Statement by the Chairman

57 Donald Barron DL

Our operations during 1983 took place against a background of tentative signs of recovery from the world-wide recession. By the end of the year, the evidence of an upturn in the world economy had begun to spread from North America to Japan and to some parts of Europe. Here in the UK, for example, the latest reports from our branch management confirm the CBI and other surveys in pointing to some improvement in the general business situation and to an increase in business confidence.

The international debt servicing problem which had dominated the international banking scene during the latter part of 1982, continued during 1983 to demand and receive much attention and, during the course of the year, there was rising confidence that the immediate tactical short-term battles had been won and that some time – but not too much – had been gained in which to resolve the longer term problems.

The Midland Group's own objectives for 1983 were to strengthen our capital ratios, to increase marketing impact, to improve further our cost position and thus to continue the upward trend of profits and earnings.

As the year progressed, it seemed likely that all these objectives would be achieved even allowing for the higher bad and doubtful debt charges we planned to make, particularly in the International Trade Services area which has been badly affected by the recession and high real interest rates. However, in December, the Board or Grocker National Corporation, in

a high we hold a 57% equity interest, decided that they should provide an additional US\$107m principally against possible had debts, making their total provisions for the year US\$ 173m (£120m). Since Crocker's profits are fully consolidated in Midland's accounts, these provisions are, of course, reflected in our results. I shall refer again later to our investment in Crocker.

In the event, therefore, the outcome is a reduction in pre-tax profit of some 10%. This is a disappointing return for a year of hard effort and much achievement in the Group's core businesses, during which we successfully attained our other main objectives.

Financial Results

Trading profit before provisions for possible bad debts was 20% up at £612m against £511m last year; pretax profit was £225m compared with £251m. There were good performances from our major operations in the UK banking, International banking and Treasury divisions with continued improvement in the trend of costs, interest spreads and non-interest earnings. With the exception of Crocker and International Trade Services, all our main subsidiary companies earned higher profits.

In arriving at the pre-tax profit, provisions for bad and doubtful debts amounting to £318m have been charged compared with £196m last year. The division of the 1983 charge was £228m for specific provisions and £90m for general provisions; these figures compare with £162m and £34m respectively in 1982.

The total provisions outstanding at the year end amounted to £673m against £484m at the beginning of the year and, of this, £244m was in general provision. Your Board regards the setting aside of these sums as a proper measure of prudence and caution at this time in view of the inevitable decline in the quality of loans during a time of recession and the continuing high level of real interest rates.

For a variety of reasons - including the non-allowability, for tax purposes, of some of the provisions - the tax charge is somewhat higher this year than in the past two years and this has an effect on basic earnings which are 60.6p per share against 68,9p per share last year (before the exceptional tax credit).

Capital

During the year we have taken steps to strengthen further our capital position. A successful rights issue announced in July raised £155m and following a 'shelf registration' in the United States, US\$150m of Guaranteed Notes were issued there in November, in view of favourable conditions in the Eurobond market in February 1984, we took the opportunity to issue US\$200m of Guaranteed Floating Rate Notes as part of our normal capital management programme.

Our free capital ratio at the year end was 4.6% compared with 4.0% at the end of 1982.

Investment Expenditure

During the year, the Group spent £135m on fixed assets - £78m in the UK and £57m internationally mainly on premises, and computer and telecommunications equipment. Your Board has also approved several large projects which will be completed over a number of years - notably the MIDNET voice and data telecommunication network costing some £12.5m. This exciting development using the latest technology will link together all the Group's operating units in the UK in a way which will make possible improved service to our customers - corporate, personal and international - as well as greater operating efficiency at tower costs.

Midland's Investment in Crocker

The results of Crocker National Corporation since we acquired our 51% holding in 1981 (later increased to 57% on a fully diluted basis) have been disappointing - particularly in the light of Crocker's results in the previous five years which, reflecting the enthusiasm of a new and vigorous

management team and a buoyant Californian economy, showed a continuous upward trend.

The general effects of the world recession and the sharp reversal of California's exceptional growth rate, combined with the specific effects of exponere in real estate and agricultural loans, led to a position in which the total amount of Crocker's nonperforming loans created a strong probability of a depressing effect on earnings for some years ahead. To give the necessary flexibility required to reduce the non-performing loan partfolio, the Crocker Board informed us in December 1983 that they had decided to set aside a special provision of US\$107m out of 1983 profits making a total provision for the year of US\$173m (£120m). As a result, Crocker reported a loss before tax of US\$20m in 1983.

We have concluded that, in future, Midland should play a more direct part in Crocker's operations and it has been decided that the 'maximum operational autonomy' given to Crocker management under the 1980 Investment Agreement is no longer appropriate. Mr. John Harris, one of our Executive Directors, has taken up residence in San Francisco; he has been appointed Senior Vice Chairman of Crocker and will be fully involved in their decision taking processes.

Our investment in Crocker was made as part of a long-term strategic development to broaden our international base. The events of recent months do not alter our view of the correctness of that strategy or our confidence that Crocker will in due course prove a sound and necessary investment.

Ine World Economic Scene

A major feature of the year has been the remarkable strength of the US dollar accompanied by relatively stable foreign exchange markets in other currencies. After the March re-alignment, the European Monetary System succeeded in maintaining a fair degree of stability between the member currencies; and sterling, after passing through a period of uncertainty before the election, ended the year with its trade-weighted value

down by less than 2%. In general terms, progress has been made throughout the developed economics in controlling inflation; it is essential that further expansion is achieved without the re-emergence of inflationary pressures and a consequential tightening of credit conditions. This is especially important in the United States which is the major influence on world interest rates, but conveyn remains over the size of the 1)5 budg it deficit and its effect on credit markets.

Within the United Kingdom, the annual rate of inflation for retail prices at the end of 1983 yas about 5%; broadly the same as at the start of the year. This was encouraging in the light of the increase in the level of economic activity recorded during the year-which now turns out to be higher than originally suggested. Recovery was also aided by a reduction in the cost of borrowing as the banks' base rates fell by two percentage points between March and October. The substantial increase in consumer spending-especially on durables financed by borrowing-did not, however, lead to a commensurate expansion of domestic output or to any substantial increase in stock building.

The strength of the recovery, and its power to bring about any decline in the level of unemployment, will depend on British producers being able to gain a greater share of the demand both from domesti; and overseas sources. It may be that the conditions for this are being re-established as a result of the recovery in business profits which continued and, indeed, accelerated last year assisted by relatively rapid productivity growth and moderate pay settlements. The importance of a healthy level of profits and its directly encouraging effects on new investment, new product development and marketing initiatives cannot be overstated.

The International Debt Problem

It was fitting that 1983 should end with formal approval of a substantial increase in the quotas for the International Monetary Fund (IMF) and of other parallel supportive measures. Great credit is due to the IMF for devising an effective formula both to contain the international debt problem in the short term, and to lay the foundation for recovery. The main elements of the formula involved bridging loans from official sources, agreement with the debtor country on a formal economic adjustment.

Programme, rescheduling of maturing debt and the provision of new finance to support the economic adjustment.

Nevertheless, it was the commercial banking sector which provided the larger share of new funds, as well as bearing the main burden of rescheduling. The new money has been described as 'involuntary lending' since each IMF programme was conditional upon its provision. But that description underplays the role of the banks, including Midland, which have accepted the need for a disciplined and co-operative approach to the complex solution of this global problem.

