to understand the impact of changes in the assumptions on the available headroom. We critically assessed management's forecast by comparing growth forecast to actual growth to date and to IMF projections

The recoverable amounts of a number of CGUs including Brazil Secure Solutions, Risk Management and UK Cash Solutions were found to be sensitive to reasonably possible changes in assumptions and we satisfied ourselves that trisirisk was appropriately highlighted in the disclosures in note 18

As a result of our work, we determined that it was appropriate that no mpairment charge was recognised in the context of the Group financial statements taken as a whole and that adequate disclosure has been made

# Independent auditors' report to the members of G4S plc continued

Key audit matter

How our audit addressed the key audit matter

#### Uncertain tax positions and deferred tax assets

Refer to Audit Committee report on page 85. and to notes 13 and 34 of the Group financial statements

The Group operates in a complex multipational tax environment and is subject to a range of tax risks during the normal course of business including transaction related tax matters and fransier oncing arrangements

Where the amount of tax payable is uncertain, the Group establishes provisions based on management's judgment of the probable amount of the future liability At 31 December 20-7, the Group has recognised provisions. of £42m related to uncertain tax positions. (20.6 £37m)

In addition, the Group has recognised £240m of deferred tax assets at 31 December 2017 (2016 £285m) The recognition of deferred tax assets involves judgment by management regarding the likelihood of the real sation of these assets. The expectation that these assets will be realised is dependent on a number of factors including whether there will be sufficien taxable profits in future periods to support jut I sation of these assets

There have been a number of changes in tax. law in 20-7, especially in the US that have resulted in a significant impaction the Group's deferred tax balances. The most sign ficant. change has been the US Tax Cuts and Jobs Activer on was substantively enacted before 31 December 2017. The Group has needed to consider the impact of this new tax law on both ts current and deferred taxes. Certain of the changes introduced by the Act are complex and there are number of areas of uncertainty relating to both the manner in which the law will apply and to the accounting in certain areas

With the assistance of our local and international tax specialists, we evaluated and challenged management's judgments in respect of estimates or tax exposures and contingencies in order to assess the adequacy of the Group's tax provisions

in understanding and evaluating management's judgments, we considered the status of recent and current tax authority audits and enquiries judgmental positions taken in tax returns and current year estimates and developments in the tax environment. Where appropriate, we also read appropriate documentation to understand the regal positions reached. From the evidence obtained, we considered the level of provisioning to be acceptable in the context of the Group financial statements taken as a imple. However, we noted that the assumptions and judgments that are required to formulate the provisions mean that there is a broad range of possible outcomes

In respect of the recoverability of deferred tax assets, we evaluated management's assessment of how these assets will be real sed and whether there will be sufficient taxable profits in future periods to support their recognition. We evaluated the directors' future cash flow forecasts and the process by which they were prepared, ensuring consistency of cash flows with those used for the purpose of goodwill impairment testing. Based on our procedures, future cash tiow forecasts supported the recoverability of the deferred tax assets recognised

We have reviewed the Group's impact assessment as a result of US tax reform, deploying our US tax specialists. We have discussed with management the key udgments made in evaluating how the legislation applies to the Group and compared these judgments with our independent expectations pased on our knowledge of the Group's tax affairs. We have also venfied the mathematical accuracy of the deferred tax re-measurement calculations. We are satisfied that the Group has appropriately accounted for the impact of US tax reform in the context of the Group financial statements taken as a whole

#### Key audit matter

#### How our audit addressed the key audit matter

# Compliance with payroll laws and regulations

Refer to Audit Committee report on page 85 and to note 33 of the Group financial statements

The Group employs over 570,000 employees across six continents. There are a number of ongoing employee and regulatory claims in relation to the interpretation and potential risks relative to the application of local payroll laws and regulations in a number of countries

Interpreting and complying with payroll laws and regulations is complex. There is inherent udgment associated both with assessing and quantifying probable outcomes in relation to ongoing claims and with determining any exposure (and the need for provision) in areas where legal requirements are open to interpretation. In addition, possible outcomes need to be considered for disclosure as contingent liabilities. Unexpected adverse outcomes could materially impact the Group's financial performance and position

We met with the directors, management and in-house legal counsel and held discussions with the Group's external legal advisors to assess the probable outcomes in relation to ongoing claims and exposures in countries and areas. where legal recuirements are open to interpretation

We evaluated and challenged management's judgments in order to assess the adequacy of the Group's provisions and disclosures in understanding and evaluating management's judgments, we considered the status and basis of employee and regulatory claims, settlement ristory and the views of internal and external legal counsel regarding the interpretation and application of local payroil laws and regulations. Where appropriate, we also read relevant documentation and correspondence to understand the legal positions reached.

From the evidence obtained, we are satisfied with the Group's provisioning decisions at 31 December 2017 in the context of the Group financial statements taken as a whole and with the adequacy of the contingent liability. disclosures given the status, material ty and likely outcome of employee and regulatory claims and exposures in countries and areas where legal requirements are open to interpretation

#### Income statement presentation

Refer to Audit Committee report on page 85 and to note 3(b) of the Group financial statements

The Croup has historically reported specific and other items (including restructuring costs) which are discloser separately on the face of the ncome statement and which are excluded from management's reporting of the underlying results of the business. Consistent with the Croup's definition of profit before interest, tax and amortisation ("Adjusted PBITA"), the following items have continued to be disclosed separately on the face of the income statement. in 2017 net specific items £34m (2016 £13m). restructuring costs £20m (2016 £12m), and net profit on disposal and closure of subsidiaries £74m (2016 £7m)

The treatment of specific and other separately disclosed tems is explained in the Group accounting policy in note 3(b). We focused on this area because the classification of tems as specific or separate disclosure of items of income or expenditure on the face of the ncome statement requires judgment and because certain of these items are excluded from the calculation of elements of executive remuneration in line with the Group's remuneration policy. Consistency in the dentification and presentation of these items is important to ensure comparability of year-onyear reporting in the Annual Report

We substantiated the nature and quantum of individual items to appropriate componenting evidence

We considered whether the designation of individual items as specific was consistent with the Group's accounting policy and treatment in phonyears Furthermore, we considered whether amounts included as specific items related to current year trading and might be more appropriately reflected in the  $% \left( 1\right) =\left( 1\right) ^{2}$ underlying results

We considered whether the Group has taken a balanced approach to this area. checking that exceptional one-off tems of income are treated consistently with one-off tems of cost

We tested management's process for centifying and tracking the current year reversal of any prior year specific items, or utilisation of or adjustment to related provisions, to identify whether these have been appropriately presented in the current year income statement

Based on our procedures, we were satisfied that the freatment and classification of these items were consistent year-on-year and with the Group's policies

# Independent auditors' report to the members of G4S plc continued

Key audit matter

How our audit addressed the key audit matter

#### Control environment

The geographical span and decentral secstructure of the Group, soupled with the current disparate systems landscape and evolving control environment, means that there s an increased risk of errors remaining undetected and aggregating to cause a material misstatement to the Group financial statements Progress has been made by the Group in 2017 to strengthen the controls framework through the embedding of the Minimum Financial Controls ("MFC") framework. However, as the tramework is still in its early stages, the operation and formalisation of these controls is at different levels of maturity across the organisation

In recognition of the Group's scale and decentral sed structure and aligning to the Group's regional management structure, we continued to deploy feams in each of the Group's regions to lead our interactions with regional management, to coordinate the audit work performed at a country component level and to audit and report on the aggregated financial information of that region

Given that the operation and formalisation of MFC controls are at different levels of maturity across the organisation, we did not seek to test or rely on these controls for our 2017 audit. We therefore instructed our component teams not to rely on financial controls at the local pusiness level but to perform a substantive audit focused on transaction testing and on the integrity of the year-end balance sheet

With the support of our regional teams, we determined the entires to be included in our Group audit scope based on those locations with significant risk and those which contribute a significant amount to material line items in the Group financial statements

We applied a reduction to our overall materiality to set a performance material ty penchmark that we used to determine the nature, timing and extent of our detailed audit procedures. Our performance materiality benchmark for the Group audit of £12.5m reflects the Croup's evolving control environment, the risk of multiple misstatements resulting in a material misstatement and the history of past audit adjustments

Whereven well dentified audit adjustments or control matters which could be pervasive across the Group, we instructed our regional and country component teams to assess whether similar errors had arisen discwhere "While we did dentify audit differences across the Group, management corrected the more sign ficant items meaning that the uncorrected items reported to the Audit Committee were considered to be immaterial for adjustment, both individually and in aggregate

#### How we tailored the audit scope

We failured the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Group and the parent company, the accounting pro-lesses and controls and the industry in which they operate

In 20-7, the Group was structured into seven geographical regions being Africal Asia Pacific, Europe Latir, America, Middle East & India North America and the UK & ireland ("UK&I"). Corporate head office entities are managed at a Group level. Each geographical region. ("regional component") is an aggregation of a number of country-based components along with the Group's interests in joint ventures (together the 'country components') Fach geographical region has a separate management team which coordinates the businesses with a that region

The Group's accounting processes are structured around a local finance function in each of the country components. In addition, finance shared service centres in the UK, North America and India support certain of the Group's businesses. The country components report to the regions and to the Group through an integrated consolication system

In performing our audit, we determined that we needed to conduct audit work over the complete financial information of each of the regional components. We therefore deployed regional component audit teams in each of the seven regions to read our interactions with regional management, to coordinate the audit work performed on country components and to audit and report on the aggregated financial information of that region. In addition to the seven regional components, specific audit procedures over central functions, the Group consolidation, head office entities and areas of judgment finduding taxation, goodwill and intangible assets impairment itreasury and post-refirement benefits) were directly led by the Group audit feam

Recognising that not every country component in each regional component is included in our Group audit scope, we considered as part of our Group and troversight responsibility what audit coverage had been obtained in aggregate by our regional component teams by reference to country components at which audit work had been undertaken. Beneath the regional component layer, the Group financial statements are an aggregation of approximately 100 reporting units, each of which is considered to be a country component. We identified 73 country component units that, in our view, required a full scope audit due to the haize on hisk characteristics. Specific audit procedures over significant balances and transactions were performed at a further 16 country component units to give appropriate coverage of all material balances

where the work was performed by regional and country component audit teams, we determined the level of inholivement we needed to have in the audit work at those components. As a result, six of the seven regions were visited by senior members of the Group audit fearn as a supplement to the regular dialogue between our Group and regional fearns and the issuance of instructions to direct their work. Regional teams visited a further 10 country components performing oversight procedures under our instruction. For those components in Group audit scope where a site visit was not undertaken, our Group and our regional component audit teams involvement included regular dialogue with our country component teams, review of component auditor work papers and participation. in certain component audit clearance meetings for the more significant country components

Taken together, the components and functions where we performed either full scope audit work or specified audit procedures accounted for 76% of consolidated revenue, T8% of consolidated profit before tax and 73% of consolidated anjusted profit before tax This was before considering the contribution to our audit evidence from performing audit work at the regional and Group levels, including disaggregated analytical review procedures and our evaluation of entity level controls, which covered a significant portion of the Group's smaller and lower risk components that were not rirectly included in our Group audit scope

#### Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together withigualitative considerations, helped us to determine the stope of our audit and the nature, timing and extent of nur audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole

Based on our professional judgment, we determined materiality for the financial statements as a whole as follows:

# Independent auditors' report to the members of G4S plc continued

|                                    | Group financial statements   | Parent company financial statements   |  |  |
|------------------------------------|--|---|--|--|
| Overall materiality                | £20m (2016 £15m)   | £15m (2016 £135m)   |  |  |
| How we determined it               | 5% of adjusted profit before tax, being profit before tax after adding back nertain items that are separately reported on the face of the consolidated income statement including specific items, restructuring costs and profit on disposal   | 1% of net assets  |  |  |
| Rationale for<br>benchmark applied | The Group's principal measure of earnings is profit before interest, tax and amortisation adjusted for a number of items of income and expenditure ("Adjusted PBITA") Management uses this measure as it believes that it reflects the underlying performance of the Group. We took this measure into account in determining our materiality, except that wield dinoit adjust profit before tax to add back amortisation of acquisition-related intangible assets and finance income and expense as in our view these are recurring terms which do not introduce volatility to the Group's earnings. | The parent company holds the Group's investments and performs treasury functions on behalf of the Group. Therefore, the entity is not in itself profit-onented. The strength of the palance sheet is the key measure of financial health that is important to shareholders since the unmany concern for the parent company is the payment of dividencs and servicing of dept. |  |  |

For each component in the scope of our Group audit, we allocated a materiality that is less than our overall Group auch materiality. The range of overall materiality allocated to each regional component was between £5m and £15m and by each region to each country component was between £0.01m and £14m. Certain components were audited to a local statutory audit material ty level that was also less than our overall Group audit material ty

We agreed with the Audit Committee that ive would report to their misstatements, dentified during our audit above £1 m (Group audit) (2016 £1 m) and £750,000 (parent company audit) (2016 £6 to,000) as well as misstatements below those amounts that, in our view warranted reporting for qualitative reasons

#### Going concern

In accordance with iSAs (UK), we report as follows:

| Reporting obligation   | Outcome                                |
|--|--|
| We are required to report if we have anything material to add or draw        | 'We have nothing material to acc       |

| approval of the financial statements   |  |
| We are required to report if the directors' statement relating to Going      | We have nothing to report              |
| Concem in accordance with Listing Rule 9.8 6R(3) is materially               |  |
| nconsistent with our knowledge obtained in the audit                         |  |

# Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon

In correction with our audit of the financial statements, our responsibility is to read the other information and in doing so, consider whether the other information is materially inconsisterit with the financial statements or our knowledge obtained in the audit, on otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstalement of the financial statements on a material misstatement of the other information. If based or the work we have performed, we conflude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities

With respect to the Strategic Report, Directors' Report and Corporate Governance Statement, we also considered whether the disclosures required by the UK Companies Act 2006 have been included

Based on the responsibilities described above and our work undertaken in the course of the audit, the Companies Act 2006, (CA06), ISAs (UK) and the Listing Rules of the Financial Conduct Authority (ECA) require us also to report certain opin or sland matters as described helovi (required by ISAs (UK) unless otherwise states);

#### Strategic Report and Directors' Report

in our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic Report and Directors' Report for the year ended 3. December 2017 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements (CA06)

In light of the knowledge and understanding of the Croup and parent company and the nervironment obtained in the course of the audit, we did not identify any material misstatements in the Strategic Report and Directors' Report (CA06)

#### Corporate Governance Statement

In our opinion, pased on the work undertaken in the course of the audit, the information given in the Corporate Governance Statement (in the corporate governance report) about internal controls and risk management systems in relation to financial reporting processes and about share capital structures in compliance with rules 725 and 726 or the Disclosure Guidance and il ransparency Rules sourcebook of the FCA ("DTR") is consistent with the financial statements and has been prepared in accordance with applicable legal requirements (CAO6)

nlight of the knowledge and understanding of the Croup and parent company and their environment obtained in the course of the audit, we did not identify any material misstatements in this information (CA06)

In our opinion, based on the work undertaken in the course of the audit, the information given in the Corporate Governance Statement (in the corporate governance report) with respect to the parent company's corporate governance code and practices and about its administrative imanagement and supervisory bodies and their committees compiles with rules 722, 723 and 727 of the DIR (CAC6)

We have nothing to report arising from our responsibility to report if a corporate governance statement has not been prepared by the parent company (CA06)

# The directors' assessment of the prospects of the Group and of the principal risks that would threaten the solvency or liquidity of the Group

We have nothing material to add or draw attention to regarding

- . The directors' confirmation on page 91 of the Annual Report that they have carried out a robust assessment of the principal risks facing the Group, including those that would threaten its business model, future performance, solvency or riguidity,
- . The disclosures in the Annual Report that describe those risks and explain how they are being managed or mitigated, and
- . The directors' explanation on page 92 of the Annual Report as to how they have assessed the prospects of the Group, over what period they have done so and why they consider that period to be appropriate and their stallement as to whether they have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fall due over the period of their assessment, including any related disclosures drawing attention to any necessary qualifications or assumptions

We have nothing to report having performed a review of the directors' statement that they have carried out a ropust assessment of the principal risks facing the Group and statement in relation to the longer-term viability of the Group Our review was substantially less in scope than an audit and only consisted of making inquines and considering the directors' process supporting their statements, checking that the statements are in alignment with the relevant provisions of the UK Corporate Governance Code (the "Code"), and considering whether the statements are consistent with the knowledge and understanding of the Group and parent company and their environment obtained in the course of the audit (Listing Rules)

#### Other Code Provisions

We have nothing to report in respect of our responsibility to report when

- The statement given by the directors, on page 119, that they consider the Annual Report taken as a whole to be fair balanced and understandable and provides the information necessary for the members to assess the Group's and parent company's position and performance, business model and strategy is materially inconsistent with our knowledge of the Group and parent company obtained in the course of performing our audit,
- The settion of the Annual Report on page 85 describing the work of the Audit Committee does not appropriately address matters communicated by us to the Audit Committee, and
- . The cirectors' statement relating to the parent company's compliance with the Code does not properly disclose a departure from a relevant provision of the Code specified, under the Listing Rules for review by the auditors

# Directors' Remuneration

th our opinior, the part of the Directors' Remuneration Report to be audited has been properly prepared in accordance with the Companies Act 2006 (CA06)

# Independent auditors' report to the members of G4S plc continued

# Responsibilities for the financial statements and the audit

#### Responsibilities of the directors for the financial statements

As explained more fully in the directors irresponsibilities set out on page in 19, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error

In preparing the financial statements, the directors are responsible for assessing the Gloub's and the parent company's ability to continue as a going concern, disclosing as applicable matters related to going concern and using the going concern basis of accounting unless the directors either intend to inquidate the Group or the parent company on to cease operations or have no realistic alternative out to do so

#### Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial stalements as a whole are free from material misstatement, whether due to fraudion error, and to issue an auditors' report that includes our opinion Reasonable assurance is a high level or assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraucion error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website. at www roong uklaud torsnesponsibilities. This description forms part of our auditors' report

This report, including the opinions, has been prepared for and only for the parent company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown on nto livrose hands it may come save where expressly agreed by our phoniconsent in whiting

# OTHER REQUIRED REPORTING

# Companies Act 2006 exception reporting

Under the Companies Act 2006, we are required to report to your filin our opinion

- · we have not received all the information and explanations we require for our audit, or
- · adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by ius, or
- · certain disclosures of directors' remuneration specified by law are not made, or
- the parent company financial statements and the part of the Directors. Remuneration Report to be audited are not in agreement with the accounting records and returns

We have no exceptions to report arising from this responsibility

# Appointment

Following the recommendation of the Audit Committee, we were appointed by the members on 4 June 20/5 to audit the financial statements for the year ended 31 (December 2015) and subsequent financial periods. The period of total uninterrupted engagement is three years, covering the years ended 31 December 2015 to 31 December 2017

Richard Hughes (Senior Statutory Auditor)

for and on penalf of PhicewaterhouseCoopers LLP Chartered Accountants and Statutory Auditors London

8 March 2018

#### Notes to the consolidated financial statements

#### 1. General information

G4S plc is a company incorporated in the United Kingdom. The consolidated financial statements incorporate the financial statements of the Company and entities (its subsidiaries) controlled by the Company (collectively comprising "the Group") and the Group's interest in joint ventures made up to 31 December each year. The Group operates throughout the world and in a wide range of functional currencies, the most significant being the Euro, the US dollar and Sterling. The Group's financial statements are presented in Sterling, as the Group's primary listing is in the UK. The address of the registered office is given on page 212

#### 2. Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with the Companies Act 2006, with International Financial Reporting Standards adopted by the European Union (IFRSs) and interpretations issued by the IFRS Interpretations Committee (IFRS IC), and the accounting policies have been consistently applied. The parent company financial statements have been prepared in accordance with FRS 101 - Reduced Disclosure Framework, in accordance with UK Generally Accepted Accounting Practice (UK GAAP) These are presented on pages 202 to 210

### 3. Significant accounting policies

#### (a) Basis of preparation

The consolidated financial statements of the Group have been prepared on a going concern basis and using the historical cost basis except for the revaluation of certain non-current assets and financial instruments. The principal accounting policies adopted are set out below Judgments made by the directors in the application of those accounting policies which have a significant effect on the financial statements, and estimates with a significant risk of material adjustment, are discussed in note 4

#### Presentation of the Consolidated statement of financial position

The Consolidated statement of financial position as at 31 December 2016 has been re-presented to show the re-classification of certain items within cash and cash equivalents of £20m as investments and to show the re-classification of certain investments totalling £12m previously presented as current, as non-current. As a consequence of this change in presentation, cash and cash equivalents as at 31 December 2016 have decreased from £851m to £831m, current investments have increased from £44m to £52m and new non-current investments of £12m have been presented

#### (b) Presentation of the Consolidated income statement

In order to provide further clarity in the Group's Consolidated income statement and segmental analysis, the Group separately discloses specific items, restructuring costs, profits or losses on disposal/closure of subsidiaries, amortisation of acquisition-related intangible assets and any related expenses and goodwill impairment. This is consistent with the way that financial performance is measured by management and reported to the Board and assists in providing a more meaningful analysis of the Group's results. The directors believe that presentation of the Group's results in this way aids the understanding of the Group's financial performance Further explanation about the Group's rationale for separately presenting these items is set out in the Alternative Performance Measures section of the Strategic Report on pages 35 and 36

The Group's Consolidated income statement and segmental analysis note separately identify results before specific items. Specific items are those that in management's judgment need to be disclosed separately in amving at operating profit by virtue of their size, nature or incidence. In determining, whether an event or transaction is specific, management considers quantitative as well as qualitative factors. such as the frequency or predictability of occurrence

All items that are reported as specific items are evaluated and approved by the Group's Audit Committee prior to being separately disclosed. The Group seeks to be balanced when reporting specific items for both debits and credits, and any reversals of excess provisions previously created as specific items are classified consistently as specific items

In general provisions recognised for future losses on onerous contracts are charged to the Consolidated income statement within Adjusted PBITA. However, where onerous contract charges are significant by virtue of their size, they are separately charged within specific items. Such losses are distinct from "in-year" losses, which are utilised against provisions for onerbus contract losses. Releases of onerous contract provisions originally charged as specific items are separately credited within specific items

Specific items may not be comparable to similarly-titled measures used by other companies. Specific items for the current and prior years are described in note 8

#### Other separately disclosed items

In order to provide further clanty in the Consolidated income statement, the Group also discloses separately certain strategic restructuring costs, profits or losses on disposal or closure of subsidiaries, acquisition-related amortisation and expenses and goodwill impairment

Restructuring costs that are separately disclosed reflect the multi-year productivity programme which is being implemented by the Group This programme is of a strategic nature and, as such is monitored and approved by the Group's Executive Committee During 2016 and 2017 activities under the programme have focused primarily on transforming the operating model in the UK & Ireland and Europe regions. Restructuring costs that are incurred in the normal course of business are recorded within Adjusted PBITA. Going forwards the Group has announced a three-year plan to 2020 to implement efficient organisational design and leaner processes which is likely to require further restructuring investment

Further explanation about the Group's rationale for separately presenting profits or losses on disposal or closure of subsidianes, amortisation of acquisition-related intangible assets and goodwill impairment is set out on page 36

#### (c) Basis of consolidation

#### Subsidiaries

Subsidiaries are entities controlled by the Group Control is achieved where the Group has existing rights that give it the current ability to direct the activities that affect the Group's returns and exposure or rights to variable returns from the entity. This can be determined either by the Group's ownership percentage, or by the terms of any shareholder agreement. In the case of certain investments detailed analysis of the different contracts in place is required, together with a level of judgment, to ascertain whether there is control under the definition of IFRS 10 - Consol dated financial statements (see note 4)

On acquisition, the assets, liabilities and contingent liabilities of the acquired business are measured at their fair values at the date of acquisition. The cost of acquisition is measured as the acquisition date fair value of the assets transferred as consideration to the vendor and does not include transaction costs. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognised as goodwill. Any deficiency in the cost of acquisition below the fair values of the identifiable net assets acquired (i.e. discount on acquisition) is credited to the Consolidated income statement in the year of acquisition

The cost of acquisition includes the present value of deferred and contingent consideration payable, including that in respect of put options held by non-controlling shareholders, as estimated at the date of acquisition. Subsequent charges to the present value of the estimate of contingent consideration and any difference upon final settlement of such a liability are recognised in the Consolidated income statement with respect to contingent consideration and in other comprehensive income with respect to put options. Non-controlling interests are stated at their proportion of the fair values of the assets and liabilities recognised. Profits and losses are applied in the proportion of their respective ownership to the interest of the parent and to the non-controlling interest

The results of subsidiaries acquired or disposed of during the year are included in the Consolidated income statement from the effective date of control and up to the effective date of disposal, respectively

A joint venture is a joint arrangement whereby the parties that have joint control have the rights to the net assets of the arrangement

The results and assets and liabilities of joint ventures are incorporated in the Group's consolidated financial statements using the equity method of accounting. Under the equity method, investments in joint ventures are carried in the Consolidated statement of financial position at cost as adjusted for post-acquisition changes in the Group's share of the net assets of the joint venture, less any impairment in the value of the investment. The Group's share of post-tax profits or losses is recognised in the Consolidated income statement

# Transactions eliminated on consolidation

All intra-group transactions, balances income and expenses are eliminated on consolidation. Where a Group company transacts with a oint venture of the Group, profits and losses are eliminated to the extent of the Group's interest in the relevant joint venture

# (d) Foreign currencies

The financial statements of each of the Group's businesses are prepared in the functional currency applicable to that business Transactions in currencies other than the functional currency are translated at the rates of exchange prevaling on the dates of the transactions. At each balance sheet date, monetary assets and liabilities, which are denominated in other currencies are retranslated at the rates prevailing on that date. Non-monetary assets and liabilities carned at fair value which are denominated in other currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items measured at historical cost denominated in other currencies are not retranslated. Gains and losses arising on retranslation are included in the Consolidated income statement for the period

On consolidation, the assets and liabilities of the Group's overseas operations, including goodwill and fair value adjustments ansing on their acquisition, are translated into Sterling at exchange rates prevailing on the balance sheet date. Income and expenses are translated into Sterling at the average exchange rates for the period (unless this is not a reasonable approximation of the cumulative effect of the rate prevailing or the transaction dates in which case income and expenses are translated at the rates on the dates of the transactions) Exchange differences arising are recognised in other comprehensive income, together with exchange differences arising on monetary rtems that are in substance a part of the Group's net investment in foreign operations, and on borrowings and other currency instruments designated as nedges of such investments where and to the extent that the hedges are deemed to be effective. On disposal, translation differences are recognised in the Consolidated income statement in the period in which the operation is disposed of

#### Notes to the consolidated financial statements continued

# 3. Significant accounting policies continued

#### (e) Derivative financial instruments and hedge accounting

In accordance with its treasury policy, the Group only holds or issues derivative financial instruments to manage the Group's exposure to financial risk, not for trading purposes. Such financial risk includes the interest-rate risk on the Group's variable-rate borrowings, the fair-value risk on the Group's fixed-rate borrowings, commodity risk in relation to its diesel consumption and foreign-exchange risk on transactions, on the translation of the Group's results and on the translation of the Group's net assets measured in foreign currencies The Group manages these risks through a range of derivative financial instruments, including interest-rate swaps, fixed-rate agreements, commodity swaps, commodity options, forward-currency contracts and currency swaps

Denvative financial instruments are recognised in the Consolidated statement of financial position at fair value as financial assets or financial liabilities

The gain or loss on re-measurement to fair value is recognised immediately in the Consolidated income statement, unless the derivatives qualify for hedge accounting where the treatment of any resultant gain or loss depends on the nature of the item being hedged as described below

#### Fair-value hedges

The change in the fair value of both the hedging instrument and the related portion of the hedged tem that is attributable to the hedged risk is recognised immediately in the Consolidated income statement

### Cash-flow and net-investment hedges

The change in the fair value of the portion of the hedging instrument that is determined to be an effective hedge is recognised in equity and subsequently recycled to the Consolidated income statement when the hedged cash flow or hedged net investment, impacts the Consolidated income statement. The ineffective portion of the fair value of the hedging instrument is recognised immediately in the Consolidated income statement

#### (f) Intangible assets

#### Goodwill

Business combinations are accounted for by the application of the acquisition method. Goodwill ansing on consolidation represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets, liabilities and contingent liabilities at the date of acquisition of a subsidiary or joint venture. No goodwill anses on the acquisition of an additional interest from a non-controlling interest in 4 subsidiary as this is accounted for as an equity transaction. Goodwill is stated at cost, less any accumulated impairment losses, and is tested annually for impairment or more frequently if there are indications that amounts may be impaired On disposal of a subsidian, or joint venture, the attributable amount of goodwill is included in the determination of the profit or toss on disposal

#### Acquisition-related intangible assets

Intangible assets on acquisitions that are either separable or arising from contractual rights are recognised at fair value at the date of acquisition. Such acquisition-related intangible assets include trademarks, technology, customer contracts and customer relationships The fair value of acquisition-related intangible assets is determined by reference to market prices of similar assets, where such information is available, or by the use of appropriate valuation techniques, including the royalty relief method and the excess eamings method

Acquisition-related intangible assets are amortised by equal annual instalments over their expected economic life. The directors review acquisition-related intangible assets on an on-going basis and, where appropriate, provide for any impairment in value

The estimated useful lives are as follows

Trademarks and technology up to a maximum of five years Customer contracts and customer relationships up to a maximum of ten years

# Non-acquisition-related intangible assets

Development expenditure represents expenditure incurred in establishing new services and products of the Group Such expenditure is recognised as an intangible asset only if the following can be demonstrated, the expenditure creates an identifiable asset, its cost can be measured reliably, it is probable that it will generate future economic benefits it is technically and commercially feasible, and the Group has sufficient resources to complete development. In all other instances, the cost of such expenditure is taken directly to the Consolidated income statement

Capitalised development expenditure is amortised over the period during which the expenditure is expected to be revenue-producing, up to a maximum of ten years. The directors review the capitalised development expenditure on an on-going basis and, where appropriate, provide for any impairment in value

Research expenditure is charged to the Consolidated income statement in the year in which it is incurred

Capitalised computer software is stated at cost, net of amortisation and any provision for impairment. Amortisation is charged on software so as to write off the cost of the assets to their estimated residual values by equal annual instalments over their expected useful economic lives, up to a maximum of eight years

#### (g) Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and any provision for impairment. Depreciation is provided on all property plant and equipment other than freehold land. Depreciation is calculated so as to write off the cost of the assets to their estimated residual values by equal annual instalments over their expected useful economic lives as follows

Freehold and long leasehold buildings up to 50 years

over the life of the lease Short leasehold buildings (under 50 years)

2 to 10 years Equipment and motor vehicles

Assets held under finance leases are depreciated over the shorter of their expected useful economic lives and the terms of the relevant lease

Where significant, the residual values and the useful economic lives of property, plant and equipment are re-assessed annually

#### (h) Financial instruments

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instruments

Trade receivables are initially recognised at fair value and are subsequently carried at amortised cost less provision for impairment Provisions are made where the Group identifies a risk of non-payment, taking into account ageing, previous losses experienced and other local economic and market conditions and are calculated by discounting expected cash flows using the effective interest rate at origination of the receivable

#### Investments

Investments comprise investments in securities which are classified as held-for-trading. Such investments are initially recognised at cost, including transaction costs, and subsequently measured at fair value. Gains and losses arising from changes in fair value are recognised in the Consolidated income statement

#### Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand and that form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the Consolidated statement of cash flow

#### Interest-begring borrowings

Interest-bearing bank overdrafts, loans and loan notes are recognised at the value of proceeds received net of direct issue costs. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are recognised in the Consolidated income statement on an accrual basis using the effective-interest method

#### Trade payables

Trade payables are not interest-bearing and are stated initially at fair value

Equity instruments issued by the Group are recorded at the value of proceeds received, net of direct issue costs

# (i) Inventories

Inventones are valued at the lower of cost and net realisable value. Cost represents expenditure incurred in the ordinary course of business in bringing inventories to their present condition and location and includes appropriate overheads. Cost is calculated using either the weighted average or the first-in-first-out method. Net realisable value is based on estimated selling price, less further costs expected to be incurred to completion and disposal

### (j) Impairment

The carrying values of the Group's assets, with the exception of inventories, financial receivables and deferred tax assets, are reviewed on an on-going basis for any indication of impairment and, if any such indication exists, the assets' recoverable amount is estimated. An impairment loss is recognised in the Consolidated income statement whenever the carrying value of an asset or its cash-generating unit exceeds its recoverable amount

An impairment loss in respect of goodwill is not reversed. In respect of any other asset, an impairment loss is reversed if there has been a change in the estimates used to determine its recoverable amount. The amount of the reversal is limited such that the asset's carrying amount does not exceed that which would have been determined (after depreciation and amortisation) if no impairment loss had been recognised

### Notes to the consolidated financial statements continued

#### 3. Significant accounting policies continued

#### (k) Employee benefits

#### Retirement benefit costs

Payments to defined contribution schemes are charged as an expense as they fall due. Payments made to state-managed retirement benefit schemes are dealt with as payments to defined contribution schemes where the Group's obligations under the schemes are equivalent to those ansing in a defined contribution retirement benefits scheme

The retirement benefit obligation recognised in the Consolidated statement of financial position represents the present value of the Group's total defined benefit obligation reduced by the fair value of the related scheme assets. The total of all of the Group's individual schemes that are in a net asset position is presented separately in the Consolidated statement of financial position. The value of any net asset recognised for a defined benefit scheme is limited to the present value of available refunds and reductions in future contributions

For defined benefit plans, the cost charged to the Consolidated income statement consists of current service cost, net interest cost, and past service cost. The finance element of the pension charge is shown in finance expense and the remaining service cost element. is charged as a component of employee costs in the Consolidated income statement. Actuanal and other re-measurement gains and losses are recognised immediately in full within other comprehensive income

#### Share-based payments

The Group issues equity-settled and cash-settled share-pased payments to certain employees. The fair value of equity-settled sharebased payments is determined at the date of grant and expensed, with a corresponding increase in equity, on a straight-line basis over the vesting period, based on the Group's estimate of the shares that will eventually vest. The amount expensed is adjusted over the vesting period for changes in the estimate of the number of shares that will eventually vest, excluding changes resulting from any market-related performance conditions. Cash-settled share-based payments are recognised as a liability at fair value at the date of grant. The value of the liability is re-measured at each reporting date and at the date the liability is settled. Changes in the liability are recognised directly in the Consolidated income statement

#### (I) Provisions and contingent liabilities

Provisions are recognised when a present legal or constructive obligation exists for a future liability in respect of a past event and where the amount of the obligation can be estimated reliably. The amount recognised as a provision is the Group's best estimate of the likely outflows at the end of the reporting period

In respect of claims, onerous customer contracts and litigation, the Group provides for anticipated costs where an outflow of resources is considered probable and a reasonable estimate can be made of the likely outcome. For all risks, the ultimate liability may vary from the amounts provided and will be dependent upon the eventual outcome of any settlement. Management exercises judgment in measuring the Group's exposures to contingent liabilities (see note 33) through assessing the likelihood that a potential claim or liability will arise and in quantifying the possible range of financial outcomes

