Notes to the Financial Statements

Year ended 31 December 2020

1. General information

The company is a private company limited by shares, registered in England and Wales. The address of the registered office is 168 Birmingham Road, Shenstone Wood End, Lichfield, Staffordshire, WS14 0NX.

2. Statement of compliance

The accounts have been prepared in accordance with the provisions of FRS 102 Section 1A Small Entities. There were no material departures from this standard.

3. Accounting policies

Basis of preparation

The financial statements have been prepared on the historical cost basis. The financial statements are prepared in sterling, which is the functional currency of the entity. The previous financial year end of the company was changed from 31 August 2019 to 31 December 2019 so as to be coterminous with the year end of the holding company. Accordingly the financial statements were prepared for 16 months from 1 September 2018 to 31 December 2019 and as a result, the comparative figures stated in the income statement and statement of changes in equity are not comparable with the current year.

Disclosure exemptions

The entity satisfies the criteria of being a qualifying entity as defined in FRS 102. Its financial statements are consolidated into the financial statements of Piper Homes Plc which can be obtained from 168 Birmingham Road, Shenstone Wood End, Lichfield, Staffordshire, WS14 0NX. As such, advantage has been taken of the following disclosure exemptions available under paragraph 1.12 of FRS 102: (a) Disclosures in respect of each class of share capital have not been presented. (b) No cash flow statement has been presented for the company. (c) Disclosures in respect of financial instruments have not been presented.

Revenue recognition

Turnover is measured at the fair value of the consideration received or receivable and represents amounts receivable for properties sold, stated net of discounts and of Value Added Tax. Revenue from the sale of properties is recognised when the significant risks and rewards of ownership have transferred to the buyer, usually on exchange of contracts, the amount of revenue can be measured reliably, it is probable that the associated economic benefits will flow to the entity, and the costs incurred or to be incurred in respect of the transactions can be measured reliably. Turnover represents the value of properties sold, including estimates of amounts not invoiced. Turnover less payments received are included in debtors as amounts recoverable on construction contracts.

Corporation tax

The taxation expense represents the aggregate amount of current and deferred tax recognised in the reporting period. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, tax is recognised in other comprehensive income or directly in equity, respectively. Current tax is recognised on taxable profit for the current and past periods. Current tax is measured at the amounts of tax expected to pay or recover using the tax rates and laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognised in respect of all timing differences at the reporting date. Unrelieved tax losses and other deferred tax assets are recognised to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date that are expected to apply to the reversal of the timing difference.

Work in progress

Work in progress is valued at the lower of cost and estimated selling price less costs to complete. Costs include all direct expenditure and an appropriate proportion of fixed and variable overheads.

Financial instruments

Basic financial instruments are initially recognised at the transaction price, unless the arrangement constitutes a financing transaction, where it is recognised at the present value of the future payments discounted at a market rate of interest for a similar debt instrument. Debt instruments are subsequently measured at amortised cost. Other financial instruments are subsequently measured at fair value, with any changes recognised in profit or loss. Financial assets that are measured at cost or amortised cost are reviewed for objective evidence of impairment at the end of each reporting date. If there is objective evidence of impairment, an impairment loss is recognised in profit or loss immediately. For all equity instruments regardless of significance, and other financial assets that are individually significant, these are assessed individually for impairment. Other financial assets are either assessed individually or grouped on the basis of similar credit risk characteristics. Any reversals of impairment are recognised in profit or loss immediately, to the extent that the reversal does not result in a carrying amount of the financial asset that exceeds what the carrying amount would have been had the impairment not previously been recognised.