If the emergency measures of 1983 are to lead to a lasting improvement, further progress will need to be made along the following lines. First, an improvement must be secured in the trading positions of the debtor countries whose export trading activities have been curtailed by the recession and by the steps taken to achieve economic adjustment. Second, to assist in this improvement, the trade policy commitments made by the leaders of the major developed countries at the Williamsburg Summit in the Spring of 1983 will need to be put into practice; the rising trend of protectionism must be stemmed and, ultimately, reversed. The third requirement is that financial flows to debtor countries should remain at adequate levels. The banks clearly have an important role to play here, along with the international financial agencies. However, developing countries could improve their longer term prospects by giving greater encouragement to direct investment and to its associated and equally important flow of 'know-how'; this would be a positive step towards a more integrated and stable world

Whilst it is important that answers are found in the short term to

one york seems deep important that activ now to the way in t is developed in the i Without that forwar term palliatives will right climate for fin inverment confiden growth in the world Context, an encourag was the publication Towards a New Br which had been con Commonwealth Fin The proposals in this Report are now being is to be hoped that J will result.

Directors and Seni

problems as they arise, it is equally important that active thought is given now to the way in which the system is developed in the medium term. Without that forward thinking, shortterm palliatives will not create the right climate for financial stability, investment confidence and sustainable growth in the world economy. In this context, an encouraging event of 1983 was the publication of the Report, "Towards a New Bretton Woods", which had been commissioned by Commonwealth Finance Ministers The proposals in this forward looking Report are now being studied and it is to be hoped that positive initiatives will result.

Directors and Senior Management

During the year, there were a number of changes in the membership of your Board which are mentioned in the Report of the Directors, I would like to mention in particular the retirement of Lord Watkinson in July and to record, with sadness, the death of Sir John Hunter in December last. Lord Watkinson had been a Director of the Bank for 19 years and served as a Deputy Chairman from 1969 to 1976. He brought to our Board the wisdom and experience of a distinguished career in Parliament and Government and of many years in business. Sir John made a valuable contribution to our boardroom discussions backed by his wide commercial experience, particularly in the industries of the North-East of England where the Bank has a strong customer base.

Since the turn of the year, we have elected to the Board Sir Derrick Holden-Brown, who is Chairman and Chief Executive of Allied-Lyons PLC. Further changes in the Directorate are to take place at the Annual General Meeting at which Sir Reay Geddes, Dame Rosemary Murray and Mr. Thomas R. Wilcox will not be standing for re-election. Sir Reay bas been on the Board for 17 years, the last six of which he has been a Deputy Chairman. He has given the Bank outstanding service and we are grateful to him for his many contributions. Dame Rosemary has given close attention to the affairs of the Bank during her six year term of office and we thank he! for her wise counsel, I paid reibute to Tom Wilcox in my lat Report on his retirement from the Chairmanship of Crocker National Corporation in September 1982; his decision to retire from the Board of Midland Early in line with the conclusion of his agreed term of service with Crocker. The Board has appointed Sir Patrick Meaney as a Deputy Chairman; Sir Patrick has been a Director of the Bank since 1980.

1983 was a year of considerable change in the ranks of the senior management of the Bank. At Chief Executive level, Mr. Michael Julien was appointed Group Finance Director and Mr. Brian Goldthorpe a Director and Chief Executive (Group Risk Management) following the retirement from the Board of Mr. Dennis Kitching who had given great service to the Bank over 42 years.

Mr. Ernst Brutsche, a partner in our German subsidiary, Trinkaus und Burkhardt, assumed responsibility for our Group Treasury operations based in London and, in February 1984, Mr. Hervé de Carm y succeeded Mr. John Harris as Chief Executive, International Banking.

Four senior members of our General Management team, Mr. Alan Knights, Mr. Dennis Gladwell, Mr. Ken Cox and Mr. George Barrett also retired during 1983. Each of them had devoted the whole of their working lives to the service of the Bank and I record our gratitude to them for their respective contributions to our development. Mr. John Bennett and Mr. Robert Wyatt have been appointed General Managers.

The Staff of the Group

The staff of the Group, nationally and internationally, have again shown a firm commitment to the tasks they faced in 1983 and to the challenges of making plans for 1984.

They have demonstrated their enthusiasm for innovation and for the new technology which is a feature of today's banking environment and which adds a new dimension to their long traditions of service to the consumer.

I am sure shareholders and customers (many of whom write to me commenting favourably on the service they receive) will wish to Join the Board in thanking them for their considerable efforts in a difficult year.

Outlook

Around the world, the banking industry is in a state of rapid change. It is easy to assume that this is a direct consequence of the pace of new developments in electronics and telecommunications and, while this is partly so, it is important to recognise that significant changes in attitudes underlie many of the developments now taking place. For example, the very positive attempts to seek out the requirements of the rustomer—whether personal, corporate or multinational—are evidence of a new marketing orientation.

As a major international bank, Midland welcomes this new environment; during the year a detailed and extensive survey of consumer needs was carried out and is being used in the development of new products and marketing approaches. The Review in the following pages gives details of the new services and products we have introduced and of the attention we are giving to the continuing programme of improvement of our operating systems and equipment and to the training of Midland Bank people.

At a strategic level, we continue to keep firmly in our sights our main objectives of profitably employing our assets, of controlling costs and of giving the highest level of service to our customers around the world. This involves building on the strengths of the Group and of directing the necessary resources, both management and capital, to the areas where additional support is required. The changes we have made, and will continue to make, in the organisation, management and direction of the Group are all designed to ensure that the upward trend of profitability and earnings will be resumed in 1984 and that our main objectives will be achieved.

Review of group operations by the Croup Chief Executive

Geoffrey W. Taylor

In a year when so much real progress has been made, it is disappointing to have to record a fall in the Group's pre-tax profits. Trading profit before bad and doubtful debts increased by 20% to £612m in 1983. This was achieved despite a reduction in average base rate of more than 2%, with increased interest spreads leading to a 6% growth in net interest income. Excluding profits on the sale of investments, non-interest income frew strongly, increasing by 23% over 1952.

In addition to these encouraging ancome trends, measures taken throughout the Group to control costs showed through in the results. The growth in total operating expenses was restricted to 8%, and this is reduced to 5% when adjusted for the effect of exchange rate movements.

Total year-end Group assets increased by 10%, reflecting the way in which we have tried to control balance sheet volumes. At the same time, the Group's capital base was further strengthened during the year, leading to a substantial improvement in the year-end free capital ratio to 4.6% from 4.0% in 1982. This provides us with a firm foundation on which to develop our business in 1984.

1983 - A Year of Consolidation

In 1983, our aim was to bring about a pause in the pace of expansion, which has been so much a feature of the Group, in recent years, to consolidate business and to build a new executive team which would carry the Group through the remainder of the decide and into the 1990s. At the same time, pressure was intensified on the control of costs and more energies were devoted to the development of new services and products. Despute the setback to Group profits caused by the problems in California, I can report that the objectives for the year were largely realised.

A modern banking Group needs a blend of skills which, from time to time, have to be supplemented by other than internally trained staff. During 1983, Group Finance and Group Treasury were strengthened by the arrival of Michael Julien and Ernst Brutsche respectively. A number of other people at senior levels have also joined us.

Brian Goldthorpe moved into a new function - Group Risk Management - through which we will be reviewing lending standards and credit training throughout the Group. The current bad debt experience of all major international banks gives an indication of the rate at which economic change can overtake even the strongest organisations. Taking advantage of modern technology, our goal mur he to develop bankers who are in mep with the market place and who can operate in a complex world where the inter-relationship between assets and liabilities calls for constant watchfulness.

Our customers, whether personal or business, have a range of borrowing and investing options greater than at any time before. This means that Group Treasury must maintain a 24 hour round-the-clock vigil, watching and participating in markets both to protect our liquidity and to ensure that customers receive the service which they are entitled to expect from the Midland Group.

The Elephant Money Box is an integral part of Midland Bank's image as a savings institution. Over 500,000 have been sold.