Where the time value of money is material provisions are stated at the present value of the expected expenditure using an appropriate discount rate

# (m) Restructuring costs

A restructuring provision is recognised when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or by announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the on-going activities of the entity

The Group distinguishes in the Consolidated income statement between restructuring costs that are recurring and those that relate to one-off or transformational Group programmes that impact a number of operations

Recurring restructuring costs that are incurred in the normal course of business are recorded as part of the Group's results within adjusted profit before interest, tax and amortisation (Adjusted PBITA)

Restructuring costs that are one-off and individually material or relate to programmes linked to the Group's wider transformation and require approval at executive level, are disclosed separately in the Consolidated income statement

#### (n) Revenue recognition

The Group's revenue anses from two primary sources – Secure Solutions products, mainly comprising manned security and facilities management services, and Cash Solutions, mainly the provision of physical cash management services

Within Secure Solutions there are additional revenue streams arising from

- Technology services, comprising the supply installation and monitoring of alarm systems, and security and building systems technology.
- · Facilities management, and
- · Care & Justice services

Within Cash Solutions there is an additional revenue stream arising from Technology services to retailers, comprising the provision of hardware and software for customer cash management and related services

In all of these business areas revenue is measured at the fair value of consideration received or receivable net of discounts, VAT and other sales-related taxes

Certain fow-volume, high-value government contracts, mainly for Care & Justice services and facilities management services, can cover a range of bundled services over a long period of time, that are provided on a time and materials basis. Revenue for this type of contracts is recognised on an accrual basis based on the individual services provided and in accordance with the terms of the contract

Where services provided to customers include more than one particular revenue source, particularly in cash technology services and in the alarms pusiness, such as the supply and installation of equipment together with on-going services and maintenance contracts, the fair value of each revenue source is separately identified and allocated to each element of the arrangement and recognised as the product is sold or the services are delivered

#### Manned security, cash management, facilities management, other care and justice services and security systems services

Revenue is recognised to reflect the period in which the service is provided

#### Security alarm systems installations

Revenue for B2B customers is recognised on completion of the installation, and the attributable costs of the installation are recognised as a cost of sale, given that economic ownership of the asset is transferred to the customer

Revenue for B2C customers is deferred and recognised along with the revenue from the related monitoring service over the term of the contract, given that legal and economic ownership of the assets remains with the Group

Service and monitoring fees for all alarm system contracts are recognised in the period when the service is provided

#### Long-term contracts

These contracts are mainly related to certain long-term construction or alarm or other technology installation projects which span one or more reporting periods and where long-term contract accounting is applied

Where the outcome of a long-term contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the balance sheet date. This is measured either by the proportion that contract costs incurred for work to date bear to the estimated total contract costs or by the proportion that the sales value of work completed to date bears to the total sales value. Variations in contract work, claims and incentive payments are included to the extent that it is likely that they will be agreed with the customer and hence recoverable

Where the outcome of a long-term contract cannot be estimated reliably, contract revenue is recognised only to the extent of contract costs incurred that are deemed likely to be recoverable. Contract costs are recognised as expenses as they are incurred

Where it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised immediately as an expense

#### (o) Pre-contract and mobilisation costs

Pre-contract costs in respect of major outsourcing contracts, incurred after the point at which the Group achieves preferred bidder status (at which point it is considered probable that the contract will be obtained) and before contract mobilisation, are capitalised and expensed over the life of the contract, subject to recoverability criteria. Costs incurred prior to this point are expensed as incurred Capitalised costs are expensed immediately in the event that preferred bidder status is not followed by the award of the contract, or where these may no longer be expected to be recovered through future profits

Mobilisation costs are those costs incurred after the signing of a contract with a customer, and prior to commencement of delivery of the contract. Costs incurred during this stage are generally only capitalised if the criteria to be capitalised as inventories or as property, plant and equipment are met. In all other cases mobilisation costs are expensed as incurred

#### (p) Onerous contracts

Onerous contract provisions are recognised where the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. Management's profit-improvement plans to recover the position on loss-making contracts require a level of judgment and are generally taken into account in the calculation of the onerous contract provision only when implementation has commenced and tangible evidence exists of benefits being delivered. The provision is calculated based on discounted cash flows to the end of the contract

In general provisions recognised for future losses are charged to the Consolidated income statement within Adjusted PBITA Where onerous contract provisions are material by virtue of their size, they are separately charged within specific items

In-year operating losses from onerous contracts are accounted for as a utilisation of the related provision for future losses. Any excess or shortfall to the initial estimate for onerous contract provisions is credited or charged in the Consolidated income statement consistent with where the charge for the initial provision was recognised

Vacant property provisions are recognised when the Group has committed to a course of action that will result in the property becoming vacant. The provision is calculated based on discounted cash flows to the end of the lease taking into account expected future sub-lease income

# Notes to the consolidated financial statements continued

#### 3 Significant accounting policies continued

Interest income is accrued on a time basis by reference to the principal outstanding and at the effective interest rate applicable. This is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset's net carrying amount. Borrowing costs also calculated using the effective-interest method, are recognised as an expense in the Consolidated income statement

#### (r) Income taxes

Tax is recognised in the Consolidated income statement except to the extent that it relates to items recognised in equity, in which case it is recognised through other comprehensive income. The tax expense represents the sum of current tax and deferred tax, and excludes charges for interest on tax and certain penalties on tax settlements, which are reported within finance expenses and administration expenses respectively

Current tax is based on taxable profit for the year. Taxable profit differs from net profit as reported in the Consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilised

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidianes and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future

The carrying amount of potential deferred tax assets is re-assessed at each balance sheet date and recognised to the extent that it is probable that sufficient taxable profits will be available to allow those assets to be recovered

Deferred tax is measured based on the tax rates that have been enacted or substantively enacted by the end of the reporting period

Tax liabilities or refunds may differ from those anticipated due to changes in tax legislation, differing interpretations of tax legislation and uncertainties surrounding the application of tax legislation. In situations where uncertainties exist, provision is made for tax liabilities and assets on the basis of management judgment following consideration of the available relevant information. Further detail on management's judgments in respect of taxation is provided in note 4

#### (s) Leasing

Leases are classified as finance leases when the terms of the lease transfer substantially all of the risks and rewards of ownership to the lessee. On occasion this classification requires a level of judgment. All other leases are classified as operating leases

Assets held under finance leases are recognised at the inception of the lease at their fair value or if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the Consolidated statement of financial position as a finance lease obligation. Lease payments made or received are apportioned between finance charges or income and the reduction of the lease liability or asset so as to produce a constant rate of interest on the outstanding balance of the liability or asset

Rentals payable or receivable under operating leases are charged or credited to income on a straight-line basis over the lease term. as are incentives to enter into operating leases

# (t) Non-current assets held for sale and discontinued operations

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. The Group must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification

A discontinued operation is a component of the Group's business that represents a separate major line of business or geographical area of operations or is a subsidiary acquired exclusively with a view to resale that has been disposed of has been abandoned or meets the criter a to be classified as held for sale

#### (u) Dividend distribution

Dividends are recognised as distributions to equity holders in the period in which they are paid or approved by the shareholders in general meeting

#### (v) Adoption of new and revised accounting standards and interpretations

The Group has not early-adopted any standard, amendment or interpretation. A number of new standards, amendments to standards and interpretations are not yet effective for the year ended 31 December 2017. The directors are currently evaluating the impact of these new standards on the group financial statements

- Annual Improvements to IFRS Standards 2014-2016 Cycle
- $\bullet \quad \text{IFRS 2 amendments} Classification \ \text{and} \ \text{Measurement of share-based payment transactions}\\$
- IFRIC 22 Foreign currency transactions and advance consideration
- IFRIC 23 Uncertainty over income tax treatments

# IFRS 15 - Revenue from Contracts with Customers

The Group has acopted IFRS 15 – Revenue from Contracts with Customers with effect from 1 January 2018 and will prepare its 2018. Interim Results and Integrated Report and Accounts in accordance with the requirements of this new standard, with full retrospective application restating comparatives where appropriate

The majority of the services which the Group provides are related to Secure Solutions (including security systems) and Cash Solutions (including hardware and software systems). Following a thorough review of the contractual terms of the contracts under which the Group provides these services, and from an assessment of the basis on which customers are invoiced in relation to work performed on a number of material contracts in each of these business categories, it has been concluded that the Group's right to consideration from the customer corresponds directly with the value to the customer of the Group's performance completed to date. The Group is therefore allowed to recognise revenue in the amount to which it has the right to invoice, and there will be no significant change in revenue recognition in respect of these services. The Group will apply the practical expedient approach allowed by IFRS 15 in such cases, whereby revenue is recognised in line, with amounts invoiced to customers, based on the value of services performed over the duration of the contract

Only a residual amount of care and justice services have been identified where the practical expedient approach is not applicable, but based on a detailed assessment of the most material of such contracts in relation to IFRS 15 revenue recognition criteria, no material change to current revenue recognition has been identified

In addition to review and assessment of revenue recognition, the Group has assessed the impact of IFRS 15 criteria for capitalisation of contract-acquisition and contract-fulfilment costs by comparison with its existing accounting policies. Certain changes (such as the cessation of capitalisation of pre-contract costs after attainment of preferred supplier status) are required to those existing policies under IFRS-15, but these changes will likewise have no material impact on the Group's results or Consolidated statement of financial position

As a result of these reviews, management has concluded that, whilst refinements are required to certain of the Group's existing revenue recognition and contract cost capitalisation policies for compliance with IFRS 15, together with the inclusion of a number of additional disclosures in the Integrated Report and Accounts for 2018 and for subsequent years, there will be no material change to the Group's revenue. Adjusted PBITA, profit before tax or profit for the year, or to its Consolidated statement of financial position, as a consequence of adoption of this new standard

#### IFRS 9 - Financial Instruments

The Group has adopted IFRS 9 – Financial Instruments with effect from 1 January 2018, and will prepare its 2018 Interim Results and Integrated Report and Accounts in accordance with the requirements of this new standard, with restated comparatives where appropriate

The new standard is applicable to financial assets and financial liabilities, and covers the classification, measurement, impairment and de-recognition of financial assets and liabilities together with a new hedge accounting model

Management has completed its assessment of the impact of this new accounting standard on its consolidated financial statements, with particular reference to the impact of the expected credit loss model for impairment of financial assets and to the changes in respect of hedge accounting, from which it has been concluded that there will be no material change to the Group's revenue, Adjusted PBITA, profit before tax or profit for the year, or to its Consolidated statement of financial position, as a consequence of adoption of IFRS 9 and there will be no change to the Group's existing hedging strategy

#### IFRS 16 - Leases

The Group continues to assess the impact of adopting IFRS 16 - Leases, which will be effective for the Group's financial year ending 31 December 2019

Additional dept will be recognised in the Consolidated statement of financial position, together with additional property. Dlant and equipment assets

The impact on the Consolidated income statement is currently expected to be a small increase in Adjusted PBITA, due to the re-classification of the interest element of operating lease rentals as finance costs

The impaction Profit before tax will be variable over the term of a lease, as interest is charged at the effective rate on the reducing balance of the liability over the lease term. Over the course of each lease the cumulative impact on pre-tax profit, will be neutral

The impact on the Consolidated statement of cash flows will be an increase in net cash flow from operating activities, equivalent to the increase in Adjusted PBITA, matched by an increase in cash outflow from financing activities due to the re-classification of finance lease interest, with no impact on net cash flow

#### 4. Accounting estimates, judgments and assumptions

The preparation of financial statements in conformity with adopted IFRSs requires management to make judgments, estimates and assumptions that affect the application of the Group's accounting policies, which are described in note 3, with respect to the carrying amounts of assets and liabilities at the date of the financial statements, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period

### Significant judgments

Significant judgments are those made by management when applying its accounting policies that are considered to have the most significant impact on amounts recognised in the consolidated financial statements

During the year, management reassessed the most significant judgments and determined that those relating to revenue recognition were no longer considered to be significant

Those judgments that are considered to have the most significant impact on amounts recognised in the consolidated financial statements, apart from those involving estimations (which are disclosed separately below) are the following

# Compliance with foreign ownership rules and consolidation of subsidiaries

The Group has a diverse set of complex ownership structures, which are sometimes driven by local laws and regulations relating to foreign ownership. In some instances the Group operates through local structures, with limited direct share ownership of the business. but exercises control through shareholder agreements

Judgment is required in determining whether certain Group entities qualify for consolidation under IFRS10 - Consolidated Financial Statements and in some instances professional and legal advice is sought to support these judgments. Consolidation of any of these entities would be at risk if the Group's ability to enforce its rights of control was successfully challenged

These judgments have been applied in determining how the Group consolidates businesses with an aggregated revenue of c £800m. Adjusted PBITA of c £60m and equity shareholders' funds of c £200m. The impact on the Group's earnings (after tax) of equity accounting rather than full consolidation would not be material

#### Classification of leases

The classification of leases as operating or finance leases is based on the criteria set out in IAS 17 - Leases, which defines a series of attributes which, when contained within a lease, may result in its classification as a finance lease. Judgment is required in assessing leases at inception as to whether individual attributes, in aggregate or in isolation, are such that the substance of the lease is that of a finance lease. Details of the Group's finance leases are disclosed in note 28 and the Group's operating lease commitments are set out in note 38

#### Alternative Performance Measures

The Group uses Adjusted PBITA as a consistent internal and external reporting measure of its performance as management views it as being more representative of the normal course of business and more comparable period to period. Adjusted PBITA excludes strategic restructuring costs, amortisation of acquisition-related intangible assets and specific and other separately disclosed items, which the Group believes should be disclosed separately by virtue of their size, nature or incidence (judgment is required when defining those items to be disclosed separately and when applying the classification criteria to each period's results. Further details on separately disclosed items are set out in note 8

# Significant estimates and assumptions

Significant estimates and associated assumptions are those that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year. Significant estimates are made taking into account historical experience and various other factors that are believed to be reasonable under the circumstances, including current and expected economic conditions, and, in some cases, actuanal techniques. Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected

The most significant estimates, assumptions and sources of uncertainty in preparing the Group's 2017 consolidated financial statements are set out below

#### Onerous contracts

The Group delivers certain long-term services that are complex in nature. Some of these contracts may evolve to become loss-making, such that not unavoidable losses are expected to be incurred over their life

Where a contract is expected to be loss-making over its remaining term, the net present value of estimated future losses is determined in order to calculate an onerous contract provision. The identification and measurement of such provisions is subject to inherent risk, given the extended time periods often involved and the number of variables which are not all within the Group's control

In particular, estimation is required in assessing future expected revenue and costs on such contracts, including

- · determining the expected impact of any profit improvement plans where sufficient evidence exists of benefits being delivered by those plans and
- determining an appropriate discount rate to apply to material future cash flows

The level of uncertainty in the estimates and assumptions supporting expected future revenues and costs can vary with the complexity of each contract and with the form of service delivery

For further details of how the Group has applied judgments and estimates to significant onerous contract provisions refer to note 33 on pages 179 to 181

#### Carrying value of goodwill

The Group tests tangible and intangible assets, including goodwill, for impairment on an annual basis or more frequently if there are indications that amounts may be impaired. The impairment analysis for such assets is based principally upon discounted estimated future cash flows from the use and eventual disposal of the assets requiring assumptions on growth rates and the impact of local economic factors. The full methodology and results of the Group's impairment testing, including an analysis of the sensitivity of goodwill to the key assumptions, are presented in note 18

#### Taxation

The Group operates in many tax jur sdictions including countries where the tax legislation is not consistently applied and under some complex contractual circumstances where the responsibility for tax arising is not always clear. Judgments and estimates are required to determine the appropriate amount of tax to provide for and any required disclosure around contingent tax liabilities at each period end

Provisions for tax liabilities are estimated for existing matters under dispute with local tax authorities, as well as for matters which it is considered may be disputed by them, where it is probable that a future liability will arise. The tax liability provided is management's best estimate, taking into account external advice, the anticipated position of the relevant tax authorities, and other local factors. In certain cases, and where appropriate, a probability weighting is applied in determining the amount provided in all cases it is assumed that the local tax authorities have, or will be provided with, full information. Therefore the tax liability is not reduced for "detection risk" Further details about the range of the potential tax exposure to which the Group is subject are set out in note 13

The Group has tax losses and other deductible temporary differences, mainly in the UK and USA, that have the potential to reduce tax payments in future years. Deferred tax assets are only recognised to the extent that their recovery is probable, having regard to the projected future taxable income of these entities and after taking into account specific risk factors that affect the recovery of these assets. The same profit projections are used for these purposes as are used by the business, for example in assessing the carrying value of goodwill judgment is applied on a case-by-case basis due to the junscictional nature of taxation. This analysis is considered afresh at each balance sheet date

#### Valuation of retirement benefit obligations

The valuation of defined retirement penefit schemes is arrived at using the advice of qualified independent actuaines who use the projected unit credit method for determining the Group's obligations. This methodology requires the use of a variety of assumptions and estimates including the determination of an appropriate discount rate, the expected return on scheme assets mortality assumptions, future service and earnings increases of employees and inflation. Full details of the Group's retirement benefit obligations, including an analysis of the sensitivity of the calculations to the key assumptions, are presented in note 32

