Notes to the Accounts for the period from 19 October 2007 to 31 October 2008

1 Accounting policies

1.1 Basis of preparation of accounts

The accounts are prepared under the historic cost convention and incorporate the results of the principal activity which is described in the director's report and which is continuing.

The company's principal activity is exposed to inherent uncertainties and global market fluctuations beyond the control of the company's management. The company meets its working capital requirements from its day to day activities in this market place and the director considers that the company will continue to operate on this basis and that it is appropriate to prepare the financial statements on the going concern basis. The financial statements do not include any adjustments that would result from a downturn in the market in which it operates.

The company has taken advantage of the exemption in Financial Reporting Standard number 1 from the requirement to produce a cash flow statement on the grounds that it is a small company.

1.2 Turnover

Turnover represents the invoiced value of goods and services supplied by the company, net of value added tax and trade discounts.