Readers of this Regort have a wide variety of reasons for 'tking an interest in the Group's activities and performance, Having old you of some of the broad issues which are being given priority I will now refer in more detail to the various businesses within the Group and some of their plans for 1984.

The Group in the UK

England and Wales

In the face of intense competition in the personal savings market in 1983, the Bank has worked hard to coordinate its personal customer savings services by promoting them under the banner 'Midland Savings'. The gaps which remained in our product range were largely filled earlier in 1984 by the new High Interest Cheque Account, so that a truly comprehensive range of savings products is currently offered, showing our commitment to promote the Bank as a savings institution, caring for the personal saver.

In other areas, we have continued to improve our range of financial services to reflect our customers' changing habits and their increasingly sophisticated needs. Notable among these, our decision to join the Uniform Eurocheque scheme has proved very successful with more than 170,000 cards being issued during 1983. We expect to see an increasing use of this scheme, especially by those seeking the additional facilities for eash withdrawal and account payment offered by the Eurocheque system in most European countries. From I June, cardholders will be able to use their Eurocheque cards in cash dispensers in Spain. The service will

Another innovation during 1983 was to link our Personal Loan, Save and Borrow and Budget accounts with an optional protection plan covering sickness, accident and redundancy. This service also proved popular, with approximately one quarter of all new Personal Loan customers taking up the protection plan.

At the same time as the personal sector has been given considerable attention, 1983 has also seen a number of initiatives on the husiness customer front. The establishment of the Business Sector Marketing Unit has co-ordinated the development of services, products and marketing activity to our business customers, A second stage in the streamlining of our presence in this sector, was the introduction of our Business Advisory Service at the end of 1983. This specialised service will be staffed by a number of carefully selected and fully trained Regional Business Advisers.

During 1983 the Bank's Corporate Finance Division experienced some recovery in the profitability and liquidity of many of the major UK based commercial and industrial

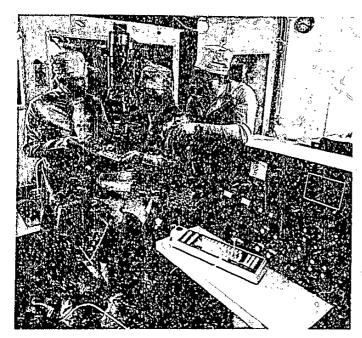

groups, particularly those in the consumer market. While the expected upuage ir, the raising of long-term capital through the bond markets did not materialise, our own medium term lending remained steady and we were again well placed to meet the working capital needs of industry. 1983 was a year marked by many successful rights issues, acquisitions and managemen buy-outs, and the Division played major role in providing appropriate supporting timeserial markets.

Whilst there is now evidence to suggest that the economy is beginning to recover from the recession, some businesses and sectors of the economy continue to experience particular problems. The Bank's resources and wide experience continue to be wide experience continue to be available to assist customers who are in difficulty and, where the businesses concerned are large or the problems particularly complex, the special skills available in our Corporate Pinance Division continue to be used.

The aim of these staff are, wherever possible, to adopt a positive approach to the planned repayment of difficult loans and to liaise closely with the management of the company concerned to seek a mutually acceptable recovery strategy. I am

pleased to report that, once again, a significant proportion of those companies which had faced severe difficulties are now trading successfully as a result of strategic and financial programmes produced in partnership with the Bank.

Within the major corporate sector, our marketing effort has been concentrated on the further development of our cash management, foreign exchange and new improved payment transmission services. We are now capable of meeting the widest needs of the Finance Directors and Treasurers of our major elients and further office automation projects were launched to support our Corporate Finance Directors, These will provide electronic links to member companies of the Midland Group world-wide as well as on-line individual computing capacity.

Midland Bank's Corporate Finance Director for the Electronics Industry, Mr. C. M. Amics (left), discusses Cambridge Instruments' electron beam microlivhography equipment with the Company's Chairman, I.e. T. J. Gooding (centre), and Managing Director, Mr. C. Spal (right).

Midland Bank's experimental Shoppers' Branch in Learnington Spa.

In the UK branch network we have combined new technology with modern office designs in order to experiment with exciting new branch styles. 1983 saw the introduction of our first 'Shoppers' Branch' at Learnington Spa. This represents a significant move away from the traditional bank premises by introducing open plan concepts in a relaxed and friendly environment. These ideas have been well received by our customers and we shall continue to try out other variations on these themes in 1984.

In 1983 we moved further towards completing our plans for branch network reorganisation with the opening of three new Area Offices. This concept, whereby business customers are served by a central management team with particular

specialisations working from an Area Office, is well suited to certain city locations forming natural business districts. Area grouping of management has proved successful particularly in directing, planning and motivating the activities of a group of branches. In 1983, a number of senior branch managers were designated Area Managers and, although they will not have formalised Area Offices from whit's to operate, their role in lessing the activities of a group of branches primarily for business development purposes was officially recognised.

Last year, I reported on the introduction of small computers known as branch controllers. This programme continued in 1983 and the organisation is now beginning to reap the benefits of this and other need

developments

In common v Clearing Banks, been actively an development of Automated Payn which was intro 1984. The introd

developments in branch equipment. This is not only improving staff efficiency, but also our ability to provide better information responses and service to our customers. On the technology front I am also pleased to report that our home banking experiment went 'live' in September and is currently being tested by over 300 customers and 100 members of staff. Further central equipment is in the process of being purchased morder to allow expansion of home banking and the introduction of new facilities.

Our programme to ensure that we have a suitable coverage of automated teller machines (AutoBanks) has continued in 1983 with the installation of further machines. The reciprocal arrangement with National 'Vestminster Bink, which I mentioned in last year's Report, brings the total number of machines accessible by our customers to approximately 2,000 with every indication that it has been well received. Our 'through the wall' AutoBank programme is continuing on target, and 1983 has also seen the preparation of plans for their installation at non-bank locations which will

further improve this popular service. In common with the other UK Clearing Banks, Midland Bank has been actively involved in the development of the Clearing House Automated Payments System, CHAPS, which was introduced on 9 February 1984. The introduction of the system

will improve considerably the same day settlement procedures available to the London banking community. The CHAPS network is complementary to our already extensive automated payments service, available to all customers for the quick and efficient transfer of funds.

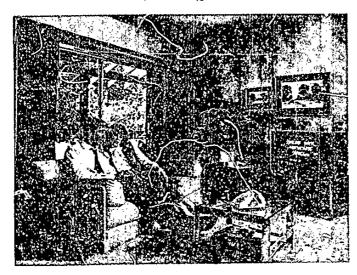

These developments, the continued viability of the domestic retail business, and our commitment to the containment of costs in the areas of personnel and premises, have enabled Midland Cloaring Bank in England and Wales to make impressive progress in 1983.

progress in 1983, With 75 years of successful business, Midland Bank Trust Company continues to offer a wide range of executor, trust, investment and taxation services through its separate branch network of 50 offices in England and Wales, The Company had another highly successful year in 1983 in terms of new business and produced record pre-tax profits in excess of Lom. Total funds now held by this subsidiary on behalf of personal and corporate customers are valued in excess of £10bn, the Company being acknowledged as the leading Corporate Trustee in a number of specialised fields.

As a subsidiary of the Trust Company, Midland Bank Group Unit Trust Managers offers a range of ten unit trusts - now titled Midland Bank Unit Trusts - with funds under management having a value in excess of £100m. This investment vehicle,

Autollank

Home Banking

rous an Acea certain city I business

successful, planning and of a group of iber of renior estimated ough they harea Offices their role in a group of business as officially

on the imputers likers. This is 1983 and the rening to reap pater new well mited for the smaller investor, continues to progress and in 1983 made a worthwhile contribution to Group profits.