#### Labour laws and commercial agreements

The Group is involved in disputes in a number of countries, mainly related to activities incidental to its operations. Currently there are a number of such disputes open in relation to the application of local labour law, commercial agreements with customers and subcontractors and claims and compliance matters, in some cases in the course of litigation. In addition the interpretation of labour laws and regulations in a number of countries where the Group operates is complex and there is an inherent judgment made when applying those laws and regulations that are open to interpretation. As such, there is a risk that further disputes and claims from employees could anse in the future. Where there is a dispute (or where there is a risk of a dispute on claims in the future, and where, based on legal counsel advice, the Group estimates that it is probable that the dispute will result in an outflow of economic resources, provision is made based on the Group's best estimate of the likely financial outcome. For further details of how the Group has applied judgments and estimates to these provisions and, where relevant, an analysis of the sensitivity of the provisions to the key underlying estimates and assumptions, refer to note 33 on pages 179 to 181

In certain instances it is not possible to determine a reliable estimate or a reasonable range of potential outcomes. For these cases, disclosure of the relevant items as contingent labilities is provided in note 33

#### 5 Revenue

An analysis of the Group's revenue ias defined by IAS 18 - Revenue, is as follows:

|  | √otes | 2017<br>£m | 20 6<br>£m |
|--|-------|------------|------------|
| Continuing operations  |       |            |            |
| Sale of goods  |       | 281        | 311        |
| Rendering of services  |       | 7,344      | 1,072      |
| Revenue from construction contracts  |       | 203        | 207        |
| Revenue from continuing operations as presented in the Consolidated income statement | 6     | 7,828      | 7,590      |

# 6. Operating segments

The Group operates on a worldwide basis and derives a substantial proportion of its revenue and operating profit from each of the following seven geographic regions. Africa, Asia Pacific, Latin America, Middle East & India, Furobe, North America and UK & Ireland For each of these reportable segments, the Group Executive Committee (the chief operating decision maker) reviews internal management reports on a regular basis

Segment information is presented below

| Revenue by reportable segment | Total gross<br>segment revenue<br>2017<br>Em | Inter-segment<br>revenue<br>2017<br>£m | External revenue<br>2017<br>£m | Tota gross<br>segment evenue<br>20 6<br>£m | nter-segment<br>revenue<br>20-6<br>£m | External revenue<br>20-6<br>£m |

#### 7. Discontinued operations

The loss from discontinued operations of £6m in the current year relates to impairments of trade receivables and costs and charges incurred or expected to be incurred relating to historical disposals of businesses classified as discontinued operations at the time of sale (2016 £3m costs and charges relating to historical disposals). Discontinued operations incurred no tax charge during the year (2016 Enil) None of the Group's businesses currently held for sale or closure meet the criteria to be classified as discontinued operations in the current year (2016 none)

The effect of discontinued operations on segment results is disclosed in note 6

Discontinued operations generated no cash flows for the year ended 31 December 2017 (2016 £9m operating cash outflow)

#### 8 Operating profit

The Consolidated income statement can be analysed as follows

|   | 2017    | 20+6   |
|---|---------|--------|
| Continuing operations                         | £m      | £m     |
| Revenue                                       | 7,828   | 7,590  |
| Cost of sales                                 | (6,432) | (6212) |
| Gross profit                                  | 1,396   | 1,378  |
| Administration expenses                       | (904)   | (976)  |
| Goodwill impairment                           | -       | (9)    |
| Share of profit after tax from joint ventures | 9       | 9      |
| Operating profit                              | 501     | 402    |

Operating profit includes items that are separately disclosed for the year ended 31 December 2017 relating to

- Net specific items charge of £34m (2016 £13m), of which £19m (2016 £4m) primarily relates to the anticipated total losses over the next 15-20 years in respect of certain UK contracts. The net specific item charge also includes £6m relating to the estimated cost of settlement of subcontractor claims from commercial disputes in respect of prior years, and £9m relating mainly to the settlement of labour-related disputes in respect of prior years in North America and Latin America. Specific items in 2016 included a £10m charge due to the revision of estimates relating to legacy acquisitions and labour claims in Latin America, £7m relating to commercial restructuring in Middle East & India, and a net £4m supplementary onerous contract provision primarily in respect of the Compass asylum seekers contract, all offset by an £8m credit mainly relating to the recovery of a legal claim in Europe and of certain disputed debtor balances in the UK.
- Costs of £20m (2016 £12m) arising from restructuring activities during the year mainly in the UK & Ireland and Europe regions, as part of the multi-year strategic prodoutivity programme across the Group which is now drawing to a close. In addition, the Group incurred non-strategic severance costs of £10m (2016-£9m) which are included within cost of sales and administration expenses as appropriate. Going forwards the Group has announced a three-year plan to 2020 to implement efficient organisational design and leaner processes, which is likely to require further restructuring investment,
- Amortisation of acquisition-related intangible assets of £10m (2016-£32m) is lower than the prior year as certain intangible assets recognised on a number of legacy acquisitions became fully amortised in 2016, and
- As part of the portfolio programme the Group realised net profit of £74m (2016 £7m) relating to the disposal of a number of the Group's operations including the US Youth Services business, the children's homes business in the UK, the cash businesses in Peru and Paraguay, and the Group's businesses in Israel and Bulgaria (see note 17). In 2016, the Group recorded a goodwill impairment charge of £9m in relation to businesses identified for sale or closure.

| Total income tax expense for the year                  | 128                        |                                 | 128                 | 76                                     |                             | 76                          |

UK corporation tax is calculated at 19% (2016-20%) of the estimated assessable profits for the year. Overseas tax is calculated at the corporation tax rates prevailing in the relevant jurisdictions

#### 13. Tax continued

The tax charge for the year can be reconciled to the profit per the Consolidated income statement as follows

|  | 2017<br>£m | 2016<br>£m |
|--|------------|------------|
| Profit before tax  | Lin        | 2,111      |
| Continuing operations  | 386        | 296        |
| Discontinued operations  | (6)        | (3)        |
| Total profit before tax  | 380        | 293        |
| Tax at UK corporation tax rate of 19% (2016, 20%)                                      | 74         | 59         |
| Items that are not deductible and other additions to caxable profit (note (1))         | 20         | 25         |
| Goodwill impairments not deductible  | _          | 2          |
| Profits on disposal of businesses not taxable or covered by capital losses (note (ii)) | =          | (8)        |
| Losses on disposal of businesses not relieved (note (11))                              | 1          | 7          |
| Different tax rates of subsidiaries operating in non-UK jurisdictions (note (iii))     | 23         | 12         |

| Tax losses not recognised in the current year (note (iv))                              | 2          | 2          |
| Impact of US tax reforms (hote (v))  | 19         | _          |
| Re-assessment of deferred tax recoverability on losses (note (VI))                     | (5)        | (36)       |
| Adjustment in respect of prior years – current and deferred tax (note (vii))           | 2          | 15         |
| Total income tax charge  | 128        | 76         |
| Effective tax rate for continuing and discontinued operations                          | 34%        | 26%        |

The effective tax rate for continuing operations was 33% (2016) 26%:

### (i) Items that are not deductible and other additions to taxable profit – £20m (2016: £25m)

This category reflects the tax effect of items which, in management's judgment, are potentially disallowable for the purposes of determining local taxable profits. This includes unrelieved withholding taxes of £8m (2016, £9m) relating to withholding tax deducted on domestic or cross-border payments in excess of the profits tax arising in the recipient company

#### (ii) Profits on disposal of businesses not taxable or covered by capital losses - £nil (2016. £(8)m)

This relates to profits arising on the disposal of businesses where any taxable gain arising on the disposal is either exempt from tax under the relevant tax legislation or there are capital losses available to offset against those taxable gains, for which deferred tax assets were not previously recognised. Similarly, losses on disposal of businesses not relieved of £1m (2016. £7m) relates to the disposal of businesses where no deductible loss anses or where there is a low probability that losses will be utilised

# (III) Different tax rates of subsidiaries operating in non-UK jurisdictions – £23m (2016: £12m)

This relates to the effect of profits of the Group being subject to tax at rates different from the current UK corporation tax rate of 19%

# (iv) Tax losses not recognised in the current year – £2m (2016. £2m)

This relates to current-year losses not recognised as deferred tax assets on the basis that there are insufficient taxable profits available to utilise those losses in the foreseeable future

#### (v) Impact of US tax reforms - £19m (2016, £nil)

On 22 December 2017, the US tax legislation known as the Tax Cuts and Jobs Act, was signed into law and introduced significant changes in US tax laws taking effect on 1 January 2018. For 2017, the changes in legislation result in a one-off charge to the income statement of £19m which relates to a revaluation of deferred tax asset balances due to the reduction in the US Federal tax rate and the impairment of foreign tax credits which are no longer expected to be utilisable in future periods against foreign source income On the basis of currently available information and analysis completed since the legislation was enacted, these are likely to be the most significant impacts for the Group. However, as more detailed analysis and future legislative guidance becomes available, it is possible that the Group may be further impacted in the current year and subsequent years by the legislative changes

#### (vi) Re-assessment of deferred tax recoverability on losses – £(5)m (2016 £(36)m)

Relates to the recognition of additional deferred tax assets on historical tax losses during the period as a result of improvements in profitability in group forecasts and business plans. Forecasted taxable profits for future years support a marginal increase in the level of deferred tax assets recognised on tax losses compared to the prior year. The increased recognition in 2016 reflected improvements in the taxable profit profile of the relevant Group companies, underpinned by the continuing progress of the Group's transformation strategy to generate future, sustainable profitable growth

# (vii) Adjustment in respect of prior years – current and deferred tax – £2m (2016 £15m)

This relates to a re-assessment of the tax deductibility of expense items and provisions for unresolved tax issues as a result of case law developments and settlements with tax authorities

#### Issues relating to taxation

The calculation of the Group's total tax charge involves consideration of certain items whose tax treatment cannot be ultimately determined until final resolution has been reached through negotiation with the relevant tax authorities, or via a domestic or international dispute resolution process

The global nature of the Group's operations means that the most significant tax risk is in relation to challenges from tax authorities in relation to the pricing of cross-border transactions and the Group's interpretation of the OECD's arm s-length principle. This risk is largely driven by the inherently subjective nature of transfer oncing and the divergent views taken by tax authorities. In determining the appropriate level of provisions in respect of such challenges, the Group applies a risk-based approach which considers factors such as the quantum of the charge, the countries party to the transaction and the relevant statutes of limitation

An assessment is also made of the likelihood that compensating adjustments will be obtained under the relevant tax treaties to mitigate the level of double taxation which could anse. As the Group operates in a significant number of countries determining the appropriate level of judgment is typically influenced by the Group's evolving experience of tax controversy in different countries. The Group has open tax periods in a number of countries involving a number of issues, with the most material disputes typically being in respect of cross-border transactions. As at 31 December 2017, the Group had total tax exposures of approximately £146m (2016, £102m) of which £42m (2016 £37m) is provided against. The Group believes that it has made appropriate provision for open tax periods which have not vet been agreed by tax authorities. The final agreed liabilities may vary from the amounts provided, as these are dependent upon the outcomes of the domestic and international dispute resolution processes in the relevant countries. The Group typically has limited control over the timing of resolution of uncertain tax positions with tax authorities. Acknowledging this inherent unpredictability, and on the basis of currently available information, the Group does not expect material changes to occur to the level of provisions against uncertain tax positions during the next twelve months

Following the referendum held on 23 June 2016, the UK voted to leave the European Union. The potential tax impacts which could anse as a consequence of the UK withdrawing from the European Union are currently uncertain, but on the basis of current information the Group does not anticipate that significant additional tax liabilities will arise

<sup>\*</sup> Excluding shares held by the Group's Employee Berieft Trust and accounted for as it easury shares (see note 36)

# 16. Acquisitions

The Group has not made any material acquisitions in the current or prior year. During the year, the Group has invested £16m in the acquisition of non-controlling interests in certain operations, primarily in the Group's Europe region (2016–£2m in the Africa region)

# 17. Disposals and closures

As part of the Group's portfolio programme, in 2017 the Group sold nine businesses, including the US Youth Services business. the children's homes business in the UK, the cash businesses in Peru and Paraguay, and the Group's businesses in Israel and Bulgaria, realising net cash consideration of £156m. These businesses generated Adjusted PBITA of £8m to the date of disposal (2016 full year £21m) A further four pusinesses were closed during the year

In the year ended 31 December 2016 the Group sold 12 businesses, including the Cash Solutions business in Thailand, the businesses in Finland, Brunei and Kazakhstan, and the Utilities Services and ATM engineering businesses in the UK, realising net cash consideration of £82m. A further four businesses were closed during that year, and in addition the Group recognised a loss of £16m in relation to a systems business in Latin America which was in the process of being closed down

The net assets and net profit on disposal/closure of operations disposed of or closed were as follows.

#### Goodwill allocation

Goodwill acquired in a business combination is allocated to the cash-generating units (CGUs) which are expected to benefit from that business combination. A significant portion of the Group's goodwill was generated by the merger of the security services businesses of Group 4 Falck and Securicor in 2004, which was accounted for as an acquisition of Securicor by Group 4 Falck.

#### Goodwill impairment testing

The Group tests tangible and intangible assets, including goodwill, for impairment on an annual basis or more frequently if there are indications that any of these assets may be impaired. The Group's annual impairment test compares the carrying value of goodwill and other relevant non-current assets held by each CGU with the recoverable amount of each CGU as at 31 December each year CGUs for goodwill impairment testing purposes are identified on a country-level basis including significant business units, consistent with the Group's detailed management accounts. Under IAS 36 - Impairment of Assets, an impairment is deemed to have occurred where the recoverable amount of a CGU is less than the carrying value of goodwill and other relevant non-current assets

The recoverable amount of a CGU is generally determined by its value in use which is derived from discounted cash flow calculations The key inputs to the calculations are described below. In certain circumstances, where market prices can be ascertained (for example through recent transactions or by reference to normal industry standard multiples), the fair value less costs to sell is used as a basis for the recoverable amount. In the current year the value of goodwill in the Group's Greece CGU was supported by this valuation method

#### Forecast cash flows

All operating countries in the Group are required to submit a budget for the next financial year (for the year ending 31 December 2018) and strategic plan forecasts for the two years following the budget year (i.e. for the years ending 31 December 2019 and 31 December 2020)

Estimated future cash flows are based on these plan forecasts for the first three years, with year 4, year 5 and the terminal value projected by applying growth rates as set out in the growth rate section below. Estimated cash flows are discounted using country-specific risk-adjusted discount rates as described in the discount rate section

The following table demonstrates the application of growth rates to forecast cash flows

| Growth assumptions | Year    | Year 2                                  | Year 3                                  | Year 4  | Year 5   | Terminal value   |
|--------------------|---------|---|---|---|--|--|
| Input              | Budget' | Strategic plan<br>forecast <sup>1</sup> | Strategic plan<br>forecast <sup>1</sup> | Projected – to achieve<br>midpoint between<br>years 3 and 5 | Projected lower of year 3 forecast or country-specific inflation rate. | Country-specific long-term inflation rate <sup>2</sup> |
| Example            | 8%      | 7%                                      | 6%                                      | 4%  | 2%   | 2%   |

- I Budgets and strategic plan forecasts are reviewed by the group board
- 2 Sourced from IMF website

In this example budgeted year 1 growth rate is 8%, forecast growth in year 2 is 7% and in year 3 is 6%. The long-term country inflation rate is 2% so the year 4 growth rate is calculated to be the midpoint between 6% in year 3 and 2% in year 5, i.e. 4%. The terminal value calculation is then based on the long-term inflation rate of 2%

# 18 Intangible assets continued

#### Discount rates

The following key inputs are used to calculate country-specific discount rates for all CGUs

| Input   | How determined  | 31 Dec 2017           | 3 - Dec 2016        |
|---|---|-----------------------|---------------------|
| Risk-free rate (Group)                        | The Group's risk-free rate is based on the UK government's 20 year gilt / bond rates  | 1 75% in UK           | I 89% in UK         |
| Adjusted risk-free rate<br>(country specific) | Country-specific risk free rates are derived for each CGU by adjusting the Group's risk-free rate for both the relevant inflation rate differential between the UK and that CGU's country and by applying an appropriate country-specific risk premium sourced primarily from the IMF and New York University websites as well as other studies by independent economists | 2 3% in UK            | 2 4% in UK          |
| Unleveraged beta                              | Beta is a risk adjustment applied to the discount rate to reflect the risk of the Group's operating companies relative to the market as a whole. The Group's beta is estimated by performing an analysis of comparable multinational listed companies and is adjusted for the appropriate leverage of the Group.  | 0.75 for the<br>Group | 07 for the<br>Group |
| Debt margin                                   | The Group applies a Group-wide debt margin to the country-specific risk-free rates to obtain a cost of debt for each CGU. The debt margin is determined by calculating the premium between the yield on a BBB-rated 15+ year UK benchmark bond and the UK risk-free rate.   | 13% in UK             | 1 5% in UK          |
| Weighted-average cost of capital (pre-tax)    | The weighted-average cost of capital is calculated by weighting the cost of equity and the cost of debt by the applicable debt to equity ratio at the year end  | 9 1% in UK            | 8  % in UK          |

The table below sets but the pre-tax discount rates and growth rates used for the countries that represent significant goodwill balances

<sup>1</sup> ower of long-term country inflation rate per the IMF and implied year 3 business forecast growth rate

Within the UK, the most significant CGUs and their goodwill carrying values are UK Central Government Services (£225m), UK Cash Solutions (£205m) and UK Secure Solutions (£107m) Within the USA, the most significant CGU is US Commercial Security Solutions with goodwill of £405m

# Impairment charge in 2016

During the prior year the Group recognised an impairment charge of £9m relating to businesses held for sale or closure as a result of their estimated recoverable amounts being less than the carrying value of their net assets

#### Sensitivity to key assumptions

The key assumptions used in the discounted cash flow calculations relate to the discount rates and long-term growth rates used. The table below shows the additional impairment that would anse from an increase in discount rates by 1% and 3% (with all other variables being equal for example increasing the UK base rate from 9.1% to 10.1% and 12.1%) or a decrease in long-term growth rates by 1% and 3% (to a minimum of 0% with all other variables being equal, for example, decreasing the UK long-term growth rate from 2.0% to 10% and 00%) for the Group in total and for each of its countries that represent significant goodwill balances

| At I January 2016  | 143                          | 284                    | 427         |
| At 31 December 2016  | 146                          | 291                    | 437         |

The net book value of equipment and vehicles held under finance leases was £26m (2016–£39m). Accumulated depreciation on these assets was £109m (2016–£126m) and the depreciation charge for the year was £16m (2016–£21m).