Midland Bank Insurance Services has continued to expand the range of insurance and insurance related products that it provides to both personal and corporate customers. The past year has seen this rapidly developing company again producing record figures in terms of new husiness and profitability, the latter being in excess of £5m.

The Midland Bank Industrial Equity Holdings Group of companies offers an extensive range of financial assistance for management buy-outs, new developments and start-up schemes, Currently over £30m is invested in a wide range of companies whose diverse activities include high street retailing, biotechnology and engineering.

The benefits from an equity investment need to be assessed over the long term, but the profit performance of this sub-group involved considerably in 1983 and the excess of the Directors' valuation of the portfolio over the book value showed a marked increase.

By deploying some of our resources in this way we are giving active support to the successful revival of UK industry and the country's economy.

Glydesdale Bank's business encompasses both traditional and modern industries.

Scotland

The recession continues to be felt keensy in Scotland and trading conditions are difficult. However there are notice exclusing developments in the North Sea oil and gas industries, and the micro-electronics sector maintains its steady growth. Clydesdale Bank is well represented in both these fields of activity which encourages some optimism about future prospects, despite, the continued decline in other, predominantly heavy manufacturing industries. Pre-tax profit for the year to December was £18m.

On the banking Front, the progress in introducing electronics and wider automation to a variety of customer services is already showing substantial benefits, Clydesdale Bank's AutoCash Account, which has how a variable to the public for almost two years now, has more than fulfilled all our expectations with its ability to handle routine banking business, Virtually all AutoCash Account transactions are handled electronically through the AutoBank Card and its use in 24 hour cash dispensers and at counter terminals.

Early in 1983 the Counterplus experiment was successfully extended to include a total of 24 BP filling stations in the Glasgew and Aberdermareas. Use of this system of electronic funds transfer at point of sale grows every week as more and more customers recognise the convenience and safety it offers.

Ireland

1983 was another difficult year in Northern Ireland, both politically and economically, but despite this adverse trading environment I am pleased to report that Northern Bank produced a significantly improved performance with pre-tax profits of £10m. In the Republic of Ireland the

in the Republic of Ireland the branch network operates under the most difficult circumstances. Profit potential is hindered by the imposition of a further Government levy of IR £25m on the bank industry, together with the Government's deflationary policies which are greatly curtailing the remand for financial services and support.

This year will see the implementation of computer based accounting in the branch network and, with the agreement on AutoBank reciprocity in Ireland complementing the Midland Bank's links with National Westminster, considerable enhancements to customer service are expected.

Ferward Trust

Record new business volumer for instalment credit and leasing were achieved by our leading finance house subsidiary, Forward Trust Group Limited, in the face of intense competition in the financial services market place.

Although this competition served to place severe pressure on margins, the underlying trading performance improved and Forward Trust Group was once again a significant contributor to Group results with pretax profits of £36m.

Total assets now exceed £1.8bn as Forward Trust Group, in their role as asset finance specialists, continue to demonstrate their expertise in the development and selective marketing of new products and services for personal and corporate customers

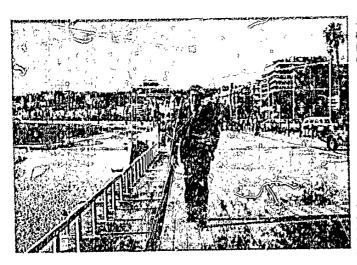

alike.

Griffin Factors Limited recorded further growth in turnover for the provision of 'off balance sheet' current asset finance facilities, and this was reflected in their increased profit outcome.

Although demand for leasing by industry slowed in comparison with the spectacular growth of previous years, Forward Trust Group managed to obtain considerable levels of new business. In particular, the Group's corporate finance division completed several large leasing transactions, which reflect the valuable assistance Forward Trust Group provides to British industry through their ability to aid investment in new capital assets.

The branch network has been rationalised and considerable progress has been made in streamlining operations, with the aim that customers should receive an increasingly efficient service. With the boundaries between competitors becoming less distinct, the challenges facing the finance house industry are demanding, but Forward Trust Group is well positioned to respond.

Forward Trust Group leased plant and machinery to Pirelli General for the manufacture of 270,000 volt cables for the world's biggest underwater power transfer scheme which will link the electricity systems of England and France.

Atidized Bank SA has 15 offices spread throughous France The Manager of the Nice branch, M. Bomunque Labourdene, as soon best on the Prometade des Anglais.

Mr. D. W. King, Managing Director of Associated Midland Group Ltd. In the background, the Sydney skyline includes the Centrepoint Tower, tallen building in the Southern Hemisphere.

The Group World-wide

Group Treasury

The newly established unified Group Treasury has a clear role in the management of liquidity on a Group-wide basis. This task has become even more important with the growing speed, sophistication and integration of international money and financial markets, and the increasing importance of treasury services and activities within the Group's overall strategy.

We have therefore identified the market for foreign exchange and treasury services world-wide, as a target for increased penetration, particularly in the corporate sector of the UK. In pursuit of its vital Group role, Group Treasury is also promoting the development of business opportunities through the Group's network of branches and subsidiaries in overseas financial centres.

International Banking

During the past year we have consolidated and integrated further our International activities with the Midland name now well recognised and our operations strategically posttioned in the major financial centres of the world.

We ow offer a full range of bankir in inancial services in the

Far East through branches and subsidiaries.

In France, where Midland Bank SA is the largest foreign owned private bank, and in Germany we have restructured our operations to focus more directly on future market developments. These same principles have characterised developments in other markets.

Reflecting the continuing need to make the most of our resources, we

The Cre

It is man distance Crocker contribu year. II Crocker with a p were able to reduce our premises requirements in the City of London-110 Cannon Street is now firmly established as the management centre of the Division following the sale of 60 Gracechurch Street, which had been the headquarters of our overseas operations since 1962.

In response to the challenge of world-wide exertonic banking, we have developed a complete payment service, Midland Advisory and Payment Services, MAPS, which will accept and process payment instructions as well 2s providing comprehensive information and advisory packages. The service is based on a unique system which links our own internal networks with the external networks utilited by our banking and corporate customers, both in the UK and world-wide.

The 1983 results of the Group's international trade finance arm, Midland Bank Group International Trade Services (MBGITS), were severely affected by adverse world economic conditions generally, as well as by the specific problems of Latin America

MBGITS embraces insured and uninsured non-recourse trade finance, countertrade and à forfait trade, together with the Group's aerospace, export finance and project finance activities. This product range was enhanced last year by the purchase of what is now Midland Bank (Aval) Erd., which places us amongst the leaders in a forfait financing, with operations based in London, Vienna and Lausanne. We attach great importance to achieving and retaining a prime position in what is recognised as an area of encrmous potential. MBGITS will also provide Midland Bank Group with the capability of offering its customers world-wide a range of specialised trade finance products in support of their sales.

The Crocker Bank

It is naturally a considerable disappointment to have to report that Crocker did not make any contribution to Group profits last year. The loss before taxes reported by Crocker for 1983 was \$20m compared with a profit of \$2m for 1982.

reflecting both the wider problems of the US banking environment, and, in particular, those specific to California and to Crocker.

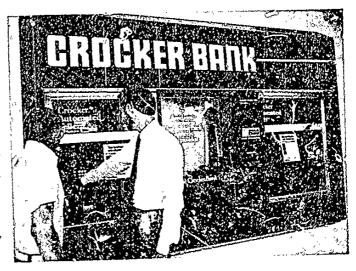

In common with a large part of the United States banking community, the effects of one of the deepest postwar recessions on trajor manufacturing and commercial sectors adversely affected Crocker's interest income and provisions. Added to this, in Crocker's case, was the indirect impact of deregulation of the US financial services market, the very prohibitive costs of carrying a large non-performing loan portfolio and a generally tuw level of corporate loan demand.

Since becoming aware of the full extent of Crocker's problem loans, a number of steps have been taken to ensure that Midland Bank exercises a greater measure of control over its largest overseas investment.

Our acquisition of Crocker was part of a logical process of expanding our overseas representation. Crocker remains the main platform of our North American strategy and many opportunities have been taken on both sides to learn from each other. Joint working parties have been set up in the last year to examine the benefits of synergy in a number of important areas and regular and frequent contact has helped each to reach new levels of understanding.

The steps we have already taken, and are continuing to take, will eithen a Crecker's own attempts to restore profugibility, improve performance and provide a good return on the flank's investment.

market principles neuts in

need to

The then Lord Mayor of London, Sir Anthony Jolliffe GHE DSC, (left) and Mr. J. Staffan Gadd, Chahman and Chief Executive of Samuel Montagu, at the signing ceremony for the Kingdom of Sweden sterling credit.

Samuel Montagu

The Samuel Montagu merchant banking group, of which we own 60% with the remaining 40% being owned by ATNA Life and Casualty Co, has continued to expand its operations.

During the course of the year, the company established representative offices in New York, San Francisco, and Tokyo and an SEQ registered broker/dealer company (Samuel Montagu Inc.) in New York, It disposed of its shareholding in Capel Court Carperation in Australia and, in a joint venture with Dominguez & Barry Partners, a leading Australian Issuing House, formed a new Australian merchant bank, Dominguez Barry Samuel Montagu Limited.

In Kenya, together with the Aga Khan, Samuel Montagu made an investment in Diamond Trust of Kenya, a long established finance house, to develop this into a fully fledged merchant bank. Another important move saw Samuel Montagu acquire the share capital of Galbraith Wrightson Shipping Limited, a leading firm of ship-brokers, from Stewart Wrightson plc.

During October 1983, the Samuel Montagu Group arranged the largest ever sterling credit of £500 million for 12 Kingdom of Sweden, and in

ats second full year as a manager of assure in the international capital markets, Samuel Minnagu lias achieved a position in the top exemy of banks worldwide.

Thomas Cook

Allough the travellers cheque market became increasingly competitive during 1983 and airline problems continued to affect adversely the travel industry, the Thomas Cook Group was well placed to take advantage of the opportunities hist existed due to the action taken to restructure the business over the last two years. The trading profit of £12m represented a significant contribution to Group profits,

Thomas Cook continued to develop its travellers cheque operations both through its partnership with a number of the major European Banks in Euro Travellers Cheque International (ETCI) and through its more recent membership of Mastercard. Thomas Cook significantly increased its share of the European travellers cheque market during 1983 and the newly launched Thomas Cook/Mastercard dollar travellers cheque range should further increase the acceptability of the Thomas Cook product - particularly in the important North American market.

Thomas Cook travellers cheques are available in a range of currencies and are widely accepted.

Increasing advantage is being taken of latest methods and technologies both to improve the transmission of travellers cheque data world-wide and to provide the traveller with the latest available information through viewdata facilities.

Competition in the airline industry and amongst UK tour operators will inevitably impact on travel revenues in 1984, whilst it is anticipated that competition will remain intense in the travellers cheque market. Nevertheless, Thomas Cook has made an encouraging start in the current imancial pear and continues to consolutate its position.

Staff

During the year, we have introduced a revised management training programme which will bring career development and training into sharper focus, and from an earlier career point than has been the custom in the past Some 3,500 of our existing cle ical staff have been selected for this programme during the past year, in addition to those recruited into the Bank as part of the programme.

We also continue to seek improved methods of developing and training more senior staff to prepare them for succession to the most senior executive appointments in future years.

During the year, the Government introduced us Youth Framing Scheme. We are pleased to be associated with the scheme under

which we are giving work experience to young people in a number of our branches. In offering places on the scheme, we are applying the same policy of equal opportunities that is in practice throughout the Group.

The pace of change continues with the introduction of technology into the workplace. I should like to place on recard my thanks to all our staff for their continued loyalty, enthusiasm and re-kness to accept change.

Report of the Directors

Profits and appropriations The profit of the Group attributable to members of Midland Bank ple, as shown in the consolidated profit and loss account on page 23 amounted to		Àmillions
This has been dealt with as follows	,	
First interim dividend of 11.0p per share paid 7 November 1983) 25	
Second Interim dividend of 14.5p per share payable 5 April 1984	33	
<u> </u>	· · · · · · · · · · · · · · · · · · ·	58
Retained profit transferred to reserves	1	56
· · · · · · · · · · · · · · · · · · ·	`	114

The Directors have declared a second interim dividend in respect of the year ended 31 December 1983 instead of recommending a final dividend at the annual general meeting. The interim dividends total 25.5p per share, the same as for 1982,

Group Activities

The Bank and its subsidiaries, operating through branches in the British Isles and in other parts of the world, provide a comprehensive range of banking, financial and talatad services.

The Chairman's statement and the Group Chief Executive's review of Group operations on pages 3 to 15 contain a review of the business of the Group during 1983, of recent events and of likely future developments. Resolution No. 8 to be proposed at the forthcoming annual general meeting seeks to authorise Directors for up to one year to allot shares for cash up to £13,250,000 in nominal amount of capital (being 5% of the current authorised share capital/of the Bank) without first having to offer any of them to shareholders in proportion to their existing holdings.

The Directors are not aware of any person having an interest in 5% or more of the Bank's issued share capital

Share Capital

The conversion rights attached to the 7½% Subordinated Unsecured Loan Stock 1983/93 were exercisable as at 31 May 1983 for the last time. Holders of £53,614,211 of the stock exercised their rights to convert their stock studin exchange received 11,258,984 shares of £1 each, fully paid, ranking pari, passu in all respects with the shares already in issue.

During 1983, 546,747 shares of £1 each were appropriated to the staff under the profit sharing scheme at £3.943 per share and 244,912 shares were issued in respect of the exercise of options under the share option schemes at prices ranging from £2.6752 per share to £4.0080 per share.

A rights issue of 45,730,146 new shares of fol each was made to shareholders at 350p per share in the proportion of one new share for every four shares held on 15 August 1983, following the approval of shareholders at an extraordinary general meeting on that date.

Loan Capital

An issue of US \$150 million 12,% Guaranteed Notes due November 2003 was made in November 2993 at 99½% by Midland American Capital Corporation, the Bank's US finance company subsidiary, and is guaranteed by the Rank on a subordinated basis. The net proceeds of this issue are being employed in the development of the business of the Midland Bank Group. This issue followed the registration of US \$400 million of debt securities in October 1983 with the United States Securities and Exchange Commission.

At issue of US \$200 million Guar inteed Floating Rate Notes 1999 was made in Merch 1984 at 100% by Midland International Financial Services BV, a wholly owned Dutch subsidiary of the Bank, and is guaranteed by the Bank on a subordinated basis as to payment of principal and interest. The net proceeds of the issue will be employed for the conduct of the international business of the Group.

Directorate

It is with regret that the Directors record the death of Sir John Huwer in December 1983, Sir John had been a Director of the Bank since 1968.

The Rt Hon Lord Watkinson and Mr Dennis W. C. Kitching retired from the Board in July 1983 and September 1983 respectively. Sir Reay Geddes, a Deputy Chairman, Dame Rocemary Murray and Mr Thomas R. Wilcox will retire from the board at the forthcoming annual general meeting but will not be offering themselves for reappointment. Sir Patrick Meaney has been appointed a Deputy Chairman as from the annual general meeting.