The rights over assets held on finance leases are effectively security for lease liabilities. These rights revert to the lesson in the event of default

The net book value of equipment and vehicles includes £25m (2016 £23m) of assets leased by the Group to third parties under operating leases. Accumulated depreciation on these assets was £28m (2016, £40m) and the depreciation charge for the year was £9m (2016 £7m)

The net book value of land and buildings comprises freeholds of £68m (2016-£71m), long leaseholds of £17m (2016-£20m) and short leaseholds of £52m (2016 £55m)

### 20. Investment in joint ventures

The following is summarised aggregate financial information for the Group's interest in joint ventures that are not material to the Group, based on the amounts reported in the Group's consolidated financial statements.

|  | 2017       | 2016       |
|--|------------|------------|
|  | £m         | £m         |

#### 22. Investments

Investments include listed securities of £27m (2016 £31m) held by the Group's wholly-owned captive insurance subsidianes These securities are stated at fair value based on quoted market prices consistent with Level 1 of the valuation hierarchy. Use of these investments is restricted to the settlement of claims against the Group's captive insurance subsidiaries. During the year the 2016 comparatives have been re-presented, as explained in Note 3(a)

#### 23. Trade and other receivables

#### 23. Trade and other receivables continued

#### Credit risk on trade receivables

There is limited concentration of credit risk with respect to trade receivables, as the Group's customers are both large in number and dispersed geographically in around 90 countries. The Group performs various services to a number of UK Government agencies which, in total comprised approximately 6% of the total trade debtor balance as at 31 December 2017 (2016-8%). The Group considers these individual Government agencies to be separate customers due to the limited economic integration between each agency Management are satisfied that across the G4S Group's total trade debtors as at 31 December 2017 there is no significant concentration risk. Group companies are required to follow the Group Finance Manual guidelines with respect to assessing the creditworthiness of potential customers. These guidelines include processes such as obtaining approval for credit limits over a set amount, performing credit checks and assessments and obtaining additional security where required

Credit terms vary across the Group and can range from 0 to 90 days to reflect the different risks within each country in which the Group operates. There is no group-wide rate of provision, and provision is made for debts according to local conditions and past default experience

The movement in the provision for impairment of trade receivables is as follows

|   | 2017<br>£m | 2016<br>£m |
|---|------------|------------|
| At I January  | (65)       | (53)       |
| Provision for impairment of trade receivables   | (21)       | (21)       |
| Amounts written off during the year   | 16         | 10         |
| Unused amounts reversed   | 6          | 6          |
| Exchange differences  | 3          | (7)        |
| At 31 December  | (61)       | (65)       |
| The ageing of trade debtors, net of provision for imparment of trade receivables, is as follows |            |            |
|   | 2017<br>£m | 2016<br>£m |
| Accrued income  | 167        | 151        |
| Not yet due   | 754        | 769        |
| I-30 days overdue   | 143        | 125        |
| 31-60 days overdue  | 45         | 41         |
| 61-90 days overdue  | 21         | 22         |
| 91-180 days overdue   | 26         | 22         |
| 181-365 days overdue  | 13         |            |
| Over 365 days   | 8          | 5          |
| Net trade debtors and accrued income  | 1,177      | 1,146      |

No additional provision has been made on the above amounts as there has not been a significant change in credit quality and the Group believes that the amounts are still recoverable. The Group does not hold any collateral over these balances. The proportion of trade deptors at 31 December 2017 that were overdue for payment was 22% (2016-20%). The Group's DSO measure (days' sales outstanding) for continuing operations based on revenue from the last 90 days of the year is 52 days (2016, 46 days)

The directors believe that the fair value of trade and other receivables, being the present value of future cash flows, approximates to their book value

# 24 Construction contracts

|  | Note | 2017<br>£m | 2016<br>[m |
|--|------|------------|------------|
| Amounts due from contract customers included in trade and other receivables    | 23   | 17         | 17         |
| Amounts due to contract customers included in trade and other payables         | 29   | (2)        | (3)        |
| Net balances relating to construction contracts                                |      | . 15       |            |
| Contract costs incurred plus recognised profits less recognised losses to date |      | 173        | 198        |
| Less progress billings   |      | (158)      | (184)      |
| Net balances relating to construction contracts                                | _    | 15         | - 14       |

At 31 December 2017, advances received from customers for contract work amounted to £9m (2016, £14m), and the value of retentions held by customers for contract work amounted to  $\ell 3m$ :2016  $\ell 5m$ ). All trade and other receivables arising from construction contracts are due for settlement within one year

#### 25. Disposal groups classified as held for sale

As at 31 December 2017, disposal groups classified as held for sale include the assets and liabilities associated with minor operations in the Group's Africa, Asia Pacific, Latin America and Europe regions

As at 31 December 2016, disposal groups classified as held for sale include the assets and liabilities associated with a number of groupwide operations. The more material of these operations include G4S Israel, the US Youth Services business and the children's homes. business in the JK.

The major classes of assets and liabilities comprising the operations classified as held for sale are as follows

|   | 2017<br>£m  | 2016<br>£m |
|---|-------------|------------|
| Assets  |             |            |
| Goodwill  | 9           | 50         |

| Net assets of disposal groups   | 34          | 93         |

# 26 Cash, cash equivalents and bank overdrafts

The Group's Cash Solutions businesses provide a range of cash handling and processing services on behalf of customers. Certain of those services comprise collection, segregated storage and delivery of customer cash, with title to the cash handled remaining with the customer throughout the process. Such cash is never recorded in the Group's balance sheet

A number of other cash-processing services are provided to customers, such as the sale and purchase of physical cash balances, and the replenishment of ATMs and similar machines from customer funds held in Group bank accounts. Such funds, which are generally settled within two working days, are classified as "funds within cash-processing operations" along with the related balances due to and from customers in respect of unsettled transactions, and are included gross within the relevant balance sheet classifications.

| Funds within cash-processing operations  | 2017<br>£m | 2016<br>£m |
|--|------------|------------|
| Stocks of money included within cash and cash equivalents  | 74         | 95         |
| Overdraft facilities related to cash-processing operations, included within bank overdrafts                      | (19)       | (22)       |
| Liabilities to customers in respect of cash-processing operations, included within trade and other payables      | (62)       | (83)       |
| Receivables from customers in respect of cash-processing operations, included within trade and other receivables | 7          | 10         |
| Funds within cash-processing operations (net)  | -          |            |

#### 26 Cash, cash equivalents and bank overdrafts continued

Whilst such cash and bank balances are not formally restricted by legal title, they are restricted by the Group's own internal policies such that they cannot be used for the purposes of the Group's own operations. For the purposes of the Group's Consolidated statement of cash flow funds within cash-processing operations are therefore recorded net of the related balances due to and from customers in respect of unsettled transactions, within cash, cash equivalents and bank overdrafts, and hence have no impact on the Group's statutory cash flow

A reconciliation of cash, cash equivalents and bank overdrafts at the end of the year per the Consolidated statement of financial position to the corresponding balances included within the Consolidated statement of cash flow is as follows.

|  | 2017  | 2016 |
|--|-------|------|
|  | £m    | 4m   |
| Cash and cash equivalents in the Consolidated statement of financial position                          | 902   | 831  |
| Bank overdrafts in the Consolidated statement of financial position                                    | (284) | (93) |
| Cash, cash equivalents and pank overdrafts included within disposal groups classified as held for sale | 8     | 7    |
| Total cash, cash equivalents and bank overdrafts   | 626   | 745  |
| Add  |       |      |
| Liabilities to customers in respect of cash-processing operations, included within trade               |       |      |
| and other payables   | (62)  | (83) |
| Receivables from customers in respect of cash-processing operations, included within trade             |       |      |
| and other receivables  | 7     | 10   |
| Cash, cash equivalents and bank overdrafts at the end of the year in the Consolidated statement of     |       |      |
| cash flow  | 571   | 672  |

Cash and cash equivalents comprise principally snort-term money market deposits, current account balances and Group-owned cash held in ATM machines. At 31 December 2017 cash and cash equivalents earned interest at a weighted-average rate of 0.6% (2016) 0.6%). The credit risk on cash and cash equivalents is limited because wherever possible, and in accordance with Group Treasury policy the cash is placed with bank counterparties that hold investment grade credit ratings assigned by international credit-rating agencies

The Consolidated statement of financial position at 31 December 2016 has been re-presented to show the re-classification of certain items within cash and cash equivalents of £20m as tracing investments. As a consequence of this change in presentation, cash and cash equivalents at 31 December 2016 have decreased from £851m to £831m

Cash and cash equivalents of £71m (2016, £75m) are held by the Group's wholly-owned captive insurance subsidiaries. Their use is restricted to the settlement of claims against the Group's captive insurance subsidiaries

#### 27. Bank overdrafts, bank loans and loan notes

|   | 2017<br>£m | 2016<br>£m |
|---|------------|------------|
| Bank overdrafts   | 284        | 93         |

| At 31 December 2017 | 539              | 1,345       | 507              | 47           | 2,438       |
| Bank overdrafts     | 1                | 10          | 50               | 32           | 93          |
| Bank loans          |                  | ~           | 6                | 14           | 20          |
| Loan notes          | 3 <del>9</del> 5 | 1,366       | 631              | _            | 2,392       |
| At 31 December 2016 | 396              | 1,376       | 687              | 46           | 2,505       |

Of the borrowings in currencies other than Sterling, £1.214m (2016-£1,198m) is designated as a net-investment hedge

The weighted-average interest rates on bank overdrafts, bank loans and loan notes at 31 December 2017, adjusted for nedging, were as follows

|                    | 2017 | 2016 |
|--------------------|------|------|
|                    | %    | %    |
| Bank overdrafts    | 4.3  | 38   |
| Bank loans'        | _    | _    |
| Private loan notes | 4.8  | 4    |
| Public loan notes  | 3.7  | 3.5  |
|                    |      |      |

<sup>\*</sup> There were no material bank loans in place at either 31 December 2017 or 31 December 2016

At 31 December 2017, the Group's committed bank porrowings comprised a £1bn multi-currency revolving credit facility with £964m maturing in January 2022 and the remainder in January 2021. At 31 December 2017, this committed facility was undrawn Interest on all committed bank borrowing facilities is at prevailing LIBOR or EURIBOR rates (with a floor of zero), dependent upon the period of drawdown, plus an agreed margin, and is re-priced within one year or less

Borrowing at floating rates exposes the Group to cash-flow interest-rate risk. The management of this risk is discussed in note 31

The Group's main sources of finance and their applicable rates as of 31 December 2017 are set out below

|                                   |                                |                         | Post-hedging<br>average |      | Y    | ear of rede | swb ion si | ic amount: | ≤m,  |      |       |

a . Nominal debt amount. For fair value carrying amount, see note  $31\,$ 

b. Applying foreign exchange rates at 31 December 2017 or hedged foreign exchange rates where applicable

#### 27. Bank overdrafts, bank loans and loan notes continued

The Group's average cost of gross borrowings in 2017, net of interest hedging, was 4 1% (2016-4 1%)

In June 2017 the Group issued a €500m Public Bond which matures in June 2024 and pays an annual coupon of 1.5%

The committed bank facilities and the private loan notes are subject to one financial covenant (based on a net debt to Adjusted EBITDA ratio where Adjusted EBITDA is calculated as Group Adjusted PBITA plus depreciation and amortisation of non-acquisitionrelated intangible assets) and non-compliance with the covenant may lead to an acceleration of maturity. The Group complied with the financial covenant throughout the year to 31 December 2017 and the year to 31 December 2016. The Group has not defaulted on or breached the terms of, any material loans during the year

Bank overdrafts, bank loans, the loan notes issued in July 2008 and May 2009, €380m of the loan notes issued in December 2012, the loan notes issued in November 2016 and €400m of the loan notes issued in June 2017 are stated at amortised cost. The loan notes issued in March 2007 €120m of the loan notes issued in December 2012 and €100m of the loan notes issued in June 2017 are stated at amortised cost but are designated in a fair-value hedge relationship which has a fair-value adjustment in relation to the hedged

Cross-currency swaps with a nominal value of US\$50m (£37m) relating to the loan notes issued in July 2008 have a fair-value mark-tomarket gain of £12m (2016) gain £16m), predominantly resulting from fixing the Sterling value of this portion of the loan notes at an exchange rate of 1 975 and partly from fixing the Sterling and US dollar interest rates

Cross-currency swaps with a nominal value of €350m (£311m) relating to the loan notes issued in December 2012 have a fair-value mark-to-market gain of £30m (2016, gain £20m), predominantly resulting from fixing the Sterling value of this portion of the loan notes at an exchange rate of I 233 and partly from fixing the Sterling and Euro interest rates

Cross-currency swaps with a nominal value of €270m (£240m) relating to the loan notes issued in November 2016 have a fair-value mark-to-market loss of £9m (2016 loss £17m), predominantly resulting from fixing the Sterling value of this portion of the loan notes at an exchange rate of 1 109 and partly from fixing the Sterling and Euro interest rates

Cross-currency swaps with a nominal value of €400m (£356m) relating to the loan notes issued in June 2017 have a fair-value mark-tomarket gain of £12m, predominantly resulting from fixing the Sterling value of this portion of the loan notes at an exchange rate of I 157 and partly from fixing the Sterling and Euro interest rates

## 28. Obligations under finance leases

|  | Minimum lease<br>payments<br>2017<br>£m | Minimum lease<br>payments<br>2016<br>£m | Present value of<br>minimum lease<br>payments<br>2017<br>£m | Present value of minimum lease payments 2016 |
|--|---|---|---|--|

| Within one year  | 15                                      | 22                                      | 15  | 20   |
| In the second to fifth years inclusive   | 20                                      | 36                                      | 19  | 35   |
| After five years   | 1                                       | 2                                       | 1   | 2  |
|  | 36                                      | 60                                      | 35  | 57   |
| Less future finance charges on finance leases  | (1)                                     | (3)                                     |   |  |
| Present value of lease obligations   | 35                                      | 57                                      |   |  |
| Less amount due for settlement within 12 months (presented within current liabilities) |   |   | (15)  | (20)   |
| Amount due for settlement after 12 months (presented within non-current liabilities)   |   |   | 20  | 37   |

The Group leases certain of its fixtures and equipment under finance leases. The weighted-average lease term is six years (2016) six years) For the year ended 31 December 2017, the weighted-average effective borrowing rate was 5.7% (2016-5.7%) Interest rates are fixed at the related contract dates. All leases are on a fixed repayment basis and no arrangements have been entered into for contingent rental payments

The Group's obligations under finance leases are secured by the lessors' charges over the leased assets

#### 29. Trade and other payables

|  | Notes | 2017<br>£m | 2016<br>fm |
|--|-------|------------|------------|
| Within current liabilities.  |       | ,          |            |

| Not in a hedging relationship | _          | _          | 1           | _           |
| Forward-currency contracts    |            |            |             |             |
| Cash-flow hedges              | =          | =          | _           | 1           |
| Not in a hedging relationship | _          | I          | _           | _           |
|                               | 85         | 76         | 13          | 19          |
| Less' non-current portion     | (40)       | (53)       | (6)         | (14)        |
| Current portion               | 45         | 23         |             | 5           |

Derivative financial instruments are stated at fair value, measured using techniques consistent with Level 2 of the valuation hierarchy (inputs other than quoted prices in active markets that are observable for the asset and liability, either directly or indirectly). Market prices are sourced from Bloomberg or third-party relationship counterparty banks. The relevant currency-yield curve is used to forecast the floating-rate cash flows anticipated under the instrument, which are discounted back to the palance sheet date. This value is compared to the original transaction value giving a fair value of the instrument at the balance sheet date

Certain financial instruments are not designated or do not qualify for hedge accounting. Changes in fair value of any derivative instruments in this category are immediately recognised in the Consolidated income statement. In 2017 these included certain interest-rate swaps and in 2016 included certain forward-currency contracts used for interest and cash management

The mark-to-market valuation of the derivatives has improved by £15m during the year, mainly due to an increase in the value of the cross-currency swaps as a result of Sterling's weakness

#### Offsetting and enforceable master netting agreements

Financial assets and liabilities are offset and the net amount reported in the Consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. There were no material amounts offset in the Consolidated statement of financial position and no material. balances associated with enforceable master netting agreements were identified

#### 30. Derivative financial instruments continued

The interest-rate, cross-currency, and forward-currency contracts treated as cash-flow or net-investment hedges have the following maturities

|                              | Assets<br>2017<br>£m | Asvels<br>2016<br>Ém | Liabilities<br>2017<br>£m | Trabilities<br>2016<br>£m |
|------------------------------|----------------------|----------------------|---------------------------|---------------------------|
| Within one year              | 41                   | 12                   | _                         | 1                         |
| In the second year           | _                    | 36                   | -                         | _                         |
| In the fourth year           | _                    | -                    | _                         | 1                         |
| In the fifth year or greater | 26                   | _                    | 8                         | 17                        |
| Total carrying value         | 67                   | 48                   | 8                         | 19                        |

In the table above, derivatives are presented as either assets or liabilities at the date of maturity