Mr Michael P. Julien Joined the Board in May 1983, and was appointed Group Finance Director in July 1983, Mr Brian L. Goldthorpe was appointed a Director and Chief Executive (Group Risk Manager, ent) in October 1983, Sir Derrick Holden-Brown was appointed a Director in March 1984.

Sir Kenneth Corfield, Mr Goldthorpe, Sir Derrick Holden-Brown, Mr Julien and Sir Patrick Meaney will retire at the annual general meeting and they offer themselves for reappointment. Mr Goldthorpe and Mr Julien have service contracts with the Bank which can be terminated by the Bank on not less than two years' notice and by the director concerned on six months' notice.

Mr John G. Harris war appointed Senior Vice Chairman and Direct of Crocker National Corporation and Crocker National, ank in February 1984. Previously he was Chief Executive (International) of Midland Bank.

The names of the present Directors of the Bank are shown on page 16.

The Directors' interests (as defined in the Companies Act 1967) in the shares and loan stocks of the Bank and its subsidiaries are set out in the table on page 21.

Employee Communication and Involvement

The Bank has a long, stablished system of written communication from management to all employees through daily circulars. This system is supported by other communications which include a monthly group newspaper, a special edition of which is issued on the publication of the annual results, and an annual report on the pension scheme.

During 1983, video facilities have been made available and this medium is being used for training, product information and general communication purposes.

A formalised system of regular two-way communication meetings between managers and staff has been evolving over the last four years. This includes an annual Bank conference, attended by all levels of staff, which is used for the exchange of views on current issues. A conference bulletin reporting the proceedings is available to all staff. There has been growing informal involvement of staff at local level as managers seek their

the organisation. This fuscion for the overall benefit of failer to communication for the overall benefit of each to the suspingorie of biggers of persons.

During the entern year toward comparational which wall can be involved in influencing operational which was the content of the property of the

Consultative arrangements exist between the Rink and its two trade unions. Discussions are held on the implications for employees which may erise from the adoption or development of new or revised business practices, the introduction of new technology and changed trading and economic circumstances.

The Bank has an established profit sharing scheme, under which employees have the option of selecting shares or cash. There is also a cavings related share option scheme.

Towards the end of 1983 the Bank commissioned a review of the internal communication arrangements. The findings will be used to examine policy and, where necessary, changes will be implemented to improve communication and involvement practices.

Employee Share Schemes

The three employee share schemes provide at present that the subscription or exercise prices of the Bank's shares are based on a market price at a time when they could be quoted 'eum' dividend, whereas the shares are appropriated or allotted to participating employees on an 'ex' dividend basis. Resolution No. 9 seeks to correct this anomaly through amendments to the schemes that would result in the amount of the 'net' dividend being deducted from the market price of any shares so quoted 'cum' dividend. The amendments are likely to result in a small increase in the number of shares appropriated or allotted to scheme participants, though the overall limit of 10% of the issued share capital being available to the schemes over a ten year period will be maintained. These proposed amendments have received approval in principle from the Inland Revenue.

Employees

The weekly average number of employees in the Group, excluding those who worked wholly or mainly outside the United Kingdom, and their aggregate remuneration for the year were as follows

	Employees	millions
Midland Bank plc	49,299	400
Other Group Companies	18,638	145
	67,937	345

teoming Store for up 50,000 in trreut test having ion to their

Employment of Disabled Persons

It is the policy of the Bank to promote equality of employment opportunities by giving full and fair consideration to applications from disabled people for vacancies where particular job requirements are considered to be within their ability. When exitting employees become disabled, every effort is made to retain them within the workforce wherever reasonable and practicable. The Bank also endeasoners to provide equal opportunities in the training, promotion and general career development of disabled employees.

Donations

The aggregate amount of money given in the United Kingdom by the Group during the year for charitable purposes was £738,848. In addition, donations amounting to £6,719 were made to the Economic League.

Close Company Provisions

0

Midland Bank ple is not a close company as defined in the Income and Corporation Taxes Act 1970.

Auditors

Ernst & Whitney have informed the Bank of their willingness to continue in office as auditors. A resolution proposing their reappointment and giving authority to the Directors to fix their remuneration will be submitted to the annual general meeting.

Doe year under review no Director had any non-terest in the shares of Midland Bank plc or its subsidiaries, no Director had any beneficial interest in the shares of subsidiaries other than Crocker and no Director had any interest in the loan stocks of Midland Bank ple or its subsidiaries.

Since 31 December 1983 Mr. Brian L. Goldthorpe and Mr. John G. Harris have each purchased 50 Crocker shares and Mr. John B. M. Place has acquired options on a further 7,000 Crocker shares. Mr. Thomas R. Wilcox has exercised his options on 11,607 Crocker shares and his remaining options over Crocker shares have now expired. No other changes in any of the above interests occurred between 31 December 1983 and 7 March 1984.

The principal accounting policies adopted by the Grash Server of below and are considers with those adopted it 1782 with the exception of the treatment of Atialand Bank yie's inventions in associated and subsidiary compania—set, note nobelow. Comparative amounts have been resided where appropriate to correspond with the 1983 presentation.

a Accounting convention The accounts are prepared under the historical conscious modified by the revaluation of freshold and long leavehold

h Basis of consolidation Basts of consolidation. The Group accounts at 31 December 1983 are prepared in accordance with Sections 149A and 152/t of and Schedule BA to the Companies. Act 1948 and deal with the state of affairs and profits of Midland Bank ple and all its subditiaries and the attributable abare of profits and reserves of its associated.

companies.
The Group accounts therefore include the full results, assets and liabilities of those subsidiary companies, such as Crocker National Corporation, in which there exists a unharity interest; such minority interests are shown separately on the consolidated profit and loss account and convolidated balance sheet.

The accounts of certain subridiaries are made up to 30 September or 31 October in order to avoid delay in the resentation of the Group accounts.

e Basis of allocation between Domestic and International business for the purposes of these accounts. The business domiciled in the UK are allocated between Domestic and International sectors in accordance with internal management responsibilities. This allocation primarily reflects whether the majority of the business is recorded in sterling or another currency. The International business is further divided into four major geographical areas based on the domicile of the office in which the assets, liabilities, income and expenditure are recorded.

d Bad debts

ij

Bad debts

Specific and general provisions for had and doubtful debts are

based on the year-end appraised of advances. The specific element

relates to identified risk advances; the general element relates to

other bank advances where possible risks are anticipated. The

other bank advances where possible risks are anticipated. The charge in the profit and loss account accordingly represents the increase in provisions less recoveries for the year.

In Group companies other than Crocker, interest on bad and doubtful log is continues to be charged to the customer's account and credite, to interest income where insolvency law permits, although in most instances a corresponding specific provision is made. When it becomes apparent that recovery is unlikely, interest ceases to be accrued and the outstanding debt is written off.

off.

In the case of Crocker, whose policies are in accordance with the US Comptroller of the Currency's rulings, loans are placed on non-accrual status when principal or interest is overe as for 90 days or more, except for consumer instalment loans, property loans secured by re-idential properties and loans that are well secured and in the process of collection. From the time a loan is placed on non-accrual status, interest is recorded only when eash is received and any interest income previously accrued but not collected is reversed. Consumer instalment loans 120 days overdue and not covered by credit life insurance and credit card loans 180 days overdue are written off monthly and any uncollected interest is reversed. uncollected interest is reversed.

Instalment finance Income from fixed rate instalment finance business, after making a deduction for certain expenses, is credited to profit and loss account in proportion to the reducing balance outstanding. These balances are stated in the bilance sheet after deduction of uncarned charges and interest.

f Leased assets

Leased assets Income from leasing contracts, other than those with major recourse or similar agreements, is credited to profit and loss account in proportion to the funds invested.