The projected settlement of cash flows (including accrued interest) associated with derivatives treated as cash-flow or net investment hedges is as follows

|                              | Assets<br>2017<br>£m | Assecs<br>2016<br>Em | Liabilities<br>2017<br>Em | i iabili∟ies<br>2016<br>£m |
|------------------------------|----------------------|----------------------|---------------------------|----------------------------|
| Within one year              | 41                   | 16                   | 10                        | 5                          |
| In the second year           | (7)                  | 35                   | 3                         | 4                          |
| In the third year            | (7)                  | -                    | 3                         | 4                          |
| In the fourth year           | (7)                  | _                    | 3                         | 3                          |
| In the fifth year or greater | 50                   | -                    | (5)                       | 3                          |
| Total cash flows             |                      | 51                   | .14                       |                            |

#### 31. Financial risk

#### Capital management

£964m of the original £1 billion multi-currency revolving credit facility matures in January 2022, with the remainder maturing in January 2021 At 31 December 2017 there were no drawings from the facility

In May 2017, Standard & Poor's affirmed the Group's long-term credit rating of BBB- (negative). The Group will continue to manage its capital structure so that it retains an investment-grade rating

The Group's policy objective is a net debt to Adjusted EBITDA ratio of less than 2.5x. At the end of 2017 the ratio was 2.4x (2016 28x)

The next debt maturities are £44m and US\$224m of US Private Placement debt maturing in July 2018 and a €500m Public Bond maturing in December 2018. Overall the debt portfolio has a medium to long-term debt maturity profile. The Group is currently well placed to access finance from the debt-capital markets and from the bank market if required. Borrowings are principally in Sterling, US dollars and Euros reflecting the geographies of the Group's significant operational assets and profits

#### Liquidity risk

The Group mitigates liquidity risk by ensuring there are sufficient undrawn committed facilities available to it. For more details of the Group's bank overdrafts, bank loans and loan notes see note 27

The percentage of the available committed Revolving Credit Facility that was undrawn during the course of the year was as follows

| 31 December 2016  | 100% |
|-------------------|------|
| 31 March 2017     | 86%  |
| 30 June 2017      | 93%  |
| 30 September 2017 | 89%  |
| 31 December 2017  | 100% |

To reduce re-financing risk, Group Treasury obtains finance with a range of maturities to minimise the impact of a single material source of finance terminating on a single date

Re-financing risk is further reduced by Group Treasury opening negotiations to either replace or extend any major medium-term facility at least 12 months before its termination date

### Maturity profile of loans and borrowings

The contractual maturities of financial assets and liabilities, estimated based on expectations at the reporting date, together with their carrying amounts including interest payments in the Consolidated statement of financial position, are shown below, subtotalled by category

|   |       |                    |                    | Total                     |                  |              |                  |

<sup>\* £44</sup>m of July 2008 loan notes €90m (£66m) of May 2012 loan notes and €120m (£89m) of December 2012 loan notes were held in fair-value neege relationships

Note In the table above, certain values are presented gross, to show both the asset and the liability

The gross cash flows disclosed in the tables above represent the contractual undiscounted cash flows relating to derivative financial assets and liabilities held for risk management purposes and which are usually not closed out before contractual maturity. The disclosure shows the net cash-flow amount for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross cash settlement – e.g. forward-currency contracts

<sup>\*\*</sup> Excluding cash and overdraft balances in respect of cash-processing operations (see note 26)

#### Market risk

#### Currency risk and forward-currency contracts

The Group conducts business in many currencies. Transaction risk is limited since, wherever possible, each business operates and conducts its financing activities in local currency. However, the Group presents its consolidated financial statements in Sterling and it is in consequence subject to foreign-exchange risk due to the translation of the results and net assets of its foreign subsidiaries

Treasury policy is to manage significant translation risks in respect of net operating assets and its consolidated net debt/Adjusted EBITDA ratio by holding foreign currency denominated loans, cross-currency swaps and to a lesser extent forward-currency contracts The Group has hedged a substantial proportion of its exposure to fluctuations in the translation into Sterling of its overseas net assets through these nstruments

Translation adjustments arising on the translation of foreign currency loans and on changes in the fair value of cross-currency swaps meeting hedge accounting criteria are recognised in equity to match translation adjustments on foreign currency equity investments as they qualify as net investment hedges with no residual impact to equity

At 31 December 2017, the Group's US dollar and Euro net assets were approximately 91% and 90% respectively hedged by foreign currency loans and the cross-currency swaps designated as net-investment hedges (2016, US dollar 80%, Euro 93%)

Cross-currency swaps with a nominal value of \$449m (£332m) were arranged and designated as net-investment hedges

Cross-currency swaps with a nominal value of £25m are in place hedging the foreign currency risk on US\$50m of the second US Private Placement notes issued in July 2008, effectively fixing the Sterling value of this portion of debt at an exchange rate of 1 9750

Cross-currency swaps with a nominal value of £284m are in place hedging the foreign currency risk on €350m of the Euro public notes issued in December 2012, effectively fixing the Sterling value of this portion of debt at an exchange rate of I 2332

Cross-currency swaps with a nominal value of £244m are in place hedging the foreign currency risk on €270m of the Euro public notes issued in November 2016, effectively fixing the Sterling value of this portion of debt at an exchange rate of 1 1088

Cross-currency swaps with a nominal value of £346m were arranged to hedge the foreign currency risk on €400m of the Euro public notes issued in June 2017, effectively fixing the Sterling value of this portion of debt at an exchange rate of LIS70

Applying the relative movements in US dollar and Euro foreign exchange rates against Sterling in 2017 compared with 2016 to carrying values at 31 December 2017, the fair value not gain on the cross-currency swaps which hedge part of the currency loan notes would have increased by £33m with a direct impact on the Consolidated income statement. This would be offset by an equal and opposite revaluation to the underlying bonds. Any of the underlying bonds not in a cash-flow hedge are in a net investment hedge relationship. so that ultimately the impact on the Consolidated income statement is nil

#### Interest-rate risk and interest-rate swaps

Much of the Group's debt is issued at fixed rate, but to the extent there is borrowing at floating rates as described in note 27, the Group is exposed to cash-flow interest-rate risk, which the Group manages within policy limits approved by the directors. Interest-rate swaps and, to a limited extent, forward-rate agreements are utilised to fix the interest rate on a proportion of borrowings on a reducing scale over forward periods up to a maximum of five years. At 31 December 2017 there were no such contracts in place (2016, £60m)

The US Private Placement market is predominantly a fixed-rate market, with investors preferring a fixed-rate return over the life of the loan notes. At the time of the first Issue in March 2007, the Group was comfortable with the proportion of floating rate exposure not hedged by interest-rate swaps and therefore rather than take on a higher proportion of fixed-rate debt arranged fixed to floating swaps effectively converting the fixed coupon on the Private Placement to a floating rate. Following the swaps the resulting average coupon on the US Private Placement is LIBOR + 60bps. These swaps have been documented as fair-value hedges of the US Private Placement fixed interest loan notes, with the movements in their fair value recognised in the Consolidated income statement at the same time as the movement in the fair value of the hedged item

The interest on the US Private Placement notes issued in July 2008, the Sterling public notes issued in May 2009, €5 IOm of the Euro public notes issued in May 2012. €380m of the Euro public notes issued in December 2012, the Euro public notes issued in November 2016 and €460m of the public notes issued in June 2017 was initially kept at fixed rate. In April 2014, the interest rate on £44m of the US Private Placement notes issued in July 2008 and on all the Sterling public notes issued in May 2009 was swapped from fixed to floating for a period of three years using derivatives and therefore matured in 2017

All four public notes have a coupon step-up of I 25% which is triggered should the credit rating of G45 plc fall below investment grade

The core Group berrowings are held in US dollars, Euros and Sterling. Although the impact of rising interest rates is largely shielded by fixed-rate loans and interest-rate swaps, which provide certainty on the vast majority of the exposure, some interest-rate risk remains

A 1% increase in interest rates across the yield curve in each of these currencies, with the 31 December 2017 debt position constant throughout 2018 would result in an expectation of an additional interest charge of £6m in the 2018 financial year

#### Commodity risk and commodity swaps

The Group's principal commodity risk relates to the fluctuating level of diesel prices, particularly affecting its Cash Solutions businesses Commodity swaps and commodity options are on occasions used to fix synthetically part of the exposure and reduce the associated cost volatility. The hedging programme is under evaluation, and as a consequence there was no commodity nedging in place, at 31 December 2017

#### 31. Financial risk continued

#### Counterparty credit risk

The Group's strategy for credit-risk management is to set minimum credit ratings for counterparties and to monitor these on a regular basis

For treasury-related transactions, the Group's policy limits the aggregate credit risk assigned to a counterparty. The utilisation of a credit limit is calculated by applying a weighting to the notional value of each transaction outstanding with each counterparty based on the type and duration of the transaction. The total mark-to-market value outstanding with each counterparty is also closely monitored against policy limits assigned to each counterparty. For short-term transactions (under one year), at inception of the transaction, the financial counterparty must be investment-grade rated by either the Standard & Poor's or Moody's rating agencies. For long-term transactions, at inception of the transaction, unless otherwise approved, the financial counterparty must have a minimum rating of BBB+/Baal from Standard & Poor's or Moody's

Treasury transactions are dealt with through the Group's relationship banks, all of which have a strong investment grade rating. At 31 December 2017 the largest two counterparty exposures related to treasury transactions were £48m and £29m and both were neld with institutions with a long-term Standard & Poor's credit rating of A. These exposures represent 29% and 18% of the carrying values of the treasury transactions, with a fair value gain at the balance sheet date. Both of these banks had significant loan commitments outstanding to G4S plc at 31 December 2017

The Group operates a multi-currency notional pooling cash management system with a wholly-owned subsidiary of an A-rated bank. At year end, credit balances of £271m were pooled with depit balances of £260m, resulting in a net pool credit balance. of £11m. There exists a legal right of set-off under the pooling agreement and an overdraft facility of £3m. In accordance with IFRS Interpretations Committee (IC) requirements, the cash and overgraft pool balances are presented gross in the Consolidated statement of financial position

At an operating level the minimum investment-grade rating criteria applies. Exceptionally, where required by local country circumstances, counterparties with no rating or a non-investment grade rating can be approved as counterparties for a period of up to 12 months. Due to the Group's global geographical footprint and exposure to multiple industries, there is minimal concentration risk

#### 32. Retirement benefit obligations

The Group operates a wide range of retirement benefit arrangements which are established in accordance with local conditions and practices within the countries concerned. These include funded defined contribution, multi-employer and funded and unfunded defined benefit schemes

#### Defined contribution arrangements

The majority of the retirement benefit arrangements operated by the Group are of a defined contribution structure, where the employer contnoution and resulting income statement charge is fixed at a set level or is a set percentage of employees' pay. Contributions made to defined contribution schemes in 2017 and charged to the Consolidated income statement totalled £67m (2016 £77m)

In the UK, following the closure of the defined benefit schemes to new entrants in 2004, the main scheme for new employees is a contracted-in defined contribution scheme

### Multi-employer arrangement

In the Netherlands, most employees are members of the Security Industry Wide Pension Fund (IWPF). This is a career-average defined benefit plan. Pensionable salary is subject to a cap, and minus an offset that reflects social security levels. Withdrawal from the scheme is only possible under certain strict conditions determined by Dutch law and by the pension fund board of the IWPF

The plan is funded by a premium that is set by the IWPF board in line with the financing rules that state that the premium should cover the cost of the annual accrual of pension benefits. As of 1 January 2018 the premium is 35.3% and historically has been around 30% of pensionable salaries. The employer pays 60% of this premium and the employees the remaining 40%

The financing rules specify that an employer is not obliged to pay any further premiums in respect of previously accrued benefits. This means that in case of insufficient funding, the benefits of participants could, in theory, be reduced. The current solvency ratio is 104.2% (December 2017) The required solvency ratio according to Dutch law is 124.2% (as at 31 December 2017). Should a surplus appear within the scheme the board will decide if a reduction in premium is possible although this would only be possible at much higher solvency levels

Premiums paid to the scheme by the Group and charged to the Consolidated income statement in 2017 totalled £11m (2016 £10m) The estimated premium expected to be paid to the scheme during the financial year commencing 1 January 2018 in respect of the on-going accrual of benefits is approximately £12m

The scheme is not accounted for as a defined benefit scheme under IAS 19 – Employee Benefits as it is not possible to identify the Group's share of the scheme's assets and liabilities. As a result, and in line with general practice for such schemes, the scheme is accounted for as if it were a defined contribution scheme under IAS 19.

The Netherlands Cash Solutions Pension Plan ("the Cash Solutions scheme") is a separate scheme operated by the Group but is required to provide benefits at least equivalent to the IWPF, and in particular pension increases in payment and deferment, as well as revaluation of active members' rights in the Cash Solutions scheme, have to follow the multi-employer scheme (which applies a conditional approach).

#### Defined benefit arrangements

The Group operates several funded defined retirement benefit schemes where the benefits are based on employees' length of service Whilst the Group's primary scheme is in the UK, it also operates the Cash Solutions scheme in the Netherlands and other less material plans elsewhere. Under funded arrangements, the assets of defined benefit schemes are held in separate trustee-administered funds or similar structures in the countries concerned

#### Consolidated income statement

The amounts recognised in the Consolidated income statement in relation to the material funded schemes are included within the following categories

|   | 2017 | 2016 |
|---|------|------|
|   | £m   | LM   |
| Cost of sales                                     | 4    | 4    |
| Administration expenses                           | 2    | 2    |
| Net finance costs                                 | 8    | 7    |
| Total for material funded defined benefit schemes | 14   | 13   |

There are also various less material unfunded arrangements, for which the Group does not hold related assets separate from the Group In aggregate other unfunded arrangements neurred £10m (2016 £8m) of costs within cost of sales and finance costs of £3m (2016 £3m)

#### Consolidated statement of comprehensive income

Re-measurements of the net defined benefit obligation are recognised in full in the Consolidated statement of comprehensive income in the year in which they arise. These comprise the impact on the net defined benefit liability of changes in demographic and financial assumptions compared with the start of the year, actual expenence being different to those assumptions and the return on plan assets above the amount included in the net pension interest expense. During the year the Group recognised a total net re-measurement gain of £26m (2016 loss of £169m) within other comprehensive income (OCI) comprising a re-measurement gain of £29m (2016 loss of £164m) relating to material funded defined benefit schemes offset by a re-measurement loss of £3m (2016 loss of £5m) relating to unfunded or other funded defined benefit schemes

#### Consolidated statement of financial position

The Group's net defined benefit deficit recognised in the Consolidated statement of financial position at 31 December 2017 was £381m (2016 £437m), or £318m (2016 £368m) net of applicable tax in the relevant jurisdictions

The defined benefit obligations (DBO) and assets for defined benefit schemes are as follows

| 2017  | DBO<br>£m | Assets<br>£m | (Deficit)/surplus<br>£m |
|---|-----------|--------------|-------------------------|
| UK sections:  |           |              |                         |

#### 32. Retirement benefit obligations continued

#### UK defined benefit scheme

The defined benefit scheme in the UK accounts for 88% (2016-94%) of the net balance sheet liability for material funded defined retirement benefit schemes. It comprises three sections, the Group 4 section which is the pension scheme demerged from the former Group 4 Falck A.S., the Securicor section for which the Group assumed responsibility on 20 July 2004 with the acquisition of Securicor plc, and the GSL section, for which the Group assumed responsibility on 12 May 2008 with the acquisition of GSL

The UK scheme is closed to future accrual apart from some sub-sections of the GSL section, and for most members defines the pension based on final salary. Certain sub-sections of the GSL section have historically remained open to provide a facility to accept former public-sector employees who join the Group through outsourcings. In the Group 4 and Securicor sections, members retain their link to final salary where appropriate on their benefits accrued up to closure in 2011

As at the latest actuarial funding valuation the participants of the UK pension scheme sections can be analysed as follows

| At 5 April 2015        | Group 4 section | GSL<br>section | Securicor<br>section | Total  |
|------------------------|-----------------|----------------|----------------------|--------|
| Active participants    | 300 011         | 3000011        | ,                    | , ocar |
| Number                 | _               | 607            | _                    | 607    |
| Average age            | N/A             | 49 0           | N/A                  | 49.0   |
| Deferred participants  |                 |                |                      |        |
| Number                 | 3,653           | I 236          | 8.535                | 13,424 |
| Average age            | 520             | 510            | 530                  | 52.5   |
| Pensioner participants |                 |                |                      |        |
| Number                 | 3,346           | 883            | 9 55 1               | 13,780 |
| Average age            | 710             | 65 0           | 690                  | 69.2   |

There is a mix of fixed and inflation-dependent pension increases, in payment and deferment), which vary from member to member according to their membership history and the section of the scheme

The discounted weighted-average duration of the accrued liabilities of the sections is as follows

|           | 2017 | 2016 |
|-----------|------|------|
| Group 4   | 17   | 17   |
| GSL       | 19   | 20   |
| Securicor | 18   | 18   |

The scheme is set up under UK law and governed by a Trustee company which is responsible for the scheme's investments. administration and management. The Board of the Trustee company comprises an independent chairman and further independent, Group and scheme membership representatives

The current schedule of deficit recovery contributions provides for a contribution of approximately £41m during 2018. In addition the Company has pledged a share of any material disposal proceeds to the pension scheme (to be shared in the same proportion as the pension scheme deficit bears to overall group indebtedness) and has agreed that additional contributions would be made in the event that the average annual dividend payment to ordinary shareholders over the three financial years 2016, 2017 and 2018 exceeds a certain threshold or in the event that the Company makes a significant special dividend payment (or equivalent capital return), to its ordinary shareholders over the same period

A funding valuation is carried out for the scheme's Trustee every three years by an independent firm of actuaries. Depending on the outcome of that valuation a schedule of future contributions is negotiated, the Group has guaranteed any contributions due from its subsidiaries

Under the terms of the existing agreement with the pension trustees, deficit payments are due to increase by 3% per annum until the next funding valuation in 2018 when they will be subject to review and potential renegotiation

The Group has concluded that it should allow for a refund of any residual surplus in all three sections of the UK Scheme assuming wind-up after all benefits have been paid in the normal course of events. Therefore no adjustments for asset ceiling or additional liabilities under the IFRIC 14 interpretation are made. At present the GSE section has a surplus and the other two sections have deficits. The IASB is proposing to amend IFRIC 14 and the Group, will assess of there are any implications once the final form of the revised interpretation is clarified

### Principal risks

The Group's pension schemes create a number of risk exposures. Annual increases in benefits are to a varying extent from scheme to scheme, dependent on inflation so the main uncertainties affecting the level of benefits payable are future inflation levels (including the impact of inflation on future salary increases) and the actual longevity of the membership. Benefits payable will also be influenced by a range of other factors including member decisions on matters such as when to retire and the possibility to draw benefits in different forms

A key risk is that additional contributions are required if the investment returns fall short of those anticipated when setting the contributions to the pension plans. For the UK funding valuation those assumed investment returns (for funding valuations) are set. based on fixed margins over the LIBOR swap curve. The management of the UK pension fund assets has been delegated to an asset manager, who manages the assets against a liability benchmark. The key parameters of this mandate can be summarised as follows

| Risk                          | Description   | Mitgator  |
|-------------------------------|---|---|
| Asset mix                     | The plan assets may fall in value   | The assets are managed dynamically over time rather than a set strategic allocation   |
| Interest rate risk            | The plan assets may fall in value as a result of a fall in interest rates   | Managed with the benchmark of hedging 100% of these risks as a percentage of the asset value through the use of debt instruments (government bonds) and derivatives   |
| Inflation risk                | The plan assets may fall in value as a result of rise in inflation  | Managed with the benchmark of hedging 100% of these risks as a percentage of the asset value through the use of debt instruments (government bonds) and derivatives   |
| Currency risk                 | Any plan assets held in foreign currencies<br>are exposed to changes in foreign currency<br>exchange rates  | Managed with the objective of hedging at least 70% of the overseas currency exposure in the portfolio through the use of forward foreign currency contracts   |
| Regulatory risk               | All pension schemes are regulated by the relevant jurisdictions. These include extensive legislation and regulatory mechanisms that are subject to change and may impact the Group's pension schemes.   | G4S monitors changes in regulations in the UK and the Netherlands to assess the potential impact these changes could have on the Group's material pension schemes   |
| Actuarial<br>assumptions risk | Actuarial assumptions made on a range of demographic and financial matters that are used to project the expected benefit payments including future inflation, salary growth and life expectancy. The DBO and service cost are also very sensitive to the IAS 19 discount rate, which determines the discounted value of the projected benefit payments. The discount rate depends on market yields on high-quality corporate bonds. | The UK pension trustees have adopted investment strategies to mitigate changes in key assumptions applied to the valuation of pension liabilities for funding purposes. These strategies mainly hedge against interest rate and inflation expectations generally, as described above, but do not specifically seek to nedge against changes in credit spreads that also affect the IAS 19 discount rate. As a result the difference between the market value of the assets and the valuation of the pension obligations under IAS 19 may be volatile. |

# Financial assumptions and sensitivity analysis

The weighted averages for each of the principal assumptions used for the purposes of the actuarial valuations were as follows

| ÜK   | Netherlands |
|--|-------------|
| Key assumptions used at 31 December 2017   |             |
| Discount rate 2.55%  | 2 0%        |
| Expected rate of salary increases 3.3%   | N/A         |
| Pension increases in payment (for the UK, at RPI" with a limit of 5% p.a.)  3.1% | 1.2%        |
| Inflation 3.2%   | I 8%        |
| Key assumptions used at 31 December 2016   |             |
| Discount rate 25%  | 2 0%        |
| Expected rate of salary increases 3.4%   | N/A         |
| Pension increases in payment (for the UK, at RPI* with a limit of 5% p.a.)       | 0.8%        |
| Inflation 3 3%   | 1 9%        |

RPI with a limit of 5% pill is the most common level of increase in the LIK arrangements. Assumptions for other increases are derived, om the apove inflation. assimption for RPI, and an annual CPI assumption of 2.2% (2016) 2.3% as appropriate

IAS 19 specifies that pension liabilities should be discounted at appropriate high quality corporate bond rates. The Group considers that it is appropriate to consider AA-rated corporate bonds as high quality and has therefore used discount rates based on yields on such bonds corresponding to the liability profile of the respective schemes. In 2017 the Group has refined its approach to exclude certain university and government-backed bonds that the Group does not consider to be corporate bonds for the purposes of IAS 19

The effect of a movement in the discount rate applicable in the UK alters reported liabilities (before associated deferred tax adjustments) by approximately the amounts shown in the table overleaf

|  | DBO of the UK scheme       | DBC of the UK .cheme       |
|  | 2017                       | 2316                       |
| Sensitivity analysis                   | £m                         | £m.                        |
| Inflation assumption being 0.5% higher | 90                         | 92                         |
| Inflation assumption being 0.5% lower  | (95)                       | (85)                       |

The above sensitivities allow for inflation-dependent assumptions such as salary growth and relevant pension increases to vary corresponding to the inflation assumption variation. Due to the caps and floors on pension increases a certain movement in the inflation. assumption will not generally result in the same movement in the pension increase assumption

#### Demographic assumptions and sensitivity analysis

In addition to the above, the Group uses appropriate mortality assumptions when calculating the schemes obligations. The mortality tables used for the scheme in the UK are Birth year table S2P[MiF]A Base with future improvements in line with CMI\_2015 Core projections, based on a long-term improvement rate of 1 25% p.a. and allowing for individual scaling factors based on the mortality analysis carried out as part of the last funding valuation

The resulting assumed life expectancy of a male member of the UK schemes currently aged 65 is 21 years. The assumed life expectancy at 65 of a male currently aged 52 is 22 years. At those ages, the assumed life expectancy for a female member is between two and three years longer than for a male member

The effect of a one-year change in this UK life expectancy assumption is to alter reported liabilities (before associated deferred tax adjustments) by approximately £123m (2016, £137m)

The selection of these movements to Illustrate the sensitivity of the DBO to key assumptions should not be interpreted as the Group expressing any specific view of the probability of such movements happening

# Analysis of amounts recognised in the Group's Consolidated statement of financial position

The amounts recognised in the Group's Consolidated statement of financial position in respect of the material funded defined benefit schemes, and in the various components of income, OCI and cash flow are as follows

| 2017  | DBO<br>£m | Assets<br>£m | Provision<br>£m |
|---|-----------|--------------|-----------------|
| Amounts recognised in the Consolidated statement of financial position at the                 |           |              |                 |

<sup>\*</sup> Total le-measurements recognised in OCI in 2015 of £169m are shown let of re-measurements relating to other unfur ded schemes of £5m

Employer contributions in 2017 included £40m (2016: £39m) of additional contributions in respect of the deficit in the UK schemes

# Analysis of scheme assets

The composition of the scheme assets at the reporting date is as follows

| 2017             | UK<br>£m    | Netherlands<br>£m | Total<br>£m |
|------------------|-------------|-------------------|-------------|
| Equity           | 552         | 10                | 562         |
| Government bonds | 72          | 39                | 111         |
| Other            | 1,721       | 14                | 1,735       |
| Total            | 2,345       | 63                | 2,408       |
|                  | ,           | ,                 |             |
| 2017             | UK          | Netherland        | l oʻlal     |
| 7016             | ĒM<br>Z 4 Z | <u> </u>          | <u>ζ</u> m  |
| Equity           | 747         |                   | 758         |
| Government bonds | 237         | 39                | 276         |
| Other            | 1,355       | 10                | 1,365       |
| Total            | 2,339       | 60                | 2,399       |

A more granular approximate split of assets of the UK scheme at 31 December 2017 is as follows

|                           | 2017  | 2016  |
|---------------------------|-------|-------|
|                           | £m    | £m    |
| Equity                    | 409   | 628   |
| Private equity            | 143   | 119   |
| Government bonds          | 72    | 237   |
| Credit                    | 83    | 51    |
| Property Property         | 83    | 71    |
| Macro-onentated           | 243   | 339   |
| Multi-strategy            | 202   | 217   |
| Denvatives                | 382   | 412   |
| Cash and cash equivalents | 728   | 265   |
| Total UK assets           | 2,345 | 2,339 |

Multi-strategy assets are held in a pooled fund structure, which is a multi-asset fund investing across all asset classes

Within the UK pension fund, the Equity, Credit, Macro-orientated and Multi-strategy sub-categories consist of pooled vehicles investing predominantly in assets with quoted prices in active markets. All government bonds are issued by the UK government and have quoted prices in active markets. Other UK investments are predominantly unquoted

Derivatives include a range of interest-rate and inflation-linked swaps, forward-currency contracts, equity-index total return swaps, equity options, and futures. Investing in interest-rate and inflation-linked swaps is designed to mitigate the impact of future changes in interest. rates and inflation

None of the pension scheme assets are held in the Group's own financial instruments or in any assets held or used by the Group

The fair value of directly-held securities (equities and bonds) is taken as the closing price on an actively-traded market. Fair value of holdings in pooled funds is provided by the investment manager, who calculates the price based on the aggregate value of the underlying assets held by the fund (based on closing prices of the securities on an actively-traded market) and the number of units issued

|                                     | 242 |

Judgment is required in quantifying the Group's provisions particularly in connection with claims and onerous customer contracts, which are based on a number of assumptions and estimates where the ultimate outcome may be different to the amount provided Each of these provisions reflects the Group's best estimate of the probable exposure at 31 December 2017 and this assessment has been made having considered the sensitivity of each provision to reasonably possible changes in key assumptions. The Group is satisfied that it is unlikely that changes in these key assumptions will have a material impact on the Group's overall provisioning position in the next 12 months

#### **Employee benefits**

The provision for employee benefits is in respect of any employee benefits, which accrue over the working lives of the employees typically including items such as long service awards and termination indemnity schemes

The Group's net obligation in respect of long-term service benefits other than retirement benefits represents the present value of the future benefit that employees have earned at the balance sheet date, less the fair value of scheme assets out of which the obligations are to be settled directly

## Notes to the consolidated financial statements continued

#### 33. Provisions and contingent liabilities continued

Restructuring provisions include amounts for redundancy payments, and the costs of closure of activities in acquired businesses and discontinued operations. Settlement of restructuring provisions is highly probable. The timing is uncertain but is generally likely to be short-term. During the year the Group incurred restructuring costs of £20m (2016, £12m) within specific items relating to the multi-year strategic productivity programme across the Group. In addition, the Group incurred non-strategic reorganisation costs of £10m (2016 £9m) which are included within Adjusted PBITA

#### Claims

Claims provisions represent any outstanding litigation claims against the Group that are considered likely to lead to the outflow of funds in the future, including provisions within the captive insurance companies to cover (where appropriate) anticipated claims incurred as at the balance sheet date, based on actuanal assessments to calculate the liabilities

These claims reserves are held by the Group's wholly-owned captive insurance subsidianes in Guernsey and the US which underwrite part of the Group's Cash Solutions, general liability, workers' compensation and auto liability policies. In the year the Group provided £36m (2016 £20m) in relation to claims made under these policies which comprise a significant number of unrelated claims, most of which are individually immaterial. Claims provisions are subject to regular actuarial review and are adjusted as appropriate. Settlement of these provisions is highly probable but both the value of the final settlements and their timing is uncertain, dependent upon the outcome of on-going processes to determine both liability and quantum in respect of a wide range of claims or possible claims

During the year the Group also recognised additional provisions of £9m mainly relating to the settlement of labour-related disputes in North and Latin America in respect of prior years, and £6m relating to the estimated cost of settlement of subcontractor claims from commercial disputes in respect of prior years. Both of these amounts have been presented within specific items in the Consolidated income statement

#### Onerous customer contracts

The Group recognised as specific items additional onerous contract provisions of £19m (2016-£4m) relating primarily to the anticipated total losses over the next 15 to 20 years in respect of certain UK contracts. It is expected that around 60% of the Group's total provision for onerous contracts will be utilised by the end of 2020, mainly as the Compass contract comes to an end in August 2019 Given the short period remaining to the finalisation of this contract, any potential future changes to key assumptions made when estimating its future losses are not expected to have a significant impact. The additional expected losses of £19m are mainly related to two other PFI contracts where there has been an expected increase in costs to deliver the required maintenance regime. The expected additional future losses are expected to be partially offset by profit improvement plans, although these are reflected only to the extent that they have been implemented and are delivering the expected savings. A number of profit improvement plans that have been designed but which have not yet been embedded successfully in the contract delivery were not considered when estimating future expected losses. This is consistent with the Group's policy which requires evidence that profit improvement plans will be successfully implemented before they are reflected in anticipated future cash flow projections for onerous contract provisioning purposes. There is no single change in key variables that could materially affect future expected losses on these contracts. Furthermore, management believes that the current level of provision is balanced and that any significant potential downside from possible changes to key assumptions could be offset by further progress made in those profit improvement plans that have not been considered following the Group's policy described above. The discount rates applied when calculating onerous contract provisions for these contracts were between 14% and 17%

#### Property and other

Included within property and other provisions are future liabilities for long-term idle leased properties, for properties sub-let at a shortfall, for the cost of replacing or reinstalling assets where there is a present contractual requirement, and for customer claims on contracts that are related to the performance on a contract but do not form part of onerous customer contract provisions Whilst the likelihood of settlement of these obligations is considered probable, there is uncertainty over their value and duration

Included in property and other provisions are contract-related provisions of £35m (2016-£43m) and onerous property lease provisions of £17m (2016 £16m)

#### Contingent liabilities

The Group is involved in disputes in a number of countries, mainly related to activities incidental to its operations. Currently there are a number of disputes open in relation to the application of local labour law, commercial agreements with customers and subcontractors and claims and compliance matters, in some cases in the course of litigation. In addition, the interpretation of labour laws and regulations in a number of countries where the Group operates is complex and there is inherent judgment made when applying those laws and regulations that are open to interpretation. As such, there is risk that further disputes and claims from employees could arise in the future. Where there is a dispute or where there is a risk of a dispute or claims in the future and where, based on legal counsel advice. the Group estimates that it is probable that the dispute will result in an outflow of economic resources, provision is made based on the Group's best estimate of the likely financial outcome. Where a reliable estimate cannot be made, or where the Group, based on legal counsel advice considers that it is not probable that there will be an outflow of economic resources, no provision is recognised

In this regard, the Group is party to a number of on-going litigation processes in relation to interpretation of local labour law and regulations in a number of countries, and where it is expected that these matters will not be resolved in the near future. At this stage, the Group's view is that these cases will either be resolved in a manner favourable to the interests of the Group or, due to the nature and complexity of the cases, it is not possible to estimate the potential economic exposure. In addition, in the ordinary course of business, other contingent liabilities exist where the Group is subject to commercial claims and litigation from a range of parties in respect of contracts, agreements, regulatory and compliance matters, none of which are expected to have a material impact on the Group

The investigation opened by the Serious Fraud Office in 2013 in respect of the Group's Electronic Monitoring contract remains ongoing. The Group continues to co-operate fully with the investigation but, based on currently available information, is unable to make a reliable estimate of the outcome of that review

#### 34. Deferred tax

The following are the major deferred tax liabilities and assets recognised by the Group and movements thereon during the year

|  | Retirement<br>benefit |            | Other temporary |       |
|--|-----------------------|------------|-----------------|-------|
|  | obligations           | Tax losses | differences     | Total |
|  | £m                    | £m         | £m              | £m    |

Certain deferred tax assets and liabilities have been offset where permitted. The following is the analysis of the deferred tax balances (after offset)

|   | 2017       | 2015 |
|---|------------|------|
|   | £m         | t_M  |
| Deferred tax liabilities  | (8)        | (14) |
| Deferred tax assets   | 240        | 285  |
| Net deferred tax .liability/asset included in assets of disposal groups classified as held for sale | <b>(1)</b> |      |
| Net deferred tax assets   | 231        | 272  |

At 31 December 2017, the Group had unutilised tax losses of approximately £780m (2016, £842m) potentially available for offset against future profits. A deferred tax asset of £92m (2016 £110m) has been recognised in respect of approximately £508m (2016 £529m) of gross losses based on profitability from approved budgets and business plans

No deferred tax asset has been recognised in respect of the remaining £272m (2016 £313m) of gross losses due to the unpredictability and availability of future profit streams in the relevant jurisdictions, and the fact that a significant proportion of such losses remains unaudited by the relevant tax authorities. In certain cases, there are continuing structural issues, which prevent the utilisation of losses within the foreseeable future. Losses which will never be utilised, for example due to the operation of statute are not included in the above figures

Approximately £54m (2016 £80m) of the gross unrecognised losses relate to the UK group. Utilisation of such losses is dependent. upon the profitability of particular trading and corporate entities. The financial projections used in assessing the future profitability are consistent with those used in assessing the carrying value of goodwill as set out in note 18. The utilisation of these losses will occur at different rates due to the incidence and timing of profits within these entities, which consequently impacts their recognition as deferred

Included in unrecognised tax losses are gross losses of £27m :2016 £40m) which will expire between 2018 and 2026. Other losses may be carried forward indefinitely

At 31 December 2017, the Group has capital losses available to carry forward of approximately £2.6bn (2016) £0.25bn). The in-year increase is mainly related to liquidation of dormant holding companies crystallising tax losses. These losses have no expiry date and have not been agreed with the relevant tax authorities. No deferred tax assets have been recognised in respect of these losses on the basis that the likelihood of their future utilisation is considered to be remote