Where leasing contracts are covered by major recourse of other similar agreements, income is released in such a way that the book amount of the asset is consistent with the contractual

Depreciation of premises and equipment freehold and long translad (100 years and over macepred) buildings are depreciated on the uraght-line basis over their estimated unful lives at rates ranging from 1851 to 50st other leasehold land and buildings are written off on the straight-line basis over 50 years, or the period of the lease whichever at the shorter. Obsolescence of buildings as charged to prefit at at artists. Furniture, fittings and equipment are depreciated on the straight-line basis over their estimated useful lives at rates ranging from 5% to 50%.

Dealing atters. Where assets are acquired with the intention of resching them in the short term at a profit, they are stated in the balayse sheet at market value in the case of bills and bullian other this; gold, and at the lower of cost and market value in the case of certificates of deposit, investments and properties.

Fixed Interest investments with fixed redemption dates have been purchased for the long term at a premium or discount, these premiums and discounts are amortised through the profit and loss account over the period (45) date of purchase to date of maturity. If the date of maturity is at the borrower's option within a specified range of years, the anaturity date which gives the more conservative result is adopted. These investments are included in the balance sheet at amortised cost.

Profits and losses on the realisation of these investments are dealt with in the profit and loss account as they arise.

J Retirement benefits

Retirement benefits
Annual contributions are made to pension schemes on the advice of actuaries for funding of retirement benefits and these are charged to profit and loss account as meurical in the case of certain overseas subsidiaries, retirement benefits are funded to as to conform with local law and practice.

k Tayation

Taxation
The charge for taxation is based on the profit for the year and takes into account deferred taxation on all timing differences apart from those ecusidered likely to continue in the future. The Directors consider it prudent to make provision for a proportion of the deferred taxation liability in respect of 'rasing business on account of the uncertainties surrounding future taxation liability.

The deferred taxation shown in the balance sheet is carculated by the liability method using the current rate of corporation tax and takes into account recoverable advance corporation tax.

1 Currency translation
Assets and liabilities of UK resident companies maintained in foreign currencies, including favestments in associated companies and trade investments financed by loans in foreign currencies and commitments for lutture purchases or sales, are translated into sterling at the exchange rates ruling at the balance sheet dates of those companies and any difference is taken to the profit and loss account.

The accounts of overses subsidiaries and associated companies

are translated into sterling at the rates ruling at their balance sheet dates and the consequential adjustments to the opening balances are dealt with through reserves.

m Premium on acquisition of shares in associated and Premiums and discounts on acquisition of shares in associated and subsidiary companies are written off to reserves in the year

Investments in associated and subsidiary companies Midland Bank ple's investments in associated and subsidiary companies are stated at its share of their net tangible assets. Previously, such investments were stated in its balance sheet at cost less provisions or amounts written off. The adjustment to Midland Bank ple's reserves at 31 December 1982 resulting from this change in policy has been dealt with as a prior year adjustated.

Notes on the Accounts-continued

2 Tuende er

The two second die Group as a whole is not shown as it results mainly its in the pusiners of banking. Non-banking turnover consists of commissions on travel arrangements and sales in respect of long operations amounting to £215m (1983 £201m).

3,125 4,266

14 4,280 Pensions for employees of Midland Bank ple and certain wholly-owned UK subsidiaries are paid from a separate Trust Fund set up under the Midland Bank Pension Scheme. The annual charge to income represents payments by participating companies to the Trust Fund, determined on an actuarial basis, designed to build up reserves for each full-time employee during the employee's working life to pay the employee or dependants a pension after retirement. Such pensions are based on pensionable salary (i.e. excluding overtime, bonuses, etc.) and are determined by the length of service of the employee and his final salary upon retirement. Pensions payable are limited to a maximum of two-thirds of final salary for employees with 40 years' service or more. Staff do not make contributions for basic pensions but may make voluntary contributions to purchase additional benefit where less than 40 years' service will have been completed by normal retirement age.

The pension funds of Clydesdale Bank PLC and Northern Bank Limited and certain other UK subsidiaries are similarly constituted. Overseas subsidiaries make provisions for pensions in accordance with local law or practice.

An actuarial valuation is carried out on the Midland Bank Trust Fund triennially to determine the payments to be made to the Pension Fund. In determining these payments, account is taken of estimated increases in salaries and pensions as well as anticipated increases in the income of the Pension Fund. At 31 December 1981, the date of the last actuarial valuation, the actuaries confirmed that the liabilities of the Midland Bank Pension Scheme based on curtent salary levels and service to date were fully funded.

Holders of £54m 74% Convertible Supordinated Unsecured Loan Stock 1983/93 exercised their right to convert their holdings into 11m Midland Bank ple shares on 31 May 1983 on the basic of 21 shares for each £100 of loan stock held. The balance cone stock outstanding is redeemable at par on 31 December 1993 with provision for earlier repayment.

The Guaranteed Floating Rate Notes 1992 are convertible at the option of the holders thereof on 30 June and 31 December in 1984 and 1985 into an equivalent principal amount of 9½% Guaranteed, Bonds 1992.

The Guaranteed Floating Rate Notes 1994 may be redeemed at the option of the holders thereof on the interest payment date in July 1989. Options to redeem may be surrendered for consideration on the interest payment dates in January and July in any of the years 1984 to 1988 inclusive.

All other loan capital is repayable at par on redemption but in some cases with premium for earlier repayment.

The interest rates on the floating rate notes are related to LIBOR and at 31 December 1983 ranged from 10% to 10.8%.

Since 31 December 1983 the Group has issued US \$200m Guaranteed Floating Rate Notes 1999.

Under the terms of the approval given by the Board of Covernors of the Federal Reserve Board dated 25 August 1981 to the Midland Bank ple application to acquire a majority interest in Crocker National Corporation, Midland Bank ple was to divest the travel agency operations of Thomas Cook Inc., a wholly-owned subsidiary of The Thomas Cook Group Limited, or reduce its interest in Thomas Cook Inc. to 5% or less by 15 October 1983. In October 1983 the Federal Reserve Board denied the Bank's application for a riversal of the Board's requirement but extended the time by which the divestment should take place to 15 October 1984.

()

The basis of valuation is open market value for existing use except for certain specialised properties which have been valued at depreciated replacement cost.

The resultant surpluses of £74m for the Group (after minority interests) and £48m for Midland Bank ple have been credited to reserves.

The other leasehold land and buildings have also been reviewed and as a result their existing book amounts have been maintained.

32 Profit sharing

There is a profit sharing plan based upon the profits of the Group. All employees of the Bank, including Executive Directors and UK-staff seconded to overseas operations, and most of its subsidiary companies in the United Kingdom are eligible to participate in this plan. Employees have the option of taking their entitlement by way of an allocation of the Bank's shares (within certain restrictions) or in cash. During 1983, 547,000 shares for a value of £2.2m were issued in respect of the allocations arising from profits in 1982; it is not yet possible to quantify the number of shares which will be issued in 1984 in respect of 1983 profit sharing.

When the employee elects to take up shares, the shares allocated are held by Trustees for a minimum period of two years after which the shares may be transferred to the beneficiary, although if he wishes to obtain full tax advantage these shares should be held for seven years.

Notes on the current cost accounts

Amounts in £ millions

The current cost accounts have been prepared on the basis of bastement of hundred Accounting Processes No. 16, Current Cost Accounting.

Except as varied below, the valuation of assets and liabilities and the recognition of profe or loss have been carried out in the manner described in the historical cost accounts (pages 23 to 45). These current cost accounts should, therefore, be read in conjunction with the historical cost accounts.