At 31 December 2017, the aggregate amount of undistributed earnings of non-UK subsidianes and joint ventures on which temporary differences may exist was £1416m (2016 £1646m). A deferred tax liability of £2m (2016 £3m) has been recognised on undistributed earnings, based on expected distributions from such subsidiaries and joint ventures

Other temporary differences vary by country and include items relating to the local tax treatment of fixed assets, employee benefits and provisions

Other reserves include

#### Hedging reserve

The nedging reserve comprises the effective portion of the cumulative net change in the fair value of cash-flow hedging instruments related to the hedged transactions that have not yet occurred (net of tax). During the year a fair value gain of £21m (2016, £69m). was recognised in the hedging reserve relating to the increase in fair value of the cash-flow hedging instruments. Out of this gain,  $\ell 2 \, \text{Im}$ (2016 £73m) relating to the re-translation of those hedging instruments was transferred from the hedging reserve to the Consolidated income statement. This was offset by an equal and opposite revaluation to the hedged loan note items so that the net impact on the Consolidated income statement was nil

The translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations, as well as from the translation of liabilities that hedge the Group's net investment in foreign operations (net of tax). During the year £42m (2016 £nil) of cumulative translation adjustments and £24m (2016 £nil) of cumulative net investment hedging amounts relating to business disposals were recycled to the Consolidated income statement (see note 17)

## Merger reserve

The merger reserve comprises reserves ansing upon the merger between the former Group 4 Falck A/S and the former Group 4 Securitas BV in 2000 and the acquisition of Securicor plc by the Group in 2004. In accordance with Section 612 of the Companies Act. 2006 the £308m premium on ordinary shares issued in the Group's 9.99% share placement in August 2013 was initially recorded in the merger reserve, and has subsequently been transferred to retained earnings

#### Reserve for own shares

An Employee Benefit Trust established by the Group held 4.362,068 shares at 31 December 2017 (2016, 4,844,243 shares) to satisfy the vesting of awards under the performance share plan and performance-related schemes (see note 39). During the year 3,489,049 shares (2016 no shares) were purchased by the trust, and 3.971,224 shares (2016, 1,475,901 shares) were used to satisfy the vesting of awards under the schemes. At 31 December 2017, the cost of shares held by the trust was £12,330,829 (2016-£12,896,107), whilst the market value of these shares was £11,646,722 (2016 £11,383,971). Shares held by the trust are treated as treasury shares, are deducted from equity, do not receive dividends and are excluded from the calculations of earnings per share

#### Distributable reserves

As at 31 December 2017 the parent company of the Group had distributable reserves of £885m (2016-£918m)

2017

20+6

#### 37. Analysis of net debt

A reconciliation of net debt to amounts in the Consolidated statement of financial position is presented below

|  | 2017    | 2016    |
|--|---------|---------|
|  | £m      | £m      |
| Cash and cash equivalents  | 902     | 831     |
| Receivables from customers in respect of cash-processing operations <sup>r</sup>                 | 7       | 10      |
| Net cash and overdrafts included within assets of disposal groups held for sale                  | 8       | 7       |
| Bank overdrafts  | (284)   | (93)    |
| Liabilities to customers in respect of cash-processing operations?                               | (62)    | (83)    |
| Total group cash, cash equivalents and bank overdrafts   | 571     | 672     |
| Investments  | 62      | 64      |
| Net debt (excluding cash and overdrafts) included within assets of disposal groups held for sale | (3)     | 6       |
| Bank loans   | (13)    | (20)    |
| Loan notes   | (2,141) | (2,392) |
| Obligations under tinance leases   | (35)    | (57)    |
| Fair value of loan note derivative financial instruments   | 72      | 57      |
| Net debt   | (1,487) | (1,670) |

a. The 2016 comparatives for cash and cash equivalents and investments have been e-presented - see note 3(a)

An analysis of movements in net debt in the year is presented below

|   | £m      | ۲m      |
|---|---------|---------|
| (Decrease)/increase in cash, cash equivalents and bank overdrafts per Consolidated statement of |         |         |
| cash flow   | (87)    | 197     |
| Sale of investments   | (3)     | (6)     |
| Net decrease in borrowings  | 235     | 1.1     |
| Repayment of finance leases   | 23      | 22      |
| Decrease in net debt resulting from cash flows  | 168     | 224     |
| New finance leases  | (3)     | (7)     |
| Net debt (excluding cash, cash equivalents and bank overdrafts) in disposed entities            | (3)     | 5       |
| Net decrease in net debt before foreign exchange movements                                      | 162     | 222     |
| Exchange differences  | 21      | (110)   |
| Net debt at the beginning of the year   | (1,670) | († 782) |
| Net debt at the end of the year   | (1,487) | (1 670) |

## 38. Operating lease arrangements

## The Group as lessee

As at 31 December 2017, the Group had outstanding commitments under non-cancellable operating leases which fall due as follows

|  |      |      | 2016      |
|--|------|------|-----------|
|  |      | 2017 | Restated* |
|  |      | £m   | £m        |
| Within one year                        |      | 99   | 113       |
| In the second to fifth years inclusive |      | 246  | 288       |
| After five years                       |      | 125  | 124       |
| Total operating lease commitments      | <br> | 470  | 525       |

The Group leases a number of its office properties, vehicles and other operating equipment under operating leases. Property leases are negotiated over an average term of around ten years, at rates reflective of market rentals. Penodic rent reviews take place to bring lease rentals into line with prevailing market conditions. Some, but not all, lease agreements have an option to renew the lease at the end of the lease term. Leased vehicles and other operating equipment are negotiated over an average lease term of four years

b. Included within trade and other receivables

c. Included within trade and other payables

As a consequence of the detailed work carried out to date to assess the impact of IFPS16. Leases effective 1 January 2019, it has been determined that the operating lease commitments reported at 31 December 2016, year understated —he agoing analysis previously reported with £104m payable within one year 4272m payable within two to five years and £110m payable after more than five years

#### Notes to the consolidated financial statements continued

#### 39. Share-based payments

#### Long Term Incentive Plan (LTIP)

Shares allocated under the Group's LTIP are subject to performance conditions and forfeitures, as detailed in the Directors Remuneration report on page 93

Under the Group's LTIP, Relative Total Shareholder Return (a market performance condition) constitutes 30% (2016-30%) of the performance criteria and is measured over three financial years. The Relative Total Shareholder Return is measured against a comparator group of selected relevant companies 25% of this element of the award vests upon the Group's Total Shareholder Return being ranked median against the comparator group. The fair value of the shares awarded which is subject to this market performance condition has therefore been reduced by 75%

## Deferred Bonus Share Plan (DBSP) and Restricted Share Plan (RSP)

Shares allocated under the Group's DBSP and RSP are not subject to further financial performance conditions, but in both cases, are subject to forfeitures, either in part or in full, subject to continued employment, unless a participant is deemed a good leaver by the Remuneration Committee Share awards under the RSP were granted in 2016 for the first time

#### Share-based payment plans information

All three share plans have a three-year vesting period from their dates of grant

The following table shows the movements in the number of shares neld under the share-based payment plans outstanding but not exercisable

|                            | DBSP and RSP<br>2017<br>Number | LTIP<br>2017<br>Number | Total<br>2017<br>Number | DBSP ind RSF<br>2016<br>Number | 1 T  <br>2016<br>Numbe - | Total<br>2016<br>Number |

| Outstanding at 31 December | 2.912,326                      | 15,299,231             | 18,211,557              | 1,518118                       | 20,587,152               | 22,105,270              |

The weighted-average remaining contractual life of conditional share allocations outstanding at 31 December 2017 was 15 months (2016, 17 months). The weighted-average share price at the date of allocation of shares allocated conditionally during the year was 283 lp (2016 185 2p) and the contractual life of all conditional allocations was three years. The weighted-average share once at the date of exercise for the shares exercised during the year was 279 Op (2016, 1963p)

The Consolidated income statement is charged with an estimate for the vesting of shares awarded conditionally and subject to non-market performance conditions. The charge for 2017 was £10m (2016, £13m), out of which £9m (2016, £10m) arose from equity-settled share-based payments. The total carrying amount for the liabilities arising from share-based payment transactions as at 31 December 2017 was £6m (31 December 2016 £6m)

#### 40. Related party transactions

G1S plc (the 'company') is incorporated in the United Kingdom registered in England and Wales, and domiciled in the UK it is a public company. Ilimited by shares. The company's registered office is given on page 2.2. The company's principal activities during the year have been as a holding company

The financial statements are presented in sterling, which is the company's functional currency, and in millions of bounds

#### (b) Statement of compliance

These financial statements were prepared in accordance with Financial Reporting Standard (FRS) 101- Reduced Disclosure Framework

#### (c) Significant accounting policies

#### Basis of preparation

The financial statements have been prepared under the going concern basis and using the historical cost convention, except for the revaluation of certain financial instruments, in accordance with Companies Act 2006 and applicable United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice ("UK GAAP")). The principal accounting policies and measurement. bases adonted are the same as those disclosed in note 3 to the consolidated financial statements, except as noted below, and have been applied consistently to all the years presented, unless stated otherwise judgments made by the directors in the application of these accounting policies which have a significant effection the financial statements, and estimates with a significant risk of material adjustment, have been disclosed in note 4 to the consolidated financial statements

Pages 132 to 200 of the consolidated financial statements contain information on the performance of the Group, its financial position, cash flows, net debt position and porrowing facilities. Further information, including financial risk management policies, exposures to market and credit risk and hedging activities is given in note 31 to the consolidated financial statements, Financial risk! After making enguines, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future, For this reason, the directors consider it appropriate to adopt the going concern basis in preparing the înancial statements

#### Exemptions

in accordance with section 408(3) of the Companies Act 2006, the company is exempt from the requirement to present its own income statement

The company has taken advantage of certain disclosure exemptions in FRS +0+ in part because its financial statements are included in the publicly-available consolidated financial statements of G4S bid

Triese disclosure exemptions relate to

- the requirements of IAS 7 Statement of Cash Hows,
- the statement of compliance with International Financial Reporting Standards adopted by the European Union
- new IFRSs that have been issued but are not vet effective and which have not been applied by the company,
- . comparative information for the movements from the beginning to the end of the year in respect or intangible assets and certain other additional comparative information,
- · Information on the assumptions used in the determination of fair value and recoverable amounts of cash-generating units containing goodwill and management's approach to determining these amounts,
- financial instruments disclosures required by IFRS 7 Financial Instruments Disclosures,
- · disclosures required by IFRS 13 Fain Value Measurement,
- · certain related-party disclosures on key management compensation and transactions entered into between two or more wholly owned members of a Group, and
- · capital management disclosures

#### Investments in subsidiaries

investments in subsidiary unidertakings are stated at cost less provisions for imparment. The accounting policy for imparments is disclosed in note 3(j) to the consolidated financial statements

#### Amounts owed by/to Group undertakings

Amounts owed by to Group undertakings are recognised initially at fair value and are subsequently stated all amortised cost. Finance ir come and expense are recognised in the income statement on an accruals basis using the effective interest method

#### Impairment of financial assets

The company provides for impariments in financial assets when there is objective evidence of impariment as a result of one or more events that impact the estimated future cash flows of the financial assets

#### Share-based payments

The company issues equity-settled share-based payments to certain employees. The fair value of equity settled share-based payments is determined at the date of grant and is either expensed or capitalised as an investment in the relevant subsidiary, with a corresponding increase in equity, on a straight-line basis over the vosting period, based on the company's estimate of the shares that will eventually lest. The amount expensed or capitalised is adjusted over the vesting period for changes in the estimate of the number of shares that will eventually yest, save for changes resulting from any market-related performance conditions

The company also issues cash-settled share-based payments to certain employees, which are recognised as a liability at fair value at the date of grant. The value of the 'lability's re-measured at each reporting date and at the date on which the Lability's settled. The fair value of cash settled share-based payments is expensed in the income statement if it relates to employees of the company and capital sed as an investment in the relevant subsidiary if it relates to employees of a subsidiary company

#### Financial guarantees

The company enters into financial guarantee contracts to guarantee the indeptedness of other companies within the Group line company considers these to be insurance arrangements and accounts for them as such. The company therefore treats such contracts as a contingent liability uniess and until such time as it becomes propable that the company will be required to make a payment under the guarantee

|---|-----------------------------------|----------------------------------|---------------------------------------|---------------------------------------|
| Cross-currency swaps designated as cash-flow hedges | -                                 | -                                | (4)                                   | 7                                     |
| interest rate swaps designated as fair-value hedges | (11)                              | (12)                             |                                       | _                                     |
|   | (11)                              | (12)                             | (4)                                   |                                       |

Derivative financial instruments are stated at fair value, measured using techniques consistent with Level 2 of the valuation hierarchy (inputs other than quoted prices in active markets that are observable for the asset and liability lether directly or incirectly). The source of the market prices is Bioomberg and in addition the third-party relationship counterparty panks. The relevant currency yield curve is used to forecast the floating-rate cash flows anticipated under the instrument, which are discounted back to the reporting date. This value is compared to the original transaction value, giving a fair-value of the instrument at the reporting date

The fair value of derivative financial instruments is calculated using a discounted cash flow approach and using inputs based on observable market data judgment is used to determine the relevant inputs, currency yield curves and discount rates. Although these judgments, estimates and associated assumptions are based on management's best knowledge of current events and circumstances, the actual results may differ

#### Currency risk and cross-currency swaps

The Group conducts business in many currencies. The Group presents its consolidated financial statements in Sterling and as a consequence is subject to foreign exchange risk due to the franslation of the results and net assets of its foreign subsidianes. The company, together with its subsidiary C4S International Finance bid, hedges a substant all portion of the Group's exposure to fluctuations in the translation into Sterling of the Group's overseas net assets by holding loans in foreign currencies and cross-currency swaps. On consolidation, translation adjustments ansing on the translation of foreign currency loans and changes in the fair value of the cross-currency swaps meeting hedge accounting criteria are recognised in equity to match translation adjustments on foreign currency equity investments as they qualify as net-investment hedges However in the company's own financial statements, translation adjustments ansing on the translation of foreign currency loans are recognised in the income statement and are in part nedged by cross-currency swaps

Cross-currency swaps with a nominal value of £25m are outstanding. These swaps were arranged to nedge the foreign currency risk on US\$50m of the second US Private Placement notes issued in July 2008, effectively fixing the Sterling value on this portion of debt at an exchange rate of 1,9750. These swaps will mature in July 2018.

### Notes to the parent company financial statements continued

#### (i) Derivative financial instruments continued

#### Interest-rate risk and interest-rate swaps

Borrowings issued at fixed rates expose the company to fair value interest-rate risk, which the company manages within policy I'm ts approved by the directors "When fixed floating interest-rate debt in the preferred mix is unavailable directly from investors, interest-rate swaps are utilised to create the desired blend in accordance with Treasury policy, with the proportion of fixed interest rate held reducing on a sliding scale over forward periods up to a maximum of five years. The quantity of interest-rate swaps outstanding in the Company is expected to continue to decline as treasury activity is increasingly conducted by G4S international Finance pla

The US Private Placement market is predominantly a fixed-rate market, with investors preferring a fixed-rate return over the life of the loan riotes. At the time of the first issue in March 2007, the Group was comfolitable with the proportion of floating-rate exposure not nedged by interest-rate swaps and therefore rather than take on a higher proportion of fixed-rate debt it arranged fixed-to-floating swaps, effectively converting the fixed coupon on the Private Placement to a floating rate. Following the swaps the resulting average coupon on the US Private Placement is LIBOR + 60bps. These swaps have been documented as fair-value heages of the US Private Placement fixed-interest loan notes, with the movements in their fair value posted to profit and loss at the same time as the movement in the fair value of the nedged item. The swaps with a nominal value of US\$200m matured in 2017 with the remainder of US\$145m maturing in 2019 and US\$105m maturing in 2022.

The interest on the US Private Placement notes issued in july 2008, and on the £350m public notes issued in May 2009, was initially kept at fixed rate in April 2014, the interest rate on £44m of the US Phyate Placement notes issued in July 2008, and on all of the £350m public notes issued in May 2009, was swapped from fixed to floating for a period of three years using derivatives. These swaps matured in 2017

The £350m public notes have a coupon step-up of 1,25%, which is triggered should the credit rating of the hombary fail below investment grade

#### (j) Retirement benefit obligations

The company is the sponsoring company for the Group's UK defined benefit pension scheme to which it provides a guarantee over all payments to be made to the scheme by the operating companies. The following disclosures relate to the UK scheme only and are given because the disclosures in note 32 of the group financial statements refer to the consolidated Croup position and include certain

| At 31 December 2016                     | •                          | 57  | 2                       |                  |                             | 118         |

At 31 December 2017, the company had unutilised tax losses of approximately £271m (2016 £298m) potentially available for offset against future profile. A deferred fax asset of £49m (2016, £58m) has been recognised in respect of approximately £271m (2016, £298m) of gross losses based on expected/forecast profiled by from approved budgets and business plans. The renognition of deferred tax assets on tax losses is predicated on the projected generation of income in the company which should result in the utilisation of the available tax losses within a foreseeable period. This income stream is criven by the current and future global results of the Group in line with diusiness dians. The timing of recognition of the tax losses as a deferred tax asset in 2017 was supported by the improved profit profile of the company, which itself is underbinners by the continuing progress of the Group's transformation strategy to generate future sustainable profitable growth

As at 3. December 2017, the company has rapital lorses available to carry forward of approximately (2-5on (2016-z014bn). These losses have no expiry date and have not been agreed with the relevant tax authorities. No deferred tax assets have been recognised in respect of these losses on the basis that the likelihood of the histories dation is considered to be remote