- t The adjustment for the maintenance of monetary working capital reflects the effect of price changes on the net monetary working capital (advances and other monetary assets less deposits and other liabilities needed to support the daysto-day operations of the hudness) and has been calculated by reference to the changes in the UK resall price index and appropriate overseas indices.
- 2 The depreciation adjustment is the difference between depreciation charged in the historical cost accounts and the charge based on the value to the business of premises and equipment.
- 3 The gearing adjustment recognises that the operating assets of the histiness are financed in part by borrowing so that only a proportion of the adjustments relating to monetary working capital and depreciation is attributable to shareholders.
- 4 Associated companies have been included at the attributable share of the Directors' estimate of their profits and net tangible assets under current cost accessmiling.

5 Premises and equipment comprise	1983	1982
Land and buildings	933	892
Furniture, littings and equipment	330	294
	1,263	1,186

The current cost of land and buildings is arrived at principally by valuation and of equipment by indexation of the historical cost figures using appropriate indices. 6 Trade inventuries have been included at the valuation described in noise 25 on the humital seat accounts.

To the members of Midland Bank ple

We have examined the accounts of Midland Bank ple, set out on pages 23 to 45, which have been prepared under the historical cost convention modified as explained in note 1a, and the supplementary current cost accounts set out on pages 46 to 48. Our audit has been carried out in accordance with approved auditing standards.

In our opinion the historical cost accounts give a true and fair view of the state of affairs of the company and of the group, so far as concerns members of the company, at 31 December 1983, and of the profit and source and application of funds of the group for the year then ended, and comply with the Companies Acts 1948 to 1981.

In our opinion the supplementary current cost accounts give a true and fair view of the state of the group's affairs at 31 December 1983 and of its results for the year then ended in accordance with the current cost principles described in Statement of Standard Accounting Practice No. 16.

Supplementary financial information

Amounts in Lamillions

In the autumn of 1983 Midland Bank ple filed a prospectus with the US Securities and Exchange Commission in connection with the fancing of loan capital in the US domestic market. The supplementary information which follows accords with the style and Jerman of that prospectus and will be incorporated in the annual report which will be filed with the SEC following the publication of these accounts.

In this report the analysis by principal geographical areas of the Midland Bank Group is between Domestic and International operations. The businesses domiciled in the UK are allocated between Domestic and International sectors in accordance with internal management responsibilities. This allocation primarily reflects whether the majority of the business is recorded in sterling or another currency. The International business is further divided into four major geographical areas based on the domicile of the office in which the assets, liabilities, lineage and expenditure are recorded.

The fluctuations in the value of sterling relative to other currencies have a significant effect upon the sterling amounts of assets, liabilities, income and expenditure in such currencies and consequently on the overall allocation to Domestic and International business,

Interest on subordinated loan capital is allocated between the Domestic and International sectors on the basis of the net assets employed in these sectors, except for the subordinated loan capital of certain subsidiaries which have been attributed to the sectors relating to those subsidiaries. No adjustments to this allocation have been made as a result of the change in the treatment of Midland Bank ple's investments in associated and subsidiary companies referred to in note in on the accounts.

Asset and profit before tax contributions

The asset and profit before tax contributions of the Group's Domestic and International operations over the past four years are set out in the following table

⁽ii) Short-term funds comprise money at call and short notice, short-term certificates of deposit and British Treasury bills and other bills discounted.

⁽iii) Interest earning placings with banks repayable within 30 days (£5,641 mallion for 1983 and £4,577 million for 1982) are included with short-term funds and those repayable beyond 30 days (£6,764 million for 1983 and £6,429 million for 1982) with lendings to customers.

⁽iv) Intersegment balances and transactions between the Domestic and International operations are excluded. The average balance due to the Domestic segment from the International segment for 1983 was £317 million and for 1982 was £179 million. Interest paid by International for those periods was £38 million and £9 million, respectively.

Volume changes are caused by differences in the level of interest carning assets and of interest bearing deposits and borrowings. Rate changes results from differences in yields carned on assets and rates paid on liabilities.

Changes attributation a combination of both volume and rates have been allocated to rates.

Risk elements

The forquities and Exchange Commission requires the disclosure of four risk categories of loans, (i) non-accrual, past due and restructured loans, (ii) potential problem loans, (iii) foreign outstandings and (iv) loan concentrations. The Group's loan control and review procedures do not include the categorisation of loans by these risk elements, it makes provision for bad and doubtful debts in accordance with the accounting policy in note

(1) Non-accrual, past due und restrictured loans and (ii) potantial problem loans

For the purposes of attempting to comply with the requirements of the Commission, the management of the Bank has estimated the amount of loans which, had the Commission's classifications been followed, would have been classified as nonaccural, past due and restructured loans and as potential problem loans. These amounts at 31 December 1983 were £1.3 bn and £0.4 bn, respectively. No adjustment has been made to reflect the fact that a substantial proportion of such lendings is secured.

Management believes that the provision for bad and doubtful debts adequately covers anticipated losses.

(iii) Foreign outstandings

The table below shows the geographical distribution of Group outstandings (amounting to £51 bn at 31 December 1983) comprising lendings to customers, market placings, acceptances and certain other monetary assets.

The breakdown of group outstandings is based on the country of domicile of the borrower or guarantor of ultimate risk.

		Percentage of Group Outstandings
-1	42	%
United Kingdom		46
Europe		14
United States		20
Rest of the World		20
		100

Some 82% of total Group outstandings are in respect of customers in the United Kingdom, Western European countries and North America. Including the developed economies of Japan and Australia, this proportion rises to some 86%.

As shown in the above table, the Group's business is predominantly with countries with developed economies; outstandings to Latin American and Comecon countries account for 8% and under 1% of total outstandings, respectively.

At 31 December 1983 cross border outstandings to countries experiencing liquidity difficulties which individually represented in excess of 1% of total Group assets (including acceptances) were limited to the following

	Outstandings	Percentuge of Total Group Assets
	& billions	75
Brazil	1.3	2.4
Mexico	1.0	1,8
Argentina	0,6	1,1

Outstandings to the above three countries are virtually all in US dollars, and none is denominated in local currencies. Of the aggregate lending to the above three countries, no material amounts have been included in the amounts shown above for non-accrual, past due and restructured loans and potential

In addition, cross border outstandings to the following countries exceeded 0.75% of total Group assets (including acceptances)

.'	Outstandings		Perce Total Gro	ntage of up Assets %
Tanan	1.5	4		2,7
Japan United States	1.4			2.6
Italy	0.9		رامان مهمان	1.7
France	0.6			1,1
Korea	2 0.6			
West Germany	0,6			1,1
Canada	0.5			0.9

(iv) Loan concentrations

Loan concentrations, as defined by the Commission, are considered to exist when there are amounts leaned to a multiple number of borrowers engaged in similarly, writes which would cause them to be similarly impreted by economic or other conditions. There was no loan concentration at 31 December 1983 which exceeded 10% of total lendings.

Crocker National Corporation

Crocker National Corporation* (Crocker), in which Midland's interest is 57% on a fully diluted basis, is one of the larger banks based in California and is the largest subsidiary grouping within the Midland Bank Group.

European Banks' International Company

European Banks' International Company SA (EBIC) is an association of seven major European banks, and Midland is the exclusive UK member. The EaRC partners have established five major international financial enterprises (in some cases with other participants), and the close relationship which has been developed puts the individual national branch networks at the service of the customers of all of the EBIC banks.

The shareholder banks and the Directors who represent them are

Amsterdam-Rotterdam Bank NV R. J. Nelissen; F. Hoogendijk

Banca Commerciale Italiana F. Cingano; E. Braggiotti

Creditanstale-Bankverein H. Androsch, G. N. Schmidt-Chiari

Deutsche Bank AG F. W. Christians; W. Guth

Midland Bank plc G. W. Taylor; J. G. Harris

Société Générale de Banque SA (Belgium) E. de Villegas de Clercamp; P. E. Janssen
